BUT WHO HAS TIME TO STOP TO KEEP A PIPE LIGHTED?

The National Order of Ancient and Accepted Pipe Smokers has been organized in Georgia with several hundred members and is still growing. They have a motto of, "Tolerance and Peace." Watch their smoke.

CALUMET BUILDING DOINGS

The secretary was in Chicago Thursday giving the situation the once over. He also dropped in to shake hands with the boys at the A. B. C. and the B. & M.

Rufus Danner & Co. was awarded the contract for the new school house at East Chicago. The general contract ran about \$150,000. Heating, plumbing and wiring will bring the total cost to about \$200,000.

Lavin & Scott were awarded the contract to build a three-story brick building for Mr. Grammis on East State Street. There will be two store rooms on the ground floor with apartments above.

The Ford plant across the line is progressing rapidly. The structural steel is about all placed and a large gang of masons and carpenters are at work.

While there does not appear to be any let up in local home building operations some of the larger projects are being held up on account of high prices.

NO NON-EMPLOYMENT**Muncie Building Mechanics Have Lost No Time This Season**

The employment situation in Muncie as it pertains to building trades craftsmen was never better. Practically from the first of the year there has been a steady call upon the services of all men dependent upon building for a livelihood.

In view of the fact that other cities were advancing the wage scales in the face of the heavy demand for labor, Muncie contractors took care of their men, too, in order to prevent inroads upon the local building construction mechanics' supply. This satisfied the men to the effect that there have been no strikes, no stoppages of work, no wage alterations, all of which made building conditions most favorable from the working point of view.

LITTLE FELLOWS ACTIVE**Smaller Cities All Doing Their Bit in a Building Way**

Muncie and her sister cities of like, and even lesser size, are keeping pace with the rest of the big ones proportionately. The building wave that has and is sweeping the state has sent its eddies

into the smaller municipalities and sent local building tides mounting to levels never before attained.

Locally the volume of new building construction work has been exceedingly good this year with each month rolling up figures close to \$200,000. True, there has been some school work and also that of a semi-public nature that has given things a boost and yet at the same time new residential projects have been active in helping making for a perceptible activity.

Word from Lafayette, Kokomo, Logansport and Anderson is in keeping with what has been going on in Muncie, all of which means that these cities in 1923 will contribute several million dollars' worth of new building construction work to Indiana's big total, a performance of which these smaller cities may well be proud.

LOGICAL AT THAT**Chasing Here and There for More Wages Not a Paying Proposition in the End**

Anent the efforts of certain building trades mechanics, always "with an ear to the ground," to learn where more money is being paid on a job, and forthwith dropping everything to rush to some other locality even though it be to some distant city, Old Bill Tubbs, that mythical humorist of the Bulletin of the Associated Building Employers of Michigan, says:

"When I see these building craftsmen wearin' out their sole leather tramping around from job to job and finally get five cents an hour more, it reminds me of a story.

"A fellow was walking up a country road when he happens to see a farmer. The farmer was looking over the fence at some pigs. 'These 'ere pigs were so doggone thin that they'd make a razor-back hog die of humiliashun and this guy what was walkin' along asked this farmer what was the trouble.

"Well," the farmer says, 'it's this way. 'When I put them pigs in this here field and came out to give them meals I used to take a club and pound on the fence and they got used to it and every time they heard any poundin' they came hustlin' over to get their three squares; after a while a woodpecker built a nest over on the other side of this field and he was a husky guy of a woodpecker and by an' by another woodpecker built his nest on this side of the field. He was another strong husky sort of a woodpecker and when one woodpecker wasn't pecking on his tree the other one was and so those pigs thought they had a meal comin' from both sides and kept running back and forth, and, say, look at them, they run every darn bit of meat off of 'em, and about all they got left is their hides.'

"That's about the way it is with these 'ere building fellows. They think because they can get five cents more in one place than they can in another they're going to be better off, when, in fact, they spend more time and money running around than they ever make up in the end."

SPIRIT MARKS QUARTERLY CON-
FERENCE OF STATE A. B. C.'s

Contractors Condemn Competitive Bid-
ding for Labor.

Representative building contracting men from the Indiana cities, assembled at Indianapolis June 6 in attendance at the quarterly conference of the Associated Building Contractors of Indiana went on record condemning competitive bidding among contractors for the services of skilled building trades mechanics in order to cover up labor shortages. The argument advanced was unanimous that such practice did not remedy the labor shortage, that it did not make more mechanics, instead, it only robbed the other fellow of his men if he was not in a position to advance wages, that it advanced construction costs, creating an uncertainty against which the contractor must figure in order to safely estimate, brought about dissatisfaction among the mechanics themselves and was most harmful to the continued activity of building operations.

A resume of the building situation and conditions throughout the territories represented at the conference brought out the information that while wage scales had been slightly advanced such procedure to date had not seemed to meet with the disapproval of the building public. However, it was the general opinion of the men present that any further advance in material prices or any attempt to go out in the field and start competitive bidding for the services of skilled labor would at once seriously retard future building contemplations. The contractors agreed that it was the duty of all members of the Associated Building Contractors of Indiana to frown upon any attempt made by the builder who is inclined, during a construction rush when there is a shortage of labor, to offer advanced hourly wages in order

to hurry his operation through to completion.

The A. B. C.'s of Ind. stand first, last and all the time for methods and practices that will encourage building construction and is for keeping costs down wherever possible playing fair with Labor and the Public as well.

As a means of overcoming the conditions which lead to an acute labor shortage, the contractors again went into a discussion of the apprentice question and the advisability of establishing apprentice schools in connection with the vocational education system in various cities.

At the annual convention of the State A. B. C.'s at Michigan City in January, a resolution was adopted pledging the organization members to taking on as many apprentices as possible. When a report on this matter was called for Wednesday, most of the men present reported that they were employing apprentices. The men were instructed to return home and make a canvass on what progress had been made in the employment of apprentices by local association members and report back to State A. B. C.'s headquarters.

The information gleaned from that which was said at the meeting verified conclusively that building operations in the state are going forward at high speed, indicating a prospect that will make for the largest building construction year in Indiana's history.

Every contractor attending the conference said there were no labor disturbances in the cities they represented. All wage scales have been adjusted, they asserted.

Just before adjournment it was voted to hold the next quarterly conference at South Bend, probably the latter part of September, the date to be arranged later.

Owing to the unavoidable business detention of President F. W. Jungclauss during the early hours of the conference Harry Fenton, Indianapolis, general Counsel for the State A. B. C.'s, acted as chairman while Field Representative J. H. Owens looked after the secretarial duties.

TOO MUCH FURNITURE IN THE
CONTRACTING BUSINESS.

Builders Advised to Get Out and Hustle.

There is too much swivel chair in contracting today, C. C. Pierson, Secretary of the State A. B. C.'s, told the builders at their conference Wednesday. He had listened quite a time to the airing of troubles by the contractors and, when called upon, made the above assertion.

"In this day and age," said Mr. Pierson, "there is too much of a desire for ease and comfort, an inclination to 'let George do it.' I do not refer alone to the contracting business for the evil of the swivel chair has crept into all businesses. We heard much of it during the war period and though that time has passed the evil remains.

"The fellow on the other side of the fence, the Laboring Man, has no swivel chair; he gets out and plugs, works and see where he has got to; he never would have got there had he had a swivel chair.

"Throw away your swivel chairs, I say, and get down to work, the sooner you do the sooner you will solve your problems."

FROM AFAR COMES COMMENDA-
TION

Co-operation Between Indiana Contrac-
tors and Architects Attracts
Attention

A recent issue of The Associated Contractor, Worcester, Mass., the official publication of the Associated Contractors of Massachusetts, has this to say relative to the co-operation that is being exercised between the contractors and architects of Indiana:

"Out in Indiana they have a contractors' paper called the Indiana Construction Recorder, which is the official organ of the Associated Building Contractors of Indiana, and also the official paper of the Indiana Society of Architects. This paper is now five years old. Each issue has a section devoted expressly to each of the above organizations, and the result is that there is a free exchange of ideas and knowledge of activities which is both valuable and interesting.

"Quite recently the two bodies united in introducing in the Legislature a bill for a State Building Law. Needless to say, that with such support the bill passed and is now a law.

"This is a concrete example of the benefits to be derived from organization and co-operation. There are many things here in Massachusetts which deserve the combined attention of the contractors and architects."

We are reprinting the above article that those contractors and architects in Indiana who have worked so earnestly for constructive co-operation between these two important elements of the State Building Industry may know and realize that building men in distant fields appreciate the value of the effort that is being put forth for the advancement of the industry in Indiana, nor do they fail to acknowledge that the institution of such co-operation in their own state would profit them and their industry.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE TO BIDDERS ON PARTS II, III, IV OF THE NEW SERVICE PLANT FOR THE INDIANA STATE SOLDIERS HOME.

Please note the following instructions governing the filing of proposals and the awarding of contracts.

Sealed proposals to the Board of Trustees of the Indiana State Soldiers Home for the furnishing of labor and materials for parts II, III, and IV of the New Service Plant for the Indiana State Soldiers Home in accordance with the plans and specifications prepared by R. W. Noland, consulting engineer, will be received by the Board of Trustees, % Secretary of the Board, Mrs. Caroline B. Morrison, at 422 North 7th Street, Lafayette, Indiana, up to 10 a. m. on the 22nd of June, 1923, at which time the bids will be publicly opened in the Commandants Residence at the Indiana State Soldiers Home.

Three distinct and separate proposals shall be made and three separate contracts for the work will be executed. The three proposals shall be as follows:

PROPOSAL No. 2

This proposal shall include all labor and materials for a complete boiler plant building as shown on the plans and specified in specifications, Part No. II.

PROPOSAL No. 3

This proposal shall include all labor and materials for the complete boiler plant equipment as shown on the plans and specified in specifications, Part No. III.

PROPOSAL No. 4

This proposal shall include all labor and materials for the chimney complete as indicated on the plans and specified in specifications, Part No. IV.

Only bids from firms specializing in the manufacture and erection of radial brick chimneys will be accepted under proposal No. 4.

The trustees reserve the right to reject any and all bids.

A Bidder's Bond for the full amount of bid is to accompany each and every bid.

The successful bidders will each be required to execute a contract on a form provided by the Board of Trustees. Each successful contractor will also be required to furnish satisfactory Surety Company's Bond to the amount of the contract price to secure the fulfillment of the contract.

Plans and specifications relating to any of the above work may be consulted daily at the Commandant's Office at the Indiana State Soldiers Home.

Each application for plans and specifications is to be accompanied by check for fifteen dollars (\$15.00) made payable to the Engineer to insure the return of the plans and specifications to the Engineer.

All communications and references to the above proposals or contracts should be addressed to the undersigned:

ST. MARY'S CATHOLIC SCHOOL. NOTICE TO CONTRACTORS.

Notice is hereby given that the Trustees of Saint Mary's Catholic Parish of Decatur, Ind., will receive sealed bids, at the Saint Mary's Catholic School building in the City of Decatur, Indiana, on Friday, June 22, 1923, up to two o'clock p. m. on said day for the furnishing of all material and performing of all labor necessary to erect and complete a new school building according to the plans and specifications made and furnished for this work by Herman J. Gaul, architect, 228 East Superior St., Chicago, Ill., which plans and specifications are on file with Chas. N. Christen, Decatur, Ind.

Notice is also given that at the same time and place sealed bids will be received for furnishing all material and performing all labor in strict compliance with said plans and specifications for each of the following items separately or for any two or more of said items jointly, to-wit:

Item No. 1—For the erection and construction of said building excluding the heating and ventilating plant, system and apparatus; the plumbing for water and sewerage system; the electric wiring.

Item No. 2—For the installation of the heat-

ing and ventilating plant, system and apparatus.

Item No. 3—For the plumbing, water system and sewerage.

Item No. 4—For the electric wiring.

The right is reserved to reject any or all bids and also to accept bids for the whole of said work or in parts as set out above.

Each bidder shall deposit with his bid a certified check equal to two per cent of his bid, which check shall be made payable to C. S. Niblick, treasurer, as a guarantee that the said bidder will, if awarded the contract, enter into a contract and file a bond equal to his bid, which bond shall meet the approval of the said trustees. Said bond and contract shall be made and filed within ten days after said bidder is notified that he has been awarded the contract.

All communication relative to plans and specifications shall be addressed to Chas. N. Christen, Decatur, Ind.

Estimate cost of building, \$200,000.

TRUSTEES OF ST. MARY'S PARISH,
Decatur, Indiana.

June 2nd-June 9th.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that Metamora School Township, Franklin County, Indiana, by Louis R. Foster, trustee of said township and the Advisory Board thereof, will receive sealed bids at the office of said trustee in the Directors' Room of the Farmers Bank, in the town of Metamora, Metamora Township, Franklin County, Indiana, on

TUESDAY, JUNE 19, 1923,

at 1:00 o'clock P. M. of said day, for the construction of a new joint elementary and high school building at the town of Metamora, in District No. One for the accommodation of all pupils of school age residing in said District No. One, and District No. Three, in said township and for the construction of a new one-roomed school building known as the Elm Grove School in District No. Two in said township, for instruction in the elementary branches of study, and at the same time and place bids will also be received for the installation of the heating and ventilating system for said buildings; the plumbing and sewerage system and the electric work and electric plant, for each of said buildings.

All in accordance with the plans and specifications heretofore adopted and approved by the trustee and advisory board of said township which plans and specifications are now on file in the office of said trustee and in the office of the State Board of Accounts of the State of Indiana.

Said Metamora School Building in District No. One to be a two story structure and the one in District No. Two to be a one-roomed frame building, both with basements. District No. One building to be located on lands now owned by J. C. Gordon, in Section 36 in said township, and District No. Two on lands now owned by C. C. Shakel, in said school district.

The estimated cost of the proposed buildings complete and the purchase of the necessary grounds therefor is \$28700.00. Said bids will be received jointly or separately for the construction of said buildings. All bids must be in writing on forms prescribed by the laws of the State of Indiana, and delivered to said trustee on or before the time mentioned herein. Each bid on the general construction of said Metamora School in District No. One shall be accompanied by a certified check of the bidder in the sum of \$500.00, and for the one-roomed school building in District No. Two, by a certified check of the bidder in the sum of \$300.00, all other bids for heating and ventilating system, plumbing and sewerage system, electric work and electric plant by a certified check of the bidder in the sum of \$200.00, for each item bid on therein.

These certified checks to be held by said trustee as a guarantee of good faith by the bidder and that he will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee and Advisory Board, for the due performance thereof, if his bid be accepted. The checks of the unsuccessful bidders will be returned to them when the contracts are awarded and entered into. Should the successful bidder fail to enter into such contract to execute said bond, he shall forfeit said certified check as liquidated damages for the use and benefit of said township. The plans and specifications may be examined at the office of said trustee or at the office of Karl P. Henkel, Architect, 108-110 Heinemann Bldg., Connersville, Ind. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full provided the same is returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only the sum of \$5.00 only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall endorse or stamp his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said bids or proposals will be considered jointly and severally, and will be let to the lowest responsible bidder, who upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board, for the benefit of any person, firm or corporation, who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of such contractors in the construction of said work. The trustee reserves the right to reject any and all bids.

Dated this 22nd day of May, 1923.

LOUIS R. FOSTER, Trustee Metamora School Township, Franklin County, Indiana.
P. O. Address, Metamora, Ind.
GEO. R. FOSTER, Atty.,
Metamora, Indiana.
May 26, June 2-9, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee of Washington Township and ex officio Trustee of Washington School Township of Delaware County, Indiana, at the office of the Trustee in the Town of Gaston, in said Washington Township, Delaware County, Indiana, in conjunc-

tion with the members of the Advisory Board of said township, up until the hour of 2:30 p. m. on Saturday, June 16, 1923, will receive sealed bids for the erection and construction of a new addition to and the remodeling of a School Building in the Town of Gaston, in School District No. 10, in said Washington Township, Delaware County, Indiana, and being a two-story brick school building and addition to be erected and constructed upon the present site belonging to said School Township, and to be erected and completed according to the plans and specifications now on file in the office of the Trustee of said township and in the office of Charles W. Taylor, Architect, 206 Maxim Building, in the City of Newcastle, Indiana.

Bids will be received for the erection and construction of said work and building complete according to said plans and specifications.

All materials in such old building that is in first-class condition and subject to the approval of the Architect or Superintendent of Construction can be used in the new building as provided in said plans and specifications.

The estimated cost of such construction is approximately \$62,000.00, including new heating, plumbing, lighting, ventilating and drainage systems.

Bids will also be received on a new steam heating, ventilating and plumbing system according to the plans and specifications and shall be received separate from the general contract. Each bid must be sealed and accompanied with a certified check for the sum of 3% of the contract price, payable to the Trustee of Washington School Township, to be held by him as liquidated damages in case the successful bidder fails to enter into contract.

Each contractor will be required to furnish a bond in the amount of his bid conditioned for the faithful performance and execution of his contract and the payment for all work and labor done and performed in and about such work and all materials that may enter into the construction of said building and work, or any part or portion thereof and subject to the approval of said Trustee and Advisory Board of said township. That said bond, if a personal bond, shall be signed by at least one freehold surety resident in the County of Delaware, in the State of Indiana, but a surety bond signed by a Surety Company will be preferable.

Each bid shall be filed on Form Ten as prescribed for bidders by the State Board of Accounts and to be legally sworn to as required by law and each bid and bidder shall in all things comply with the requirement of the law relating to the letting of contracts under the Act of the General Assembly of the State of Indiana entitled "An Act concerning Town and Township Business" approved February 27, 1899, and all acts supplemental thereto and amendatory thereof.

The said work and all of the same is to be done subject to the approval of the Architect and the Township Trustee and also subject to the approval of the State Board of Health.

The right to reject any and all bids is reserved.

The successful bidder will be required to commence and complete the work without delay and under the supervision of the architect, and will be required to enter into a contract in writing according to law.

Dated at Gaston, Ind., May 22, 1923.

HENRY M. LONG,
Trustee of Washington Township, Delaware County, Indiana, and ex officio Trustee of Washington School Township of Delaware County, Indiana.

CLAUD LEACH,
JOHN W. GILMER,
EVERETT E. CLOCK,
Advisory Board.

Francis A. Shaw, Attorney.
May 26, June 1, 9, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that until the 15th day of June, 1923, the undersigned, Jesse F. Phillippi, as Trustee of Eagle Civil and School Townships, Boone County, Indiana, and the Advisory Board of said Eagle Township, will receive sealed bids for the construction and completion of a new two-story and basement, brick, grade school building, and also for the construction and installation of heating and ventilating, plumbing and water supply system therefor, and electric wiring and bell system therefor and therein, for the use of said school township. All in accordance with the plans and specifications heretofore adopted and approved therefor by the said Trustee and Advisory Board, which are on file in the office of said Trustee located on Meridian Street in the Town of Zionsville, said Township, County and State. Copies of said plans and specifications also may be seen at the office of the Indiana State Board of Accounts at the State House in the City of Indianapolis, Indiana, and at the office of The Elmer E. Dunlap Company, the architect, at 1050 North Delaware Street, Indianapolis, Indiana. Bidders desiring duplicate copies of the plans and specifications may obtain same by a deposit of \$25.00 to cover return in good condition of the general construction documents, not later than the day of letting contract.

The estimated cost of the entire work is \$90,000.00.

All bids must be on Form 96 prescribed by the State Board of Accounts and the same will be received at the office of the said Trustee up to two o'clock in the afternoon on said date, at which time and place said bids will be publicly opened and read and the letting of said contract will begin, subject, however, to all rights of said Trustee and said Advisory Board, as provided by law, and as herein set forth.

Bids may be submitted for the general construction of said building and separate bids may be submitted for (1) heating and ventilating, (2) plumbing and water supply, (3) electric wiring and bell system, or any one or all of the same. The contract will be awarded in such manner as to be the best interest of said School Township. Each bid must be accompanied by a certified check for not less than three (3) per cent of the gross bid submitted, payable to said Trustee who shall have the right to cash the check of the successful bidder and the money so obtained by said Trustee shall be retained by him as liquidated damages in event said bidder fails, within ten (10) days after acceptance of his bid, to execute a contract in the form and with the provisions desired by said Trustee and approved by said Advisory Board, covering the construction and completion of said work, and at the same time to deliver to said Trustee a good and sufficient bond, in an amount and with security to be approved by said Trustee, conditioned as required by law.

The right is expressly reserved by said Trustee and said Advisory Board to reject any and all bids and to take reasonable time to investigate both the bids and the qualifications of the bidders.

Dated this 24th day of May, 1923.

CONVENTION OF I. S. OF A. THIS YEAR SHOULD BE AN OCCA- SION FOR JUBILATION.

Actual Accomplishment Has Been At- tained Through Years of Persistent Effort.

Another year has rolled around as the calendar of the Indiana Society of Architects is reckoned and the time is drawing near for the holding of the regular annual meeting of the organization at Indianapolis the fourth Saturday in June, the 23rd, to be exact.

It was some seven years ago that the first authorized meeting of the Society was called at Indianapolis, at which the keynote sounded was for a closer co-operation between the members of the profession in Indiana for the creation of a better professional understanding, the institution of constructive effort along broad lines, not only for the practice of architecture but in harmony with other building interests for the general advancement of the combined building industry of the state.

At that time the ideas advanced, more or less theoretical, seemed rather dreamy and appeared like a big contract to carry through. However, a determined start was made and today practically every constructive move proposed has been carried through to a reality.

The only real failure had to do with the securing of an architects' license law which despite hard work met such strong opposition in the various sessions of the State Legislature that no effort was made lately to put it through. However, the Engineers' License Law, which provided for the inclusion of the architect is now in effect and the majority of the architects have taken advantage of it.

As for other matters of really greater importance the Society has successfully strived to put them into effect.

The first great success was marked by the establishment of a close co-operation between the I. S. of A. and the Associated Building Contractors of Indiana, which has resulted in a better relationship of understanding between the architect and contractor. This condition has developed to the point where joint conferences are indulged in where principles of a constructive nature are concerned.

The best example of this co-operation is the Administrative Building Council of Indiana Law now in effect, and under which a joint organization of State Officials, Architects, Contractors, Engineers and Labor Representatives is now being effected to administer the new law that Indiana may be assured of standard building requirements that will make for better structures. Traced to its source this advanced building regulation law is the result of the co-operative effort that was proposed by the I. S. A. years ago. And the Grand Daddy of it all is none other than Architect E. H. Turnock, Elkhart, past president of the I. S. of A., who made an earnest plea for co-operation between the various building interests along constructive lines. He carried his plea to the A. B. C.'s of Indiana when he spoke at their annual convention in February, 1920, and struck a responsive chord that has held its tone ever since, only becoming more vibrant through the years until accomplishment has been achieved.

This is the biggest thing the Society has done and every architect in Indiana, contractor, engineer and building trades mechanic, to say nothing of the public, will benefit in time through the result of the co-operation that has been effected.

As for the profession itself, through the element of competition that must always rule that development may be the greater, it has been brought closer together and a big, broad, spirit of fellowship has been instituted bereft of the petty spirit, that in years gone by, kept the profession apart. The regional meetings begun in 1922-23 have worked wonders, apparent to every man who has attended those gatherings.

Thus the members of the Society may gather on June 23, convinced that the organization and they have, after years of struggle, really not labored in vain. The point has been reached where every member of the I. S. of A. can be proud of it for it has done things and backed up will continue to achieve not selfishly but in a spirit of the most good for the state profession in its entirety.

The program committee is not quite ready to make an announcement but assurances can be made that every effort will be exerted to make the approaching meeting most attractive to the visiting architects.

ONE RESULT.

Well Known Terre Haute Architect Joins I. S. of A.

The application of J. G. Vrydagh, Terre Haute, for membership into the Indiana Society of Architects was accepted at the Evansville meeting of the Board of Directors.

Mr. Vrydagh has been a practicing architect of Terre Haute for many years, in fact he is the dean of the profession in that city. His entrance into the Society can be traced to the regional meeting that was held there several months ago, his first participation in an affair of the organization. At its conclusion he expressed interest in the aims and efforts of the I. S. of A. and pleasure at the noticeable change of the attitude of the architects toward each other. Now he is a member.

Quite a few new members are the result of these regional meetings which bespeak their advisability.

ADVISES AGAINST CONTINUED PLUNGE.

National Building Construction Author- ity Senses Serious Danger.

Referring to the unprecedented building construction expansion now under way in this country, R. C. Marshall, Jr., general manager of the Associated General Contractors of America, said recently the tendency toward steadily mounting construction costs is a most dangerous procedure and not only threatens the building construction industry but also the other business interests of the country unless the pernicious practice is checked.

He said: "The country is undertaking the enormous expansion of building with a stationary, if not shrinking labor supply on account of the immigration restriction law, and with the material industries of the country practically at the limit of their productive capacity.

"There can be only one outcome of such a situation if it is allowed to persist. The cost of materials and labor will presently rise to prohibitive levels, and our enormous construction program will collapse with a crash."

EVANSVILLE BUILDING SLOWS DOWN.

City Building Inspector Sanguine As to Future Activity.

Though May building permit totals in Evansville were away off when compared with the big figures of April of this year, nevertheless they compared favorably with the totals recorded in previous months.

In May the total estimated valuations for new building construction operations posted at the city building inspector's office amounted to but \$208,000, quite a falling away from the \$969,175 hung up during the month previous.

However, the May volume of building was sufficient to send the total for the five months up over the two million dollar mark, as much as is ordinarily put across in a year in Evansville.

Speaking of the building situation in Evansville, City Inspector Edward Kerth pointed to the slackening up in other cities, especially the larger ones where efforts are being made to readjust conditions to a more favorable basis. He contended that Evansville is greatly in need of an unlimited amount of building and that the present lull is only temporary.

EFFORT PLANNED TO STIMULATE HOME BUILDING.

Loan Scheme Advanced.

With a view to relieving the housing shortage in Evansville and to stimulate home building, a move has been inaugurated to provide for a monthly instalment amortized plan of payment.

The plan is to loan up to 60 per cent of the value of the property at 6 per cent interest. Payment is to be made monthly, allowing 142 months for the full payment of the loan.

The loans are made upon desirably located modern dwellings, arranged for not more than two families, with bath, furnace, water, gas and electric light connection. Instalment loans are not made for more than \$8,000, or where land and buildings together are valued at less than \$2,000.

CHIPS AND SHAVINGS.

George L. Miller, general contractor, has put the Jordan home on Howard street through construction stages rapidly and is now ready to plaster it. He expects to wind up there in the next few weeks.

Three nice jobs under the guidance of Contractor John Nellis are now well on the way to completion. They are a \$22,000 home for E. T. Ploeger on Kentucky Ave., an \$8,000 apartment remodeling for Dr. W. C. Montague, and a modest, modern \$4,000 residence for C. W. Halsey at "Garvinwood."

John Wilkins, who has the contract for remodeling of a residence for Thomas Davis at 112 Monroe St. into a duplex, has started work.

Brick work on the new Saunders Bldg. at 3rd, near Locust St. has been carried to the third floor by C. Kanzler & Son. This same firm has the two \$12,000 Miller residences ready for plaster.

Matt Hallenberger has just about wound up the remodeling of the old Victory Inn Quarters at 121 Main St.

The various projects on which the Scarborough-Davis Co. have the general contract work show marked and rapid progress.

ALL FORT WAYNE BUILDING RECORDS SHATTERED ONCE MORE

May Tops the Two Million Dollar Level

The month of May contributed to Fort Wayne records the greatest building construction month in the city's history, a high level repeatedly sought and almost reached yet never attained till May, 1923, a \$2,000,000 volume of building business for one month.

During the month just past there were 327 permits granted for a grand total estimated valuation of \$2,166,085. The closest approach to these figures was registered in April this year when 383 permits were issued involving an estimated investment of \$1,939,275, thus May came right back with another rec-

ord smashing building performance showing a gain of 11.6 per cent over the previous high record.

The extent of this year's activities can be realized when comparisons are made with the building totals of the corresponding period in 1922 at which time 269 permits were granted carrying an estimated valuation of \$701,285. Hence, there were fifty-eight more permits issued in May, 1923, than in May, 1922, while the gain in valuations amounted to \$1,464,800, or 208.8 per cent.

The largest single permit issued during the month was for the Shrine temple on West Berry street, this amounting to \$600,000. Another large permit, during the month, was for the new Plymouth Congregational church, with the estimate of \$230,000. With the excellent showing made during the past month it is probable that Ft. Wayne will once more step into second place in state building showings for the year to date.

1923 BUILDING SO FAR IN FORT WAYNE EXCEEDS 1922 VOLUME BY A WIDE MARGIN

A comparison between the building activities in Fort Wayne during the first five months of 1923 and the corresponding period the previous year shows quite a gain for 1923. There have been 343 more permits issued since January 1 this year than were recorded over the same period a year ago, while the gain in the money involved is \$4,181,885, or 191.4 per cent.

The figures for the corresponding periods of 1922 and 1923 are:

1923		
Month	Permits	Est. Valuation
January	61	\$ 420,330
February	99	390,885
March	281	1,450,000
April	383	1,939,275
May	327	2,166,085
Total	1151	\$6,366,575

1922		
Month	Permits	Est. Valuation
January	47	\$ 191,035
February	42	136,660
March	180	573,376
April	270	582,335
May	269	701,285
Total	808	\$2,184,690
Permits		
Five Mos., 1923	1151	\$6,366,575
Five Mos., 1922	808	2,184,690
Fain for 1923	343	\$4,181,885

FRANK ADMISSIONS MADE BY CONTRACTORS AT STATE A. B. C.'S. CONFERENCE.

Still a Canker in Building Contracting Ranks.

The quarterly conference of the State A. B. C.'s attracted to Indianapolis, Wednesday, building contractors from a wide range of territory, all of whom displayed a deep interest in the State Association and clearly demonstrated that they were with the organization in its effort to advance the building industry and protect it from forces that might seek to hold it back or bring down on it criticism.

It was admitted by many of those who spoke that contracting still housed within its ranks a certain degree of selfishness that now and then cropped out to cause dissension and trouble. However, it was acknowledged that the association has done much to eradicate this disturbing element and induce a strong co-operative spirit despite the keen spirit of competition that holds the contracting business in its clutches.

The greatest impediment to the progress of a contractors' association it was freely asserted, is that element of contractors and builders who are prone to act as free lances, men who wish to go it alone and forget the mutual business bond that makes all contractors kin. It is this class of men who seek to escape the burden that should be common to all, men who act independently and do as they please regardless of the hardship their actions may cause the other fellow, yet are always willing to take advantage of any favorable situation association effort may bring about.

Every man present Wednesday, acknowledged that the State A. B. C.'s had profited the contractors all over the State in the things it has accomplished, members as well as non-members.

There was a good attendance at the conference these cities' men responding to the roll call: Anderson, Wm. Thompson; Ft. Wayne, E. F. Oelschlauger, Secretary Builders' Exchange, A. T. Wineman, President Carpenters' Association; Gary, E. F. Cramer; Indianapolis, H. A. Fenton, General Counsel; F. W. Junglaus, President; C. C. Pierson, Secretary; J. H. Owens, Field Representative, respectively of the State A. B. C.'s, and Walter W. Wise; Kokomo, E. L. Danner; Lafayette, W. C. Anderson, Bowers Bros., H. P. Bowyer, Jacob Evans, G. C. Goodhart, George Pfommer, M. Mertz; Logansport, L. E. Wickersham; Princeton, Wm. Toelle; South Bend, E. H. Hyman, Secretary, Builders' Exchange; Terre Haute, Guy Brill, F. A. Burget, Secretary, Terre Haute A. B. C.'s, O. A. Toelle.

The conference was held at the State A. B. C.'s headquarters, Third Floor, Peoples' Bank Bldg.

THOUGH INDIANAPOLIS BUILDING IN MAY RAN UP A GOOD VOLUME IT SUFFERS BY COMPARISONS.

Not Up to Previous Standards.

Indianapolis backed up considerably in building construction during the month of May according to the figures issued at the city building inspection department this week.

Comparing the latest building statistics with those of April this year and May a year ago there was quite a falling off in the amount of money involved in the new building construction for which permits were granted in May, 1923. However, despite the decrease the building volume ran almost to \$3,000,000, not a bad total after all.

The May estimated valuations \$2,805,011, were 12.8% less than the same item posted in April, 1923, and 15% behind the valuations recorded in May, 1922.

On the other hand there were 1,809 permits issued in May this year or 48 more than in April, and 11 more than in May a year ago.

Of the permits issued the past month 426 were for new residences estimated to cost \$1,427,530, while only four were for fireproof structures. There was a flood of requests for permission to make alterations and additions, 1,116 permits having been granted for that purpose.

The May figures, according to the official record, are:

Period	Permits	Est. Valuation
May, 1923	1809	\$2,805,011
May, 1922	1798	3,420,847

Totals—Gain - 11 Loss \$ 615,836

GETTING DOWN TO THE BOTTOM OF THINGS.

Spirit of Afraid-to-Help Brought Out.

Touching upon the apprentice problem with which contractors all over the country are battling, a feature was brought out at the A. B. C.'s conference at Indianapolis that is more or less of the crux of the situation.

Wm. Toelle, Princeton, had the floor and in the course of his remarks asked if it was not somewhat of a selfish motive that made contractors fight shy of

apprentices. He said it was a known fact that apprentices have a way of their own of jumping from one job to another after they have learned to some extent their new trade, nor are some contractors immune from the inspiration of inducing the boys to jump by offering greater remuneration. Now there are contractors he said, who would not put on apprentices for fear that later on, when proficient, these boys might aid a competitor.

At the conclusion of Mr. Toelle's remarks President Fred W. Junglaus endorsed what he had said, but added that, though boys may jump the job, the contractor who has trained them profits in the long run, for, no matter where the boys are employed they are in the field relieving the labor shortage which indirectly redounds to the benefit of the building industry.

It seems that the contractors themselves could remedy such a condition as now exists by getting together on an understanding whereby they would refuse to take on another contractors' apprentices unless these boys were released or there was no more work for them to do.

BUILDING PERMITS

(\$5,000 and Over)

Week of June 1st to June 7th.

*Commercial Building (General Alterations). Owner, Henry Marks, 517 So. Delaware St. General contract let to R. W. Bauman, 3345 Central Ave.

Church: \$30,000. 13th and Alabama. Owner, Friends Church, 13th and Alabama. General contractor, William P. Junglaus Co., 825 Mass. Ave. Brick.

**PRESENT BUILDING VOLUME
SHOWS INCREASE OVER
PREVIOUS ACTIVITY.**

Calumet Cities Busy.

The news comes from Gary that while the early season's building volume was small there is now a great deal of building activity in progress. It is also said that contracts are soon to be awarded on several large building projects. East Chicago and Indiana Harbor are also coming to the front with some good sized jobs. All these places announce considerable residence construction under way also.

**MUCH ACTIVITY DESPITE EFFORT
TO STOP BUILDING.**

**Action Now Will Only Cause Lull Later
As New Work Nears Completion.**

Though the reports in the newspapers and even in the different bulletins issued by the contractors' associations are to the effect that building is slackening up to some extent, and that a large volume of work has been sidetracked for the present, nevertheless, there is still a great amount of work under construction that will keep construction forces a long time and the holding back of contemplated operations will hardly make any apparent effect for some time to the average citizen. The place it will tell, however, is in the market where buying will be curtailed. Maybe though this will have a good effect for the material supply men have been talking "oversold" for some time.

Speaking locally, the banks have shown a tendency to hold back on building loans lately which will retard operations in the Calumet District. Then, too, the controversy between the building contractors and the building laborers has had a retarding effect. However, if nothing further interferes in the near future to hamper building activity 1923 promises to be the best building year the Calumet District has ever experienced.

The general feeling in this section among building men is that there will be no material reductions in costs for some time and the man who really needs a new building will make nothing by waiting for lower costs. By waiting he will lose the use of his needed building or the returns that he might get from same and thus lose any advantage that reduced costs might afford under ordinary circumstances.

**HAMMOND FIGURES AHEAD OF
THOSE OF A YEAR AGO.**

46.5 Per Cent. Gain Shown.

Though the May figures at City Building Inspector Henry Vis' office showed quite a decline from the amount hung up in April, nevertheless this year's totals showed a substantial gain over the figures posted the corresponding period in 1922.

The official building report for May is:

Year	Per.	Est. Valuation
1923	144	\$363,820
1922	81	248,100
Gain, May, 1923	63	\$115,720

NO BUILDING LABOR SHORTAGE.

High Wage Standards Attract Outsiders

There seems to be little or no scarcity of building labor in the Calumet District as many mechanics have arrived here from elsewhere, attracted by the wages that are being paid.

**BREACHES IN THE LINE FILLED
AS FORCE IS DRAWN IN.**

Some Not Able to Stand the Gaff.

Calumet contractors, members of the Building Trades Employers' Association, have not reached any agreement with the building laborers. Had all the contractors stood together they could have won their point. As it is, some of the employers went into the battle only to get cold feet, cheat, and leave a few of the staunchest to continue the fight. Just wait, the fellow who deserted the ship will not be slow to take advantage of the situation that is brought about by the B. T. E. A.

MAKE GOOD ON THREAT.

Unions Pull Men Off Jobs.

The blow up had to come. All along threats had been made by several of the unions that they would not countenance the employment of non-union laborers on building operations. Sure enough they made good last week and pulled the plumbers, electricians, plasterers, painters and sheet metal workers off the works where the non-union laborers were working.

Oh, well, such is life.

**MAY BUILDING DROPPED OFF IN
MUNCIE**

Falls Behind Two Previous Months

Think a minute, what is more familiar these hot days of hustle and bustle than the sound of a Ford brought up short suddenly with a clatter and a sputter? Well Muncie's new building in May must

have gotten the stop signal, for it slacked up suddenly and with a jerk, not quite stopping but just sliding ahead at a considerably lessened speed.

The final tabulation of Muncie's May building figures as recorded at the city engineering department shows that there were ninety-two permits issued during the month for an estimated valuation of \$88,055, as against 155 permits entailing a monetary involvement of \$279,730 for April of this year. While more permits were issued in May in Muncie than were granted in March, the estimated valuation of the May work did not quite total that of March.

Muncie's building figures for the past three months are:

Month	Permits	Est. Valuation
March -----	54	\$ 89,775
April -----	155	279,730
May -----	92	88,055
Total -----	301	\$457,560

**MERELY A SPARRING PARTNER
NOW**

**That Seems to Be the Role Under the
Current Order**

A sparring partner has a thankless job. He dances around, proves a good old plow horse, puts the "big boy" on his feet for the main go and then is ditched and is forgotten when the sheekles begin to roll in at the gate for the big show.

One is inclined to believe through force of circumstances that the building industry is not unlike a sparring partner for other business interests. Things sort of slough off, and then the agile building industry steps into the training ring, takes some hard knocks and batters away to revive matters; other business gets new wind and strength from the renewed activity that the building industry creates through the furnishings that are required for the new structures. Building industry spars around, flits here and there, feinting and jabbing, and as new life comes back to other business the latter slips over an unexpected, ungrateful wallop to its sparring partner and down he goes for a spell, groggy, almost out, and the multitude forgets his fortitude, endurance and stamina that made a revival of business possible.

Right now just such a demonstration is going on. Everyone seems to be taking a crack at building and he is having a hard time withstanding the blows that are coming his way.

When the building industry co-ordinates all its forces through co-operation, gets its five senses, architects, engineers, contractors, labor and material supply men, working in harmony, all to one end, defense, then a new champion will have graduated from the sparring partner class to step forth into the spot light for the main go to meet all comers.

ANOTHER ARGUMENT FOR LABOR

We can't see why jazz musicians should be paid \$15 per day. Riveters, who get only \$10, make almost as much noise and do something useful besides. — New York Tribune.

Viskalt

~Pliant Under Stress~

MEMBRANE ROOFS

How to build *a permanent roof*

If you want your roof to endure years of hard weathering, build into it two things:

Viskalt—a pliant, durable, adhesive waterproofing bitumen, which the weather cannot penetrate.

Richardson Felt—a foundation which in spite of severe strains of storm and sun will permanently hold this bitumen fast to the roof.

Both combined give you a Viskalt Membrane Roof, and both are made by a firm backed by over fifty years of manufacturing experience—The Richardson Company of Lockland (Cincinnati) Ohio; Melrose Park (Chicago) Illinois; New Orleans, Louisiana.

For complete details and estimates
consult any good roofing contractor.

Attest:

LEO K. FESLER, Auditor.
June 16-23, 1923.

NOTICE TO CONTRACTORS. BOILERS AND INSTALLATION.

Notice is hereby given by Wilbert L. Grose, trustee of Whiteriver Township, Johnson County, Indiana, that on Saturday, July 7, 1923, between the hours of 9 and 10 o'clock, at Center Grove school building in Whiteriver Township, Johnson County, Indiana, we will receive sealed bids for furnishing and installing 2 steam boilers to be erected in the Center Grove School building in accordance with the plans and specifications adopted and approved and which are on file in the office of the said trustee and George Ransdell the architect at Franklin, Ind. The estimated cost of the proposed boilers and installation is three thousand five hundred dollars (\$3,500).

All bids must be in writing on forms prescribed by the State Board of Accounts and must be accompanied by a certified check for three hundred dollars (\$300), payable to said trustee as a guarantee of good faith in submitting said bid. The checks of the unsuccessful bidders will be returned when the contract is awarded and entered into by the successful bidders, but should the successful bidder fail to enter into a contract and execute such bond, he shall forfeit such certified check as liquidated damages for the use and benefit of said Township.

Plans and specifications may be examined at the office of the trustee or at the office of the architect at Franklin, Ind. The trustee reserves the right to reject any or all bids. Said bids will be opened at Center Grove School building

in said township and county at 10 o'clock a. m., July 7, 1923.

WILBERT L. GROSE, Trustee,
Bargersville, Ind.
WM. J. COUNCILMAN, Pres.,
THOMAS DORRELL, Secy.,
FRANK SHUFFLEBARGER,

Advisory Board.
June 16 and 23, 1923.

REPAIRING AND REMODELING SCHOOL HOUSE.

NOTICE TO CONTRACTORS.

Notice is hereby given, that Harrison School Township, Fayette county, Indiana, by the trustee and advisory board thereof, will receive sealed bids at the office of the trustee, in said township, county and state until 1:30 o'clock p. m., Monday, July 2, 1923, for the repairing, remodeling and constructing an addition to Harrisburg School House No. 5 and for addition and alteration of heating and ventilating system therefor.

All bids shall include all labor, material and supplies necessary for the complete construction of that part of the work bid on and all strictly in accordance with the plans and specifications therefor, which have been properly accepted and approved and are now on file in the office of said Township Trustee.

Bidders will submit their bids as follows:

1. For addition and alteration of Harrisburg School House No. 5, General Construction and Furniture.

2. For addition and alteration of Heating and Ventilating System.

3. For the construction, as a whole or any part or combination or combinations thereof.

The estimate on the cost of construction are as follows:

General construction, \$8,000.00; Heating and Ventilating system, \$2,000.00; School Furniture, \$450.00.

All bids and proposals must be on the forms prescribed by the State Board of Accounts. Bids on the general contract must be accompanied by a certified check for the sum of \$200.00 and bids on the heating and ventilating or combination of bids must be accompanied by a certified check for a sum equal to 5% of bid. All checks shall be payable to Ernest Maurer, trustee, and conditioned, that the successful bidder will enter into a contract with sufficient surety

for the performance thereof, when the contract or contracts are let. Checks of the unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract and execute a bond with sufficient surety to be approved by the Township Trustee, in an amount equal to the amount of the contract and conditioned for the faithful performance thereof.

Plans and specifications may be had for the individual use of bidders from the architect, H. M. Griffin, Connersville, Indiana, by making a deposit of \$10.00 for each set, which deposit will be returned upon the return of the said plans, in good condition, on or before the letting. One complete set of plans and specifications is on file with the trustee.

The right to reject any and all bids is reserved.

ERNEST A. MAURER,
Trustee of Harrison School Township,
Fayette County, State of Indiana.
June 16, 1923.

SCHOOL HOUSE. NOTICE TO BIDDERS

Notice is hereby given that the undersigned Trustee of Owen township, Warrick county, State of Indiana, will, at his office, at Folsomville, Indiana, receive sealed bids until 2:30 p. m., on the

23rd DAY OF JUNE, 1923,
for the construction of a frame school building at the town of Folsomville, Indiana. Said building to be constructed according to the plans and specifications now on file in the office of said Trustee. A copy of said plans and specifications has been filed and approved by the State Department in their office in the City of Indianapolis, Indiana.

Each bidder will be required to deposit with his bid a certified check for \$300 as evidence of good faith that he will enter into a written agreement to perform the required work, in the event he is the successful bidder.

The building required will be a one story frame building and the estimated cost is \$12,000. The usual non-collusion affidavit will be required of all bidders, and the right to reject any or all bids is hereby expressly reserved.

(Signed) WAYNE WRIGHT,
Trustee, Owen Township, Warrick County, Ind.
June 16, 1923.

CARNAHAN EVANS DOOR

Horizontal Cross Section of Evans Process Door.

Prices will gladly be furnished upon receipt of lists covering your requirements for special millwork and doors.

THE DOOR OF TODAY

The Evans Process Door is now recognized as "the stylish door," as well as the sanitary and common sense door. The building public appreciates the beauty of its perfectly-matched, one-piece veneer and particularly the advantages of its special construction—shown in insert above.

This door is light in weight, yet substantial and durable. It is practically sound proof, as well as proof against perceptible shrinking and swelling.

CARNAHAN MANUFACTURING CO.

MAKERS OF SPECIAL MILLWORK FOR EXACTING BUILDERS

General Sales Office and Factory,
LOOGOOTEE, IND.

THE INDIANAPOLIS ATHLETIC CLUB

The following firms are furnishing materials for this building:

CEMENT:

Portland Cement, Carneys Cement and Wall Plaster, furnished by **The Peoples Coal and Cement Co.**, 1109 East 15th St., Indianapolis.

FACE BRICK:

Furnished by the **Interstate Clay Products Co.**, 607 J. F. Wild Bldg., Indianapolis.

HARDWARE:

"Yale" locks and finished hardware furnished by the **Lilly Hardware Co.**, 114 East Washington St., Indianapolis.

ELECTRICAL INSTALLATION:

All electrical work installed by the **Hoosier Engineering Co.**, 41 No. Capitol Ave., Indianapolis.

FREIGHT ELEVATOR DOORS:

"Peelle" doors furnished by the **Moring-Stackhouse Co.**, 1130 Hume Mansur Bldg., Indianapolis.

GLASS AND MIRRORS:

Furnished by **Stewart-Carey Glass Company**, 231 South New Jersey St., Indianapolis.

HEATING, PLUMBING AND VENTILATING:

Installations by **Freyn Bros.**, 31 West Michigan St., Indianapolis.

HOLLOW METAL DOORS AND ELEVATOR ENCLOSURES:

"Central Metal Products Co.," furnished by **James H. Carnine**, 522 Indiana Pythian Bldg., Indianapolis.

MARBLE:

All interior marble furnished by **F. E. Gates Marble and Tile Co.**, 21st and Adams Sts., Indianapolis.

STEEL MEDICINE CABINETS:

"White Steel Cabinets" furnished by **Neeves and Co.**, 111 Monument Circle, Indianapolis.

MILL WORK:

All millwork, including rich walnut columns, Italian Renaissance paneling, birch, furnished by **Maas-Neimeyer Lumber Co.**, 21st and Monon R. R., Indianapolis.

One of the most pretentious and some architectural contributions to Indianapolis' Nineteen Hundred and Twenty-two Building Development is the new million and a half dollar home of the Indianapolis Athletic Club. The building, situated at the southeast corner of Meridian and Vermont streets, across from the proposed Indiana War Memorial Plaza site is of the Italian Renaissance type of architecture, nine stories height with mezzanine floor, basement and sub-basement covering a ground area of 10x200 feet. When completed it will be the finest athletic club quarters in the city, incorporating as it does the very latest ideas in club house construction and appointments. It is practically an Indianapolis building product, designed by a local architect, supervised by a local contractor and supplied most entirely by local building supply men whose names are to be found on this page.

Architect:
Robert Frost Daggett,
Indianapolis.

General Contractors:
Bedford Stone & Construction Co.,
Indianapolis.

Engineer:
Ammerman,
Indianapolis.

METAL WEATHERSTRIPS AND CALKING:

Furnished and installed by the **General Builders Supply Co.**, 434 Merchants Bank Bldg., Indianapolis.

ROLLING WOOD PARTITIONS:

"J. G. Wilson Corporation," furnished by **Moring-Stackhouse Co.**, 1130 Hume Mansur Bldg., Indianapolis.

ASH HOIST:

"Gillis-Geoghegan Co.," Model D, overhead crane hoist with electric motors, furnished by **Moring-Stackhouse Co.**, Indianapolis.

STEEL CASEMENT WINDOWS:

"D. Lupton and Son," furnished by **C. B. Mayer**, 727 Lemcke Building, Indianapolis.

STEEL ERECTION:

Steel erecting by **Powers and Addy Co.**, Merchants Bank Building, Indianapolis.

TERRAZZO WORK:

Terrazzo floors and base installed by the **Indiana Terrazzo Co.**, 1019 Lemcke Building, Indianapolis.

BONZE ENTRANCES AND TRIM:

"Wisconsin Wire and Iron Works," furnished by **R. Alfred Hayes**, 606 Lombard Building, Indianapolis.

PLASTERING AND LATHING:

All ornamental and plain plaster work is being done by **Charles W. McGarvey**, 2335 Broadway, Indianapolis.

SHEET METAL WORK:

The metal skylights, copper cornice and roof ventilators are being furnished by **H. W. Laut and Co.**, Fletcher Ave. and Noble St., Indianapolis.

SMOKE STACK:

Built and installed by **P. W. Kennedy and Son**, (Boilers, tanks and heavy sheet iron works) 1201-33 Beecher St., Indianapolis.

PLAN INTERESTING MEETING FOR STATE ARCHITECTS.

Annual Gathering to Be Held Next
Saturday.

The annual meeting of the Indiana Society of Architects is but two weeks distant and the officials and entertainment committee are busily engaged in mapping out a program with the intent of making the 1923 gathering a noteworthy one. The regional meetings that have been held during the winter proved magnetic in attractive power to those architects of the territory in which they were held and this influence should make for one of the best attendances that has ever turned out at an annual meeting of the Society.

The latter has gotten away from theory and has proved that it can accomplish practical things. Not only that, but its sessions bring together the architects from every section of the state to create acquaintanceships that make for greater unity in architectural endeavor and professional purpose. There are those who under-rate such an asset yet that does not lessen the value. There are men of the profession who still hold aloof, who put no faith in this broad spirit of progress and fellowship that tends to weld the members of the profession together. When all architects discard such petty ideas, when they like other professional men, realize the value of mingling, and abandon the old spirit of jealousy, they and the profession will advance. There is no getting away from the fact that certain cherished narrow views entertained more or less in the by-gone days by architects radiated even beyond architectural circles and did bring down an indictment upon the profession because of its inner relations.

That indictment is being quashed these days through the efforts of organizations such as the Indiana Society of Architects which are building up better relationships among the architects and carrying them out before the Public to take a united stand in matters of a public interest.

It is to further that function that the meetings of the I. S. of A. are held and that is why the architects are called to meet in such sessions as will be held at Indianapolis, June 23.

Among the most important matters to

come up at the meeting will be the annual election of officers and the consideration of an amendment to the constitution to provide for a progressive directorate, the directors to be elected for various term periods so that instead of changing all the directors each year some would hold over, and in the directorate would be men thoroughly informed of the policies of the Society and thus be enabled to perpetuate same.

Next Saturday is the time, Indianapolis is the place, the Lincoln Hotel is to be the scene of action.

Why not prepare to attend? It is for the Indiana architect, his profession, and the building industry that the Society is working, that all may be advanced.

Result of the Committees' Reports for Candidates for Officers and Directors of the Indiana Society of Architects:

Committee composed as follows: Walter Scholer, Chairman; George W. Allen, Fritz Anderson.

The other committee consisted of: Fernor Cannon, Chairman; Wilson B. Parker; Merritt Harrison.

President—

Guy Mahurin, Fort Wayne.
H. M. Griffin, Connersville.

1st Vice-President—

Harry E. Boyle, Evansville.
Rodney Leonard, Frankfort.

2nd Vice-President—

Ewing Miller, Terre Haute.
Edgar O. Hunter, Indianapolis.

Secretary—

Geo. W. Allen, Laporte.

Chairman Publicity and Public Action—

Herman Scherrer, Indianapolis.
H. H. Fitton, Indianapolis.

AMENDMENTS TO THE CONSTITUTION.

The Board of Directors of the Indiana Society of Architects propose the following amendments to the constitution:

Article 5, Sections 5 and 7 to be combined so that the Committee on Publicity and the Committee on Public Action will be one committee.

Article 8, Section 2, that the regular meeting of the Society shall be changed from the fourth Tuesday to the fourth Saturday in June, and from the hours of 3:30 p. m. to 8:30 p. m., to the hours 10:30 a. m., to 9:30 p. m.

Section 4. Change the meeting date of the Board of Directors from the fourth Tuesday in June to the fourth Saturday in June.

That the Board of Directors shall be elected for one, two, three and four year terms so as to provide for continuity of the policies of the society.

The above amendments to the constitution will be printed and mailed to the members and will be put to vote at the Annual Meeting, Saturday, June 23, 1923, at the Lincoln Hotel, Indianapolis.

(Signed) MERRITT HARRISON,

Secretary.

PLANNING IDEA GROWING

New York Creates State Planning Bureau

The creation of a state bureau of housing and regional planning by New York state is a step looking toward more accurate ascertainment of housing conditions and more intelligent community planning and is of interest to architects.

The new bureau, placed in the state department of architecture, is to be composed of the state architect, the state commissioner of highways and the industrial commissioner, with five lay members to be appointed by the state architect. It is directed to study housing needs and conditions throughout the state, to collect and distribute information relating to housing and community planning and to assist in the preparation of legislation and regulations in regard to zoning and planning as well as in regard to housing throughout the state. A report on housing is called for to be prepared by the bureau and submitted to the governor and to the legislature as a basis for state action.

HOME BUILDING ONCE MORE TO THE RESCUE

Small Type of Construction Carried the
May Burden

Residence construction was the big factor in the Evansville building program for the month of May, according to the report of Ed C. Kerth, city building inspector, a total of seventy-one permits for new homes being issued at the building inspector's office last month. There were 243 building permits issued during the month, involving \$297,454. Of this amount \$228,789 was for home building.

Compared with the month of April for this year, last month's record of permits shows some falling off in residence construction. The total permits issued during April were ninety-one, involving \$255,800. The total number of permit valuations was exceptionally high that month, with a total of \$969,175, but of this amount \$600,000 was represented in the permit for the construction of the Boys' Catholic high school.

Compared with May of 1922, last month shows a decided gain, the total for the corresponding month of 1922 being \$280,995, of which amount \$184,000 was represented in permits for but fifty-three homes.

LOCAL PRICES FAIR DESPITE PROPAGANDA, DECLARES LUM- BERMAN

Too Much Loose Talk He Says

Declaring reports that building operations are being held up owing to high costs of material are mere propaganda to stop, or at least hinder, building progress, a prominent Evansville lumber dealer denied that there is any advance in the cost of building material.

"Prices are the same as they were last year, and are from 35 to 40 per cent cheaper than they were in 1920," he said. "Any reports to the contrary is pure propaganda intended to hurt building. Generally speaking, the building public of Evansville seems to be satisfied with prices for they have gone right ahead with their projects. Labor is scarce and this has been somewhat of a factor in

raising construction costs, but these are not such as the propagandists would like to have us imagine.

"This propaganda has been influential, however, in slowing up building operations to some extent.

"Grade for grade, lumber here is from 5 to 10 per cent cheaper than at any place out of the city. Prices have not advanced here one cent in the last year."

SEEKING TO AID NOT RETARD BUILDING

Periodical Lulls Recognized as Essential
—Hence No Effort to Force

Since Evansville, like other cities, is from four to five years behind in its regular building requirements, local building interests and others with the welfare of the city at heart are doing all in their power to throw no impediment in the way of building.

These men realize that while operations have been moving ahead with a greater speed than in past years it is no time to force things, rather, to encourage and hold matters to an even keel in so far as possible.

Temporary slow downs are almost necessary now and then to enable the material men to keep up with the demand, hence a tendency toward a lull such as has been noticeable recently is not viewed with alarm.

CHIPS AND SHAVINGS

G. L. Miller & Son, general contractors, have seven new homes under way in the Miller Terrace District.

Scarborough-Daves Co., who have the contract for the construction of the Farmers' Dairy Plant addition, expect to complete the work there shortly.

NEW SECRETARY NAMED

Fort Wayne Builders' Exchange to Have
Man in Office Constantly

Another change is contemplated in the Fort Wayne Builders' Exchange secretary's office. A few months ago Eph

Dailey, who had occupied the position of exchange secretary for several years, resigned in order to accept a position as one of the members of the State Industrial Board and E. F. Oelschlager was named to succeed Mr. Dailey. The new secretary, who was to devote part of his time to the office, has found that other business interests demand his attention and asked to be relieved.

After considerable thought, the members of the Exchange have decided to retain a permanent secretary who will be on the job steadily to look after the organization's interests and have named George Schack, who will assume office June 18.

The members realized that to keep the Exchange alive and serve its personnel a permanent secretary was necessary, one who could give all his time to the position.

PROMINENT FORT WAYNE BUILD- ER NAMED TO SERVE ON STATE BUILDING COUNCIL

Governor McCray Approves Appointment

Max Irmscher, president of the Fort Wayne Exchange and one of the city's most prominent building contractors, has been appointed by Governor McCray as a member of the advisory committee on the new State Administration Building Council.

Mr. Irmscher has been appointed for a two-year term and is one of three state contractors to serve on the committee which is made up of contractors, architects, engineers and Labor representatives in codifying building construction regulations and instituting standard building requirements throughout Indiana.

The new body is the result of a recent law effected at the 1923 session of the State Legislature.

LOCAL BUILDING FAR AHEAD OF CORRESPONDING PERIOD LAST YEAR

Large Volume Piling Up

When Fort Wayne building activity in May ran up a total of \$2,166,085 it carried the city's performance up to within 22.7% of Indianapolis' total and put Fort Wayne far out in front of all other Indiana cities, the capital city excepted.

So far in 1923 Fort Wayne has a total new building estimated valuation of \$6,366,575, which is 66% of all the building done in the city in 1922. This year's figures are 194.6% in advance of those for the corresponding period a year ago.

Mason Contractors Association meets every Thursday—1 P. M.
General Contractors meet second Friday each month.

PLANS ON FILE.

None this week.

WAIVER OF LIEN.

The Wm. P. Jungclauss Co., as contractor, and The Terminal Building Corp., as owner, agree to erect a 5 story warehouse building for \$708,863.00, located at southwest corner of Pennsylvania and Georgia streets.

Conder & Culbertson Co., as contractor, and Ray C. Shaneberger, as owner, agree to erect a residence and garage on _____ for \$35,740.00 (No real estate mentioned in instrument).

SORT OF MESSED THINGS UP.

Outside Contractor at Indianapolis Tilts Lathers' Wages.

Just when everything seemed to be fixed up and the old building band wagon was rumbling along in Indianapolis at a steady rate promising a pleasant journey for all concerned there came a rattle and a bumpety-bump that threatened to cause considerable annoyance if not delay. A hurried inspection brought to light the fact that some one had been monkeying with the running gears and the wheels were inclined to go off the road. Up to press time the repair crew was still at work.

In other words, the same old story, an outside contracting firm with no regard for local wage scale standards and needing lathers went right out into the field and offered \$10.00 per day as against \$9.50, the scale being paid. The result was that the lathers flocked to the foreign standard, leaving the Indianapolis contractors to meet the advance or twiddle their thumbs.

A conference was called at once and a representative of the outside firm invited in. When he appeared his excuse was that the workmen informed him \$10.00, \$11.00 and \$12.00 per day was being paid lathers and he offered the \$10.00, never making a move to investigate of the association as to what the actual scale was. It is just such action as this that will go far to wreck the local situation and put at naught the earnest endeavor of the contractor's association that works hard to stabilize conditions.

The least an outside contractor might do would be to observe local regulations and wage scales but as it is they fre-

quently jump in, pay any old price, grab men off here and there, finish up their work, move on and leave it to the local contractor to rearrange as best he can the chaotic state of affairs that has been created.

J. H. OWENS

Will Be Executive Officer of Newly Authorized Committee.

J. H. Owens, of Indianapolis, field secretary and representative of the Associated Building Contractors of Indiana, has been selected executive secretary of the advisory committee of the Indiana state administrative building council, which was created by the last legislature.

Selection of Mr. Owens as the executive officer of the committee took place at a meeting of the committee Tuesday night. It chose Fermor S. Cannon, Indianapolis architect, chairman of the committee.

Plan Early Meeting

Mr. Cannon said that the administrative committee and advisory committee which jointly constitute the state administrative building council, probably will hold a council organization meeting the last week in June. The law requires the council to be organized on or before

September 1, but engineers, architects, building contractors and others interested in the new state department wish to get it into operation as soon as possible.

BUILDING PERMITS.

(\$5,000 and Over)

Week of June 7th to June 14th.

Residence: \$10,000, 8724 Central. Owner, Everett M. Schofield, 806 State Life Bldg.

INDIANA BUILDING OPERATIONS IN MAY, THOUGH RUNNING UP A BIG TOTAL FAILED TO EQUAL APRIL'S HIGH RECORD BUT SHOWED GAIN OVER MAY VOLUME IN 1922.

Building operations in Indiana cities after breezing along month after month for consecutive gains since the first of the year showed quite a reversal of form in May dropping back considerably from the totals hung up in April and even March. According to the official reports from the building inspectors of Indiana's ten leading cities the sum total of permits issued in May was 144 less than were granted in April this year, while the estimated valuation of the new work was 20% off the April valuation.

At that, the May, 1923, figures all around were ahead of those for the same period a year ago, there having been 475 more permits granted for a 21.8% gain in estimated valuations.

The feature of the month's building business has to do with Fort Wayne, which contrary to the prevailing order of slacking up stepped forward with the best building performance ever recorded in that city, showing a gain not only over May, 1922, but also one over the April this year, when a record high building level was posted. Terre Haute was the only other city to show a gain over April, 1923. As for comparisons with May last year six of the cities showed gains, three showed losses, and one, Muncie, had no record in 1922 with which to compare.

The cities ranked in the order of gains and losses over May, 1922, are: Ft. Wayne, 58 more permits, 208.8% gain; Terre Haute, 229 more permits, 156.9% gain; Hammond, 63 more permits, 46.6% gain; Elkhart, 2 more permits, 30.2% gain; Richmond, 9 more permits, 19.4% gain; Evansville, 13 more permits, 7.5% gain; South Bend, 17 less permits, 2.5% loss; Gary, 15 more permits, 6% loss; Indianapolis, 11 more permits, 15% loss.

The official reports from the various city building inspectors are as follows:

May Building Permit Record

J. Wesley Reed ----- President
E. E. Cole ----- Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**AS ONE MAN FOUND IT****Holds Public Is Weary of Continued
Strife and Turmoil in Industrial
Labor Relations**

As a result of an investigation throughout the United States that reached all classes, popular opinion as regards Labor may be summarized in this fashion, writes Mr. Isaac F. Marcossin in the Saturday Evening Post:

"A great majority of the American people are in favor of the open shop. They resent the periodical peril to life, traffic and prosperity through strikes which, in the great majority of instances, could be avoided by reference of grievances to impartial and disinterested tribunals. They feel that Labor in the main has been unwisely led and is too often imposed upon by its leaders. There is widespread demand that the unions should be compelled to incorporate so that they can be held legally responsible for their inroads upon property.

"One of the most cheering facts in the whole situation is the growing participation of Labor in financial movements. Such action is teaching the beneficent lesson that Capital has neither cast nor prejudice and can work profitably for all classes, once it is conserved, and then employed in the proper channels.

"Finally, in both the employer and the employee is a growing enlightenment that makes for a larger degree of close personal co-operation in the management of industry, in this co-operation lies the real hope of the future, for it means a more equal distribution of responsibility as well as compensation."

John Little
Started business
On a much restricted
Plan, for he had but little
Capital and he was a cautious
Man, but he kept his eye on everything
And every detail knew, and his business
Started growing, and it grew and grew
And grew, till the Little Place of Business
Was a place of much renown. the solid
Old Reliable In-sti-tu-tion of the town.

James Bigger entered business on a most gigantic
Scale, he loaded up both hold and deck and
Clapped on all his sail, but he couldn't look
To Details and he couldn't watch each Leak,
And his Capital slipped from him, and
His Business, so to speak, leaked
Out before he knew it, and a
Pity 'tis no doubt, Mr. Bigger's
Business slowly, surely
Petered
Out.

—Exchange

AT LEAST SHOULD BE CONSISTENT**Labor Sacrifices Skill to Demand of
Unskilled**

Though the breaks of the game, as they say in baseball, have been against the Calumet contractors in the laborers' wage controversy, there are those who have dug their spikes a little deeper in and are set on sticking to the finish for as in baseball the game isn't over till the last batter is out.

Indications are that over at the Building Trades Council they are getting fed up on the proposition of pulling men off the jobs in the interest of the laborers. The latter admit that many of their ilk, over a hundred, are working in the local steel mills for 40 cents per hour to keep them off the streets.

It is a great situation when a skilled building trades mechanic will be called off a job and forfeit his \$1 per hour or more just because a laborer refuses to work for a contractor at 87½ cents per hour, but will accept a job in some other sphere of endeavor at 40 cents.

**BIG STUFF SLACK—SMALL STUFF
GOING BIG****Speculative Home Building Active**

Architects in and around Hammond report that plan preparation on large structures has fallen off, but, on the other hand, those who have to do with speculative home building matters are going along at high speed. Several new firms have opened new subdivisions and are building anywhere and everywhere. It all means business and, possibly, riches for the promoters, who can tell?

CALUMET BUILDING PROGRESS

The contractor has the large rotary pumps all set at the municipal sewage disposal plant, has completed the tunnel under the river and expects to have everything in shape for operation July 1.

Charles Rhoades who knocked off for a time to make a visit down in Tennessee and Kentucky has returned to Hammond.

Guess the weatherman got his mechanism crossed, for somehow or other after giving us a flow of summery zephyrs, things reversed, on came a cold spell that made folks up here dig out their coats.

E. E. COLE.

MUNCIEAssociated Building Contractors
Member State A. B. C.Chas. Rowe ----- President
J. A. Gallivan ----- Secretary

314 Main Street

THERE'S A REAL REASON.**Muncie et al, Victims of Unusual
Demand.**

Thank goodness the situation in Muncie building circles has not reached the point of high costs that prevails in many of the larger municipalities, though it

must be admitted the costs are high. However, they correspond favorably with those ruling in other sections of Indiana and are virtually the result of demand, both on the labor and the material supplies. Even at that it is the demand prevalent in the large cities that influences prices in the smaller places. For instance, Muncie must pay if she would protect her available labor supply or else it would drift to those centers that do pay. Likewise she must pay the market price for building materials needed for her building requirements or again the larger cities would denude her market, for manufacturers naturally must sell where they can get a price and as between a high and a cheap market they would ship to the former.

An analysis of the situation reveals the fact that Muncie prices are not abnormal nor are those in other smaller Indiana cities, they are simply corresponding with current quotations all over Indiana as a result of the demand created by the great volume of building business that is being transacted in the state.

When all building ceases, when there is no call for building mechanics, when the material supply market is glutted, when there is no employment and no work, prices will decline. Until then, as long as business is good, there can be no material reduction in prices in the building field.

High prices mark prosperity and who is there who does not want prosperity?

NOW DON'T FORGET**Hoped All Contractors Will Stick to
Ideal Proposal.**

At Indianapolis last week at the A. B. C.'s conference the contractors in attendance sounded a note that if harkened to would mean much to the building industry of the State. It had to do with a frowning upon the custom indulged in by some contractors who will go out into the labor market and bid spiritedly against the field for the services of trades mechanics. If the A. B. C.'s can exert an influence that would stop that pernicious practice it would remedy an evil that is far reaching in its effect.

Now that official recognition has been made of that which sends wages soaring without warrant and is the result of selfishness pure and simple it is to be hoped that every city association will further the condemnation and every contractor and sub-contractor member will pledge himself to live up to the move that as been started to hold wages at the agreed levels.

No one can condemn the mechanic for selling his services at the best price he can get, but, when a contractor in order to supply his own needs will take advantage of his fellow contractors and tilt the scale to meet an emergency it is another story.

Time and again months of effort have been thrown into the discard and conditions have been made chaotic by the unscrupulous contractor who offered 5c, 10c and 15c per hour more than the established scale.

It was a commendable move made at the conference and if followed out will aid greatly in keeping construction affairs out of the danger zone.

NOTICE TO CONTRACTORS. BOILERS AND INSTALLATION.

Notice is hereby given by Wilbert L. Grose, trustee of Whiteriver Township, Johnson County, Indiana, that on Saturday, July 7, 1923, between the hours of 9 and 10 o'clock, at Center Grove school building in Whiteriver Township, Johnson County, Indiana, we will receive sealed bids for furnishing and installing 2 steam boilers to be erected in the Center Grove School building in accordance with the plans and specifications adopted and approved and which are on file in the office of the said trustee and George Ransdell the architect at Franklin, Ind. The estimated cost of the proposed boilers and installation is three thousand five hundred dollars (\$3,500).

All bids must be in writing on forms prescribed by the State Board of Accounts and must be accompanied by a certified check for three hundred dollars (\$300), payable to said trustee as a guarantee of good faith in submitting said bid. The checks of the unsuccessful bidders will be returned when the contract is awarded and entered into by the successful bidders, but should the successful bidder fail to enter into a contract and execute such bond, he shall forfeit such certified check as liquidated damages for the use and benefit of said Township.

Plans and specifications may be examined at the office of the trustee or at the office of the

architect at Franklin, Ind. The trustee reserves the right to reject any or all bids. Said bids will be opened at Center Grove School building in said township and county at 10 o'clock a. m., July 7, 1923.

ANNUAL MEETING OF INDIANA
ARCHITECTS ON TODAY

Indications Pointed to a Good Representation of the Profession

Responses received by Secretary Merritt Harrison from the architects out over the state indicated that there would be a substantial and representative gathering of the profession in Indianapolis Saturday, June 23, to attend the annual convention of the Indiana Society of Architects. It was some seven years ago that the first convention was held in Indianapolis and since that time the organized body of state architects has grown until it includes the majority of the members of the profession in Indiana, not only that but it has become a virile, militant body striving always for progressive and constructive measures that will not only advance the profession but the building industry as well. The members long since came to realize that the architects and other building construction interests had a mutual interest in the welfare of the industry of which each was a part, and to that end a great co-operative effort has been exerted by the architects, contractors, engineers and even Labor. Results have been achieved through the function of that co-operation and it is to be hoped that even greater efforts will be exerted in that direction.

While the society has worked with other interests and all have profited at the same time it has used and exerted its influence for the benefit of the Indiana architect nor has the effort been in vain. That being the case the convention this year should develop a still greater spirit of fellowship and a purpose to carry on the work of the society on an even enlarged scale.

The convention is to be held at the Lincoln Hotel and all meetings will be conducted in the Lincoln Room on the fourteenth floor.

The program for the day has been arranged as set forth below:

10:30 A. M.
Meeting of Board of Directors.
12:30 Noon
Luncheon.
2 P. M.
Business session.
3:30 P. M.
Visit and inspection of new Wild Bank

Building. Conducted by Fernor Spencer Cannon, architect.

4:30 P. M.

Visit and inspection of the new Roosevelt Building. Conducted by Kurt Vonnegut and Otto Mueller, architects.

5:30 P. M.

Visit and inspection of the new residence of Dr. Goethe Link. Conducted by Frederick Wallick, architect.

6:30 P. M.

Stag steak dinner.

Entertainment.

Addresses: Hon. Samuel Lewis Shank, Mayor of Indianapolis; Lawrence V. Sheridan, executive secretary City Planning Commission, Indianapolis.

THE ANONYMOUS ARCHITECT

(New York Tribune)

In his address delivered before the Lincoln Memorial in honor of its architect, Henry Bacon, Royal Cortissoz used the phrase "unsigned buildings." To be literally accurate, they are sometimes signed. But whoever turns to look at a corner stone or read an inscription? The author's name on the title page of a book is certain to pass under the reader's eye. The architect of a great building, so far as the general public is concerned, dwells in a state of complete anonymity.

This is true not only in new America. It has been the habit of ages, most completely and strikingly illustrated in the case of the great gothic cathedrals. The historians have unearthed evidence as to the masters who designed Chartres, Rheims, Bourges, Amiens; not one in a thousand of those who visit or worship at these shrines of beauty and religion could give the name of one.

An odd trick of the world, surely. So far as length of time goes, the architect outlives all his fellow artists. He builds in the most enduring of materials. Centuries are the unit of his influence and thousands of years often mark the beginning of his glory, as the fate of the Parthenon can testify. But the immortality is for his work, not for him or his name. He can die feeling that his labor may live for ages, perhaps meet its just praise among distant generations of alien races. Hope that his name will have an equal share of immortality is slight indeed.

INDIANAPOLIS ARCHITECTS LISTEN TO INSTRUCTIVE ADDRESS ON ARCHITECTURAL LIGHTING.

June Meeting Featured by Fine Talk by an Authority.

A most unusual and interesting program was put on Wednesday night at the regular June meeting of the Indianapolis Architects Association at the Hoosier Athletic Club.

As is the custom there was the 6:30 p. m. dinner, after which Mr. Henry Logan was introduced and discussed in a broad way the general principles of architectural lighting.

Mr. Logan received his training at the Royal Academy, London, and also at the Birmingham Polytechnical Institute. Through his years of experience he has collaborated with many noted architects, among them being Messrs Lutyens, Cram, Goodhue and Ferguson, Thos. Lamb and Geo. B. Post.

As an aid to illustrate his points the speaker employed a miniature stage showing lighting effects in color, effect of light on speed of vision, necessary degree of shadow, etc.

His talk was most entertaining and was greatly enjoyed by a representative crowd of the architectural profession of the city. The meeting was not limited to membership, the architects being permitted to have their office forces attend.

The monthly meetings of the city association during the past winter season have been most enjoyable and programs have been put on that were really worth while. Then, too, the varied discussions developed have been broad, profiting all those who have had the pleasure of hearing them.

President Herman Scherrer, Secretary Batchelder, and the various program committees have worked hard to make the meetings attractive, nor has their effort been in vain. Next season when these gatherings are resumed after the summer vacation period it will well repay any Indianapolis architect to take one night off a month and attend the city architects association gatherings.

NO HALT YET

Local Building Activity Holding Up Well

Except that last week the inclement weather interfered with Evansville building operations and stopped outdoor activity, otherwise things moved along in good shape. Quite a few new plans bobbed up in the architects' offices for contractors to figure, indicating that prospective builders are still in the mind of building regardless of all the scare top that is going the rounds.

As far as local conditions go there was never a better time to build, for things have become fairly well stabilized, material quotations have been ruling steady right along and mechanics are on the job not only satisfied but are delivering the work. Under such conditions Evansville has nothing to gain by calling a halt on building, for she needs more buildings, is behind in her building program, and throwing her army of craftsmen employed on construction operations out of work would react seriously on her other business interests.

Everyone seems to realize the situation and is doing his best to keep things in building construction circles moving ahead at a reasonable rate.

DOING ITS BIT AND MORE

Home Building Keeping Things Moving on Satisfactory Scale

Laboring along under the burden of keeping the Evansville building volume up residential construction efforts are telling. Big work has fallen off some but the home building activity is as strong as ever it was early in the spring.

There is little indication of a slackening up in home building. The conservative builder is going ahead with his work irrespective of any reports to the contrary. So far there is no sign of a slackening up in sight. The month of May was one of the biggest months in the history of the city's building history and June should not fall far short of the May record.

CHIPS AND SHAVINGS

Anderson and Veatch, general contractors, in addition to pushing new work out at Lincolnshire have many other projects in various stages of construction about the city.

The task of remodeling the new quarters of the Lincoln Savings Bank at 211 S. Fourth street was started the past week by Scarborough-Davies Co., general contractors. The interior work will be quite extensive.

C. Kanzler and Son were the low bidders on the general contract for the building of a garage addition at the rear of the People's Savings Bank, 222 Main street.

Matt Hallenberger plucked the contract for the construction of a new store front at 412 Main street. His bid was \$6,000.

FORT WAYNE PASSES SOUTH BEND

Now Leads Her Northern Indiana Rival by Quite a Margin

After trailing South Bend all year with regard to the amount of money involved in her new building volume, Fort Wayne came along with a new burst of speed in May and breezed right ahead of her nearest competitor and is now riding along in second place in the state building race by a wide margin of over a million dollars.

Of Indiana's ten leading cities Indianapolis by virtue of her size is securely entrenched at the top of the building ladder with Fort Wayne next and South Bend third. The latter city has shown a steady building gait right along in years gone by and Fort Wayne can not afford to falter if she would maintain her position as runner up.

Though in arrears as far as the estimated valuations are concerned, the records show that South Bend in 1923 has issued 2,244 building permits as against 1,151 permits for Fort Wayne up to June 1.

The total building figures for the two

cities to June 1 this year are:

City	Per	Est. Val.
Fort Wayne	1,151	\$6,366,575
South Bend	2,244	5,086,148

Total arrears 1,093 *\$1,280,427

*Gain

LARGE RESIDENTIAL BUILDING VOLUME RECORDED LAST WEEK

Estimated Valuation Ran Over Quarter of a Million

While other points report a slowing up in building activity and evidences of big work on a large scale in Fort Wayne are not as frequent possibly as earlier in the season, nevertheless home building operations show little or no let up and are going ahead under a strong impetus.

Last week, for instance, permits were granted at the city building inspection office for the erection of fifty-two more new houses. The total estimated valuation of those fifty-two projects amounted to \$255,350, making for one of the largest weekly volumes of new house construction recorded in Fort Wayne this year.

PROPER ACTION TAKEN

Building Operations Welcomed But Not Under Such Circumstances

When building promoters ignore ordinary, common established customs and respect for others and seek to foist objectionable projects upon a foreign interest it does not take long to set them right and curb a selfish move that would sacrifice all else in attaining its purpose.

In Fort Wayne recently it was proposed to erect a movie theater on a site next door to a church. However, the better element of the community arose at once, carried the matter to the city council and blocked the proposition, the council at once passing an ordinance prohibiting the erection of a theater within 300 feet of any church, school or hospital.

The ordinance will not operate against theaters already established, and there are several instances where such establishments are situated less remote from churches or schools than the distance prescribed by the ordinance. These instances, however, are all down in the intense business center of the city.

It was a stupid undertaking to set about the opening of a picture theater next door to a church. In a situation of that sort such an amusement place would be an offense without mitigation, a nuisance for which no excuse could be offered.

INDIANAPOLIS BUILDING OPERATIONS FOR 1923 CONSIDERABLY AHEAD OF SAME FOR 1922

Nearly 30 Per Cent Gain Posted

Comparing the building figures of Indianapolis for the first five months of 1923 with those of the corresponding period last year the building construction operations this year are shown to be away ahead. There were 484 more permits issued than were granted over the same period in 1922 while the estimated valuations showed an increase of \$2,868,862, or 29.9 per cent.

The official figures for the first five months of 1923 and 1922 as recorded by the building inspector are:

1923		
Months	Per	Est. Val.
January	619	\$2,021,138
February	545	1,601,282
March	1,438	3,028,839
April	1,761	3,215,976
May	1,809	2,805,011
Total	6,172	\$12,672,246
1922		
Months	Per	Est. Val.
January	403	\$ 580,706
February	576	1,170,398
March	1,218	2,065,051
April	1,693	2,566,382
May	1,798	3,420,847
Total	5,688	\$9,803,384

A REAL CHAMPION OF LABOR.

More's the Pity There Are Not More of His Kind.

Commenting, in a letter, upon the repudiation of the Landis Award by certain crafts at Chicago, John Donlin, president of the Building Trades Department of the American Federation of Labor, wrote: "You know my attitude as to the repudiation of the Landis Award, and not only in this but in every

and all agreements; and that upon the integrity of all parties to agreements depends the stability of all nations, industries and the every-day intercourse of people, and that labor organizations or other associations or individuals should not repudiate agreements."

If only other labor leaders were as fair as Mr. Donlin, and possessed his keen appreciation of the honor involved, think what an agreement would mean and the security it would lend to industry.

DETERMINED TO MAKE THE EXCHANGE INTERESTING TO MEMBERS

South Bend Body Plans Big Picnic

Every week word reaches Indianapolis from South Bend contractors and conveys the information that they not only have an organization for business purposes but one that has aroused a deep interest because of its activity to promote a good fellowship amongst the members, developing, as it were, a greater degree of understanding and sociability.

Several interesting functions of a semi-social nature have been held by the South Bend Builders' Exchange and now plans are being made for a big picnic on Wednesday, June 27.

A special committee at a recent meeting decided to hold the event at Chapin Lake, Berrien Springs. It will be one of the largest affairs ever held by South Bend contractors and every builder and building supply man in the city will be invited. It is planned to make it an all-day event, the start to be made from the exchange at 9 a. m. During the entire day refreshments will be served by the committee, and at 5 o'clock in the evening a chicken dinner will be served to those present.

Stunts will be provided during the day and prizes, which have been donated by manufacturers and supply houses of Indianapolis, Chicago and Cleveland, will be awarded to winners.

DON'T WAIT FOR "FLY-TIME" IN THE BUILDING GAME

Not a Bad Suggestion for Consideration of Contractors

The editor of Building Materials says that one reason people don't think to buy fly screens until they see the first fly is that the dealer doesn't think to tell 'em to buy fly screens until he sees the first fly.

We wonder if this same bit of homely philosophy does not apply to the entire building industry and to the members of the various city contractors' associations. Everyone knows of the existing nationwide house shortage. This shortage is not a "fly time" or seasonal shortage but has been with us since the war when industrial expansion caused a shift in population from the country to the cities and industrial centers and a demand for shelter that contractors were unable and not permitted to supply.

Are contractors making an honest effort to get in touch with the people who want to buy and build homes or are they calmly resting on the fourteenth vertebra in a swivel chair waiting for an occasionally desperate home seeker to stum-

ble over the door mat?

Why can not the contractor get out occasionally like the real estate salesman and get a list of home building prospects that are willing to talk plans and give him an option on their bank accounts?

The total volume of building for the first quarter of 1923 has been greater than in any similar period, amounting to 23 per cent more than for the similar period in 1922.

The index of building cost is rising steadily and it is anticipated that at this time there must come a considerable falling off in the volume of orders for material and equipment. This will be partially due to increased cost, but probably more extensively due to the fact that many manufacturers will have sold out their entire production program for at least a short period.—Monthly Bulletin, National Association of Builders' Exchanges.

J. Wesley Reed ----- President
E. E. Cole ----- Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**B. T. E. A. CONTRACTORS CARRY
THEIR POINT****Calumet Laborers Accept Original Wage
Offer After Weeks of Contention**

The long, protracted, annoying altercation with the building laborers' union has been brought to a satisfactory conclusion with the association contractors carrying their point. After a battle for six weeks the laborers finally capitulated and voted to accept the 87½ cents per hour offer of the contractors and return to work.

The result demonstrates that which it is possible to attain through organization. Fifteen contractors who were left, after the weak, the lame and the halt had fallen by the wayside, made a determined stand and repulsed every attack upon their line, stood solidly together and, by their action, forced the laborers to surrender by accepting the terms originally offered. The men who accomplished their purpose had not only the laborers to combat and the Building Trades Council to contend with but also those contractors who were willing to accede to any demands the Union might make that they selfishly might keep their individual operations moving regardless of the resultant conditions. However, these latter were among the first to want to take advantage of the new scale that they refused to fight for, in fact, it was mainly through the way they so easily threw up the sponge that made the task of the association fighting contractors the harder.

One would think from the recent experience that all contractors would now be for association and organization, for, if fifteen men could win in the face of such opposition as they meet, how much easier it would be if all would take the stand of all for one and one for all.

It will be interesting to see hereafter just how much the Hammond contractors will have profited when future trouble arises. As was once written: "Man, know thyself, presume not God to scan. The proper study of mankind is man."

VERY TRUE**A Timely Commentary on Labor Condi-
tions**

After making an exhaustive study of the proposition, Mr. K. L. Roberts says, broadly speaking: "We have as much common labor as we ever had. The trouble is that it is not productively employed. No one knows and no one can estimate, with even modern accuracy, how many hundred thousand able-bodied men who ought to be working on rail-

roads, making steel, mining copper, putting up dwelling houses, or raising wheat are tarring endless stretches of boulevard roads, grooming golf courses and erecting showy city halls, county court-houses or municipally owned railway stations. The most casual scrutiny of the tremendous amount of public work now under way in the country makes it obvious that productive industry's most pitiless competitor for unskilled labor is the state itself, not the state alone but most of its counties, towns and cities are doing their full share, and more, in snatching away from industry, manufacturing, transportation and housing operations, the common labor that should be theirs by economic right.

It is a commonplace of good economics that great public works, betterments and improvements should be made, as far as possible, in periods of industrial depression. At such times it is possible not only to take advantage of materially lower costs but to lessen the hardships of widespread unemployment. This principle, everywhere accepted, appears just now to be almost universally disregarded.

ALWAYS WELCOME**State Association Representative Pays
B. T. E. A. a Visit**

Among those dropping in to pay their respects at association headquarters the past week was "Jack" Owens, field representative of the state A. B. C.'s, who had been making a business trip to South Bend and Gary.

CALUMET BUILDING PROGRESS

Joe A. Wolf was the low bidder on the Greek Catholic church addition and parsonage in East Hammond, at \$21,688.

The Central School building is slowly being moved to its new location on Russell street. It has left the old grounds and is about a hundred feet on its way.

The architects report business looking up a little; they have several good building propositions for which they are making tentative sketches.

There is a continued shortage of bricklayers, plasterers and lathers. One would think that with these trades receiving from \$12 to \$16 a day more of the young men would enter them.

**FOUND TIME BETWEEN PLUMBING
JOBS TO VISIT TENNESSEE****Muncie Plumber Greater Optimist Than
Ever.**

They have accused plumbers of being most everything else so who is there to

deny that a plumber can be an optimist. Well, Muncie has just such a man, A. B. Wetherill, member of the local Optimist Club, who took out enough time last week to run down to Chattanooga to attend the national convention. Accompanying Mr. Wetherill were Mrs. Wetherill and Sheriff H. E. Hoffman and wife. Quite a few of the Optimists looked askance at the sheriff but found him a dandy good fellow. The sheriff was quite taken by the flowers on Signal Mountain until someone called his attention to the fact that there was a ban on plucking same, then the Delaware county law enforcer spent considerable time hunting up someone with whom he could square himself.

The Muncie crowd came home boosting southern hospitality and Tennessee's "Land of the Sky."

WHEN FACTS WERE PRESENTED**Workmen Get a New Slant at the Situa-
tion**

In speaking of wages the other day a contractor reminded some disgruntled building trades mechanics that they were working for him; instead, they were working for Muncie citizens who were building. Their attention was called to the fact that the contractor merely was the agent, the superintendent for the owner. The contractor asked the workmen if they had ever stopped to consider that oftentimes they are getting \$1 or more an hour while the home builder, the owner himself, is making but 75 cents or 80 cents per hour, yet they the workmen howl for more and more pay. When this takes place they are not squeezing the contractors, rather, the owners who save laboriously that they may own a home, and upon these latter the workmen are dependent, yet they would make the burden the heavier. Long after the mechanics are through the owner is still struggling to meet the obligation that high wages inflicted upon him. Most building is done on a loan basis in Muncie as elsewhere, and if the workmen given no thought as to where the money comes from, forget the earning capacity of the would-be builder and seek to carry wage levels to where those who would build can not assume the burden not only will building stop but the workmen will find their wage bubble has burst and that they are without employment.

Several of the mechanics who were arguing the other day admitted they had not stopped to give the owner of the new house who was making around about 75 cents per hour a thought, that they had simply looked no farther than the contractor as a source of their pay. As a consequence of the talk they went back to work and no more grumbling was heard.

GROWTH AND ACTIVITY OF I. S. OF A. BROUGHT OUT AT ANNUAL CONVENTION SESSION

New Officers Elected

The annual meeting of the Indiana Society of Architects at Indianapolis Saturday, June 23, while not developing any particular feature did demonstrate, through various reports of committeemen, that the Society has grown and accomplished things the past year that, except for the co-operation that has been exercised amongst the members of the state profession and allied interests of the building industry, in previous years would have been impossible.

Instances were cited where the Society had attracted to itself public recognition and been accorded an influence that even many architects have failed to appreciate. The recognition came through moves made by the Society not in a selfish spirit but in moments of constructive and progressive effort for the advancement of building conditions and the industry as a whole.

The evidence at hand denotes that the Society has given to the architectural profession and to the individual members a prestige not enjoyed in other circles before. A publicity has been afforded through the daily press all through the state, a publicity clothed with dignity and couched with an air of progressiveness that breathed of broader thought than had been attributed to the architects as a class previously. Through the actions of the Society the public seems to have come to a realization that the profession has cast from itself the mantle of clanishness and narrowness that seemed to once envelop it.

(Continued on Page 15)

THE MEMBER WHO THINKS

Too Many Neglect To

"About once in a blue moon," says the secretary of a contractors' association, "we run across a member who thinks. This member is not one of those who shakes the most hands—although he knows of the value of sociability—but he is usually the member who thinks about his membership and his obligation to his organization even when he does not want a few rules for his special accommodation."

"In other words, this member belongs to the organization twenty-four hours a day. He is critically jealous of it. He does not spend his time in the dark corners with Tom, Dick and Harry, telling about the way in which things are going to rack and ruin. If he has anything to say he comes out in the open with it and what he suggests is a remedy and not a requiem."

"I have often wondered what the effect would be if every member of a builders' organization would think about it just five minutes a day. The trouble with most men is that they expect a paid secretary to do their thinking for them."

"This is all right in a Quaker meeting but when tried out in an association it keeps the secretary so busy thinking about the members that he has no time to devote to thinking of the organization."

"The greatest asset to any organization is a roster made up of men who think to think. The modern economist has discovered that it is not labor that produces all wealth but that the man who labors without thinking works for the man who thinks and reasons without doing much manual labor. It is the thought back of every project that results in constructive accomplishment."

"With thinking comes knowledge and with knowledge comes understanding and with understanding comes mastery over circumstances, opposition and fate."—Bulletin of National Association of Builders' Exchanges, June issue.

THE WHY OF THE COST.

Prospective Builders Continually Demanding Better Homes and Buildings.

To the average person who first receives information regarding the cost of a new home, the price seems high. But when the facts are analyzed he soon sees that the increased costs are due more to higher standards of living than to higher labor and material charges. Just as an illustration in the home of a few years ago in the way of electrical

equipment it was thought that one center outlet in the ceiling and one wall switch to a room was all that was necessary. The most per outlet today is but little more than at that time, but what is of more importance, the owner instead of being satisfied with two or sometimes even one outlet per room, must have three or four wall bracket outlets, a couple of receptacles for the mantel shelf, two or three base board receptacles and some of the lights controlled by three-way switches. Instead of having twenty to twenty-five outlets in one house, the average house of today requires sixty or seventy. And then in addition to the expense of all this extra wiring it must be remembered that fixtures must be supplied for all of these outlets.

Just so is it with other features that are incorporated in new building today. The owners want conveniences, they want protection against fire hazards, and countless other little things all of which send construction costs mounting in comparison with costs of other days when buildings were not more than four walls, a roof, some floors, windows, a few lights and just ordinary plumbing.

With a complete understanding of what goes to make up the cost of new buildings and so long as raw material can be furnished at the present prices there is no justifiable reason why building operations should not cost more than in other days.

REGARDING MINIMUM WAGES.

Judge Landis Held That the Word Minimum Creates a Big Loop Hole.

Judge Landis, in making his famous decision in the Building Trades Arbitration announced that he would not allow the word minimum to be used in connection with the wage rates approved by himself. He said that he was not going to allow any one to make a new rate of wages almost immediately after he had fixed one rate, and that the wages he fixed were going to be the rate during the term of the agreement he was then passing upon.

Some trades in Chicago are disposed to ignore this important provision in their agreements and are insisting that the word minimum be inserted in their new agreements.

Organized Contractors generally recognize that to do this would be a step backwards and propose to insist that the wage as stated in the agreement shall be both the minimum and the maximum.

GROWTH AND ACTIVITY

(Continued from Page 5, Col. 1)

President Mahurin ably described the situation in his address when he said a power has been thrust into the hands of the Society entailing a responsibility that everybody but the architects appear to be awake to. The chance has come to the architects of Indiana to assert themselves, and yet there are those who fail to show an interest in this opportunity, those who hold aloof from the organization. The benefits are accruing and the time is not far distant when every architect will be reaping of those benefits, deny it though he may try to do. There is no getting away from the fact that the loyal members of the Society, the men who pay their dues, are carrying the burden, thus seeking to place the architectural profession of Indiana on a high plane of recognition, regardless of the fact that some of their fellow architects ignore the responsibility that is rightfully theirs also. There is no justice in such a situation, but, until all architects arise above the thought of self, throw off the narrow spirit of envy and petty jealousy, and one and all acknowledge the common cause the Society shall continue as it has despite the hobbles of selfishness that would seek to retard.

Reviewing the work of the year attention was directed to the regional meetings held at Fort Wayne, Terre Haute and Evansville, to which were attracted architects and draftsmen of those cities and surrounding territories who had never before been to an I. S. of A. gathering or shown a direct interest in the organization. Several new members have come into the Society as a result of such meetings and it was moved and carried that they be continued.

Concerning membership, George W. Allen, Laporte, chairman of that committee, reported 123 members, ten of whom were taken in during the past year. He made an interesting detailed report showing the distribution of membership throughout the State. A special vote of commendation was given Mr. Allen as a mark of appreciation for the efforts he had put forth to build up the Society.

Secretary Harrison brought up the

matter of dues and the fact that many members were still in arrears in the payment of same. He explained, and was backed up by the treasurer's report, that in the work the Society has undertaken expense is entailed and the Society must have funds in order to "carry on." He expressed the opinion that since this work in the interest of all the State architects it was incumbent upon all of them to help shoulder the burden and not just a few of them.

Other reports by the various committee chairmen proved interesting in showing the Society to be active in sundry departments.

Particularly interesting was the report of Fernor S. Cannon, Building Code Committee chairman, recently named chairman of the Advisory Committee of the Administrative Building Council of Indiana, stressing upon the co-operation exerted by the Architects, Engineers, Contractors and Labor in effecting this new state body. Mr. Cannon reported that organization had been effected and that it was hoped to get the Building Council functioning soon.

Architectural registration was touched upon by A. F. Wickes, Gary, delegate to the National Board of Architectural Registration meeting at Washington, D. C. Inasmuch as Indiana has no such provision for architects, the suggestion was advanced for the formation of a private board, the details for which will have to be worked out. The aim is to secure reciprocal relations for Indiana architects in states where registration is required.

The following amendments to the constitution were voted:

Article 5: Sections 5 and 7 shall be combined so that the Committee on Publicity and the Committee on Public Action will be one committee.

Moved, seconded and carried.

Article 8, Section 2, that the regular meeting of the Society shall be changed from the fourth Tuesday to the fourth Saturday in June, and from the hours of 3:30 to 8:30 p. m., to the hours of 10:30 a. m. to 9:30 p. m.

Moved, seconded and carried.

Section 4, that the meeting date of the board of directors shall be changed from

the fourth Tuesday in June to the fourth Saturday in June.

Moved, seconded and carried.

Board of Directors shall be elected for one, two, three and four-year terms so as to provide for the continuity of the policies of the society.

After much discussion it was moved by H. A. Scherrer that this be referred to a committee of three to be appointed by the president, who shall give consideration to the subject and submit a report at the next semi-annual meeting.

These men were elected to office for the ensuing year:

President, H. M. Griffin, Connersville; first vice-president, Harry E. Boyle, Evansville; second vice-president, Ewing Miller, Terre Haute; secretary, Merritt Harrison, Indianapolis; treasurer, Wilson B. Parker, Indianapolis; chairman entertainment committee, L. A. Turnock, Indianapolis; chairman pageant and exhibit committee, Kurt Vonnegut, Indianapolis; chairman legislative committee, Warren D. Miller, Terre Haute; chairman membership committee, George W. Allen, Laporte; chairman publicity and public action committee, Herman Scherrer, Indianapolis.

In addition to the business session there were trips about the city, the delegates and visitors being conducted to quite a few of Indianapolis' large new structures. Saturday night there was a dinner and entertainment in the Travertine Room at the Lincoln Hotel.

Those present were: Harry M. Griffin, Connersville; A. E. Neucks, Evansville; Rodney Leonard, Frankfort; Guy Mahurin, Fort Wayne; Charles Brossman, F. S. Cannon, William Clemens, R. F. Daggett, Stephen Dark, Herbert Foltz, William Garns, Donald Graham, Merritt Harrison, Otto Mueller, W. B. Parker, Herman Scherrer, L. A. Turnock, Fred Wallick, Caleb C. Wright, A. A. Honeywell, Clarence Myers, Kenneth Coffin, Indianapolis; Walter Schober, Lafayette; George W. Allen, Laporte; John Fritz, Linton; W. W. Schneider, South Bend; Warren Miller, Charles Scott, Terre Haute; J. W. Gaddis, Vincennes. Visitors: J. H. Owens, field representative, Associated Building Contractors of Indiana; Lawrence Sheridan, executive secretary City Planning Commission, Indianapolis.

MOVE FOR BETTER BUILDING CODES APPEARS TO BE THE INCLINATION

Evansville in Line With This Progressive
Thought

The thought given to better building in Evansville as shown by efforts to effect a more up-to-date city building code is right in line with the progressive moves in that direction that are attracting the attention of building men and officials throughout the country. Right here in Indiana the new Administrative Building Council has been organized under the state law and will seek to institute regulations that will provide for standard state-wide building construction requirements.

Then, too, the Building Code Committee of the United States Department of Commerce is making good progress in its efforts to standardize building law requirements in the United States and so remove several existing incongruities and aid in more efficient utilization of materials.

The committee has issued the first report entitled "Recommended Minimum Requirements for Small Dwelling Construction" and has a qualified subcommittee at work drafting similar requirement covering plumbing installations.

The main committee is planning to have its next report cover various general details applicable to all buildings other than private dwellings. Among these is the question of allowable floor loads for different occupancies. Many strong requests have been received for the committee to make recommendations on this subject. The task has been undertaken but the committee desires to base its suggestions upon well-established facts.

Data Scarce

Up to recently, actual floor load data have been exceedingly scarce. The variations in existing code requirements are wide and give ample evidence of years of copy work.

During the last few months some careful studies of office buildings have been made for the committee and a summary of these was given to several technical periodicals for publication in the hopes of securing similar data (preferably on

different occupancies) from other sources; also to stimulate others to make studies for the committee's use.

As all members of the committee are giving voluntary service to this work, they feel they are justified in taking the liberty to make such appeals for information which is to be used for public benefit.

CHIPS AND SHAVINGS

General contractors, C. Kanzler & Son, have begun work on a new sixty-five-foot coal tippie for T. C. Bugg, coal operator. These builders report satisfactory progress on their numerous projects under construction about the city.

Estimating requests continue fair with the result that local contractors are busy on that score. If practice makes perfect then Evansville contractors should be close to perfection, for estimating this season, almost from the first of the year, has been steady and heavy.

BEAT THE BARRIER, TO SPEAK IN RACING PARLANCE

Fort Wayne Building Operations Right
in Line With Suggestions From
Herbert Hoover

One might imagine from the 1923 building performance of Fort Wayne that her citizens, the prospective builders, had an inside tip from Herbert Hoover, for they have coincided with his advice; in fact, have proved they were far ahead of him.

Mr. Hoover advised that government building be held in abeyance, but that residences, business structures and factories are needed and should be pushed through with dispatch.

Though it is doubtful if the volume of government building construction would reach a proportion where it would infringe seriously upon the demand placed upon Labor and the material supply by private building activity, nevertheless a postponement of government work will to some extent relieve the situation and create a greater Labor supply and turn

more building material into private channels.

As for Fort Wayne, her citizens seem to have analyzed conditions and, convinced that no material changes could be expected, have gone right ahead building the essential kind of structures so necessary to the continued growth of the city.

The wisdom of local citizens is substantiated by expressions advanced by economists and wise business men who by their remarks admit they realize that building material will certainly not go down in price; that labor wages will not be reduced; that brick and lumber and roofing and building hardware will not be reduced in cost to the householder.

And another thing that the average householder can do to encourage the building of more structures is this, let him use every effort to keep prices down to a reasonable plane. If prospective builders use good business judgment and common sense, if they deal only with responsible firms or individuals, and if they look continuously for good goods and reasonable prices and excellent service at only reasonable prices—then the building boom which is on in Fort Wayne is apt to continue and the whole community and all of its citizens will gain because of the continued activity. If manufacturers of building wares are permitted to raise the price higher than it should be there is bound to be a reaction against building. Against such a condition everyone interested in Fort Wayne and Indiana building should work unceasingly in order to keep up the activity.

ORDINANCE PASSED TO RESTRICT GARAGE CONSTRUCTION

The city council has taken another whirl at regulating building construction in Fort Wayne, this time devoting its attention to garages. By a vote of 12 to 3 the city fathers passed an ordinance carrying an important amendment which not only specifies that the filling stations must be 300 feet from any park, church, hospital or school, and twenty-five feet from a residence building, but also sets forth that the building must be of fireproof material on the outside and that all woodwork on the inside must be covered with fireproof material.

There was some opposition to the ordinance and it was contended that the measure could never be enforced because one of the sections states that any station built contrary to the provisions of the ordinance is declared a nuisance. The point raised was that the city council does not have the power to declare a nuisance but that this is a matter for the courts to decide. However, several lawyers expressed the opinion that the ordinance could be enforced.

McLeland, O. P., as contractor, and Mrs. Helen N. Biedermann, as owner, to erect a dwelling house on lot 649 Northcliffe add. in Washington township for \$11,000.

AN ORGANIZATION WITH A GOOD MISSION

Should Prove Helpful to Indiana Contractors

There is a proposition on foot at Indianapolis that, if it matures, should prove beneficial to the contracting fraternity not only of that city but, if extended in its scope, to the builders' working organizations throughout the state.

The scheme, fostered by the men concerned themselves, is to organize an association of construction clerical men in order to keep in close and direct touch with the employment situation. Membership will be limited to men who have had actual experience in construction clerical work, such as chief clerk, material man, timekeeper, checker, spotter, etc. As a result of this limitation the organization will at all times be composed of men not theoretical construction clerical help alone but those who have put their learning into successful practice.

In addition to working for the benefit of its members to keep them actively employed the organization will be in a position, at any time, to supply suitable practical men for any clerical work required on construction operations. For instance, if a contractor needs a chief clerk, or any other employee for his office work, a man can be obtained from the new organization who will be thoroughly qualified, who can do and has done just the kind of work required.

The organization is still in an embryo state but is expected to blossom forth shortly. There is merit to the scheme and its utilitarian feature is attractive. Such a body has a mission in that there is nothing like it in the Indiana contracting field and in its position of being able to supply competent help to contractors would fill a long felt want.

START MADE

State Building Council Holds First Official Meeting

The administrative building council of Indiana, the newly created state body to provide better building for the State through the institution of standard building requirements and a more systematic supervision, met Friday, June 29, at the State House to effect permanent organization. Officers were to be elected and steps taken toward drafting rules and regulations.

As the result of the efforts of Indianapolis contractors, architects, engineers and Building Trades Labor, backed by their colleagues throughout the state the general assembly this year passed the Van Orman senate bill creating a state building council, to consist of an administrative committee of three members and an advisory committee of twelve members. The administrative committee consists of the secretary of the state board of public health, the chairman of the state industrial board and the state fire marshal. The advisory committee consists of three representative architects, three engineers, three building contractors and three representatives of building trades Labor.

Both committees have met and organized separately, the advisory committee having been appointed by the administrative committee. The meeting Friday was the first joint meeting of the committees, and the council was actually formed at that time. The advisory committee is working in an endeavor to obtain the codification of all state building laws.

NEW INTEREST MANIFEST

State A. B. C.'s Following Up Same With Membership Campaign

Many inquiries are coming in to Indianapolis to the headquarters of the State A. B. C.'s asking for information regarding this body and details as to how to proceed in the organization of local city associations. Evidently the work being done by the State A. B. C.'s is attracting attention and beginning to tell, for the letters arriving have come from contractors and builders located in various sections of Indiana where no association attempt has been made before, or, having been made, was allowed to peter out.

While the state contractors' organization has studiously looked after the builders' problems, opposed inimical legislation, and in other ways sought to guard, strengthen and further the interests of the building industry, nevertheless, because there were no "fireworks" little credit was given the efforts expended. However, the last legislative session produced tangible results and a new interest seems to have been aroused in the State Association.

In addition to taking care of the late inquiries those at headquarters are actively engaged in promoting the organization's work and, to that end, are making a membership drive. Through various Indiana city Chambers of Commerce and other agencies, the names of hundreds of contractors, general and sub, have been secured both in the medium sized cities and smaller towns and an intensive campaign is being launched to bring these men into the organization realm.

The program mapped out is not an easy one, and it will take time to consummate it but every effort is to be made to create a solidarity in building contracting ranks that will mean greater unity of action by the contractors and also provide a bulwark against onslaughts that might be attempted to cause discord amongst the builders in order to achieve selfish aims. A unified contracting industry in Indiana will do more to encourage good working conditions, inspire confidence and insure a greater tone of stability the year round than any other one thing that might be introduced into the building industry. And, that is the aim of the Associated Building Contractors of Indiana.

Hammond, Indiana**EXTENSIVE IMPROVEMENTS
PLANNED****Would Make of Hammond a Modern
City**

If certain propositions that are now being entertained are carried through to completion Hammond is due for an extensive transformation and one that will make old settlers rub their eyes and take a second look to convince themselves that they are still in the old town.

The administrators of the Jacob Rimbach Estate which includes nearly the entire frontage on the south side of Sibley street from Hohman street to the state line are figuring on some big changes and improvements. At the present time the Rimbach home and fifteen cottages occupy the above tract; the cottages have been sold and are being moved to other locations, and the old homestead is to be placed on the market to be sold and moved also. It is then the intention to widen Sibley street, 20 feet, and erect business buildings along the site. The idea is to make Sibley street the main thoroughfare between Hammond and West Hammond.

In line with the above the street car company is contemplating the extension of its line west on Sibley street and then on to the new Ford plant.

Then, too, the Board of Works has started proceedings to provide for the widening of Hohman street and State street from Hohman to the state line. These latter improvements will entail a large expenditure of money as the street is built up solidly with business buildings, but the owners are of the opinion that the benefits to be derived from the improvement will greatly offset the cost.

Again, the Chamber of Commerce and the Board of Works have had several joint meetings with the officials of the railroads entering Hammond to work out a feasible plan for a track elevation scheme.

When worked out these various propositions will make of Hammond a real for sure city.

CALLED OFF**Joint Election on City Consolidation
Fizzled Out**

And so many citizens had gotten all worked up about it, too. At the last moment City Attorney McMahon advised Mayor Brown to call off the city amalgamation election that was scheduled for June 26. Since East Chicago rescinded her action regarding the election there was nothing left for Hammond to do but to call off the affair. The proposi-

tion was to have the citizens of Hammond, East Chicago, Indiana Harbor and Whiting vote on the proposition to incorporate the four into one big city. It seems now that those really active in sponsoring the election were mostly bankers and politicians.

THREE CHEERS!**Railroad Does Away With Unsightly
Structure**

Thank goodness an old eye-sore for years in Hammond is passing. The old coal storage plant of the Erie Railroad formerly used for storing and grading coal is now being razed, for which Hammond citizens are duely thankful.

**TRUE CONCEPTION OF ORGANIZA-
TION NOT YET GRASPED****Many Contractors Fail to Appreciate
Continuity of Effort Necessary**

One of the serious handicaps of association effort among contractors has to do with the idea from which many contractors can not free themselves, namely, that the organization is but a place of refuge to which to flee in time of trouble and peril. Just let things run along smoothly and contractors are prone to forget the organization. They go along doing about as they please and in their selfishness think not of their business from the standpoint as a whole but from an individualistic slant. Then conditions arise with a tendency to hamper operations; jurisdictional disputes loom; wage controversies are in order; building affairs grow unsettled; at such times the contractor's thoughts turn to organization ideals, they rush together all calling for aid and hurriedly seek to map out a campaign for mutual protection and in their excitement flounder around grasping at straws like a drowning man. They are never prepared for the storm and, because they are not, they suffer, the industry suffers, economic waste results, and outsiders view with alarm the chaotic state in building construction circles, a state that distorted rumors magnify, and the contractor, because of his negligent attitude toward preparedness, condemns the organization scheme because it can not so adjust itself at a moment's notice and settle his difficulty. This applies not alone to Muncie, every locality experiences the same situation.

On the other hand as opposed to the contractors is Labor, organized financially backed by its rank and file, on the job 365 days in the year prepared always to protect itself. Not only that but it is figuring out legislative activity, making surveys of local situations, advising its departments in all localities just what is transpiring in all sections of the country. Labor in Hammond, Kokomo, Ft. Wayne, Evansville,

Indianapolis, Muncie, Terre Haute, in fact all the big cities, knows exactly the situation in each of the various municipalities. The same can not be said of the contractors, there seems to be lacking an appreciation of the value of keeping informed.

Labor pays its dues and considers the money well spent; the contractor is inclined to expect a monetary return for the money paid in, failing to place a value on the effort the organization or association is compelled to exert in order to insure auspicious conditions. Broader vision must seize upon the contractor generally, and when it does many of the barriers met will be removed, until then not.

CAN BE SOLVED**Labor Shortage Subject to Remedy if
Tackled in Earnest.**

There is no getting away from the fact that those interested in building, especially the contractors, can solve the labor shortage problem if they would but concentrate on the subject, exert an earnest endeavor toward the encouragement of apprentices, and interest the educational authorities in the matter of training youths in the building trades. Think how much more beneficial Indiana's vocational training system in the public schools would be if the boys were taught a real trade rather than the smattering they get now at making knicknacks, possibly a chair, a table, a medicine cabinet, maybe a lamp or some insignificant wrought iron ornament. Much money is being spent on so-called vocational training all over Indiana, and yet, what does that four years training actually profit the thousands of boys who indulge in it? On the other hand, supposing those boys had actually learned a trade during their school years, they would at least have been fortified with a means of livelihood instead of having to cast around and grab off most any old job.

Muncie contractors, like others, have neglected their obligation to their industry in not giving enough practical thought to the ways and means of rehabilitating Labor's ranks. Nor will the situation, most annoying, be improved one iota until the contractors awaken to the fact that it is up to them to go after the matter.

Many contractors hold back and are loath to tackle the problem because it looks like a long hard pull. However, out in San Francisco they didn't meditate, they acted and this is what was done:

During the year ending May 1, 1923, there was trained a total of 460 apprentices through schools for plasterers, plumbers, bricklayers, painters. Thus not only has the acute shortage which existed in these trades last year been wholly relieved, but over 460 young men are now well on the way toward becoming skilled mechanics.

Indeed, a few of them (those with longest experience on the job) are now earning full journeyman's pay, and many others are earning only a dollar or two less. As the wages of all apprentices are based strictly on merit, and each paid according to what he can actually produce, the daily wage these young men are receiving is the most convincing proof of their proficiency.

AIMS TO ASSURE BETTER BUILD- ING CONSTRUCTION AND AT SAME TIME REDUCE COST

Such Is Purpose of State Building Council Law

There has been some adverse comment on the new "Administrative Building Council of Indiana" law, probably because it has not been thoroughly understood.

The main purpose of the new law is to put machinery in operation that will standardize building construction requirements throughout the state and reduce building costs.

The previous laws were sufficient to cover design, construction and final inspection.

Inspection of completed structures is practically all that is now done. The departments are not organized to give expert building advice.

The result of the foregoing was an increased cost, for the following reasons:

(a) Duplication of inspection by three departments where the inspection from one department can be made a three-copy report.

(b) Duplication of inspection where order is made to change and again inspected to see if satisfactorily completed.

(c) Travel expense by department inspectors on trivial matters which may be done by local inspection.

(d) Local inspection may be by letter of instruction referring to the rules of construction issued by the council.

(e) Inspection after completion many times requires changes which cost money and lost time to the owner.

(f) The rules of construction carefully co-ordinated with rules of final inspection and prepared as far as possible in non-technical language will insure approval on final inspection.

(g) The local ("home rule") inspection provides for an inspection during

construction and avoids travel expense.

The difficulty of operation under the above conditions was that there were too many interpretations by architects, engineers and builders as to what was the proper form of construction to satisfy inspection rules.

Under the new order all Indiana building laws will be codified and interpreted from one central body composed of representatives from the Industrial Board, the State Board of Health, the State Fire Marshal's Office, State Architects', Contractors', Engineers' and Building Labor bodies.

The Administrative Building Council has been fully organized and is now working out rules and regulations for its guidance.

Despite criticism that has been directed at the new Building Council, the State Building Industry as a whole looks upon the law that created it as the most constructive piece of legislation ever fostered and advocated by the Indiana Building Interests.

AMERICAN CONSTRUCTION COUNCIL TO OPEN NEW YORK OFFICE

To Keep Statistical Tab on Building Conditions

Officers of the American Construction Council announce that an office will be opened shortly at 62 West Forty-fifth street, New York. In commenting on some of the activities which will be taken up by the council, Mr. Roosevelt, its president, has the following to say:

"The council will issue a weekly construction forecast indicating the presumptive demand for labor and materials of the various classes entering into building construction for a three months' period. Such a forecast showing the requirements three months ahead, whether in excess of normal or otherwise, will be an invaluable guide to the public, to labor, to financial interests and to those contemplating building operations in determining the program to adopt. The council is establishing a bureau of statistics and business information for distribution of facts relating to raw materials, fabricated products, transportation wholesale and retail distribution and labor. Such knowledge broadly distributed should prevent such crises as we now face in the construction industry.

Some two hundred and fifty national associations are directly or indirectly represented in the various groups which constitute the American Construction Council. Architects, engineers, construction labor, general contractors, subcon-

tractors, materials and equipment manufacturers, materials and equipment dealers, bond, insurance and real estate interests, construction department of public utilities and the construction departments of federal, state and municipal governments are participants in the broad organization. They have approached the matter with the consciousness that the construction industry in its ramifications is second only to agriculture in the magnitude of its operations and its importance to the American people."

ARCHITECTS MUST AWAKEN TO RESPONSIBILITY THAT IS THEIRS

Activity and Achievements Have Brought Real Recognition to State Society

In his welcome to those attending the annual convention of the Indiana Society of Architects President Guy Mahurin, Fort Wayne, implanted a strong personal plea to the architects to line up with and back up the organization. There was a tone of sincerity in his words that was unmistakable, an earnestness that was appealing and a conviction not to be denied as he recounted the aim, purpose, achievements and sought to contemplate the future of the Society. He said in part:

"Gentlemen of the Convention:

"Again it has been our privilege to make this annual pilgrimage for the purposes of renewing old acquaintances and forming new ones, of meeting the men who have undertaken tasks similar to ours and talking over the problems that have been confronting us in our common efforts of the past year. In behalf of the official staff, and for these princes of good fellows who are responsible for this hospitality, I extend to you the greetings of the Society.

"In accordance with a time-honored custom, it is necessary for the president to briefly review the activities of the past year and to indulge in a few words of kindly advice to the incoming official family. Personally, this association has been one of the most pleasant experiences of my life, an experience not only of good fellowship, but of a very definite practical value. It has been to me a conclusive demonstration of the theory that association, co-operation and mutual understanding among the architects of our state constitute one of the greatest forces for the advancement of the pro-

ARCHITECTS MUST AWAKEN

(Continued from Page 5)

fession. Your Board of Directors has during the year been experimenting with this theory, and I think will bear me out in the conclusion that each regional meeting has been a greater success than the preceding ones only because the enthusiasm had been spreading. I firmly believe that the regional idea is practical, and if developed and properly organized will make the Indiana Society of Architects a greater power in the state and a more intimate factor in advancing the business of practicing architecture. The fact that it has heretofore seemed impossible, or impractical, to organize the architects of a single community and maintain that organization in peace and harmony I believe is because there has been no mother organization to hold them together. How long would be the existence of your Rotary and Kiwanis clubs, your Insurance and Real Estate Exchanges, your political clubs and the hundreds of other organizations that have grown in power and influence in the last few years were it not for the influence of a greater organization that binds them together and nourishes them with enthusiasm and loyalty? The town, city and state are the vitals of our Government; but how long could they thrive were it not for the great central government that welds them together? Again, what would be the strength of an International Rotary or Kiwanis, or of a government, were it not for the smaller representative bodies? It seems to me that the Indiana Society of Architects has grown to that extent that it will not function properly without the establishment of local or regional units; and I believe that the regional units will be made possible through the influence and guidance of a state-wide organization.

"The work of establishing and organizing regional clubs has not yet been undertaken. Your board of directors, as I have said, have thus far only conducted a series of experiments and we do not feel that these experiments should be converted into a definite constructive policy without the consent and co-operation of the Society.

"The Society has grown strong, and is growing stronger with but compara-

tively little effort on the part of its membership. It is recognized by the state and public as a dignified body: not by reason of any power it exerts nor through any united effort or display of enthusiasm, but because of a recognized necessity for such an organization. The architect occupies too important a place in the commercial and artistic elements of our national life to evade this recognition; we are confronted with it whether we invite it or not. I hesitate to estimate the extent of its influence if the members of this Society ever get down to work and make of it a serious and vital part of their business.

"I am not unmindful of the splendid work that has been done by many of our members. The passage of the Building Council Law was the beginning of one of the biggest things that has ever been accomplished, and much credit is due the Society for its part in this achievement. Your board of directors has been diligent and faithful in the performance of its tasks. The committees have responded promptly and efficiently and their work was well done. But as an organization I do not believe the Society as a whole has yet recognized its responsibility. When this awakening comes we will see our opportunity and there will be for someone a real job. And when that job is finished there will be not a single reputable architect in the State of Indiana but that will hold his membership in the Society as a most valued asset in his profession.

"Through some weakness in the administration of our affairs it has seemed to me that we do not have the full support and whole-hearted loyalty of the entire membership. We have not yet been able to sell this Society 100 per cent to every member. This is evidenced by the fact that we do not have a larger attendance at these conventions. Many have neglected for some time to pay their dues. Many of the best architects in the state do not yet feel the need of a membership in this Society. I am informed on good authority that from now on this is going to be a dues-paying Society, or else there must be another change made in our by-laws.

"Perhaps it will not be possible to entirely exterminate that deadly germ of professional jealousy that saps the strength of this organization. But I hope the time may come when the archi-

tect will feel a greater concern toward the jobs that he has than for the jobs that the other fellow gets; when he can glance down the pages of the Recorder and see a long list of school houses that Elmer Dunlap landed without getting sore, or two new million dollar office buildings with Bob Dagget's name attached without wondering how he gets away with it. I believe that the easiest way to get business is to let the people know that you are going to give them a full measure of intelligent service. When you get that kind of advertising over and can make it good, your greatest trouble will be to hire enough draftsmen to get the work out, and you won't have much time to worry about the other fellow. This theory does not emanate from some soft spot in my brain, but is merely one of the things I have observed in getting acquainted with other architects."

REMOVAL NOTICE

Indianapolis Architect Changes Office Location

Herbert Foltz, one of Indianapolis' best known architects, who for a number of years has been located in the Lemcke Annex announces the removal of his office to Suite 704-710 in the new J. F. Wild Building, 123 E. Market St.

ERSTWHILE PROMINENT INDIANA ARCHITECT DIES

Built Many Courthouses in His Younger Days

Brentwood S. Tolan, age 68, prominent architect and designer of public buildings in former years, died at the Lutheran hospital, Fort Wayne, June 30, after a prolonged illness from a complication of diseases. Mr. Tolan designed the courthouses for Delaware county, Muncie, Ind.; Whitley county, Columbia City, Ind.; Laporte county, Laporte, Ind.; Kosciusko county, Warsaw, Ind., and Allen county, Fort Wayne. He also collaborated with his father, Thomas J. Tolan, in designing the courthouse at Chattanooga, Tenn.

He was born in Delphos, Ohio, and moved to Fort Wayne in 1874, remaining there until five years ago, when he entered a partnership in Lima, Ohio.

NOT UP TO MAY, BUT BUILDING
FIGURES SHOW GAIN OVER
JUNE, 1922First Six Months' Total for 1923 Is 119%
Ahead of That for 1922

While slipping back behind the volume for May, the Evansville building figures in June compared favorably with those for the corresponding period a year ago and added materially to the total business for 1923.

During the month of June this year there were granted 216 permits with a total estimated valuation of \$275,685 as against 166 permits for \$244,370 for the same period of 1922. This was a gain of 50 permits and 12.8 per cent as regards the money involved. The June figures ran 7.3 per cent behind the May, 1923, estimated valuations.

The local building figures for the year to date are:

Month	Per	Est. Val.
January	116	\$ 208,000
February	94	450,898
March	213	353,465
April	270	969,175
May	243	297,454
June	216	275,685
Total, 6 months	1,152	\$2,554,677
6 months, 1922	948	1,166,134
Gain, 1923	204	\$1,388,543

NO LET UP APPARENT

Business in Building Circles Holding Up
Nicely

Though local building statistics of late would indicate that there has been a let down in Evansville construction work, there is no surface indication of same. To all appearances the steady pace that has been maintained right along throughout the year is being continued. Evidence of the activity is apparent on all sides even to the business sections of the city where stores and other commercial structures are being remodeled and added to. Out in the suburban districts new houses in all stages of construction are to be seen on all sides and the contractors are finding a steady request for estimates on prospective work. As for employment the situation among the build-

ing trades crafts was never better, there being a heavy demand for their services.

CHIPS AND SHAVINGS

The Vanderburgh county commissioners have under contemplation the construction of a county garage wherein to house and store the county's motor and highway equipment. A gasoline filling station and repair shop would be included in the scheme. It is estimated such a structure would cost from \$27,000 to \$35,000.

Contractor J. P. Wilkinson has been awarded the contract to erect a new home for Louis Hahn in Bayard Park Drive.

Scarborough-Davies Co., general contractors, have the reinforced concrete roof slabs on the Franklin garage poured.

ALMOST A QUARTER OF A MILLION
DOLLARS FOR NEW RESI-
DENCES LAST WEEK

House Construction Active

Permits for forty-four residences were issued by the city building inspector during the seven-day period last week. The total estimate of the value of the new homes is \$235,779. None of the estimates is for a large amount, the greatest being for the sum of \$9,500 and the average being for little more than \$5,000.

INDIANA CONTRACTORS DON'T
KNOW WHAT TROUBLE ISOthers Have Had Real Barriers to
Surmount

Fort Wayne contractors along with those from other Indiana cities who may have thought they had troubles this season because of seeming labor shortages, wage disputes or delayed material shipments should pat themselves on the back because they got by so easily, for Chicago and New York contractors would have thought they were in clover had Indiana conditions ruled in their sections.

Just to bear out the argument, listen to what the New York contractor has been and is up against, a situation as described by the Monthly Bulletin of the

Associated Builders of Chicago:

"The New York contractor has had all the little difficulties to contend with during the 1923 building season. In addition, to make life interesting, he has faced or is still facing:

"A brick shortage which threatened to halt nearly all construction for two weeks.

"A militant strike by property owners against high building costs which has postponed \$100,000,000 worth of construction.

"A strike of 5,500 bricklayers for \$1.50 an hour and a two-year contract (now settled since grant was made).

"A sympathetic strike of 6,000 bricklayers' helpers (now off).

"Snowball strikes' in nearly all trades which brought wages decidedly above contract levels.

"Threat of a general strike by the old New York Building Trades Council unless its members were given a bonus of \$1 a day.

"The New Yorker's troubles began early this year when the building boom in the various boroughs began to indicate its huge peak proportions. There being no authority to enforce the living up to of wage agreements, the 'snow ball strike' made its appearance.

"The 'snow ball strike' fortunately is an evil which hasn't made itself felt in Chicago. It is simplicity itself in operation but a creator of large losses for the contractor who has to get his work done on time.

"A group of building mechanics will wait until a structure reaches a crucial point when it is most exposed to damage by wind and weather and then through a spokesman suggest that the whole gang is leaving on the morrow.

"Inquiry generally develops that there is a chance of higher pay on some other job. Of course if the contractor wants to meet the increase—

"Faced by a heavy financial loss the New York contractor usually did. He found to his sorrow, however, that the 'snow ball' artists were not content with striking once while a building was under construction. They repeated the process as often as they thought they could get away with it. Protests to union headquarters brought the bland reply that the strike wasn't sanctioned but if men wanted to quit, the business agents didn't know what they could do about it."

These are just a sample of conditions that have stared the New York contractor in the face. Again we say, the Indiana contractor should pat himself on the back and offer up thanks.

PLANS ON FILE

Country Club: 2 sty. and bas., 72x81x63, Charleston, W. Va. Archt., Louis Lott, Dayton, Ohio. Owner, Kanawa Country Club, Wanawa Holding Corp., Charleston, W. Va. Bids close July 10. Stucco, tile roof, frpf. constr., will contain dining rooms, kitchen, locker rooms, billiard room, bowling alleys, boiler room, ball room.

EARLY WAGE SETTLEMENT AND STEADY MATERIAL QUOTATIONS PLAY IMPORTANT PART IN INDIANAPOLIS BUILDING PROGRAM

Both Boost This Season's Activity

Among the greatest contributing causes to the promising building construction volume that has been piling up at Indianapolis so far this year were the fairly speedy wage settlements made between the contractors and the various building crafts and the steadiness with which the most essential material supply prices held.

Getting a good early start building operations boomed along up to April 1st, without interruption and then came the wage readjustment period. A long drawn out labor wage controversy would have been disastrous to building prospects and a determined effort was made to reach an early and satisfactory decision. It required constant work, but the end sought was achieved except in a few instances and these latter were later overcome.

Though increased scales were granted the margin was slight and the result attained was well worth the difference in that the working conditions were stabilized and work practically went right ahead with no great interruption, furthermore, the workmen have shown their satisfaction by producing.

On the other hand, despite the high price cry, quotations though ruling firm to strong have held steady since early

spring when slight increases were recorded. The only price advance since spring quotations went into effect had to do with cement which went up. Other material prices, considerably under those of a few years back, have held steady right along even under an almost unprecedented demand that has heavily levied upon the output of the factories.

The prospective builders who held off for lower prices even though advised that such was not to be expected, are no nearer their goal than away back last spring, while the men who could read the signs and reason and who went ahead with their projects are ahead in that they will soon be in a position to occupy their buildings and have lost nothing from their procedure since there is no indication of any construction costs decline for some time to come if at all.

NO ONE WORRIED

Slight Easing Up In Indiana Building Circles But a Natural One and Viewed With Favor

A decided lull made itself felt in Indianapolis building circles the past week, it being one of the most featureless periods that has occurred this year. The building construction under way is going ahead at a good pace, but new work seems to have fallen off. There were no contracts of any consequence awarded and no really big jobs put out for bids. Architects report things quiet and a slowing down of inquiries. The lethargy seems to have extended even to the city building inspection department where the demand for permits slackened considerably.

Though a quietness has descended upon building affairs the architects and contractors are not concerned greatly, rather, they attribute the let down to the fact that we have now entered upon the vacation season and people are more interested in their summer outings and trips than they are in building contemplations.

Architects and others who have been connected with Indianapolis building affairs for years say that the slowing up process is but a natural one due to the summer and that from now on till fall they don't look for much new work.

However, these men say the indication is that unless something radical occurs a revival of building construction can be looked for beginning along in September and extending well on into the months to follow.

There are those who view the present situation with favor in that it should allow much for the work now under construction to be gotten out of the way and ease up the labor supply situation in the fall, making the craftsmen more available at that time. As matters stood the visible supply of labor was heavily taxed and a respite was really needed to get the present volume of work started earlier in the year out of the way, the contractors thus not being forced to carry it on into the winter for completion.

While no great amount of new work is cropping out there has been no surcease from the actual active construction operations in force and everyone is more or less optimistic regarding the future of Indianapolis building.

BUILDING PERMITS

(\$5,000 and Over)

Week of June 28th to July 5th

Residence: \$25,000, 5555 Wash. Blvd. Owner, Mrs. Alex Taggart. General contract let to J. W. Darnell, 2435 Broadway. Brick veneer.

Building (general alteration and remodeling), \$48,000, 5 sty. building, 17-23 West Georgia St. Archt. and general contractor, J. Fred Brubaker, 157 East Market St. Owner, Havens and Geddes Co., 17 West Georgia St. Starting work.

*Church: \$15,000 (portable bldg.), E. 10th and Keystone. Owner, East 10th St. M. E. Church. Contract let to Kurman Brick Co., Hume-Mansur Bldg.

Residence: \$13,000, 31 East 52nd St. Private plans. Owner and builder, Henry L. Simons, 4244 N. Capitol Ave. Excavating. Brick veneer.

Residence: \$12,500, 37 East 52nd St. Private plans. Owner, Henry L. Simons, 4244 N. Capitol Ave. Excavating. Owner builds. Brick veneer.

Residence: (double), \$9,500, 649-51 N. Oakland. Owner, Southern Building and Realty Co., 604 Guaranty Bldg. Excavating. Owner builds.

Residence: (double), \$9,000, 2853-55 N. Talbott. Owner, Otis Kirkpatrick, 4151 Broadway. Owner builds. Excavating.

Garage: \$8,000, 1 sty., 70x62, rear of 382 So. Senate Ave. Owner, Hamilton-Harris Co. Contract let to Frank Meid, 538 W. 29th.

Residence: (double), \$8,000, 3636-38 N. Illinois. Owner, John N. Gaughan, 433 N. California. Contract let to I. N. Darter, 3015 Boulevard Place.

Residence: \$8,000, 339 N. Bolton. Owner, Oscar G. Carlstedt, 5861 Lowell. Contract let to H. Bodensick, at site.

Residence: \$8,000, 5130 East New York. Owner, J. A. Skinner, 324 Poplar Road. Contract let to E. F. Eytchison, 2519 N. Olney St.

Residence: \$8,000, 729-31 West 31st. Owner, Henry Syoeffler, 734 West 31st. General contract let to Chas. E. Smith, at site.

Stores: \$7,500, 1 sty., 34x121, 1500 E. Michigan. Owner, Standard Building and Wrecking Co., 1500 East Michigan.

Residence: (double), \$7,500, 1117-19 N. Tuxedo. Owner, Mary A. Raney, at site.

Residence: \$7,000, 435 West 44th. Owner, Maynard Realty Co. Day work.

Residences: (2) \$7,000 each, 313 and 321 Blue Ridge. Owner, M. M. Miller, Fletcher Trust Bldg. Owner builds.

Garage: \$7,000, Southern Ave. Owner, John Wentkee, c/o contractor. Contract let to William Goebes, 1622 S. Delaware St.

Residence (double) \$6,000, 2614-16 E. North. Owner, H. C. Pottschmidt, 2622 E. Michigan. Contract let to W. I. Guthrie, 815 N. Sherman Drive.

Residences: (2 doubles), 728-30 and 813-15 N. Euclid. Owner, F. L. Palmer, 4401 Washington Blvd.

Residence: \$5,000, 1045 King Ave. Owner, William Praid, at site. Contract let to E. R. Oliver, at site.

Residence: \$5,000, 909 N. Riley. Owner, Alvina Sellmeyer, 1429 Southeastern. Contract let to Earl Kepper, 1918 Valley Ave.

JOY KILLERS

Agitators Always Trying to Rock the Boat

It seems as if it is impossible these days to have peace and quiet in the labor world for any length of time. Just when it appears as if the kinks had been ironed out and there is a prospect of a respite from labor discord and worries and work can progress with little or no interruption, along comes some agitator who immediately stirs things up and down showers more trouble. For instance, over at Chicago the other day Martin Egan, Seattle, of I. W. W. fame, "blew in," succeeded in interesting the laborers and away they went on a strike, threatening to tie up several millions of dollars' worth of new building construction.

Again, Foster, another I. W. W. advocate who managed to wiggle loose from the clutches of the law up in Michigan, has moved on to Pennsylvania, where he is seeking to make converts to the I. W. W. cause from the ranks of the coal miners in that section and thus bring about more turmoil and strife.

It is to be regretted that the laboring men can be imposed upon so readily by these Red agitators and stamped at the least alleged provocation. These trouble makers are really parasites who, working upon the credulity of the less keen-witted laborer, pose as saviors, all the time feathering their own nests from the contributions of the men upon whom they prey. These same agitators never lose, instead the rank and file foot the bill in an effort to right supposed grievances, while the trouble makers collect their remunerative toll from the hard earned pay of the men they are continually leading into the mire.

It would profit the country generally if the government could secure a place in the South Seas, where such types of men as Foster, Egan and their ilk could be shipped. Maybe down there they could interest the cannibals, but it is just possible the interest of the cannibals would extend no farther than the soup pot.

LOOKING OUT FOR THE CONTRACTORS' INTERESTS

Mr. F. L. Blanke of the Builders and Manufacturers' Mutual Casualty Company, spent the past week with us looking after the compensation insurance of the contractors. He will probably spend two or three weeks in this district.

GOOD NEWS

The announcement is made that the big million dollar deep sewer system for

Hammond will be completed next spring. Work on the branch from Hohman street to Wolf Lake is to be started soon.

CALUMET BUILDING PROGRESS

Calumet building once more is moving forward with pleasing regularity except that some of the larger projects contemplated have been shelved temporarily, so 'tis said. Everybody is busy even down to the water boy and we are all hoping that for the time being, at least, the agitators will give us a wide berth. Every once in a while we have to pinch ourselves to convince that we are not sleeping and that the present is not a harmonious dream.

The Central School building has about reached its new location. The contractor expects to be ready to let it down on the new foundation soon. There is a move on foot to convert the old basement into a swimming pool temporarily.

Rhoades Graves closed the contract to build a three-story brick, eight-apartment building at the corner of Indiana and Jessie streets for Mr. Ed Grambo to cost \$20,000.

Architect Mac Turner is preparing plans for Mr. M. Sudz, 119th street, Robertsedale, the north ward of Hammond, for a brick store and flat building, one story, 27x53, estimated to cost \$10,000.

The school house at Griffith, now being refigured, is to be let the 9th.

Architect Mac Turner opened the bids on the new power house for the Central School July 2.

Architect A. C. Berry & Co. is making plans for a four-room school house at Channon, Ill., near Joliet, estimated to cost \$22,000.

State Senator James Nedji, Whiting, has just placed a commission with Architect K. D. Norris, East Chicago, for the preparation of a set of plans for a \$15,000 bungalow. It will be a story and a half high of pressed brick and terra cotta.

MUNCIE MASONIC TEMPLE BIDS BEING RECEIVED

Effort to Be Made to Complete Large Structure This Year

Building operations on the new \$700,000 Masonic Temple are being rushed right along. First the foundations were put in last fall and then this spring the contract for the erection of the structural steel frame was awarded.

This latter operation is rapidly nearing completion and bids are being received to July 10 for the award of the general contract. The building will be six stories high, 117x200 feet, to be located at Main and Madison streets, of fire-resistive construction and when completed will be a handsome addition to Muncie's architectural possessions.

Architect Cuno Kibele of Muncie designed the structure and is supervising the construction.

GETTING AROUND THE LABOR CONGESTION PROBLEM

Suggestions Advanced by Builders' Congress

At a recent congress of Boston builders the following recommendations were made relative to seasonable unemployment in the building trades:

Roofing—Do conductor and gutter repairs in September, October and November.

Painting—Do interior painting from December to April.

Plumbing—Make alterations and additions from January to May.

Clean out grease traps when houses are closed. Don't wait until they are opened again.

Heating—Overhaul and repair your heating plant when you shut down in the spring. Plan major repairs and replacement of heating plants during the winter so the work can be started April 1.

Mansonry, Carpentry, Lathing and Plastering—Do miscellaneous interior remodeling from December 1 to April 1.

WOULD ERECT A QUARTER OF A MILLION DOLLAR Y. W. C. A. BUILDING

Action to That End Started

Another large project in prospect for Muncie is a new \$250,000 building for the Young Women's Christian Association. A financing campaign has just been instituted and the hope is entertained that sufficient funds may be raised in time to get building details shaped up so that active construction operations can be started in the fall.

EFFICIENCY OF LABOR

Degree Varies According to Various Authorities

Various authorities have fixed the efficiency of labor from 40 to 60 per cent during the past two or three years, but the Wall Street Journal says it is about 85 per cent as efficient as in 1913. Referring to bricklayers in particular with a rate of pay of \$14 a day, their rates are said to be about 155 per cent of 1913 rates. And thus combining the two figures the bricklayers' real increase in cost is about 200 per cent more than it was in 1913.

This Journal goes on to say that the inadequate requirements, for admission to labor unions during the war because of the few men available, and also the psychological reaction of these men under unusually high wages are both responsible causes.—Pittsburgh (Pa.) Builders' Exchange Weekly Bulletin.

PROSPERITY AND THE BUILDING CONTRACTORS

Latter Enacting Role of Pinch Hitters

In an address by George Woodruff, vice-president of the National Bank of the Republic of Chicago, delivered before a meeting of the representatives of the building trades, in Chicago recently, Mr. Woodruff said: "Upon the intelligence, teamwork and vision of American builders now depends the immediate continued prosperity of the nation." Mr. Woodruff based this expression upon a very careful study of the fundamental indices of finances and industry.

"After carefully studying the important factors entering into our business activity," he continued, "we are forced to conclude that our building boom has been supporting our recent prosperity. * * * Never in history have we had such a great amount of building, and the stimulating effect of this construction activity has been felt in practically all manufacturing lines. * * *

"While all well-informed business men admit the possibility of a moderate business recession before the end of the year, nevertheless it would seem that those engaged in the building industry are the 'pinch hitters' who may be able largely to prevent this threatened slump. If our present building activity proceeds to fall down, the ensuing business recession will considerably decrease our prosperity until we can gather ourselves together for a fresh start, but if the building industry is able to tide us over into 1924 we may then find that a settlement of European social and political questions will make possible the sale of large amounts

of foreign securities to American investors, and the proceeds of the sale of these securities would be used by Europe for the purchase of American goods. Such a development would prolong our prosperity for some time to come, because of the manufactured goods that would be shipped to foreign shores and because of the increased purchasing power of the grain-growing sections of our country that would follow the increased demand for agricultural products on the part of the people across the seas."—July Issue, Contractors' Atlas, New York City.

TO SURVEY SEASONAL OPERATION IN CONSTRUCTION INDUSTRIES

Special Committee Named to Carry on Work

Savings, not only to the building industry and its workers, but to the public generally are expected to result from the activities of a committee on seasonal operation in construction industries, the appointment of which by Herbert Hoover, chairman of the President's Conference on Unemployment, has just been announced by the Department of Commerce. This saving should be reflected in lower relative cost of dwellings and other buildings. The members of the committee are:

Ernest T. Trigg, manufacturer, of Philadelphia, Pa., chairman; John W. Blodgett, manufacturer, of Grand Rapids, Mich.; John Donlin, president Building Trades Department, American Federation of Labor, Washington, D. C.; L. F. Eppich, president National Association of Real Estate Boards, Denver, Colo.; A. P. Greensfelder, contractor, St. Louis, Mo.; John M. Gries, Department of Commerce, Washington, D. C.; Otto T. Mallery, public works expert, of Philadelphia, Pa.; Rudolph P. Miller, engineer, of New York; James P. Noonan, president Brotherhood of Electrical Workers, Washington, D. C.; William Stanley Parker, architect, of Boston, Mass.; and Edward Eyre Hunt, secretary. Mr. Trigg, as chairman, has called a meeting of the committee for July 10 and 11 to lay out plans for a thorough study of the facts.

Previous surveys have indicated that most construction activity is concentrated in seven to ten months of the year, which means that building trades workers can not find work in their trade during several months, and that contractors' or-

ganizations and equipment, architects, engineers, building material producers, and others connected with construction, must usually remain idle for similar periods. This idle time represents waste, and direct losses to the construction industries themselves, their workers and the public.

The committee was formed in the hope that by examining the facts and proposed remedies, it might be able to suggest sound solutions, and obtain general co-operation in effecting them. It is the general impression that seasonal building has been due perhaps more to custom than to weather, and it is expected that the investigation will throw light on this and other important points.

TALK OVER NATIONAL SHEET METAL MEN'S CONVENTION

St. Louis Affair Discussed by Capital City Furnace and Sheet Metal Men

The monthly meeting of the Fur-Mets, an association composed of furnace and sheet metal jobbers and salesmen, was held at Indianapolis July 6. The meeting was called to order by President Jordan, who appointed Ralph Ingalls to act as secretary in the absence of Mr. Vorhees, and asked for reports on the national convention at St. Louis. F. A. Wilkening and Joseph Gardner both gave glowing accounts of the success of the convention and the hospitality of St. Louis.

The outing committee was next called upon to report and Chairman Joseph Mattingly stated that the picnic arranged for July 2 and 3 had been deferred by his committee on account of the proximity of the St. Louis convention date. The Fur-Mets commended the outing committee in their desire to avoid any conflict of dates with the national convention, and, following Chairman Mattingly's suggestion, voted to lay over the picnic project for this year.

An invitation was extended to the officers and committee men of both the Fur-Mets and the Indiana Association of Sheet Metal Contractors, by President Paul R. Jordan, of the Fur-Mets, to get together for a good time at his summer cottage on White river, near Indianapolis, on Saturday afternoon and evening, July 28.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BUILDING NOTICE TO BIDDERS

Notice is hereby given that the Trustee and Advisory Board of Kirklin Township, Clinton County, Indiana, will receive sealed bids at the office of said Trustee, located at Kirklin, Kirklin Township, Clinton County, Indiana, until 2 o'clock p. m., Friday, July 27, 1923.

At which time and place same will be opened, read and considered for (1) certain alterations and additions to building, (2) for certain alterations and additions to plumbing, heating and ventilating system, (3) for the installation of new wiring system for power, lighting and fire alarm system, and for the installation of lighting fixtures, to be constructed in the present High School building, town of Kirklin, all by and according to plans and specifications as provided therefor and as further approved by the Board of Health and State Board of Accounts. Total estimated cost of alterations and additions to be \$10,000.

The plans and specifications are on file for the inspection of bidders at the office of the Trustee, Kirklin, Indiana, and at the office of Rodney W. Leonard, Architect, Room 309, People's Life

Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of \$10 to guarantee safe return of same on or before opening bids. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same as follows:

1. Item No. 1.
2. Item No. 2.
3. Item No. 3.

4. For all the work inclusive and as comprehended complete by the plans and specifications. In this way the bidder only being required to submit his bid for such portion or portions of the total work as he may desire.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Trustee.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the Trustee, in a sum equal to full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specification. The Trustee and Advisory Board for the Township reserve the right to reject any and all bids without giving any reason therefor.

TOWNSHIP OF KIRKLIN, CLINTON COUNTY, INDIANA.

R. F. SWOPE, Trustee.

REDECORATING LIBRARY NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Library Trustees of Frankfort, Indiana, Clinton County, will receive sealed bids at the office of the said Board of Trustees, located in the Frankfort Public Library, northwest corner of Clinton and Columbia streets, Frankfort, Indiana, until 10 o'clock a. m., Friday, July 27, 1923. At which time and place same will be opened, read and considered, for the redecoration of the Frankfort Public Library, all by and according to specifications as provided therefor and as further approved by the State Board of Accounts. Estimated cost of work, \$1,500.

The specifications are on file for the inspection of bidders at the office of the Board of Library Trustees, Frankfort, Indiana, and at the office of Rodney W. Leonard, Architect, Room 309 People's Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the architect or trustees of \$10 to guarantee safe return of same on or before opening of bids. Bidders must familiarize themselves with specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same as follows:

For all the work inclusive and as comprehended complete by the specifications.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Treasurer of Board.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the Library Trustees of Frankfort, Indiana, in a sum equal to full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications. The Board of Trustees for the Library reserve the right to reject any and all bids without giving any reason therefor.

BOARD OF LIBRARY TRUSTEES OF FRANKFORT, CLINTON COUNTY INDIANA.

Viskalt

~Pliant Under Stress~

MEMBRANE ROOFS

An enduring foundation for your roof

The life of a roof depends largely upon its foundation—*felt*, which holds the waterproofing bitumen in place.

Richardson felt, the base of Viskalt, has through decades of service in many thousands of roofs proved itself an enduring foundation.

Thus a Viskalt Membrane Roof gives you *permanent* weather protection. Viskalt is made by a firm backed by over fifty years of manufacturing experience—The Richardson Company of Lockland (Cincinnati) Ohio; Melrose Park (Chicago) Illinois; New Orleans, Louisiana.

SECOND VICE-PRESIDENT OF THE INDIANA SOCIETY OF ARCHITECTS STRICKEN BY DEATH

Ewing H. Miller, Terre Haute, Answers
Last Call

Stalking in suddenly, and almost without warning, death entered the ranks of the Indiana Society of Architects July 3 and levied a heavy toll, claiming Ewing H. Miller, Terre Haute, second vice-president of the Society, and one of the most promising of the younger architects of the state.

No member of the profession was more generally liked, by those who knew him, than Mr. Miller who, a deep student of architecture, was possessed of a most pleasing personality, underlaid by a quiet, appealing dignity.

A member of the Society for some years, he was most loyal to the organization and entertained a sincere faith in its mission to ultimately elevate the members of the state profession, both individually and collectively. He was a strong advocate of the regional meeting idea and did much to make the one held at Terre Haute last winter a complete success.

This sudden passing on of such a sterling architect and gentleman will create an undeniable void in the state architects' ranks and cause quite a shock to his many professional associates and business acquaintances.

The deceased was stricken with appendicitis and, as the result of complications following an operation, died at St. Anthony's hospital. His illness was of but a few days' duration.

Mr. Miller was a member of the well-known and rapidly growing architectural firm of Johnson, Miller and Miller, Terre Haute, having associated with his brother Warren D. and M. H. Johnson, Jr., in 1913.

He was born in Terre Haute, 33 years ago, received his early education there

and at the conclusion of his high school course entered the University of Pennsylvania from which he graduated in architecture with high honors. Many of Terre Haute's recent new buildings stand as a memorial to his ability, skill and earnestness in his chosen profession.

When the call to arms was sounded and the United States entered the World War he responded immediately, was commissioned a first lieutenant, and served overseas seventeen months with distinction.

He was a member of Ft. Harrison Post, American Legion, and also took an active interest in the affairs of the Terre Haute Chamber of Commerce, the Rotary Club and Lodge No. 86, B. P. O. E., in all of which he was considered a valued member.

He is survived by his widow, Mrs. Esther Miller, his father, Henry C. Miller and brother Warren D. Miller, past president of the Indiana Society of Architects.

Upon receipt of the sad news at Indianapolis, Secretary Harrison immediately extended to the bereaved family the sympathy of the Society, and in the latter's name sent flowers.

The demise of Ewing Miller marked the passing of a fine type of American citizen, an able architect, a loyal member of the Indiana architectural profession and a faithful friend, a loss that can't be estimated.

INTERESTING CONCRETE FLOOR TEST

Report Made by United States Department of Commerce

A report just issued by the United States Department of Commerce sets forth the following regarding a concrete floor test that was recently made:

The hollow tile and reinforced concrete floors of the Arlington Building, Washington, D. C., occupied by the United States Veterans Bureau, were tested by loading them and measuring the deformation.

In this structure the tiles were placed in rows and spaced four inches in each direction. Reinforcing steel was placed in these spaces near the bottom of the slab in the panel and near the top of it across the supporting beams. The concrete was poured around the reinforcing bars and into the open ends of the tiles.

The building was intended for a hotel but was later turned over to the government for the use of the Veterans Bureau. The original design load of 75 pounds per square foot was increased to 100 pounds per square foot and the increased strength obtained by a two-inch layer of concrete over the tops of the tiles.

The panels of the floor were loaded with sand bags up to 380 pounds per square foot and the stresses in the steel and the concrete measured. The maximum stresses developed in the steel reinforcement were about 27,000 pounds per square inch and those in the concrete about 1,600 pounds per square inch. The effect of time under load was to increase the stresses in the reinforcing steel from 15 to 20 per cent. This was particularly pronounced in the first 20 hours and was comparatively small later.

The panels tested varied in the ratio of length to width. It was found that with the increase of that ratio, the stresses in the reinforcing steel at the bottom of the slab and those at the top of the slab (across the girders) increased in the direction of the short span and decreased in the long one. The stresses in the girders were lower than those in the slab.

The factor of safety of the structure was greater than two. This factor is the ratio of the maximum load the structure can sustain to the load which can be safely allowed when the building is in use.

These tests are described in Technologic Paper No. 236 of the Bureau of Standards.

EVANSVILLE WARS UPON DEPLORABLE HOUSING CONDITIONS**Building Inspector to Clean Up**

When this year's program of local building condemnations is complete there will be at least 2,500 persons, mostly factory operatives, affected, declares City Building Inspector Edward C. Kerth of Evansville. The first list of ninety-seven residence-type buildings ordered razed affected 1,000 people and since the announcement of that group of houses the list has been increased to 190 and at least 200 will be included when the total list is complete, Mr. Kerth said.

"The housing situation," said the inspector, "is one which should vitally interest the manufacturing concerns of this city, but it seems impossible to wake them up to the situation. Practically all the residence buildings that have been condemned are homes of factory workers. The buildings condemned are all owned by private people who built them, from all appearances, to exploit for rentals. They are all in deplorable condition. The only solution to the problem of high rents is the building of more homes. With all the tremendous building program now in progress in Evansville the city is still a thousand homes behind the actual needs."

SEES NO LET DOWN**Evansville Brick Men Speeding Right Along to Keep Up With Demand**

According to a prominent Evansville brick manufacturer, home building locally and in the surrounding territory has created such a demand for brick that the work started and in the architects' offices will keep the brick yards going big for months to come to get out enough material to meet the need.

Conditions are such that no threatened slump in building is yet apparent in the brick market and it looks, from the indicated work in sight, that there will be plenty of work for some future time for builders and the allied interests.

CHIPS AND SHAVINGS

Plasterers and painters will take up their work at the former Crescent Club building, Riverside avenue and Walnut street, Monday. The entire building is being remodeled under the direction of Jacob Bippus and Son, building contractors, at an estimated cost of \$15,000.

Several homes under construction by John Wilkins, general contractor, are fast approaching completion.

Work on the new St. Boniface school, Tenth avenue and Michigan street, is making good headway by Matt Hallenberger, building contractor.

A large force of men and good weather has been responsible for fast progress at the new Benjamin Bosse high school building. Bricklayers are at work on the second story. About two-thirds of all brick work on this story has been completed.

The Farmers' Dairy Company second story addition, Main and Michigan streets, has been completed by the Scarborough-Davies Company and turned over to the owners.

ANOTHER MILLION DOLLAR MONTHLY BUILDING VOLUME RECORDED IN FORT WAYNE IN JUNE**Thirteen Per Cent Gain Over Corresponding Period in 1922**

Though showing a decrease of 52.8 per cent from the amount of building put across during the month of May, nevertheless the June volume of building for which permits were granted in Fort Wayne ran over a million dollars again, marking the fourth consecutive month that the building figures have topped the million dollar mark. Though there was a falling off from the May total, the June business was better than that of nine individual months in 1922 and practically equaled the separate totals of

each of the remaining three, million dollar, months.

Just a year ago there were 201 permits issued in Fort Wayne for a total estimated valuation of \$903,455, while in June, 1923, there were 314 permits issued involving \$1,022,539, an increase of 113 permits for a valuation gain of \$119,084, or 13.1 per cent.

Despite the decrease from May, June proved a satisfactory and active building month in Fort Wayne; in fact, the business is holding up even beyond the hope of local builders. Much of the showing made in June is due to a vast volume of new residential building that was put across last month.

FORT WAYNE AND SOUTH BEND JUST ABOUT FIFTY-FIFTY ON BUILDING PERFORMANCE SO FAR THIS YEAR**Former Holds Slight Lead**

During the first six months of 1923 Fort Wayne and South Bend, both outstripping previous individual building construction performances, have each launched about an equal amount of new building work this year.

When the first of June arrived Fort Wayne had a lead of \$1,280,427 over her northern Indiana rival but South Bend came through during the next thirty days and hung up a building total of \$2,253,232 while Fort Wayne was posting \$1,022,539 and whittled down the latter's advantage to but \$49,734.

While Fort Wayne has involved more money in new building, the past six months South Bend has issued 2,762 permits, almost twice as many as Fort Wayne.

The building figures of these two cities for the first six months of 1923 are:

Cities	Per	Est. Val.
Fort Wayne.....	1,465	\$7,389,114
South Bend.....	2,762	7,339,380

STATE GARAGE FOR FORT WAYNE**One of Several to Be Built**

The State Highway Commission has announced that it will build a subdistrict garage in Fort Wayne at Elmer and Sherman streets, expecting to start construction operations soon. The building, one story high, 40x80 feet, is to be used to house road-building equipment engaged in highway improvements in the Fort Wayne district. Other subdistrict garages are to be erected in sundry locations throughout the state.

PLANS ON FILE

None this week.

GENERAL CONTRACTORS HOLDING
REGULAR WEEKLY LUNCHEONS

Good Results Gained Thereby

Close tab on the building situation at Indianapolis as to trend, wage conditions and general aspects is being kept by the general contractors this summer, who, every Thursday, are holding regular noon luncheon meetings.

The meetings are being well attended and some interesting discussions are being developed in an endeavor to stabilize matters as far as it is possible for the general contractors to do so.

There is a spirit of harmony ruling this summer between the contractors that has made for one of the best working situations that has ever prevailed in Indianapolis, a condition that is attributed greatly to these weekly luncheon affairs where the men have frankly discussed their problems and developed a fine spirit of co-operation in doing their best to encourage favorable conditions that will keep building construction operations moving right along.

BIG SCHOOL BUILDING PROGRAM
IN PROSPECT AT INDIANAPOLIS
THIS FALL

Bond Issue Approved

Action by the Board of School Commissioners at Indianapolis the past week assures an active school building program, in all probability this fall.

The commissioners have approved the issuing of bonds to the amount of \$1,-

650,000 to cover the expense of the proposed construction.

As planned, the program contemplates the building of eight new buildings and additions to and the remodeling of sundry school structures now in use. It is also proposed to buy a site on the West Side for the erection of a colored high school.

Architects, selected some time ago, have completed the plans for the new work and bids will be called for shortly.

STATE ADMINISTRATIVE BUILDING
COUNCIL GETS DOWN TO
BUSINESS

Plans for Action Being Worked Out

Active endeavor is being put forth by the members of the Administrative Building Council of Indiana to perfect a working organization and get it to the stage of functioning.

The advisory committee to the administrative committee, the former made up of architects, engineers, contractors and Building Trades Labor representatives has named its sub-committees to work out a plan for the codification of the present state building laws. These sub committees have been designated under the heads of Standardization, Structural and Mechanical, under the chairmanship of F. S. Cannon, DeWitte Moore and Charles Kern, respectively.

Also, the council is working out a formation of rules and regulations under which to operate.

The advisory committee will hold a special meeting July 27 to hear reports on the preliminary work accomplished, and a general meeting of both the administrative and advisory committees has been called for the afternoon of July 30.

SOUTH BEND CROWDS INDIANAPOLIS
FOR JUNE BUILDING
HONORSNorthern Indiana City Goes Over Two
and a Quarter Million Dollars
Mark

To the north a rival to Indianapolis in building construction has appeared on the horizon in the form of South Bend. There was an unusual amount of building construction activity in that locality during the month of June when a new high level was established, a volume of new building work amounting to \$2,253,232 having been put across. During the June period 518 building permits were issued.

That the unparalleled expansion of South Bend goes on with increasing momentum is revealed by the fact that the amount of building the first half of this year is within \$3,000,000 of last year's total.

COMPETITION FOR MEN AND MATERIAL HELD RESPONSIBLE
FOR HIGH CONSTRUCTION
COSTS

Curtailement of Activity Seen

According to figures compiled by the United States Bureau of Labor, the entire group of seven chief commodities used in building construction have risen above average prices. Fir, oil and steel have had the most rapid rise in the last twelve months and in a general way

lumber and bricks stand highest in the building material groups. No adequate measure of general wages in the building trades is available. As a rule, wage rates have not increased as much as material prices, yet the labor item in building costs has mounted rapidly within the last year.

There is no specific remedy for such a situation as has developed in the building trades. The stimulus of a heavy demand leads to competition for material and men. The result is a skyrocketing of prices and eventually a curtailment of demand.

COUNTY OFFICIALS DECLARE
BUILDING MUST NOT BE
NEGLECTED

A cheering note for building construction men was sounded recently by Marion county officials who, while declaring that the county did not have unlimited funds, asserted that institutional building would be taken care of to meet demands, even if some fine bridge building schemes had to be laid over.

The information was brought out at the recent dedication of two modern wing structures just completed at the County Hospital for Incurable Insane at Julietta.

WISE IN ANOTHER FIELD

Well-Known Contractor Gets Another
Appointment

Walter W. Wise, prominent Indianapolis mason contractor and well known among the builders of Indiana and the country for his earnest efforts in organization work amongst builders, who took a flyer into politics some time ago and was elected to the city council, has just been named a member of the city boxing commission.

Here's a good candidate for Sargeant-At-Arms at the next State A. B. C.'s convention.

YOU CAN'T ALWAYS TELL**And, Too, Certain Contractors Dote On Tempting Fate**

Somehow the impression succeeded in getting into circulation that by the first of July conditions in the building industry throughout the country would have become pretty well settled and that builders would be in a position to proceed with the assurance that they could go right ahead with their work fearing not interruptions occasioned by wage disputes. However, judging from the reports that come filtering in from most of the principal cities there is still considerable unrest among the building trades mechanics. There seems to be a tendency upon the part of many of the workers, or those who are leading them, to keep boosting prices regardless. If these tactics are continued it will be only a question of time until the wage levels are kited to a point where it will be utterly impossible for the prospective builder to try to meet the wage demand.

It has seemed that the limit of elasticity had been reached and as if the building industry had been burdened with a wage load that was quite enough, in fact, with about all it could possibly stand.

Nevertheless, the building operations in the Calumet section have continued to be active in the face of wage and cost increases. A few years back such conditions would have appeared preposterous, but, today all the trades are receiving at least \$10.00 per day, while some of them are receiving \$12 and \$13 with a few bosses even going as high as \$15 per day to secure certain kinds of craftsmen. One is led to wonder where the limit is. Again, the question arises, how is the man working in the industrial plants or the fellow on a salary, except in exceptional instances, going to pay for the new homes they have started.

Without any regard for the future, or the promise of lean days ahead if the pyramiding continues, the present day motto among the building mechanics appears to be "Get while the getting is good."

There is no getting away from the fact that many contractors are basicaly responsible for conditions as they rule today, for, they have gone right out in the labor market everywhere and bid openly against each other for the services of the craftsmen paying absolutely no attention to agreed scales. It is one of the greatest examples of selfishness on record for the contractor who employs such tactics is centered only on getting his

work done and utterly ignores the chaotic conditions that his methods are bound to produce. There will be a day of reckoning, of that be assured, and when that day arrives just listen for the bidding contractor to yelp and condemn Labor. The condemnation and the yelp may not get far, but, the folly of the present day selfishness will collect its toll, not only of the contractor, but the workmen as well. There is bound to be a back-lash sooner or later.

THINK OF THE MONEY SAVED**It Is Hard to Pick All the Winners**

Such is life! We tuned up the old bus, and hie'd away to Crown Point to take in the celebration and see the "Hoss" races. Just as we were getting thoroughly worked up and enjoying the Sport of Kings, the flood gates of the Heavens were opened and that was the end. A canoe race was suggested, but nobody had bathing suits.

CAUGHT HOLDING THE BAG AGAIN

The long fight of the Plumbers Union of San Francisco against the open shop has been declared off, and union plumbers are now allowed to work on the jobs with non-union mechanics.

PLEASE PASS THE MAPS

The new slogan for Hammond chosen by the Chamber of Commerce Committee is, "The Map Shows Why Hammond Grows."

E. E. COLE.

CALUMET BUILDING PROGRESS

Hammond is to have another industry. A firm has secured a location and will manufacture candy. It is announced 150 people will be employed.

The Central school building is hovering over the new foundation ready to be let down, after a journey in toto of several squares from its former site.

Homewood on the south side is going in for apartment buildings. Five large ones are now under construction in that section.

PROVES IT CAN BE DONE**Apprentice Problem Not Beyond Solution**

Here and there about the country contractors in various cities have by dint of effort and in a spirit of determination succeeded, with more or less degree, in relieving acute labor shortages by doing all in their power to encourage ap-

prentices in the building trades. The most serious phase of the situation is that the contractors themselves did not pay attention until too late to Labor's depleted ranks and a shortage was upon them before they realized it. The result is that it will take time to rehabilitate the ranks, and in the meantime there are those builders who won't bother about encouraging apprentices, preferring rather to go out and boost wages above scales in order to get men.

One of the most striking examples of what contractors can do, if they will, to infuse new material into the labor supply market is found in San Francisco, where consistent encouragement to apprentices has been extended.

Four separate trade schools for youths desiring to learn the building game have been maintained with the following results:

Bricklayers' School

In operation since January 1, 1923. Thirty-five graduates to date, all of whom, before going out on jobs, were required to pass the following production test:

1200 bricks in 8 hours on a 12-inch wall.

800 bricks in 8 hours on main corners.

600 bricks in 8 hours on 17-inch piers.

These tests are maintained for a minimum of five hours, continuously; with all work of such character as would pass inspection for permanent installation. Knowledge of usual trade methods and terminology also required of graduates. Starting wage of graduates \$3.50 per day.

Painters' School

Operated in co-operation with Master Painters' Association, one full day a week. Instruction given to apprentices already in the trade. Course designed to train men for both painting and paperhanging. Provides for steady progress from simple, rough work, to the more complicated phases of fine interior work; the men to be kept in the school as long as possible. About twenty-five graduates, with similar number still in training.

Plasterers' School

In operation since May 1, 1922. 190 graduates, and twenty-five still attending night classes for instruction in ornamental work. Graduate apprentices being paid following wages: Five at \$12.00, six at \$10.00, three at \$9.00, twenty-four at \$8.00, twenty-five at \$7.00, forty at \$6.00, twenty-five at \$5.00, ten at \$4.00, and the remainder at the starting wage of \$3.50 per day. Furthermore, many of these apprentices have been engaged on the very best class of down town construction. Graduates handling everything from scratch coating to ornamental plastering.

Plumbers' School

In operation since May 15, 1922. 210 graduates from day course. 122 have taken, and thirty-two now attending night course—which gives advanced instruction. The others will be required by their employers to attend the night classes. Apprentices all start at \$2.50 per day. Wages are then increased as rapidly as individuals pass required tests, which are given by a committee of the Master Plumbers' Association at frequent intervals. Many of first graduates of day course are now receiving from \$5.00 to \$7.00 a day.

Indiana Architects

Make more sure the awarding of the contracts on your public building projects by placing the legal advertisements for bids in the

INDIANA CONSTRUCTION RECORDER

because,

this paper reaches more building contractors (all kinds,) and material supply men all over the State than any other publication in Indiana.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Lafayette, Indiana, Tippecanoe County, and the Board of Trustees thereof, will receive sealed bids or proposals at the office of the said School Board of Trustees, located in the Vocational Building at the southeast corner of Sixth and Columbia Streets, Lafayette, Indiana, until 10 a. m. o'clock, Tuesday, July 31, 1923, at which time and place same will be opened, read and considered for the construction of a one-story Grade School Building and Auditorium, known as the "Columbian Grade School," and the improving and building of the north half of Cherokee Ave., the length of the building, site and construction of a 24-inch storm water sewer, said building shall be located in the present school lot, said lot being bounded on the north by Owen Street, on the east by lots No. 139 and No. 163 Highland Park Addition, on the south by Cherokee Avenue and on the west by Fifth Street, and for the complete installation of the heating, ventilating with temperature control, plumbing, sewerage, electrical wiring, fixtures, program clock and fire alarm systems in the said building, for uses of said School City, and according to plans and specifications as provided therefor by F. P. Riedel and T. A. Zink, Architects, 821-22-23 Lafayette Life Building, Lafayette, Indiana, and as further approved by the State Board of Health and the State Board of Accounts. Estimated cost of building, auditorium and street improvement, \$90,000.

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Lafayette, Indiana, and at the office of Riedel and Zink, Architects, and the State Board of Accounts. Copies are available to bidders, for use at their own offices upon deposit with the Architects or Trustees of Twenty-five Dollars (\$25.00) to guarantee safe return of plans and specifications. Bidders must familiarize themselves with such plans and specifications before bidding, as no departure from same will be considered. Proposals will be considered for:

1. General Construction of Building and Street Improvements and Alternates. See Proposal Sheet.
2. Heating, Ventilating, with Temperature Control of School Building and Alternates. See Proposal Sheet.
3. Plumbing and Sewerage System and Storm Sewer and Alternates. See Proposal Sheet.
4. Electrical Wiring, Fixtures, Program Clock, Fire Alarm Systems and Alternates. See Proposal Sheet.

All bids must be accompanied by the Certified Check of bidder in the sum equal to at least five per cent (5%) of his gross bid or bids.

Checks to be made payable to Treasurer of the Board. In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance perform his bid by entering into a written contract with the Board, in the

form satisfactory to Board, to execute the work and construct and complete the building contract by a bond in the form satisfactory to the Board, with surety or sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure it being impossible to estimate the amount of damages such failure would occasion to the Board.

All bids and proposals shall be upon forms No. 96 and prescribed by the State Board of Accounts. Unless bids are accompanied by Certified Check as above, and upon form as noted above, no attention will be given same. Forms will be furnished by the Architects upon request.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the School City, Lafayette, Ind., in a sum equal to the full amount of the contract. The successful bidder will be required by the terms of the contract to enter into the active prosecution of his work immediately and complete said work at the time to be agreed upon. The Board of Trustees for the School City, reserve the right to reject any and all bids without giving any reason therefor.

ELECTRIC WIRING AND BELL SYSTEM NOTICE TO CONTRACTORS

Notice is hereby given that until the 7th day of August, 1923, at ten o'clock in the forenoon, the undersigned Jesse F. Phillippi, as Trustee of Eagle School Township, and the corresponding Eagle Civil Township, Boone County, Indiana, and the Advisory Board of said Eagle Township, will receive sealed bids for the construction and installation of the ELECTRIC WIRING AND BELL SYSTEM to be used for and in the new two story, brick, grade school building now being erected in Zionsville, Indiana, for the use and benefit of said Eagle School Township, Boone County, Indiana. All in accordance with the plans and specification therefor which are on file in the office of said Trustee located on Meridian street in the town of Zionsville, Boone County, Indiana. True copies of said plans and specifications also may be seen at the office of the Indiana State Board of Accounts at the State House in Indianapolis, Indiana, and at the office of the Elmer E. Dunlap Company, the architect, at 1050 North Delaware Street, Indianapolis, Indiana. Bidders desiring duplicate copies of the plans and specifications may obtain the same by a deposit of \$25.00 to cover return in good condition of the general construction documents not later than the day of the letting of the contract. The estimated cost of the entire construction of said building was \$90,000.00. Said bids will be based on alternates numbered 1, 3, 4, and 5 as shown in said plans and specifications which said alternates have been included in the general contract. Said bidders will complete said work herein bid on so as to not interfere with other contractors and at the time agreed upon between said Trustee and the general contractor.

All bids must be on form 96 prescribed by the State Board of Accounts and the same will be received at the office of the said Trustee up to ten o'clock in the forenoon of the said date at which time and place of said bids will be opened, publicly, and read. The letting of said contract will begin, subject however, to all rights of said Trustee and Advisory Board, as provided by law and as herein set forth.

The contract will be awarded in such manner as to be to the best interest of said Township. Each bid must be accompanied by a certified check not less than 3% of the gross bid submitted, payable to the said Trustee who shall have the right to cash the check of the successful bidder and the money so obtained by the said Trustee shall be retained by him as liquidated damages in event said bidder fails, within ten days after the acceptance of his bid, to execute a contract in the form and with the provisions desired by said Trustee and approved by said Advisory Board

covering the construction and installation of said work, and at the same time to deliver to the said Trustee a good and sufficient bond in an amount and with security to be approved by said Trustee and conditioned as required by law.

The right is expressly reserved by said Trustee and Advisory Board to reject any and all bids and to take reasonable time to investigate both the bids and the qualifications of the bidders.

Dated this the 16th day of July, 1923.

JESSE F. PHILLIPPI,

As Trustee of Eagle School Township and the corresponding Eagle Civil Township, Boone County, Indiana.

WILLIAM A. HULL,

CHARLES F. MILLER,

ORION O. SMITH,

Members of Advisory Board, Eagle Township, Boone County, Indiana.

July 21 and 28.

SCHOOL BUILDING NOTICE TO BIDDERS

Notice is hereby given that the Trustee and Advisory Board of Kirklin Township, Clinton County, Indiana, will receive sealed bids at the office of said Trustee, located at Kirklin, Kirklin Township, Clinton County, Indiana, until 2 o'clock p. m., Friday, August 3, 1923.

At which time and place same will be opened, read and considered for (1) certain alterations and additions to building, (2) for certain alterations and additions to plumbing, heating and ventilating system, (3) for the installation of new wiring system for power, heating and fire alarm system, and for the installation of lighting fixtures, to be constructed in the present High School building, town of Kirklin, all by and according to plans and specifications as provided therefor and as further approved by the Board of Health and State Board of Accounts. Total estimated cost of alterations and additions to be \$10,000.

The plans and specifications are on file for the inspection of bidders at the office of the Trustee, Kirklin, Indiana, and at the office of Rodney W. Leonard, Architect, Room 309, People's Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of \$10 to guarantee safe return of same on or before opening bids. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same as follows:

1. Item No. 1.
2. Item No. 2.
3. Item No. 3.

4. For all the work inclusive and as comprehended complete by the plans and specifications.

In this way the bidder only being required to submit his bid for such portion or portions of the total work as he may desire.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Trustee.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the Trustee, in a sum equal to full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specification. The Trustee and Advisory Board for the Township reserve the right to reject any and all bids without giving any reason therefor.

CELOTEX

INSULATING LUMBER

ENDORSED BY THE COMMISSION OF BUILDINGS OF INDIANAPOLIS

(For use as Sheathing, Lining, Plaster-base, Sound Absorber, Roof Insulation, Interior and Exterior Finish)
THE ONLY FABRICATED BOARD IN THE WORLD THAT WILL STAND THE GAFF IN OUTSIDE WALLS

Celotex Insulating Lumber is stronger sheathing and lining than wood. Cork itself is no better insulation. Nails direct to the studs. More economical when applied than wood and building paper.

Use Celotex for all your jobs. It means added comfort for the home-owner. Cuts cost. Keeps down fuel bills—25% to 35% annually.

Celotex Lumber is the modern-day building material marvel. It is an actual BUILDING LUMBER. There's nothing else like it in the world.

Celotex provides six specific, efficient uses in building construction at the cost of ONE material. It is made from cane fibre, the longest, strongest fibre obtainable for board manufacture.

RESIDENCE, CENTRAL AVENUE
Maurice E. Barton, Architect
CELOTEX USED AS SHEATHING REPLACING WOOD SHEATHING

STOCK SIZES: Thickness, 7/16 in.; width, 4 in., 6 in., 8 ft., 8 1/2 ft., 9 ft., 9 1/2 ft., 10 ft. and 12 ft.
Weight, about 60 lbs. per 100 square ft.

The building department of Indianapolis subjected Celotex to the most rigid tests and gave it unqualified endorsement.

More than half-million feet of Celotex has already been used in 125 homes in Indianapolis. It is nationally distributed, nationally used, nationally advertised.

Contractors and Architects throughout the United States endorse the use of Celotex Insulating Lumber.

Ask your lumber dealer—he knows. He will gladly supply your requirements. See him NOW.

Nothing more economical for the cottage—nothing better for the mansion.

PLAN TO ARRANGE REGIONAL MEETING ON A LARGE SCALE

To Be Held in South Bend Early in
September

There is a move on foot to make the next regional meeting of the Indiana Society of Architects an event that will be worth going miles to attend. Scheduled for South Bend a letter of acceptance has been received from the architects of that city, they expressing pleasure for the opportunity to entertain the members of the state architectural profession. Mr. E. R. Austin, South Bend, has been named chairman to take care of the local end of the meeting and will work in conjunction with the officers of the Society in working out a general program.

As now proposed it is planned to extend the invitation to attend beyond the membership of the Indiana architectural profession to include the members of the Illinois and Michigan State Architects' Societies. As a preliminary to such an arrangement information to the above effect has been sent to both the officers of the Illinois and Michigan associations who will take action on the proposition in the near future. In addition it has been suggested that those of the allied building interests of northern Indiana also be invited to the September regional meeting.

It is the idea of the officials and board members of the I. S. of A. to make the proposed meeting one of the most attractive affairs ever indulged in by the state architects and the Indiana building interests, and to that end an effort is to be made to assure a big attendance by securing good speakers who know and can talk on the building industry and its various ramifications.

SUMMER ATTRACTIONS FAIL TO LESSEN INTEREST IN IN- DIANAPOLIS ARCHITECTS' MEETINGS

July Meeting Proves One of the Best
of the Year

In spite of the fact that vacation days are here, that the atmosphere was quite heated, and there are any number of

summer evening counter attractions to vie with business organization meetings, the attendance of the members of the Indianapolis Architects' Association at the regular monthly meeting July 18, was unusually good, making for one of the best gatherings in months.

The affair was held at the Hoosier Athletic Club where a 6:30 p. m. dinner was served, covers for seventeen being laid. Those present were: Pres. Herman Scherrer, Secretary Ralph J. Batchelder, Herbert Bass, Fernor S. Cannon, W. K. Eldridge, Herbert Foltz, Wm. H. Gams, Merritt Harrison, Norman Hill, A. A. Honeywell, Otto Mueller, Anton Scherrer, Wilbur Shook, L. A. Turnock, Seymour Van Meter, Kurt Vonnegut and Fred Wallick.

Following the reading of the minutes of the May meeting, Pres. Scherrer appointed Wilbur Shook, Fernor Cannon and Merritt Harrison, tellers, to tabulate the mail ballott with reference to the application of Architect Everett Crabb for membership. The count was favorable to Mr. Crabb who was duly elected.

Stuart Walker of the Stuart Walker Company, filling a summer engagement at the Murat Theatre, was scheduled for a talk to the architects, but at the last moment circumstances arose to prevent his presence, a fact much regretted by those present.

Since there was really no important business up for attention, the meeting was turned into an informal discussion affair which turned out to be quite interesting, all the architects entering freely into the spirit of the thing and developing some attractive thought. Matters architecturally were taken up from all angles and covering a wide range from office methods, handling of the work, the draftsman problem, and the various phases of the architects' contact with public officials in getting plans approved, also the handling of the early building preliminaries by the city building inspection departments and state boards having to do with building construction matters. While no formal action was taken with regard to these subjects nevertheless there were suggestions advanced that may in time be followed through to advantage.

All was not serious, in fact, there was much levity indulged in that made for

a general spirit of good humor that added greatly to the pleasure of the evening.

Those in attendance voted to forego the customary abandonment of summer meetings and the next meeting was set for Wednesday, August 8th.

REMOVAL NOTICE

Architect Everett H. Crabb, Indianapolis, announces the removal of his office from 1112 State Life Building to room 910 in the same structure.

INDIANAPOLIS ARCHITECTS EX- PRESS SORROW OVER DE- MISE OF ARCHITECT EWING H. MILLER

Extend Sympathy to Bereaved Family

Genuine sorrow and regret over the untimely passing of Architect Ewing Miller, Terre Haute, Second Vice-President of the Indiana Society of Architects, was expressed Wednesday night by the Indianapolis architects at their regular monthly meeting. Mr. Miller was well known to the Indianapolis profession and held in high esteem both as a gentleman and an architect.

Formal action relative to his passing was taken by the Indianapolis association and Secretary Batchelder was instructed to convey to the bereaved family, by letter, the sympathy of the Indianapolis architects.

WELL-KNOWN INDIANAPOLIS ARCHITECT RECOVERING FROM OPERATION

Removed From Hospital to His Home

Thos. A. Winterrowd, Indianapolis architect, long connected with the local profession and building industry, who has been confined at St. Vincent's Hospital following a rather serious operation, is reported much improved and has been removed to his home.

Mr. Winterrowd, in addition to his extensive architectural practice covering many years, was also formerly building inspector for the city, affording him a wide acquaintance. It was during Mr. Winterrowd's tenure of office that extensive revisions were made to the city building code which is now in operation.

PLASTERERS AT EVANSVILLE DEMAND WAGE INCREASE

Building Circles Given a Jar

Quite a flurry in Evansville building contracting circles was caused the past week by the unofficial announcement that beginning Monday, July 23, the journey-men plasterers would demand \$12 per day. They have been paid \$10 per day up to this time this season.

There is considerable opposition amongst contractors to granting this \$2 per day increase, though Evansville, like other localities, finds herself up against it because of the shortage of plasterers. The big cities are paying all the way from \$12 to \$20 per day for these particular craftsmen and the contractors in the smaller municipalities find it hard to combat the high wage lure of the big places which is playing hob with the local plastering labor supply. It is another case of the contractors going out in the open market and bidding against each other for men, a situation the men themselves are quick to take advantage of. The question is, how long is the building public going to stand for the gouging to which greed and selfishness are subjecting it?

SUMMER WEATHER SPEEDS UP LOCAL BUILDING

Contracting Forces Going Full Tilt

It has been good and hot in Evansville, and while there was some complaining it did not come from the contractors who are only too glad for the clear weather in order to hurry along on their building operations. The whole local contracting fraternity has been speeding up, resulting in a burst of activity which is evidenced all about the city, particularly in the residential districts where new homes are arising with regular rapidity.

The demand upon the local labor supply is exceedingly heavy, but to date the contractors have been able to keep pace with their schedules.

CHIPS AND SHAVINGS

Good progress in home construction is reported for the week by George L. Miller and Son, building contractors. Two homes in the 1100 block on Bellemeade avenue are now under roof.

Work on a five room California type bungalow for Miss Addie Smock at 815 Bellemeade avenue was started this week by Contractors Anderson & Veatch.

Scarborough-Davis Co., having the general contract on the Franklin Garage are rapidly completing same and expect to have it ready for occupancy in about ten days.

General Contractors J. Bippus & Son, in charge of the remodeling of the new quarters for the Shrine at the former Crescent Club, are hurrying the work along and hope to complete the contract August 15. This same firm is speeding up the \$15,000 Haas Store remodeling at 408 Main street.

C. Kanzler and Son, who have the general contract for the Saunders building, have reached the plastering stage.

There is still considerable estimating on prospective work going on and prospects look good for local fall building activity.

COMPARATIVE FIGURES SHOW GREAT EXTENT OF FT. WAYNE'S BUILDING ACTIVITY THIS YEAR

All Previous Records Being Distanced

Now that the first half of 1923 has been completed and the figures for that period have been compiled, the totals show that all previous building records in Ft. Wayne covering a six month's Beginning with January and right on Beginning with anuary and right on through June the building figures for each month have regularly exceeded those of the corresponding months in 1922 at which time a new building record was steadily being made in Ft. Wayne. The fact that last year's record is being topped gives some idea of the proportion of this year's business.

As the records stand now the new

building construction in Ft. Wayne for which permits have been granted during the first half of 1923 is 139.2% ahead of that of the corresponding period last year, and represents 76.72% of all the new building in Ft. Wayne for the entire year of 1922.

As compared with 1921, the current building volume in Ft. Wayne is 53.9% in excess of the entire volume two years ago and is 340% greater than the volume for the first six months of that year.

Two years ago there was but one one-million-dollar month, while in 1922 there were three million-dollar months. So far in 1923 there have been two such months, also one close to \$2,000,000, and another that ran over that figure.

Permits issued since January number 1,465 as against 1,008 during the corresponding period in 1922, a gain of 457. The estimated valuations for six months in 1923 and 1922 are \$7,389,114, and \$3,088,195 respectively.

The Ft. Wayne building permit record for the first six months of 1923 is:

Month	Per.	Est. Val.
January	99	\$ 390,885
February	61	420,330
March	281	1,450,000
April	383	1,939,275
May	327	2,166,085
June	314	1,022,539
Total	1,465	\$7,389,114

BANK CLEARINGS REACH HIGH LEVEL

Best Business Week Recorded in Ft. Wayne In Years Registered

Recently

General business in Ft. Wayne as reflected by the bank clearings is mighty good, and it is this good business wave that has been steadily surging through the city that has made building activity most noticeable.

Last week, for instance, the local bank clearings amounted to more than three and a half million dollars, the first time in years that such a figure has been reached.

The total clearings for the week were \$1,506,589.11 more than during the corresponding week one year ago, and \$751,976.75 more than the previous week.

NEW SCHOOL BUILDING RATHER THAN ADDITION, FAVORED

The possibility of erecting a new one-story school building on the James Smart grounds instead of a 16-room addition, in order to accommodate at least 600 school children at this site, is being considered by the city school board.

It was first planned as a part of the \$975,000 school building and expansion program to put up the addition at this place.

SLUMP HITS INDIANAPOLIS BUILDING CONSTRUCTION ACTIVITY

June Business Slows Down

The break had to come and it did, only it was a little sooner in arriving than was expected in view of recent past performances. Reference is made to the slowing up of construction operations in Indianapolis during the month of June.

Building permits issued during the month amounted to 1,396, which was a little better than the number granted during the corresponding period a year ago. However, the June permits fell 513 short of equaling those issued the preceding month, were 365 behind April, and 42 in arrears of March, tending to indicate a slackening activity.

The total estimated valuation of the new building construction work for June only amounted to \$1,905,000, the second lowest valuation posted since the first of the year. This was \$900,011 or 32% less than the money involved in new work for which permits were granted in May, and was \$384,941 or 16.8% short of the June, 1922, mark.

The figures for June, 1922, and 1923 are:

Month	Per.	Est. Val.
June, 1922	1,323	\$2,289,941
June, 1923	1,396	1,905,000

NEW ORGANIZATION OF NORTHERN INDIANA GENERAL CONTRACTORS FORMED

Indiana Harbor and East Chicago Contractors Get Together

Field Representative J. H. Owens of the Associated Building Contractors of

Indiana has returned to Indianapolis from a trip to Indiana Harbor, where he assisted in perfecting the organization of a new association of general contractors composed of the big builders of Indiana Harbor and East Chicago.

The new body has named J. K. Doppler, President, and R. C. Clark, Secretary, and will maintain headquarters at 4005 Grand Boulevard, Indiana Harbor. The members unanimously voted to affiliate with the State A. B. C.'s.

BUILDING PERMITS

Week of July 12th to 19th

Residence: (double), \$9,000, 3601-03 Clifton. Owner, Mabel E. and Ada Rose, 1108 W. 30th. General contract let to Louis Chapman, c/o owner. Frame

Residence: (double), \$8,780, 83-85 N. Brookville. Owner, L. Russell Newgent, 518 Hume-Mansur Bldg. Contract let to Hershman and Pounds, 202 N. Addison.

Residence: \$9,000, 822 E. Raymond. Owner, Geo. H. Amt., 828 E. Raymond. Contract let to A. H. Unversaw and Son, 1155 Shelby St. Stucco and frame.

Residence: \$5,500, 5237 Park. Owner, Rollin E. French, 4410 N. Pennsylvania.

Residences: (4), \$2,800 each, West 23d. Owner, A. W. Cox, 1260 N. Belle View Place.

Residence: \$6,500, 4844 Carrollton. Owner, F. M. Bartholomew and Son, 3725 N. Illinois St.

Yard Office: (rem.), \$5,000. Owner, C., C., C. & St. L. R. R. Contract let to Mead-Balch Co.

Residence: \$9,000, 687 Berkley Road. Owner, Ralph Root, c/o contractor General contract let to William F. Nelson, 4211 College Ave. Brick veneer.

Residence: \$5,500, 263 Parkview Ave. Owner, John Killilea, 225 N. Beville Ave. contract let to George F. Brewer, 220 N. Gray St. Frame.

Residence: \$5,000, 611 E. 34th. Owner, Fred Rideout, 2250 College.

SOUTH BEND LED ALL OTHER CITIES IN INDIANA IN THE MATTER OF NEW BUILDING CONSTRUCTION IN JUNE

State's Total Operations, While Large, Record Various Losses

Though June building operations in Indiana's nine leading cities, according to the official figures of city building inspectors, show a falling off both from the May, 1923, business and that of June a year ago, nevertheless, the volume of building for which permits were granted was a large one, amounting to \$6,795,510, a creditable showing for the month.

The fact that the June total of over six and three-quarter million dollars worth of new building ran behind the individual totals of the preceding three months, only goes to impress the fact that an enormous volume of building construction work has been put across in Indiana in 1923. June building was 8.1% behind that of May this year, and 2.69% in arrears of that of June, 1922. On the other hand, the June, 1923 volume of building construction work, though registering certain losses, noted above, exceeded the individual totals of eleven of the twelve months of 1922.

The big feature of the June building performance this year has to do with South Bend where a \$2,253,232 building total was recorded, a figure that surpassed those posted by Indianapolis for the month. This is the first time any other Indiana city has ever outstripped the Hoosier Capital City on the monthly building volume of estimated costs. South Bend's latest contribution to the state building total accentuates the fact that that city is making wonderful building strides forward this year. Indianapolis just missed the \$2,000,000 mark last month, her total of \$1,905,000 being the second lowest monthly figure posted since January, this year. Ft. Wayne once more came across with over a million dollars for new buildings for the month.

Comparative figures show that in June, 1923, five of the nine cities registered gains over the corresponding period a year ago, while the other four had to take varying degrees of losses. Elkhart with a 74.3% gain led the procession, to be followed in this order: South Bend, 20.1%; Ft. Wayne, 13.1%; Evansville, 12.7%; Gary, 8.3%. Losses recorded were: Terre Haute, 16.7%; Indianapolis, 16.8%; Hammond, 25%; Richmond, 60%.

The official building figures for Indiana cities for June, 1923, are:

Cities	Per.	1923		1922	
		Est. Val.	Per.	Est. Val.	
Elkhart	26	\$ 98,150	24	\$ 56,300	
Evansville	216	275,685	166	244,370	
Ft. Wayne	314	1,022,539	201	903,455	
Gary	*	514,050		474,520	
Hammond	140	390,690	111	521,925	
Indianapolis	1,396	1,905,000	1,323	2,289,941	
Richmond	58	33,805	55	85,220	
South Bend	518	2,253,232	462	1,875,052	
Terre Haute	283	302,359	267	363,101	
Total	*2,951	\$ 6,795,510	2,609	\$ 6,813,884	

*Official report from Gary failed to include number of permits issued in June

SOUNDS GOOD, ANYWAY**Majority of People Will Hope 'Tis So**

Here's hoping he has read properly the cards, the stars, or whatever it was that prompted his forecast.

Attorney General Daugherty has broken forth with the prediction that there will never be another railway strike, of the proportions of those that have gone before, to tie up interstate commerce and shunt business over on a side-track.

The expression of the attorney general was prompted by the action of Judge J. H. Wilkerson who entered a final decree making permanent the temporary restraining order he issued in the U. S. Court, Chicago, last fall against the striking railroad shopmen. The original injunction was granted when the shopmen's strike was technically in effect on sixty-two roads when they refused to subscribe to the Baltimore settlement. At that time the strike had seriously crippled traffic in certain localities and thus had interfered with interstate commerce and the transportation of the U. S. mails, to say nothing of the life loss and damage that had been caused. Incidentally the Court of Appeals had declared that the shopmen's strike was on a par with the Boston police insurrection and was unlawful because it was a strike against the decision of the Railway Labor Board, an instrument of the national government.

This latest decision tends to show that the claims of the Unions that they were not responsible and not under the jurisdiction of the courts was a mistake; it also tends to show the change of sentiment that has come regarding the Unions and that they will be held accountable for the actions of their members who are not entitled to any special privileges not accorded to others.

Possibly this latest twist will cause Labor leaders to be a little more cautious in the future.

MORE BUILDING**Deal Put Across Last Week Means That**

There has just been a realty transaction in Hammond that, according to the provisions, means several nice buildings for the future. The K. & W. Corporation has just taken a 99 year lease on the Rimbach property on Hohman street. The site is on Hohman street and extends from Rimbach Court to Sibley street, a frontage of 300 feet. Under the terms of the lease they must, within the next ten years, use 150 feet

on the north end of the plot for a site for a structure to cost not less than \$200,000, and within 15 years erect on the remaining portion of ground another building not to cost less than \$100,000. The rental schedule is as follows: First two years \$18,000 annually; next four years \$22,000; next thirty-four years, \$30,000 per year; and for the remaining portion of the lease \$35,000 annually. These figures, calculated on a 5% basis, indicates a front foot value of \$2,000.

CHEERING**Babson Holds Forth Promise**

The latest report of Roger Babson, the great statistician and prognosticator, forecasts that building has at last reached the peak, except in a few localities, and that costs should now gradually decline with more available labor supply for the districts where a large amount of building construction is still going on. (Here is something we are all for.)

ANOTHER NIBBLE**More Contractors to Organize**

Field Representative Jack Owens of the State A. B. C.'s dropped in for a short visit the other day. He was on his way over to Indiana Harbor where the contractors are eager to form a little organization of their own.

CALUMET BUILDING PROGRESS

One of the Calumet District architects comes forward with the information that he has projects that will total \$900,000 that have been postponed till next season in the hope that lower prices will prevail.

L. J. Granger of the Tri City Electric Co. is in New York attending an electrical dealers' convention.

LUMBERMEN AROUSED**Seek to Show Lumber Industry Is Not to Blame for High Construction Costs**

Since the general increase in building costs appeared to be reaching an alarming peak, there have been persistent efforts on the part of uninformed statisticians, careless economic services and deliberately untruthful representatives of substitute materials, to hold up the lumber industry as principally responsible for this situation.

To meet the emergency and place the economic facts about lumber before the public, the Publicity Department of the National Lumber Manufacturers Association has been active. In the case of flagrant misrepresentations appearing in

certain prominent publications individual action has been taken, which has been productive of a better understanding, and certain corrections of previously published erroneous articles.

That the lumber company should be militant in getting the proper publicity of the facts about lumber to the public, is clearly realized. The presidents of the most prominent retail lumber dealers associations have been asked for their information and views as to the relative cost of home building today as compared with 1920, and the comparative cost of lumber entering into the various kinds of home construction. (Bulletin National Lumber Manufacturers' Association.)

UNEMPLOYMENT BILL DEFEATED IN WISCONSIN**Law Makers Rightfully Balk**

One of the most vicious bills ever presented to a state legislature by organized labor was recently defeated in Wisconsin. It was known as the Huber Unemployment Bill, and provided for payment to workers of \$1 a day when deprived of employment through no fault of their own or for seasonal reasons. Such a law is now in operation in England and its demoralizing effect on workers is apparent on every hand.

Only recently Felix McWhirter, Pres., Peoples State Bank, Indianapolis, just returned from a trip abroad, in speaking of the chaotic conditions across the water particularly criticized "The Dole" or English Unemployment Legislation. He said that the custom of the government in making specified allowances to men out of work had simply encouraged laziness and put a premium on unemployment. He said English workmen had found that with the "Dole" and a little effort at odd jobs on the side they could make more money than by working straight through the week, consequently, they didn't want real work.

Wisconsin legislators are to be commended for their action.

GREATEST CEMENT OUTPUT EVER RECORDED FOR JUNE**Building Still Heavy**

June production of Portland cement was about 12,400,000 barrels, according to figures just compiled by the United States Geological Survey. Although this represents a decline of about 500,000 barrels from the record output of May, it nevertheless establishes a new high mark for the month of June by about 10 per cent. Production for the half year ending June 30, was more than 62,300,000 barrels—an increase of 33 per cent over the best previous record for a similar period.

June shipments from the mills amounted to 13,300,000 barrels, or slightly under those of June last year, and about 7 per cent less than in May of this year. Shipments for the first six months of this year were 62,226,000 barrels as against 48,029,000 in the corresponding period last year.

Stocks of cement in manufacturers' hands at the end of June were 9,219,000 barrels—a decline of approximately 9 per cent from those at the end of May.

THE BIRD THAT LAYED THE GOLD- EN BRICK AND THE LAST PLASTERER

(Reprinted from the Wall Street
Journal)

There is reason to apprehend that bricklayers will become as uncommon as veterans of the War of 1812. When one reflects on the princely wages of bricklayers, it is a lamentable thought that they have to die, but, as with all the world's great, no way has been found to save them this unhappy fate. An occasional veteran of the War of 1812 is recruited by fraud, and an occasional apprentice is admitted to membership in the Bricklayers' Union, but in neither case does the number of recruits begin to equal the mortality list.

The National Association of Manufacturers says that the number of apprentices admitted to the Bricklayers' Union last year was less than the number of members taken by death. At this rate, bricklaying will soon become a lost art, and our grandchildren will marvel at our skill in laying brick as we wonder at the lost processes of our remote ancestors who understood and practiced the tempering of copper.

The passing of the plasterers gives even greater reason for apprehension and disquietude, because they are passing even faster than the bricklayer. We replenish our streams with trout and we protect our song birds from extermination, but we take no thought of our plasterers. By reason of the limitation of apprentices, most of our plasterers are aged men and will not be with us for long. The years are not many when we shall regard with awe the last survivor of the Plasterers' Union very much as we regarded the last survivor of the change of Balaklava.

With the growing scientific interest in these matters, it is not unlikely that the

professors at our institutions of learning will soon undertake a study of this disappearing type as they do the small remnant of some of the aboriginal tribes. While there is yet time, we suggest that there be preserved on the phonograph for future generations the voice of a plasterer discussing long hours and slave wages, for the era is not remote when all we shall know of this species must come from a study of the fossil remains.

What antiquarian interest will there soon be in a fragment of freshly-spread plaster! We can see the last plasterer, a centenarian on his death-bed, painfully but skillfully spreading this fragment, at the rate permitted under union rules, for preservation in the metropolitan Museum of Art, alongside the fragment of King Tut's flagon.

ANOTHER EVIDENCE OF THE PRO- GRESSIVE SPIRIT THAT IS GRIPPING THE BUILD- ING INDUSTRY

Massachusetts Contractors Plan Big Outing

Looks as if the Associated Contractors of Massachusetts not only have a live organization from their regular monthly publication, a real live magazine, but that they also know how to play, too, and take advantage of their environment to that end.

A very attractive poster has come to our attention announcing the annual clam bake and field day of the Massachusetts contractors at the Oakland Beach Yacht Club at Oakland Beach, R. I., ten miles from Providence.

As a gentle hint there is a quotation reading, "A whale comes up and blows himself once in a while, but a lobster—never."

Scheduled for the day, August 15, is boating, bathing, swimming, a baseball game between contractors and architects, and a big feed that, to read the menu, would make one's mouth water.

The event is down on the calendar as the one big day for the Building Industry of New England to which architects, contractors, engineers and material supply men all are invited.

In conclusion the announcement says, "While at this affair, you are asked to remember—That you are out for a good time. That somebody has got to be the goat. That no matter how well you behave, you will be talked about just the same. Forget, then, your dignity, Prohibition, your creditors, the last dig your wife gave you, your age, and above all, the fact that there may be a 'next morning.'"

All of which goes to show that the Massachusetts contractors like the A. B. C.'s of Indiana are seeking to remove caste restrictions, unite the whole building industry and create a real esprit de corps in the solid ranks of the men and avocations of which the industry is composed.

SUCCESS IN BUSINESS CIRCLES TRACEABLE TO TRADE OR- GANIZATIONS

Contracting No Exception

Present day methods and conditions within the building industry require and recognize the necessity of trade organizations for the purpose of safeguarding the interests of its participants, and to see that the public is properly served and protected.

The building industry is second in size, exceeded only by agriculture. The greatest needs of mankind are food, clothing and shelter. Most everything is prepared under shelter. The building industry is called upon to satisfy these requirements. Yet builders have either been too busy or too negligent to take an active interest in the development of the industry upon which they depend for a livelihood.

The Associated Building Contractors of Indiana, a state organization of builders, organized in 1918, with 17 members, has grown to a membership of over 900. This organization functions every day, striving to improve conditions throughout the state. It has endeavored to care for the interest of the builder by putting forward constructive legislation, and opposing legislation that would have been inimical.

All Indiana contractors have derived general benefits from that which has been accomplished by the State A. B. C.'s. However, there are some who have held aloof possibly not realizing the extent of the advantages that have come as a result of the effort that has been put forth in the interest of the contractors not individually but as a whole. Increased membership will add strength to the State A. B. C.'s and, acknowledged or not, every Indiana contractor has a responsibility in the work that the association is carrying on. The sooner that responsibility is shouldered the greater will be the success that will accrue to the interest of the contractors.

NEW CATALOG OUT

John J. Tuite Co. Issues Data Book on Ash Handling Equipment

An interesting, instructive, and handy reference volume has just come off the press and is ready for distribution upon application. Reference is made to the new catalog on Ernst Ash Handling Equipment, issued by the John J. Tuite Co., 501 Fidelity Trust Bldg., Indianapolis.

NEW CONTRACTORS' ASSOCIATION NAMES STATE A. B. C.'s EXECUTIVE BOARD CANDIDATE

One of Big Calumet Operators Appointed

The recently organized General Contractors' Association of East Chicago and Indiana Harbor, which affiliated with the Associated Building Contractors of Indiana has exercised its prerogative and announced its candidate to serve on the Executive Board of the

State A. B. C.'s.

John Rahn, First National Bank Bldg., East Chicago, one of the largest building construction operators in the Calumet District, has been named for the office. Harry Olney was appointed as alternate.

SHADOW LINES NOW OBTAINABLE WITH ASPHALT SLATE SHINGLES

Add to Attractiveness of Small House Roofs

The present vogue of the multi-toned roof is especially suited to the small house. Combinations of red, green and blue-black slate-surfaced shingles have already been tried with some success, although the contrasts of these colors are somewhat harsh.

Recently, however, a new color in slate has been found which makes possible a richer beauty in the multi-tone roof. This new color, weathered brown, is especially distinctive when combined with red or green slate surfaced shingles; and it can be used very effectively to harmonize with red or brown brick walls and with stucco. By the tasteful use of these combinations it is possible to get a very distinctive roof at a moderate cost.

For the small house, slate-surfaced asphalt shingles of greatly increased thickness can now be obtained. These improved shingles cast a handsome shadow line and remove from asphalt shingles as a class, the old objection of flat, monotonous tone. Naturally, too a thicker shingle is far more durable and gives a tighter, firmer roof.

Architect Karl D. Norris, East Chicago, dropped in on Sec. Merritt Harrison the past week and reported a busy building season this year. K. D. said he wanted to attend the annual I. S. of A. meeting but a big project prevented. He was strong for the South Bend regional meeting and announced that the Calumet architects would be on hand.

VISITOR AT HEADQUARTERS

Architect Karl D. Norris, East Chicago, dropped in on Sec. Merritt Harrison the past week and reported a busy building season this year. K. D. said he wanted to attend the annual I. S. of A. meeting but a big project prevented. He was strong for the South Bend regional meeting and announced that the Calumet architects would be on hand.

News of the Week

Jeffersonville: Freight terminal. Owner, The Inland Waterways Co., Patrick Calhoun, Pres., Louisville, Ky. Razing of buildings to make way for this project has begun, and construction of warehouses will start within the next 6 months. Area of site, 10 acres.

***Martinsville:** H. J. Ratts, Auditor, Courthouse, Martinsville, is taking bids to close August 11 at 2 p. m. on the following: For the furnishing and installation of a new low pressure cast iron boiler, piping, etc., together with graduated system specialties and pipe and fittings for complete installation of a low pressure heating plant for the courthouse.

The contractor shall submit his bid and alternate.

No. 1. Installation of steam boiler and connection.

No. 2. Installation modulating system.

The estimated cost of the steam boiler and connection is \$1,800.

The estimated cost of the installation modulating system is \$1,000.

***Monterey:** School (1 room), \$8,000, North Bend township, Starke county, Indiana. Owner, John Exaver, trustee, Monterey, Ind. Owner receiving bids to close August 4 at 2 p. m. 1 room brick building.

Westfield: Town Hall—On July 30 at 8 o'clock p. m., the board of trustees of the town of Westfield, Ind., will receive sealed bids for the labor in the construction of a town hall, 24x30 feet, to be constructed of brick, concrete, tile and cement blocks. Specifications on file with clerk of said town.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BUILDING NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustees of the School City of Anderson, Madison County, Indiana, will receive sealed bids until 2:00 p. m. of Thursday, August 9th, 1923, for the erection and completion of a two story, sixteen room, fire proof school building, according to plans and specifications prepared by Mr. E. F. Miller, Architect, to be located between 14th and 15th streets and Laurel and Sycamore streets in said city at an estimated cost of \$130,000.00.

Separate bids will be received for the general construction, heating and ventilating, plumbing and electrical wiring for said building or any combination of the above.

Each bidder will be required to furnish evidence satisfactory to the Board that he has sufficient means and has had sufficient experience in the work of the class herein called for to enable him to undertake and complete the contract herein contemplated.

Said Trustees reserve the right to reject any and all bids.

Bids must be on the blank form provided by the Trustees as authorized by the State Board of Accounts and must be accompanied by a certified check for 4 per cent of the bid as a guarantee that the bidder will sign contract and execute bond with surety to be approved by the Board in full amount of bid to secure the completion of building according to plans and specifications if the contract is awarded to him.

The building shall be substantially completed, ready for school use by August 31st, 1924.

Plans, specifications and blank bid forms may be obtained for use of individual bidders from Supt. W. A. Denny at his office in the Senior High School Building or from Mr. E. F. Miller, Architect, room No. 545 Farmers Trust Building, Anderson, Indiana.

By order of the Board of School Trustees of Anderson, Indiana.

A. W. Brady, President.

H. B. McMahan, Secretary.

August D. Millsbaugh, Treasurer.

July 21 and 28.

story, brick, grade school building now being erected in Zionsville, Indiana, for the use and benefit of said Eagle School Township, Boone County, Indiana. All in accordance with the plans and specification therefor which are on file in the office of said Trustee located on Meridian street in the town of Zionsville, Boone County, Indiana. True copies of said plans and specifications also may be seen at the office of the Indiana State Board of Accounts at the State House in Indianapolis, Indiana, and at the office of the Elmer E. Dunlap Company, the architect, at 1050 North Delaware Street, Indianapolis, Indiana. Bidders desiring duplicate copies of the plans and specifications may obtain the same by a deposit of \$25.00 to cover return in good condition of the general construction documents not later than the day of the letting of the contract. The estimated cost of the entire construction of said building was \$90,000.00. Said bids will be based on alternates numbered 1, 3, 4, and 5 as shown in said plans and specifications which said alternates have been included in the general contract. Said bidders will complete said work herein bid on so as to not interfere with other contractors and at the time agreed upon between said Trustee and the general contractor.

All bids must be on form 96 prescribed by the State Board of Accounts and the same will be received at the office of the said Trustee up to ten o'clock in the forenoon of the said date at which time and place of said bids will be opened, publicly, and read. The letting of said contract will begin, subject however, to all rights of said Trustee and Advisory Board, as provided by law and as herein set forth.

The contract will be awarded in such manner as to be to the best interest of said Township. Each bid must be accompanied by a certified check not less than 3% of the gross bid submitted, payable to the said Trustee who shall have the right to cash the check of the successful bidder and the money so obtained by the said Trustee shall be retained by him as liquidated damages in event said bidder fails, within ten days after the acceptance of his bid, to execute a contract in the

form and with the provisions desired by said Trustee and approved by said Advisory Board covering the construction and installation of said work, and at the same time to deliver to the said Trustee a good and sufficient bond in an amount and with security to be approved by said Trustee and conditioned as required by law.

The right is expressly reserved by said Trustee and Advisory Board to reject any and all bids and to take reasonable time to investigate both the bids and the qualifications of the bidders.

Dated this 16th day of July, 1923.

JESSE F. PHILLIPPI,

As Trustee of Eagle School Township and the corresponding Eagle Civil Township, Boone County, Indiana.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given by the Joint School Board of Jackson and Morgan School townships, Owen county, Indiana, that up to 2 o'clock p. m. on the 10th day of August, 1923, at the meeting place of said board at Jordan, Ind., the board will receive sealed proposals for the construction of a two-room grade school building to be erected at Jordan, Ind., in accordance with the plans and specifications now on file at the office of said superintendent.

The estimated cost of the proposed building is \$8,000. All bids must be made out on standard form of bid blanks and accompanied by non-collusion affidavit. Each bid must be accompanied by a certified check for 4% (four per centum) of the amount of the bid, guaranteeing that the bidder, if awarded the contract, will accept the same and give bond for the faithful performance of said contract. Such checks should be forfeited to the board in the event that the bidder to whom the contract is awarded refuses or fails to enter into a proper contract with proper surety.

Duplicate copies of the plans and specifications are on file at the office of Johnson, Miller & Miller, architects, No. 30 N. Fifth Street, Terre Haute, Ind., and may be obtained by the bidders wishing to figure. The plans can also be obtained from the county superintendent of schools, Spencer, Ind.

The board reserves the right to reject any or all bids.

Dated at Spencer, Ind., this 16th day of July, 1923.

ALBERT FREE, Superintendent, Chairman.

D. W. HASSLER, Secretary.
July 28, 1923.

ANXIOUS TO CARRY ON

President Griffin Eager to Continue to
Push Society to the Fore

United Support of State Architects
Needed

Further progress of an aggressive and militant nature is indicated for the Indiana Society of Architects under the new administration which was just recently inducted into office. President Harry M. Griffin, Connorsville, was in Indianapolis the past week and announced that he is heartily in favor of an active constructive program of action such as was followed under the leadership of former President Guy Mahurin and his predecessors. The new executive is anxious for every member to take an active interest in the workings of the Society, and is eager to have individual members give some thought as to how that interest may be accentuated, and then submit their suggestions to the officers for guidance in mapping out a definite program for the year's work.

The idea is to build up the organization to the point where it will appeal to every member of the architectural profession in the State, and thus solidly backed by the architects, will be in a better position to raise its voice in public councils and suggest moves for the improvement of building conditions, or take a stand in matters of public interest when the moment arrives for the architects to have a say.

The regional meetings instituted the past year, by means of which the architects in specified localities are brought into closer contact with each other informally are heartily indorsed by the new president who has in mind the establishment of even stronger programs for these gatherings that those who attend may come to the realization that the Society actually is a virile organization striving along big, broad, constructive lines.

Instructions have just been sent out to all the committee chairmen to get busy at once and make up their various committees that active work may be carried forward. The chairmen have been furnished with complete rosters from which to make their appointments as soon as

possible. The suggestion has been made that every member of the Society be named to some one committee that a greater individual interest may be created amongst the rank and file of the profession. The idea inspired is to make of the Society a body in which all may act, instead of a few men upon whom in past years the burden has fallen.

President Griffin's ambition to push the Society on to even greater accomplishments is most laudable and is deserving of the support of the State profession.

NEW ADMINISTRATION TO WEED
OUT THE DEAD TIMBER
FROM THE SOCIETY

Real Progressive Men With Conception
of Professional Responsibility
Wanted

Those at the helm of the Indiana Society of Architects have decided that enough leniency has been extended to a certain membership element who has just ridden along year after year seemingly oblivious to the fact that membership does entail responsibility.

Though the Society has worked unceasingly in order to advance the interests of the profession and by doing so has brought about various conditions and put into effect features, all of which have redounded to the interest of the individual architect, nevertheless, there are members who have utterly ignored their obligations in these matters and reaped the accrued benefits without contributing an iota of financial aid toward the accomplishments.

To do things financial resources are required and there was no exception to this rule in the case of the I. S. of A., which has been under considerable burden of that nature, in carrying out the aims and purposes of the organization, perfecting its function, and in securing legislative action of a nature beneficial to the architects and the building industry as a whole. Had it not been for the loyal and unselfish support afforded by the vast majority of the architect members the profession would not now be enjoying the advancement that has come to it, instead, it would still be back in that old rut of aloofness of former years where all played a lone hand, and

under that order was given little or no recognition or consideration by public officials, law makers or even the other elements in the building industry.

There may be those who will argue that they as individuals have not profited but when one considers the co-operation that has been effected amongst the whole body of architects and with the engineers, contractors, even labor and public officials such arguments are refuted. The profession has profited then, why not the individual architect?

That which is wanted in the personnel of the Society is live timber, the dead wood is to be eliminated and to that end the members who have allowed their dues to go unpaid and who have ignored the notices that have been sent to them are to be dropped from membership. The weeding out process has already been started.

INTERESTING PROPOSITION NOW
UNDER CONSIDERATION

Big Meeting of Architects and Contractors
Suggested for South Bend

Developments have arisen that are now being fostered to make the regional I. S. of A. meeting at South Bend in September, one of the greatest gatherings ever held by the architects and building industry. The meeting was originally scheduled for Saturday, September 8th, but that date has now been set aside. However, the meeting will be held sometime during the week of September 3 to 8, to be decided upon later.

Since the regular quarterly conference of the Associated Building Contractors of Indiana is to be held in South Bend the same week it has been proposed that the State Architects and Contractors meet on the same day. The tentative plan is for the architects and contractors to hold separate business sessions in the afternoon and then in the evening put on a joint meeting.

The possibilities of such an elaborated gathering are many and the scheme when presented to certain architects and contractors has met with favor.

If carried through such a meeting would be the first of its kind ever held in the state and would mark a new epoch in the Indiana building construction industry.

SMALL BUILDING KEEPING EVERYONE BUSY

Good Pace Set Early At Evansville Steadily Being Maintained

Though there is an absence of large types of building construction in Evansville, nevertheless, there is little or no diminution in the general activity that has been going on right along practically all summer, with plenty of indication that it will continue for some time to come.

The work that is being done consists chiefly of new residences, additions and remodeling. Many alterations to stores and other commercial buildings are being done but industrial construction is almost at a standstill.

Such conditions have the contractors' working organizations putting in eight full hours a day and even at that they are all speeded up to keep up with the demand for this smaller class of work.

All of which has made for a good season for the building trades mechanics, the best they have experienced locally in years.

NO CHANGE IN EVANSVILLE PLASTERING WAGE SITUATION

Union Has Not Presented Advance Demand Yet

Quite a squall seemed imminent last week when the word got out that the Evansville plasterers would, beginning Monday, July 23, demand \$12 per day. While the propaganda spread like wildfire and the contractors held a meeting to consider the matter it was decided that no action be taken. Those present argued that since no official demand had come from the plasterers' union for an advanced hourly wage there was really nothing to be done officially in the matter and there it stands.

BIG PUBLIC IMPROVEMENT CONTEMPLATED

Move Made to Enlarge Evansville Water System

The water works board, in session last week, unanimously adopted plans calling for a \$266,000 addition to the city's filtration plant and an appropriation of \$270,000 will be asked of the city council.

Such a move will require a bond issue that will have to be approved first by the State Tax Board.

CHIPS AND SHAVINGS

J. Bippus & Son, general contractors, among other jobs, are finishing up the interior work on the Freund duplex apartment at Scholtz St. and Madison Ave.

Matt Hallenberger has his men speeding up the remodeling work at the Kaiser store at 412 Main St. He expects to have the new colonial home for L. Hahn on McCormick Ave., Bayard Park, ready for occupancy about September 1st.

Contractor Ed Dubber has quite a few projects under way and expects to finish several of them within the next week or so.

It is expected to have the remodeled Saunders building, Third near Locust St. completed in about ten days, according to C. Kanzler & Son, the contractors.

GOOD BUSINESS ATMOSPHERE AT FT. WAYNE DUE TO BIG VOLUME OF BUILDING

Influence Far Reaching

While building construction in Ft. Wayne this season has made for a wonderful activity in building circles and prospered those therein engaged, that is not the limit of its influence, it has reached out and beyond into other business fields and created conditions that have redounded to the interests of many, unaffiliated directly with building. There is no way to discount the fact that the great construction effort put forth in Ft. Wayne in 1923 has made the city prosperous.

The seven millions and more dollars spent on new building have gone for wages to an army of craftsmen, to local material firms and to merchants handling household furnishings and such. That money again has been split amongst grocers, clothiers, druggists and other store owners and these in turn have again passed the money on.

For instance, when a building goes up in a community the money spent goes

for wages, brick, lumber, millwork, glass, paint, nails, labor, plumbing, electric fixtures, and scores of other things. The money goes to the contractor, to the lumber dealer, to the brick man, and to the others. They spend the money for groceries, labor, meat, clothes and countless other things. And the money—much of it—remains in town and it remains to keep working.

There is the point, a large proportion of the money involved remains at home and continues to work in the local field, hence prosperity in that field.

That is just what building has done for Ft. Wayne this year, and has acted in like manner in other Indiana cities.

The conclusion to be drawn from the above is that if money thus spent does so much good for employment and general business conditions the logical thing to be done is to encourage building construction on a sane basis. The sanest basis is to follow reasonable lines that insure reasonable prices.

Ft. Wayne is fighting for that very thing, for the hope of future business lies in a continued building activity.

WORKING ON PLANS FOR CARPENTER APPRENTICE CLASSES IN PUBLIC SCHOOLS

Suggestion for Indiana Contractors

According to W. P. Carroll, executive manager of the Cleveland Building Trades Employers Association, plans for the establishment of an apprenticeship school for carpenters are rapidly materializing. Under the present schedule the joint committee composed of representatives of the Carpenter Contractors Association and the Carpenters District Council hopes to have the classes under way by the opening of the public schools early in September.

Practically the same system which has been so successfully used in connection with the Cleveland Bricklayers Apprenticeship School will be adopted in the carpentry course. The apprentices will be indentured to carpenter contractors and the actual experience they receive on the jobs will be supplemented by four hours a week of intensive training in the class rooms under the direction of competent instructors.—(Bulletin National Assn. Building Trades Employers.)

GOVERNMENT MATERIAL TESTS BEING MADE

Investigations are now under way by the United States Bureau of Standards, covering the action of frost on building stone and on the value of colorless water-proofing materials with which to protect the surface of stone structures. A series of exposure tests are being conducted to determine the durability of the materials in preventing the decay of stone.

MEETINGS.

Executive Committee meets second Tuesday each month.
Painter Contractors meet every Wednesday, 3:00 p. m.
Plasterer Contractors meet every Wednesday noon.
Mason Contractors Association meets every Thursday—1 P. M.
General Contractors meet second Friday each month.

PLANS ON FILE.

None this week.

WAIVER OF LIEN

Bennett, T. G., known as the contractor, and Edward E. Stevens et ux. as the owners, agree to construct and build a dwelling house on part of lot 6, Miller & Wacker's addition, for \$2,910.

The Indiana Builders Corporation, known as the contractor, and Jeremiah J. O'Brien, et al., as owners, agree to erect a frame bungalow on lot 27, Emerson Heights addition, west section, for \$5,992.94.

Ayres, C. C., as contractor, and John D. Brosnan, as owner, to erect a one-story brick veneer business building on Nos. 909, 911, 913 Fort Wayne Ave., for \$5,335.

MORE GLORY FOR INDIANAPOLIS MASON CONTRACTORS**Put Across Another One of Their Famed Annual Outings**

The Mason Contractors' Association of Indianapolis, who for many years have established quite a reputation for the annual picnics they put across, took another fling at their specialty Saturday, July 14th and held one of their famous outings at Page's, seven miles east of Indianapolis on the National Road.

Favored with perfect weather the mason contractors made the most of their opportunity and had a most enjoyable time. The outing this year was confined to the late afternoon and evening. Along about sunset the masons and their guests began arriving and soon had the merriment started.

Later on a sumptuous chicken dinner was served after which there was music and dancing.

Mrs. James Hodgson, Sr., as a special committee on decorations acquitted herself with credit, her efforts drawing forth much praise. The big dining room was most attractive under a soft glow

of electric lights concealed within artistic Japanese lanterns strung around and across the room. Under the glow stretched the tables where at each cover little silk American flag favors were stuck into the cantelopes that awaited the guests upon their arrival. Artistic, fantastic and many hued caps were distributed to those present which, when donned, added to the general attractiveness of the scene.

Gathered about the tables were some forty-one persons who all entered into the spirit of gladness with zest. Among those present were: Walter Wise and wife, James Hodgson, Sr., and wife, E. H. Pierson and wife, T. J. O'Hara and wife, Leon Joyce and wife, Orville Wise, wife and child, James Rybolt and wife, their daughter, and husband and grandchild, Chris Hattendorf and son, M. M. Bonnewitz and guests, J. H. Owens and wife and numerous other visitors.

TO TOUR THE EAST**Well Known Indianapolis Builder Contemplates Extensive Motor Trip**

To get out from under the heavy building rush that has kept Indianapolis builders on their toes all season, James Hodgson, well known local brick contractor, his son Will and their wives have planned quite an extensive vacation trip.

They will leave by auto Monday and expect to be gone for four weeks on a tour of the East. Their itinerary will include Washington, D. C., Philadelphia, Atlantic City, New York, Boston, Buffalo, Niagara Falls and Cleveland, O., thence home again.

FIRST OFFICIAL MEETING OF STATE BUILDING COUNCIL TO BE HELD NEXT WEEK

Those directly connected with the new Administrative Building Council of Indiana are busily engaged in whipping preliminaries into shape so that actual operation may be brought into effect as soon as possible.

Already the administrative committee, named under the provisions of the law, has organized, and the advisory committee has been appointed. The latter has named its sub-committees and a general meeting was held Friday afternoon to adopt rules and regulations for action.

The first regular meeting of the entire building council composed of the administrative and advisory committees, will be held at the State House Monday afternoon, July 30.

This meeting will mark a new era in Indiana building circles, for it will be the first time Indiana state officials and the state building construction industry, represented by architects, contractors, engineers and labor, will have met together to formulate plans for future building construction operations in Indiana.

BUILDING PERMITS

HERE'S THE ANSWER**Very Simple After All**

There is one question that will not dawn these days to the effect, "Why is it?"

Yes, why is it that with wages at peak levels, with practically everybody busy, with the greatest building season ever known in full swing, and other businesses going good, nevertheless, every one seems short of ready cash? On all sides one hears the cry, "Collections are slow, hard to make." This yelp comes from the milkman, insurance man, installment houses, material supply dealers and manufacturers, in fact, practically every business man has the same complaint.

It has been suggested that automobiles and moonshine are responsible for this doctrine. The latter is a pretty strong assertion and should be taken with a grain of salt. On the other hand, the auto has gotten in its work. There are too many people owning or buying cars who are not so financially fixed that they can afford to indulge in such luxury. It is not so much the first cost as the upkeep that is responsible for the drain on purses. Gasoline, tires, accessories and repairs, to say nothing of the expense of week-end trips, is an open maw into which people feed their cash while other accounts are allowed to grow, accumulate, and are passed up with reckless abandon.

Another thing, one must not overlook the fact that when an automobile sale is transacted the money, except the agent's commission, leaves the locality and goes to the place where the cars are manufactured. If this money was put into homes or into property it would remain at home to be reinvested and thus be kept in local circulation.

Then, too, when an auto is purchased the maintenance feature creeps in and on top of this the investment in the machine itself brings no return on the capital, instead the latter begins to evaporate and diminish under the stress of depreciation.

How different it is from the old ways of thrift. At that time few people considered they could afford the upkeep on a horse and vehicle for the pleasure that the outfit would return was not held commensurate with the struggle involved. That was during a period when people paid their bills on time. The argument was made that a horse would eat his head off and the expense and care involved was too great. However, "them days is gone forever" to all intents and purposes. Now the price of three or four teams is invested in an

auto and hours are spent in keeping it in running order, no reckoning being taken of the labor or expense involved. Once people were rated by the house in which they lived, today they are judged by the machine in which they ride.

Reports show that despite prohibition there is a great volume of money spent for booze, with beer, where obtainable, selling at 25c per glass, and other liquor running as high as 75c per swig. At 25c to 75c per glass it don't take long for a ten dollar bill to fade away to nothing under a good thirst.

If the money thrown into the above channels was directed to the purchase of homes and property it would make quite a difference in the business world.

CALUMET BUILDING PROGRESS

Morris Bros. were awarded the contract for the new M. E. parsonage to be built on Webb St. It will cost \$12,000, and be a two story structure.

The concrete for the third floor of the new hotel has been poured and the forms are being erected for the fourth. Seems the job is going rather slow but it takes a lot of form work for each floor.

J. K. Doppler, contractor from Indiana Harbor is building three bungalows in West Hammond. He expects to build ten, as there is a good demand for new homes in that locality.

Rufus Danner & Co. has completed the foundation and started the brick work on the Lincoln School at Indiana Harbor.

The contractors of East Chicago and Indiana Harbor have formed an association of general contractors and has affiliated with the State A. B. C.'s.

**EXPECTS BUILDING ACTIVITY
WILL CONTINUE****End of Present Building Boom Not in
Sight**

"It is true that the rising costs may cause some building work to be postponed indefinitely, but the fact that the buildings are wanted on the basis of costs prevailing prior to May 1st is a very definite element of strength in the situation. The fact that employers have granted wage advances since then is evidence that they believe there is a considerable amount of work that will go forward even under the new conditions. As the deficit in buildings is reduced, the urgency of the demand for more doubtless will be modified, and the disposition to hold off for lower costs will be

strengthened. Ultimately the wage question will have to be dealt with again, and there may be several set-tos on the subject before the deficit is fully overcome. However much there may be of this it seems safe to say there is no prospect of a decline in actual building activities in 1923."—(Monthly Bulletin, National City Bank, New York City.)

**NATIONAL JURISDICTIONAL
AWARDS BOARD TO MEET
NEXT WEEK****Annual Election of Officers on Program**

A meeting of interest to the building contracting industry of the country is scheduled to open July 30 at Atlantic City when the National Board of Jurisdictional Awards will open its sessions at that place.

The attention of the board during the day will be devoted to the business of the Board in Executive session and, this being the annual meeting, new officers will be elected.

The public hearings of the board will begin the second day and the cases now before it will be acted upon. The erection of Conduo Base used for the reception of electrical wiring will be decided at this meeting. The board will also have before it for its action the dispute between the bricklayers and plasterers over the "setting, installing or sticking of artificial stone" and "plastering work for preparation of walls, ceilings, etc. for tiling." In addition to these subjects the board will hear evidence in the following matters:

Rehearing of the decision on low pressure heat.

Rehearing of the decision on asphalt shingles.

Installation of Zenethern.

AMERICA'S STRIKE BILL**Cost of Wage Dissensions in Industrial
Field Enormous**

During the latter half of 1922 the United States lost more time through strikes than all the other industrial countries in the world, is the statement recently made by a leading German economist. Out of a total of 20,212,036 working days lost through strikes in the seventeen leading industrial countries of the world during the period from July 1, 1922, to January 1, 1923, 14,691,000 of them were lost in the United States. If applied to the extraction of natural resources, this lost labor would have added \$120,000,000 to our national wealth, and \$50,000,000 more would have been placed in the pockets of the laboring men.—(Weekly Bulletin National Association Building Trades Employers)

***Church:** \$25,000, 1 sty. and bas., 85x50, Winslow, Ind. Archt., J. W. Gaddis, 602 American National Bank Bldg., Vincennes. Owner, Winslow Christian Church, Gilbert McCord, chmn., Winslow, Ind. Archt. taking bids.

***Church:** \$30,000, Wendelin, Ill. Archt., J. W. Gaddis, 602 American National Bank Bldg., Vincennes. Owner, Holy Cross Congregation, Rev. Joseph Fisher, pastor, Wendelin, Ill. Plans sent to owner. In abeyance until spring, 1924.

Contracts Awarded

***School (high and grade),** \$75,000, 2 sty. and bas., 107x57, Barr township, Daviess county, at Montgomery, Ind. Archt., Osterhage and Sutton, Citizens Trust Bldg., Vincennes. Owner, George E. Williams, trustee, Montgomery, Ind. General contract awarded to Virgil Grannon, Washington, Ind. Heating and plumbing let to H. F. Zietlow, 548 Eastern Ave., Indianapolis. Electric work let to E. K. Sudduth, Washington, Ind. Project temporarily held up until bonds sell.

***Bicknell:** School (add. and rem.) Archt., J. W. Gaddis, American National Bank Bldg., Vincennes, Ind. Owner, Board of Education, Frank M. Curry, president; George Cleveland, treasurer; E. L. Phillippi, secretary, all of Bicknell, Ind. Plans completed. Frame, brick, asphalt shingle roof, artificial black boards, Arcola hot water heating system, electric wiring, plastering. General contract awarded (subject to approval of State Board of Accounts) to Frank Cummings and William H. Milan, Bicknell, Ind.

***School (township),** \$30,000, 1 sty., 96x65, Epson, Ind. (road from Plainville). Archt., Osterhage and Sutton, Citizens Trust Bldg., Vincennes. Owner, A. M. Myers, trustee, Plainville, Ind. Brick. General contractor, Willis Bros., Carlisle, Ind. Heating and plumbing let to V. R. Smith, Princeton, Ind.

MISCELLANEOUS CITIES

Columbus: Store, 1 sty., 90x25, Jackson St. between 3rd and 4th. Owner, Jess Stillabower (feed store). Owner taking bids. Concrete block.

East Chicago: Church, \$35,000. Owner, St. Basil Roman Catholic Church, East Chicago, Ind. Plans in progress. Brick. May not mature until spring.

***Indiana Harbor:** Store (top add.), \$10,000, 2 sty., 25x45, 3410 Michigan Ave., Indiana Harbor. Archt., Karl D. Norris, Calumet Bldg., East Chicago, Ind. Owner, Dr. C. C. Robinson, 3410 Michigan Ave., Indiana Harbor. Owner taking bids.

***Kennard:** School (rem. and add.) \$30,000, Greensboro Twp. Archt., E. W. Watkins, Anderson, Ind. Owner, Homer C. Garriott, trustee, Kennard, Ind. Low bidder on general contract, Pike Bros. Constr. Co., Newcastle, Ind. Bids ran a little high, will decide whether or not to award contracts on August 11th.

***Lebanon:** Orphan's Home (add.) \$3,500. Archt., John Frost, Reporter Bldg. Owner, Board of County Commrs, Ira Stephenson, auditor, Court House, Lebanon. Owner taking bids to close August 18 at 10:00 a. m. Frame and concrete. Weatherboard siding, asphalt shingle roof, comp. roof, rem. heating system, electric wiring and fixtures, plumbing fixtures.

***Metz:** School. Archt., Henry G. Bruehlman, 1125 Yates St., Toledo, Ohio. Owner, Clyde F. Dally, trustee, Metz. Struc. steel, comp. roof, maple floors, steel sash, low pressure gravity, D. I. steam heating, light and power plant. Bids close August 18 at 1 p. m. (Note extension of closing date.)

Scottsburg: Court House, \$250,000. Archt. not selected. Owner, Board of County Commissioners, Charles Taft, Charles Payne, C. L. Read, Elvin L. Huhbanks, auditor, Court House, Scottsburg, Ind. Contemplated. Will mature early 1924.

***Seymour:** School building (3 rooms). Dist. 5, 6 and 7, Jackson Twp., Jackson county, Ind. Archt., Robert H. Hall, Seymour, Ind. Owner, Louis Aufenberg, trustee, Seymour, Ind. Owner taking bids to close August 23 at 12 o'clock noon. Brick, hollow tile, steam heat, septic tank, asphalt roofing, folding partitions, steel sash, electric generator. 1 sty. and bas., 50x70. Estimated cost general contract, \$14,619; heating and ventilating, \$2,147; plumbing, \$1,999; wiring, \$435; private water system, \$500.

Contracts Awarded

***Daleville:** Church and Sunday School, \$25,000. Private plans. Owner, United Brethren Church, Daleville. General contractor, Williams Construction Co., Lapel, Ind. Starting foundation. Htg. and plumbing let to Arthur Schlagel, Daleville. Brick veneer.

Goshen: Saw mills (2), Goshen and South Bend. Owner, The Sanders-Egbert Hardwood Lumber Co., Goshen, Ind. General contract let to The Clark Bros. Construction Co., Olean, New York.

ROADS—BIDS WANTED

Logansport—August 7, 1923, at 10 a. m., by Commissioners of Cass county at Logansport,

Ind., for the construction of Joseph C. Fettig et al. road. Estimated cost, \$40,074.00. Harry M. Gardner, auditor.

Rochester—August 7, 1923, at 2 p. m., by Commissioners of Fulton county, at Rochester, Ind., for the construction of Wm. H. McLochlain road 15,840 feet in length. John L. McClung, Auditor.

Muncie—August 7, 1923, at 10 a. m., by Commissioners of Delaware county at Muncie, Ind., for the construction of Wm. C. Thomas road, 2,625 feet in length. James P. Dragoo, Auditor.

Muncie—August 7, 1923, at 10 a. m., by Commissioners of Delaware county at Muncie, Indiana, for the construction of John Burke road, 12,830 feet in length. James P. Dragoo, Auditor.

Marion—August 7, 1923, at 2 p. m., by Commissioners of Grand county at Marion, Ind., for the construction of Chester C. Mason road. Austin D. Hunt, Auditor.

Peru—August 8, 1923, at 10 a. m., by Commissioners of Miami county for the construction of five roads: County unit road, Ira Eikenberry, et al., 8,167 ft., estimated cost \$11,850.00, county unit road, B. E. Wallace et al., 14,510 ft., estimated cost \$82,700.00; county unit road, Joseph H. Myers, et al., 5,700 ft., estimated cost \$27,270.00; county unit road, John F. Durr, et al., 5,238 ft., estimated cost \$27,700.00; county unit road, C. Glen Hurst, et al., 14,122 ft., estimated cost \$71,800.00. Charles Wolf, Auditor.

Kokomo—August 8, 1923, at 12 m., by Commissioners of Howard county at Kokomo, Indiana, for the construction of M. L. Kanable, et al., road. Estimated cost, \$5,053.57. Orville O. Butcher, Auditor.

Lafayette—August 18, 1923, at 10 a. m., by Commissioners of Tippecanoe county at Lafayette, Ind., for the construction of Charles Daugherty et al., road. Estimated cost, \$1,500. Cora M. Davis, Auditor.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

POWER PLANT AND EQUIPMENT NOTICE TO BIDDERS

Bids will be received by the Board of Trustees of the Indiana State Normal School August 8, 1923, at 2:30 p. m. at the office of the Eastern Division of the Indiana State Normal School, Muncie, Ind., for the erection and completion of a power house, tunnel, chimney, boilers, stokers and soot cleaners. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to five (5%) per cent of the amount of the bid. Separate bids must be received for the following items: First, for the erection of the power house; second, for the construction of the pipe tunnel; third, for the erection of a chimney; fourth, for the boilers; fifth, for the stokers; sixth, for the soot cleaners. Total estimated cost, \$60,000. Bids must be made in accordance with provisions of specifications prepared by Kibele & Garrard, architects, Muncie, Ind. Copies of plans and specifications may be found at the office of the Dean of the Faculty, Eastern Division, Indiana State Normal School, Muncie, Ind.; at the office of Kibele & Garrard, architects, 335 The Johnson Building, Muncie, Ind., and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Ind.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL.

Celotex Stops Heat-Cold-Noise

Makes Stronger Buildings

Celotex is in use in thousands of homes throughout the entire United States as a sheathing, replacing wood sheathing, as a plaster base, eliminating lath, as a sound deadener, interior or exterior finish or as base for stucco.

Celotex Lumber is used for sheathing throughout. Celotex is a replacement for wood sheathing, shows greater strength and is equal to cork for insulation. It turns heat and cold alike, as no other building lumber can.

When you, as an Architect or Contractor, erect a house with Celotex you provide the owner with comfort the year 'round and a 25% to 35% saving in the annual fuel bills as long as the house stands.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture. It is the only manufactured board on earth that will stand the test in outside walls. Nails direct to the studs of the building, saws and handles the same as wood lumber. It is not readily harmed by weather nor rough handling.

Talk to your lumber dealer, he stocks it. Ask him about the merits of this remarkable lumber. He knows. He can make immediate delivery, too.

Stock sizes: Thickness 7/16 in., width 4 ft., lengths 8 ft., 8½ ft., 9 ft., 9½ ft., 10 ft. and 12 ft. Weight about 60 lbs. per 100 sq. ft.

SCOPE OF SOUTH BEND REGIONAL
MEETING GROWINGArchitects and Contractors Endorse
Joint Gathering Proposition

The tentative date for the next regional meeting of the I. S. of A., scheduled for South Bend, has been set. September 6, is proposed.

Originally the meeting was to have been held on Saturday, September 8, but when it was learned that the Associated Building Contractors of Indiana were planning a district conference in South Bend the same week the idea was conceived to have both organizations arrange to hold their individual business sessions the same day and a joint meeting of architects and contractors that night. The proposition was placed before the officers of the I. S. of A., and the State A. B. C.'s and immediately met with favor.

The directors of the architects' body has heartily endorsed the idea, not a dissenting vote being registered against it. The State contractors' association has seconded the proposition also.

Since it was the original intention of the architects to invite the members of the Illinois and Michigan Societies of Architects to the South Bend regional meeting the invitation will be extended, if the elaborated plans carry, to include also the Associated Building Contractors of Illinois and Michigan who will be urged to attend the big joint meeting.

Thus the assemblage will take on a tri-state aspect and an effort will be made to secure speakers of known ability to make up a program long to be remembered by those who make the pilgrimage to South Bend.

In view of the fact that northern Indiana has put over a wonderfully active building season so far in 1923, the honor of scheduling the proposed meeting, the first of its kind in Indiana, in South Bend is well merited.

COMMITTEES NAMED

New Administration Ready for Action.

The new administration of the Indiana Society of Architects that took over the executive affairs of the association following the annual election in June has

practically effected its organization and is now ready to get down to business.

With the induction into office of the new officers and committee chairmen a reorganization of committees was in order. The chairmen were requested to select their committees and submit their choice. This was done in all cases, except with regard to Pageants and Exhibits, this committee not having been named as yet, and the following appointments are announced:

Entertainment Committee:

L. A. Turnock, Chairman, Indianapolis
Fritz Anderson, Evansville.
E. R. Austin, South Bend.
M. H. Johnson, Jr., Terre Haute.
Guy Mahurin, Ft. Wayne.
K. K. Woolling, Indianapolis.

Legislative Committee:

Warren D. Miller, Chairman, Terre Haute.

F. S. Cannon, Indianapolis.
J. W. Gaddis, Vincennes.
Wilson B. Parker, Indianapolis.
Wibur Shook, Indianapolis.

Membership Committee:

Geo. W. Allen, Chairman, Laporte.
Everett Brown, Bluffton.
Rodney Leonard, Frankfort.
A. E. Neucks, Evansville.

Paul R. Werking, Richmond.

Publicity & Public Action Committee:

Herman Scherrer, Chairman, Indianapolis.
Charles E. Bacon, Indianapolis.
Herbert Foltz, Indianapolis.
Oscar Hoffman, Decatur.

Walter Scholer, Lafayette.

Pageants and Exhibits Committee:

Kurt Vonnegut, Chairman, Indianapolis.

Appointments to be announced later.

CLEANING HOUSE

Society Dropping Those From Membership Who Show No Interest.

Determined to make the State Society of Architects a live body in which interest will center and from which action will radiate the officers are set on their plan to weed out the pseudo members who have been dragging along year in and year out contributing neither financial aid nor inspiration to the organization.

Years of effort have brought the Society to a point where it is bound to be given recognition throughout the State as it has been accorded in some sections. The State contractors' association realizes the things that the I. S. of A. has worked and has co-operated. State officials, too, have acknowledged the Society. But, this is just the start, the time is not far distant when the I. S. of A. will not only be something to belong to but a virile organization of which to be a part.

Already the officers have started to clean house and have dropped from the membership roll those architects who have continually ignored the notices sent them, have neglected to pay their dues and generally shown a tendency to dodge the responsibility that membership in any live, going organization entails.

PROBLEMS IN ACOUSTICS.

Experiments Offer Interesting Results.

Architects find no more difficult problem than that presented by the acoustics of lecture and concert halls. The subject has been investigated by one of the physicists at Harvard, who offers some interesting conclusions.

The acoustic properties of a hall depend upon two variables—the form and the materials. The essential features of the materials are their absorbing and reflective powers. Fogg Art Museum lecture hall was modeled after Sanders Theatre, Cambridge, but failed to reproduce its excellent acoustic properties. The reverberation of sound lasted 5.62 seconds, an intolerable length. But putting Sanders Theatre cushions in the seats, floor and part of the hall the reverberation period was reduced to 1.14 seconds. An open window is an absorber of sound. An audience absorbs a square meter .94 as much as an open window. An isolated woman in the auditorium absorbed .54 as much as a window, and an isolated man .48, apparently a tribute to the superior excellence of female apparel. Hair felt on the wall absorbed a square meter .78 as much as a window.

STEPPING RIGHT ALONG**Evansville Doing Much To Catch Up
With Housing Requirements.**

Though home building operations locally have been quite active during the first six months of 1923 and the contracting forces have been put to it to keep up with the demand City Building Inspector Edward Kerth, Evansville, holds that the city is still short of its housing requirements.

The city has worked hard to catch up on the housing situation and has made great strides in that direction but still has some distance to go.

Speaking of the local situation, Mr. Kerth said: "Evansville's position is due to inactivity in building during the last few years and also to the razing of 200 houses, ordered razed by the building department."

Building conditions are generally favorable and local bankers announce that there is plenty of money available for loans on home construction operations. There may be some temporary lulls here and there, but those in close touch with Evansville building matters are inclined to believe that the boom started early in the season will hold its own as the months roll on.

**ASSOCIATE WOMAN ARCHITECT TO
WORK OUT PLANS FOR EVANS-
VILLE'S NEW Y. W. C. A.
BUILDING.**
New York Firm Selected.

Evansville is to have a woman architect to build the new \$300,000 Y. W. C. A. that is Miss Blanche Geary, associate architect, New York City, is to act with the architectural firm of Wm. F. Thompson, that city, in designing and planning the new structure. Such was the action taken by the Y. W. C. A. Board of Directors a few days ago.

Miss Geary says that while definite details regarding the style and height of the building has not been definitely decided, fitting plans will be developed to meet the needs and tastes of the girls. Commenting further she announced there would be "chummy" rooms, class, social and clubrooms, kitchenettes, cafeteria,

auditorium, large and appropriate swimming pool and gymnasium.

Parlors for "beaus" will also be worked out in the plans.

The New York architectural company specializes in planning of Y. W. C. A. buildings, dormitories and girls club houses, boarding homes and recreational buildings.

**MORE PROJECTS OUT FOR
ESTIMATES.****Past Week Brings Forth New Plans For
Contractors' Attention.**

Building affairs in Evansville the past week took on renewed activity in that quite a few new sets of plans were put out among the contractors for bids and several contracts were awarded.

The projects covering residences, medium-priced commercial buildings, schools and considerable remodeling are to be built in Evansville and the adjacent territory in both southern Indiana and Illinois.

**FT. WAYNE PROPERTY OWNERS
TAKING ACTIVE INTEREST
IN ZONING.**
**Would Restrict Objectional Building
Structures.**

Nor are Ft. Wayne citizens asleep. Other cities have gone in strong for zoning and restricted building districts and now the Ft. Wayne property owner is taking a hand at that game. When auto filling stations showed a tendency to spring up like mushrooms about the city regardless of neighborhoods the matter was carried before the city council by irate citizens, who demanded restrictions on location for such structures and they got what they wanted through an ordinance. And again they secured regulation regarding the specific locations of theatres in the proximity of schools and churches.

Recently another phase arose when an alleged objectional structure to house a dry cleaning establishment was proposed in a residence-section. As a result of this latest case the city park commissioners propose to adopt a resolution regulating and restricting the building

of certain structures, that might be objectionable, within a certain distance of city parks.

Quite a number of citizens filed a complaint with the commissioners and asked aid in preventing the erection of the cleaning establishment near Reservoir Park.

Fred Shoaff, of the park board, explained that the law, sanctioned by the state legislators at their last session, would apply only to buildings dangerous or offensive to the parks, and that buildings objectional from a resident's standpoint might not prove objectional to park property. The park board members said that after the resolution had been adopted the city attorney would have to make a lengthy investigation to determine whether the establishment in question would be offensive from a park standpoint, and that an injunction could only be filed by the city after it had been conclusively proven that the establishment was objectionable.

A tentative resolution was read in which all objectional buildings, such as repair garages, slaughter houses, foundries and the like, were prohibited for a distance of from 300 to 500 feet from any park. The board took the resolution under advisement.

Part of the section of the law on which the resolution is based says:

"City Park Boards may establish a line determining the distance at which all structures to be erected upon any premises fronting any park shall be erected, and may, in the name of the city, acquire by condemnation the right to prevent the erection of, and to require the removal of, all structures outside of such line."

ONCE AGAIN
**Monthly Building Figures At Ft. Wayne
Altitude to Million Dollar
Level.**

Fort Wayne's home building boom continued during the month of July with the greater portion of the \$1,133,815 estimated for the 31-day period to be expended on new homes. A total of 295 permits was issued during the month and of this number 174 were for new residences. The past month's record shows an increase over the month of June when the estimate was set at \$1,022,539, and this, in spite of the marked slow-down in building work being noted throughout the United States. It is noteworthy that although less permits were issued during the past month than during June the total estimate is higher indicating that the average cost per structure is higher in July than in June.

By reaching the million mark, this city is maintaining the record set since March.

NEW STATE BUILDING COUNCIL GETS DOWN TO ACTION

First Official Meeting Held

The past week brought about the final and complete organization of the new Administrative Building Council of Indiana, a body made possible through a law sponsored by the associations of State Architects, Contractors, Engineers and Labor and passed at the 1923 session of the State Legislature. The new council will seek to effect a standardization of building requirements and regulations throughout Indiana and is the crowning achievement of several years of the greatest co-operative effort ever exercised by the combined building industry of the State.

A meeting of the Council, consisting of an administrative committee and advisory committee was called for Monday afternoon, July 30, at the State House, but since the proposed rules and by-laws made it obligatory for at least two members of the administrative committee to be present to make up a quorum of a necessary eight and Dr. W. F. King and Judge S. R. Artman were out of the city an adjournment was taken to Tuesday, July 31, when discussions were indulged in and formal rules and by-laws were adopted.

The council is now ready to function and a codification of the State building laws will be begun at once also preliminaries started toward a standardization of building requirements and regulations.

Those present at the meeting this week were: Judge S. R. Artman of the State Industrial Board; Dr. W. F. King, of the State Board of Health; Newman T. Miller, State Fire Marshal; Architects Fernor S. Cannon and Robert Frost Daggett, Indianapolis; Contractors Max Irmscher, Ft. Wayne; O. A. Toelle, Terre Haute; Walter W. Wise, Indianapolis; Engineer DeWitte Moore, Indianapolis; Labor representatives Chas. Kern, W. F. Wilson and C. B. Sims, all of Indianapolis. J. H. Owens, Indianapolis, executive secretary of the advisory committee, was also present.

EFFECT OF CO-OPERATION READILY APPARENT.

Indianapolis Building Results Due to Harmony.

When one stops to ponder over the barriers that have confronted building

construction operations in other localities, and the difficulties with which the contractors in the big cities have met up with, Indianapolis in carrying on her building program for 1923 has been extremely fortunate.

Construction costs in the face of the enormous demand that has been put upon the labor and material supply market hardly can be said to have been unreasonably high. The law of supply and demand was bound to rule, there was no getting away from it. And yet unlike in New York, Chicago, Boston, Cleveland and other large centers very few projects have been laid over to a later date.

Though there was a slight strike flurry earlier in the season it was of short duration and did not materially upset things. Fact of the matter is Indianapolis building circles have been free from trouble when compared with the conditions that have ruled in other cities. Building trades labor locally has shown a tendency to be fair and the contractors through their local association has responded in kind, a situation that has done much to create a harmony that has made possible an almost uninterrupted period of building activity.

Attempts at pyramiding wages have been promptly frowned upon and nipped in the bud in most cases. The first hint of trouble has been carried to the Building Contractors' Association and action started at once to counteract and nullify it.

And the answer for it all, the success that has crowned Indianapolis' building construction effort, reverts to the one big fact that there has been a sensitive spirit of harmony prevailing in the local field as a direct result of a business sense of co-operation that has been exerted by the entire industry to keep building moving.

BUILDING PERMITS

(\$5,000 and Over)

Week of July 26th to August 4th
Apartment Building: \$25,000. Owner, Jos. Frey, 15 N. Oriental. Contract let to Conder and Culbertson, 623 N. Noble St. Brick, 2 sty., 46x47.

Residence: (double), \$12,000, 3705-07 East New York St. Owner, Robert Pannel, 1123 Lexington Ave. General contract let to E. E. Barb, 612 N. Colorado St.

School: (rem.) \$13,431, 604 E. 38th. Owner, Board of School Comrs. General contract let to A. A. Mitchell, 710 N. Illinois St.

Dining Hall: \$12,000, 2 sty., 55x82. Owner, Kingan & Co. General contract let to J. E. McGaughey, American Central Life Bldg. Brk.

Residence: \$10,000, 4551 Park Ave. Owner and builder, J. L. Holmes, 5140 Park Ave. Brick veneer.

Residence: (double), \$9,000, 2826-28 Park. Owner, M. Sablosky, 804 Massachusetts Ave. Frame.

Residence: (rem. and add.), \$8,000, 1002 N. Pennsylvania. Owner, Rt. Rev. Jos. Chartrand, 1347 N. Meridian. General contract let to Michaelis Bros., 826 Parker Ave. Frame.

Residence: (double), \$7,500, 3402-04 College. Owner, Louis Gass, 1042 Churchman. General contract let to William Piel, 1026 St. Paul St.

Residence: \$7,500, 3950 N. Illinois. Owner, Angel Pappas, 541 1/2 So. Illinois St. General contract let to A. Belles, 1036 1/2 Dawson St. Brick veneer.

Business Block: \$5,355, 909-13 Ft. Wayne Ave. Owner, J. D. Brosnan, No. Penn. and Court Sts. General contract let to C. C. Ayres, Ft. Wayne Ave. Concrete block and brick veneer.

Residence: (double), \$5,300, 2819-21 East Vermont. Owner, James E. Duncan. Contract let to F. R. Barnard, both at site.

Residence: \$5,500, 338 E. Minn. Owner, Royse-Borchert Co. Owner builds.

Residence: \$5,000, 5347 Park Ave. Owner, Josephine M. Gordon, c-o contractor. General contract let to Mary E. McGuff, 1207 Broadway.

Residences (3): \$9,000 total, Highland Place. Owner, F. M. Knight, 795 West Drive, Woodruff Place.

Residence: \$5,000, 4255 Guilford. Owner, Bertha Campbell. Contract let to Louis S. Powell.

Residence: (double) \$8,000, 4706-08 College. Owner, Theresa Ilg., 2313 Coyner St. General contract let to Realty Finance and Inv. Co., Lemcke Bldg.

Residence: (double) \$8,000, 4726-28 College. Owner, Orville Burk, c-o contractor. General contract let to Realty Finance and Inv. Co., Lemcke Bldg.

Residence: \$5,000, 5013 College. Owner, Jacob Ketter, 3232 Graceland. Contract let to Realty Finance and Inv. Co., Lemcke Bldg.

Residence: \$5,000, 757 N. Bancroft. Owner, J. W. Arvin. Contract to Geo. F. Brewer, 220 N. Gray St.

Residence: \$5,300, 728 Berkley Road. Owner, D. E. Compton, c-o contractor. General contract let to Bremerman and Son, 3231 N. Illinois.

Residence: \$6,000, 5209 Broadway. Owner, Miles and Holloway. At site.

Residence: \$5,300, 55 West Mount St. Owner, William Barton. Contract let to R. W. Weeks, at site.

BUILDING AT INDIANAPOLIS SO FAR IN 1923 RUNNING AHEAD OF LAST YEAR'S RECORD PACE

Early Season's Spurt Proving Help Through Present Slump

Over fourteen and a half million dollars represents the estimated valuation of new building construction for which permits were granted in Indianapolis during the first six months of 1923. This total made for one of the best half year building periods ever recorded in the Capital City, in fact, it is second to the largest six months' record ever posted, that of the last half of 1922 when a grand total of \$15,023,891 was registered.

New building got away at the jump right at the first of the year when January turned in \$2,021,138. Then in February there was a slight recession to be followed by March and April, each with over \$3,000,000 totals. May, however, slacked up as did June, both of the latter months falling behind their corresponding months' figures in 1922 to the extent of \$1,000,777.

Notwithstanding the falling off of building during the last two months there were 557 more permits granted in Indianapolis during the first half of 1923 than during the corresponding period a year ago, while the estimated valuations showed a 20.54% increase over the figures for the like time in 1922.

Indianapolis Building Permit Record First Six Months

Months	Per.	1923		1922	
		Est. Val.	Per.	Est. Val.	
January	619	\$ 2,021,138	403	\$ 580,706	
February	545	1,601,282	576	1,170,398	
March	1,438	3,028,839	1,218	2,065,051	
April	1,761	3,215,976	1,693	2,566,382	
May	1,809	2,805,011	1,798	3,420,847	
June	1,396	1,905,000	1,323	2,289,941	
Total	7,568	\$14,577,246	7,011	\$12,093,325

PERCOLATING AGAIN**Restlessness, Bubbling and Steaming**

Seems as if the forced draft had been put on the fire again and the old kettle is likely to boil over.

The anthracite mine workers of Pennsylvania are now threatening a strike September 1; the gas workers of Chicago are demanding a 25 per cent wage increase and as an alternative are holding out darkness and cold chow for the Public; the new senator from Minnesota asserts that the country is in danger of revolution unless something is done for the farmer at once. He also advocates a better distribution of wealth by means of heavier taxation and more regulation. Then, too, Hiram Johnson, California senator, warns the Republican party that it must accept a Progressive now or a roaring Radical later. Ex-President Wilson refers to the growing discontent against Capitalism and draws a gloomy parallel with the Russian revolt, hinting that our civilization will end unless we are born again spiritually. Stocks, good and bad, are off from twenty to twenty-five per cent; wheat and hogs are going begging. Across the water Europe is in the throes of another crisis. Returning travelers report that they have been unable to spot any dove of peace hovering above the angry maelstrom.

And all this stew just after it was thought that Labor troubles had been fairly well straightened out and we were preparing to sit back and enjoy a period of peace and prosperity. It may not be a cheerful picture to contemplate with our breakfast coffee and rolls, but it is there nevertheless. Cloudy? Yes, but the dark clouds will drift away. We may be in for some little squalls, some political colic, or business discouragements, but, we have the faith in the Government to believe that the old Ship of State is sea-worthy, that there are good helmsmen in charge and that our bark will glide forth from the troubled places out again into the placid peaceful expanses of water, there to move on and on with unerring course to the great goal of achievement that Fate has marked for our country and her great citizenry.

TWO DEALERS IN THE GAME NOW**Action a Plenty at Chicago**

My, my, those fellows are gluttons for trouble! Reference is made to those of the building trades crafts of Chicago. Not content with the strife and turmoil that any well regulated Labor organization can stir up, the Building Trades Council members of Chicago have two

sets of officers now, each coterie of men claiming legal jurisdiction. The setting is good for an interesting bout. Oh, well, let 'em scrap! Maybe in the meantime the contractors will be able to find the attack against them relieved and they can enjoy a breathing spell.

AS KING RICHARD WOULD HAVE EXCLAIMED TODAY.

"A lather, a lather, my kingdom for a lather; two kingdoms for a brick-layer, and the whole works for a half a dozen plasterers."

CALUMET BUILDING PROGRESS.

The Inland Steel Co., of Indiana Harbor has started work on an \$8,000,000 addition to their plant at the Harbor. When completed it will be one of the largest mills in the country.

The First National Bank at Whiting is spending \$65,000 in remodeling its quarters. Upon completion it will be as fine a bank as is to be found in the northern part of the State.

Joe Wolf is remodeling the Bock hardware building at Oak Glenn, converting it into a brick veneer apartment structure.

J. Wesley Reed was awarded the contract for a \$21,000 addition to the Calumet Bakery Building, on Calumet Ave.

The brick-layers have started placing the brick and terra cotta on the first story of the new hotel building.

The awarding of the power and heating plant contract for the Central School is still hanging fire.

WAGE CONDITIONS IN SMALLER CITIES RULED TODAY BY INEXORABLE LAW OF SUPPLY AND DEMAND.**Muncie a Good Example**

Few citizens, especially those in the smaller cities, realize just what the local contractors are up against in the wage line in their dealings with the building trades crafts. This is but natural for the average citizen builds but once in a life time and, except for then, gives little or no thought to building construction affairs. However, when he does decide to build and inquires into the intricacies of the operation he usually spots the labor wage and yelps about being held up, and not infrequently berates the local contractors for paying such high wages. The figures appear to be out of proportion with other local wages, but the building wage scale is seldom ruled by local influence, instead, it is nation wide conditions that affect them, a situation Mr. Local Citizen fails to comprehend

and insists that a workman is only worth so much in the local field regardless of what is being paid in New York, Cleveland, Chicago or St. Louis.

However, as matters really stand, Muncie, Kokomo, Anderson, Terre Haute, Peru, Lafayette and all of the other lesser cities are forced to compete in the open market to protect their local building trades labor supply and must pay a wage that will hold the building mechanics at home in order to assure a means to care for necessary building requirements, otherwise, the men will be attracted by the high wages that rule in the larger municipalities and the local field will be denuded of help and no extensive building campaign necessary to a city's continued growth can be carried on.

Certain building crafts are limited greatly as to men at present and outside contractors are scouring local fields to rehabilitate their working organizations.

In other words the wage situation in Muncie and cities of similar size today is being governed solely by the law of supply and demand under pressure of the greatest building season the country has ever known.

NO OTHER WAY AROUND**Subterfuges Will Not Get Contractors Anywhere.**

One of the tragic features of the building construction situation is that while contractors generally are scrambling all over each other these days in order to secure men to carry on the work at hand, and have pyramided certain wages to attain that end the general result is that, except that from an individual stand point, conditions have not been relieved. The tilting of wages has not created more workmen, instead, it has simply drawn them from one job to another or from one locality to another. The supply of mechanics has not been increased one bit and it never will be by such methods.

Few, if any, apprentices, new blood in the building labor ranks, have been developed in Muncie this season, but, Muncie is not alone in the matter. Hundreds of cities find themselves in the same situation.

One thing is certain, with a continuation of advanced wages to attract men construction costs are bound to rise to a prohibitive figure and building must of necessity cease from lack of encouragement. Even now from reports coming in it would appear as if building was slowing up, the public seemingly being determined to haul in its lucre refusing to build under conditions that make profitable returns on the investment doubtful.

The sooner the contractors awaken to the fact that apprentices must be taken on, taught and trained, and thus the labor supply augmented, the sooner the building construction industry will take on a healthier tone. It is the one and only way out and the contractors must become reconciled to the fact that they must be willing to assume their responsibility in this matter of the induction of new men, new help, in the ranks of the building trades mechanics. There can be no detour from the way that stretches openly ahead, and any attempt to run around the vexatious situation will only lead back to it after a lot of wasted effort and money.

SOUTH BEND BUILDING BOOMING ALONG AT HIGH SPEED

New Projects Continue to Develop With
Regularity

E. H. HYMAN

Secretary and Manager
South Bend Builders' Exchange

The tendency at South Bend is toward a maintenance of the fast building pace that has been in order locally ever since the 1923 building season opened back in the early spring. As evidence that such is the case recent developments show considerable large work either just starting or about to do so.

Ground was broken for the new Tuttle office building last week and the cellar is being excavated by the George J. Hoffman Company, where a big steam shovel is now at work. There will be two stories under ground on account of the lay of the land which slopes towards the river. This building will be eight stories in height and with the two basements will cover a ground area of 16,000 square feet. Vonnegut, Bohn and Mueller of Indianapolis are the architects.

A ninety-nine year lease has been taken on the property at the southeast corner of Washington avenue and Lafayette street. On that site a six-story office building and hotel will be built costing not less than \$250,000. This will greatly improve the property in this neighborhood and opens up the way for the business district to extend west.

Another building will be added at once to the Studebaker group to be of fire-proof construction and estimated to cost

in the neighborhood of \$150,000. This building will accommodate forty kilns to be utilized in drying lumber for all of the Studebaker work. It will be 126 feet long by 79 feet wide, four stories high and will include 628,169 feet of floor space. The H. G. Christman Co. is the contractor and Albert Kahn of Detroit is the architect.

The contract has been let for the new Lincoln school building to the H. G. Christman Co. by the Board of Education at an estimated cost of \$216,900. This building will be constructed of brick and will conform to the present building. When completed the structure will be three times as large as the present building and will seat 1,200 children.

Statistics compiled show that 594 permits were issued for \$1,209,406 worth of buildings during July with dwellings the outstanding class of construction.

This is a half greater than the valua-

tion for the same period last year when 454 permits were issued for \$872,773 worth of building. The need of dwellings, a problem that has puzzled the city for the last two years, is apparently being met to a certain extent, although by no means reaching the saturation point, according to real estate men. There have been 1,196 dwellings constructed since January 1 of this year, while only 748 were built during the same period in 1922.

Of the total valuation, \$102,500 was spent for fireproof structures, \$163,609 for thirty-six ordinary structures, \$3,200 for two small mill constructions and \$940,079 for frame buildings. In another tabulation, public buildings cost \$94,975; semi-public, \$169,850; dwellings, \$877,767, and miscellaneous, \$66,814. The largest building for which a permit was issued was about \$90,000.

FINE ADVANCE MADE BY INDIANA IN BUILDING CONSTRUCTION DURING FIRST SIX MONTHS OF 1923

Gains Recorded in All Big Cities of the State

Building construction operations in Indiana for the first six months of 1923, taking the total figures of the city building inspectors of the ten leading cities as a basis, clearly demonstrate that the half year ending June 30 was the greatest six months' building period in the history of the state. During that time those cities issued a total of 16,183 building permits involving an estimated expenditure of \$39,618,872. Over the corresponding period last year there were 12,859 permits issued for an estimated valuation of \$25,115,740, thus giving the first half of 1923 a margin of 3,324 permits to the good for a 57.7 per cent gain in valuations. Further comparisons show that the total estimated valuations recorded the first six months this year equal 69.9 per cent of the total posted during the entire year of 1922; are 10.08 per cent ahead of the total figures for 1921, and are 28.8 per cent in excess of the whole volume of building business recorded in Indiana in 1920.

Excluding Muncie, for which there is no 1922 building record, the other nine cities show substantial gains in 1923 over the corresponding period a year ago. Taking city for city, comparisons show them ranged in this order according to their percentages of gain, with Fort Wayne leading the list with 457 more permits issued for a 139.2 per cent gain over the first six months' volume business in 1922. Then follow: Evansville, 254 more permits, 123.7 per cent; Elkhart, 25 more permits, 108.2 per cent; Gary, 100 more permits, 91 per cent; Hammond, 181 more permits, 82 per cent; South Bend, 880 more permits, 62.9 per cent; Richmond, 61 more permits, 45 per cent; Terre Haute, 508 more permits, 34.2 per cent; Indianapolis, 557 more permits, 20.5 per cent.

Newburg: School, August 25, 1923, at 2 p. m., by trustee Knights Schools Township of Vanderburgh county at Newburg, Ind., for the construction of a school building in Knight township, estimated cost \$22,000.00. Fred Mann, trustee.

Newport: School, August 15, 1923, at 3 p. m., by Trustee of Vermillion school township, Vermillion county at Newport, Ind., for the construction of completion high school and grade school building. Estimated cost, \$80,000.00. Wm. S. Brown, Trustee.

Lebanon: Orphans Home, August 18, 1923, at 10 a. m., by commissioners of Boone county at Lebanon, Ind., for the construction of an orphans home building. Estimated cost \$3,500.00. Ira Stephenson, Auditor.

Plainfield: Boys' School, 300 H. P. water tube boiler, stoker, accessories. Board of Trustees, Plainfield, Chas. Brossman, engineer, Merchants Bank Bldg., Indianapolis. Plans in progress.

Roanoke: School, August 14, 1923, at 2 p. m., by Trustees of Jackson twp., Huntington county at Roanoke, Indiana, for the construction and completion of High and Elementary school building. Estimated cost, \$80,000.00. P. B. Settlemyre, trustee.

Terre Haute: County Home, August 15, 1923, at 11 a. m., by commissioners of Vigo county at Terre Haute, Ind., for the construction of a

county home for dependent children. Estimated cost \$31,000.00. Chas. M. Lee, Auditor.

BRIDGES

Bluffton: August 15, 1923, at 2 p. m., by commissioners of Wells county at Bluffton, Ind., for the construction of 9 bridges. Bridge No. 121, estimated cost, \$512.00; bridge No. 122, estimated cost, \$583.00; bridge No. 126, estimated cost, \$308.00; bridge No. 127, estimated cost, \$492.00; bridge No. 129, estimated cost, \$443.00; bridge No. 130, estimated cost, \$605.00; bridge No. 141, estimated cost, \$607.00; retaining wall No. 145, estimated cost, \$580.00; retaining wall No. 146, estimated cost, \$580.00. F. B. Fishbaugh, Auditor.

ROADS

Ft Wayne: August 2, 1923, at 10 a. m., by commissioners of Allen county at Ft. Wayne, Ind. for the construction of Moore road in Jackson twp. Length 2:51 miles. Estimated cost, \$37,239.00. John H. Johnson, Auditor.

WANTED

Situation—As Construction Auditor or Accountant on building construction work. Backed by four years of experience on reinforced concrete and standard structural building work. Willing to go outside of Indianapolis if opportunity presents. Can furnish references. Address Box A. C., Indiana Construction Recorder, 312 East Market Street, Indianapolis, Ind.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

STACK

NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids at 2:30 P. M., August 28, 1923, at the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Indiana, for the erection and completion of the stack or chimney for the power house. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check for five (5%) per cent of the amount of the bid. Bids must be made in accordance with the provisions of the plans and specifications prepared by Kibele & Garrard, Muncie, Indiana. Copies of plans and specifications may be found at the office of Kibele & Garrard, 335 The Johnson, Muncie, Indiana; at the office of the Registrar of the Indiana State Normal School, Terre Haute, Indiana; and, at the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Ind.

Board of Trustees of the Indiana State Normal School,

Helen C. Benbridge, Secretary.

BOOSTING FOR SOUTH BEND MEETING

Aim to Get Out Large Delegation of State Architects

The Board of Directors of the Indiana Society of Architects by a mail vote unanimously has gotten back of the Regional Meeting to be held at South Bend in a few weeks and is bending every effort to make this the greatest turn out of the Indiana architectural profession ever held.

As a preliminary to the affair Secretary Harrison has sent out this notice to the architects:

September 6 has been selected as the date for the next Regional Meeting of the Indiana Society of Architects, at South Bend, Ind.

Mark the date now on your calendar. Make your plans to attend.

The quarterly conference of the Associated Building Contractors of Indiana will occur at the same time and place, and it is proposed to hold a joint session of the two organizations in the evening, the first meeting of the kind ever held in this state. Your co-operation and attendance are desired.

REMEMBER

The Date—September 6
The Place—South Bend

AN UNUSUALLY GOOD SESSION HELD BY INDIANAPOLIS ARCHITECTS ASSOCIATION

More Than Just Ordinary Points Brought Forth In Broad Discussions Indulged In

It really is to be regretted that every architect in the State of Indiana could not have availed himself of the opportunity to attend the midsummer meeting of the Indianapolis Architects' Association, Wednesday evening, August 8, at the Hoosier Athletic Club. It was without doubt the most interesting and instructive session held by the organization in many months, developing lines of thought and information of a general building nature seldom brought out so thoroughly in general discussions.

Guests of the evening were Messrs. Robert Berner, R. H. Dickson, and Arthur Gage of the Robert Berner Structural Co., who each, in an informal way, made most interesting talks about the structural steel business touching upon the manufacture, fabrication and erection of steel, the estimating of same, and the shop detailing. Suggestions were advanced for making plans and specifications as complete as possible so that which the architect really desired might be known rather than being left to chance or the supposition of the estimator. It was brought out that the architect who leaves nothing to guess work will receive better bids than the one who vaguely details and specifies and thus causes the estimator to take a gamble, for the estimator who is forced to do so naturally, as a means of protection, allows a safety margin contingency.

Another interesting topic developed related to the labor situation and Mr. Berner, who is First Vice-President of the Building Contractors' Association of Indianapolis, though announcing that he was speaking unofficially and informally, explained to the architects the aim and purpose of the contractors' body. Clearly and pointedly he told the architects that the Labor organizations are here to stay and the building industry must reckon with them. He referred to the constant effort of the contractors to combat adverse conditions creeping into the building field, not from a selfish motive, but, to keep the path clear for an encouragement and continuation of building construction. It was an enlightening presentation of the situation and the first time it has been so completely placed before the architects of the city.

The matter of building codes came up later and Mr. Cannon as chairman of the advisory committee of the newly established Administrative Building Council of Indiana spoke on the purpose of that functionary in an endeavor to codify the present state building laws and bring about standardized building construction requirements and regulations that will apply the State over, and to incorporate essential building fundamentals upon which all cities can base their building supervision. The idea as set forth by Mr. Cannon met with the favor of those

present and the opinion was that when all the architects realize the real import of the action now under way they will universally endorse the move and cooperate in the effort to register a real achievement that has been undertaken by the combined State Building Contracting and Structural Industry.

The discussion then resolved itself into the matter of plans and specifications of a practical nature, the substance of which was well expressed by Herman Scherrer, who, to quote briefly, said: "Plans are, or should be purely quantitative, specifications qualitative."

Everyone present seemed to forget the heat in the interest aroused and when the meeting adjourned the universal opinion expressed was that it was the best meeting, barring none, that the architects have held this or any other year.

STANDARDIZATION ON SIZE OF CONCRETE BLOCK BRICK AND TILE DECIDED UPON

Idea Is to Meet Local Building Code Requirements

At a recent meeting held in Chicago representatives of firms making machinery for the production of concrete building units adopted standard sizes for concrete brick and block. The determining of standards for concrete building tile was placed in the hands of a committee to be reported on at their next regular meeting which is to be held in February, 1924.

The standard size determined for concrete brick was $2\frac{1}{4} \times 3\frac{3}{4} \times 8$ inches. The standard size for concrete block was established as $7\frac{1}{2}$ inches high by $15\frac{1}{2}$ inches long, while widths may be 6, 8, 10 and 12 inches according to the wall thickness that has been designed or is required by local building codes. Sizes other than those indicated will be designated as "specials."

Standardization of size in building materials has been advocated by Herbert Hoover, secretary of commerce, as a means of cutting waste in industry. He was represented at the meeting by R. N. Hudson of the Bureau of Standards who told of the benefits that might be expected and who offered the services of his bureau in effecting the changes contemplated.

TO MODERNIZE AND BEAUTIFY EVANSVILLE BY CITY PLAN SCHEME

Big Program Along Latest Lines of Such Development Mapped Out

The City Planning Commission's beautification program which has been in prospect for several months, was brought a step nearer realization recently when every detail involved in the program was discussed by the board at its regular monthly meeting. If the program is carried out to a completion Evansville is destined to become one of the most beautiful cities in the middle west.

The gigantic scope of the plan was thoroughly disclosed when the various elements entering into it were discussed as separate units and then finally assembled into one big architectural scheme by the board. The program as outlined includes the creation of dozens of boulevards, the widening of many streets, a diversion of freight traffic entirely around the city, an up-to-date traffic plan, the straightening of Pigeon creek and fully a dozen minor items that will add to the attractiveness of the city. Another big unit included in the program is that of zoning, which will mean a complete elimination of hap-hazard construction in the residential districts as well as the maintenance of a distinct building line in all parts of the city.

Tentative blue print plans for the entire program, which have been in the process of formulation for several weeks, have been completed. The plans were prepared by Harland Batholomew of St. Louis, who is recognized as one of America's foremost city planning experts.

EVANSVILLE AND SOUTHERN IN- DIANA SWINGING ALONG AT A PROGRESSIVE GAIT

1923 Brings Forth Many Improvement Schemes

Just to the north of Evansville, Princeton, county seat of Gibson county, is preparing to go into the city plan scheme, too. Mayor Niemeier has been author-

ized by the city council to appoint a city planning commission consisting of seven citizens, one of whom is to be the city engineer and one a member of the city council.

Southern Indiana has done a great deal of building construction this season, especially the smaller cities, and what with the highway improvements, street and sewer construction and thought being given generally to the cities' advancement to make living conditions more attractive all goes to show that the Evansville environment is wide awake.

BIG GAINS SHOWN IN LOCAL BANK CLEARINGS

Good Business Tone Thus Reflected

Bank clearings in Evansville for the year of 1923 since January 1 and including the month of July as reported by the city's clearing house were \$167,871,270.94. Those of last year for the same period of time were \$128,391,167.05, showing a gain of \$39,480,103.89.

The clearings for the month of July this year totaled \$22,405,021.03 and those for the same month last year \$19,523,073.20, an increase of \$2,881,948.83.

JULY BUILDING TOTALS SEND FORT WAYNE FIGURES SOAR- ING ONCE MORE

Seven Months' Total Far in Advance of Same for Last Year

Final figures recorded at the Fort Wayne building inspection department for the month of July show that during the month there were 297 permits granted the valuations of which totaled \$1,141,265. This was a nice increase over the city's building business posted during the corresponding period in 1922 at which time the estimated valuations for the 216 permits granted amounted to \$715,733, a gain of 81 permits and 59.45 per cent in the amount of money involved.

So far this season each month has shown a decided gain in Fort Wayne over the building transacted during the corresponding periods in 1922.

The total estimated valuation of the new building started in Fort Wayne dur-

ing the first seven months of 1923 is \$8,530,379 as against \$3,803,830 registered the corresponding period a year ago. This is a gain of 124.5 per cent for this season.

SOUTH BEND NOSES AHEAD OF FORT WAYNE IN 1923 BUILD- ING RACE

Both Cities Close

After, holding the lead over South Bend in building activity up to the half-way mark this season Fort Wayne dropped back into second place when the July operations were all in and is now trailing her northern Indiana rival by a slight margin.

Both cities developed a wonderful burst of building speed in 1923 and have moved along month after month neck and neck hanging up records that have beat all previous local marks. The race between the two has been so close recently that neither could afford to slip without losing valuable ground.

There was a time when Fort Wayne was out in front by over a million and a quarter dollars, but in June South Bend, with over a \$2,000,000 total, at which time she led the state for the month, stepped out and whittled Fort Wayne's lead to almost nothing. Then South Bend with some reserve to spare came right back with \$1,209,406 in July while Fort Wayne turned in \$1,141,265. This burst of speed enabled South Bend to breeze out in front of her rival whom she now leads by \$18,407.

The total figures for the two cities for the seven months are:

Cities	Per	Est. Val.
South Bend	3,356	\$8,548,786
Fort Wayne	1,762	8,530,379

South Bend's lead...1,594 \$ 18,407

THE DEFINITION

What a Trade Association Really Is

The following is the definition of a Trade Association as recently set forth by the American Trade Association executives:

"A Trade Association is an organization of producers or distributors of a commodity or service upon a mutual basis for the purpose of promoting the business of its branches of industry or commerce and improving its service to the public. Among the methods now in use for accomplishing this end are the compilation and distribution of information, the establishment of trade standards, and the co-operative handling of problems common to the production or distribution of the commodity or service with which they are concerned."

Laban C. Johnson & Co., inc., as contractor, and D. S. Menasco as owner, agrees to erect a dwelling on part of lots 309,310, Osgood's Forest Park add.

INDIANAPOLIS HANDICAPPED

Building Figures Always Late Through Lack of Help at City Building Inspection Department

Every month accentuates the fact that the city building inspection department is limping along short handed.

Other Indiana cities flash out their monthly building operations right at, or a day or so after, the first of the month, but the Indianapolis returns are always from a week to two weeks late. As a result certain statisticians take a guess at the Indianapolis figures or ignore them in their reports.

As matters stand the clerks at the building inspector's office are swamped with work and being so short handed not only does the office suffer but so does the city from a lack of deserved publicity to which it is entitled for the great building program it is putting across.

South Bend, Fort Wayne, Evansville and Terre Haute never fail to broadcast their building performances at the earliest possible moment and are receiving a great deal of publicity as a result of their efforts.

TOO MANY THINKING IT OVER

More Action and Less Thinking Needed

A set of four cartoons in the Bulletin of the General Contractors' Association of New York depicts a contractor requesting a student of a school of brick-laying to go to work for him on his (the student's) graduation. The dialogue is as follows:

The Contractor: "Pardon me, Mr. Simpkins, but I understand you will soon graduate from the 'Elite School of Brick-laying.' I am the manager of the Mc-Stew Construction Company and we would greatly appreciate it if you will agree to lay bricks for us during the summer season. I can promise you happy and congenial surroundings and our motor will call each morning for you. We pay \$20.50 per day and you may wear gloves. Furthermore, we provide our bricklayers with an assistant who will hand you each brick as it is needed, thus avoiding any stooping or bending on your part. And now farewell, Mr. Simpkins, I trust you will consider my offer. We will appreciate anything you can do for us, sir."

Student: "I'll think it over."—Bulletin, Buffalo, N. Y., Builders' Exchange.

While this may be a little far fetched, nevertheless, it expresses to a certain extent the attitude of some of the boys toward real work.

Some Indianapolis contractors who have tried out lads claim that they don't stick long. They have pitched in all right only to begin to notice the dirt soon and pay more attention to keeping their clothes brushed off rather than working. Some of the youngsters knocked off at noon the first day and went out to seek a cleaner job.

CONTRACTORS ACT ON DEATH OF PRESIDENT HARDING

Those at Pittsburgh Honor His Memory Friday

The Pittsburgh, Pa., building industry at the suggestion of the Builders' Exchange was called upon to close down Friday as a token of respect to the memory of late President Harding.

The Board of Directors at a special meeting adopted the following resolution:

Whereas, It has pleased Almighty God to lay His hand heavily upon this nation in that He has removed by death our beloved President, Warren Gamaliel Harding; be it

Resolved, That as a mark of respect to his memory, we recommend that all members of the Pittsburgh Builders' Exchange and all others engaged in the building industry in this city close down their business for the entire day on the day of the funeral, Friday, August 10, 1923, and that this day be spent in a dignified and quiet manner as befits the occasion.

EFFECTIVE BUSINESS EFFORTS POSSIBLE THROUGH GREATER CO-OPERATION WITH ASSOCIATES

Contracting No Exception

There is not a business of any importance that is not organized.

Every builder wants to make his business larger, better, more profitable and to decrease his cares and uncertainties.

Nobody but a brother builder under-

stands the builders' problems. No one else will stand by him with the same loyalty when the pinch comes.

The Associated Building Contractors of Indiana has endeavored to give to its members the best thought and established practices to stabilize conditions and care for the interest of the builder in legislative matters.

Is not the support of such an organization really worth the effort of every Indiana contractor as a means of effecting that co-operation that other business men have found so necessary to the successful pursuit of their businesses?

WHO CAN TELL?

Officials of the International Brotherhood of Carpenters stated recently that the present building boom will last at least three more years. At the same time they unwittingly gave it a knock by stating that in almost every city carpenters were busy and increases in wages had been granted them almost upon demand. These officers, like almost every other labor leader, must realize that there will be a limit to building, just as soon as the owner figures up the cost of construction and compares these figures with the income which he may expect to get from his investment. We predict a little red ink on his ledger which will convince him that it will not be profitable to try another one. High wages and high materials will bring on the slump quicker than any one may think.—(July Bulletin Bldg. Constn. Employers Assn., of Chicago.)

BUILDING PERMITS

(\$5,000 and Over)

Week of August 2 to August 9.

Residences (2) \$10,000 each, 5160 and 5207 Washington Blvd. Owner, Thornberry Realty Co. Louise Powell, Pres., Meridian Court Apartments. General contract let to Maynard Realty Co. Brick veneer.

**SMALL HOUSES WITH A VEN-
GEANCE****Prospective Owners Tiding Over an
Emergency**

Hammond people, unable to find houses to rent and feeling that they are not financially able to build the kind of houses they wish to occupy ultimately (on account of the high cost of building) are putting up small temporary quarters on the rear of their lots. More permits for buildings of this type were issued in July than in any other month in the history of Hammond.

The small houses, in point of numbers, as far as permits went, took first place in the sum total of all the 113 permits issued for all kinds of building construction. These pygmie dwellings of from two to four rooms are beginning to dot rear ends of lots with regularity. The houses of this type that are arising are, in some cases, little more in dimensions than the ordinary garage structures one sees so frequently. Quite a few are being built in the rear of other houses and are for rental purposes, others are to be used by the owners temporarily until they can get together enough money to build a better house on the front end of the lots they have bought.

**1923 BUILDING IN HAMMOND
AHEAD OF THAT FOR 1922****July Valuations Slumped**

July saw 113 building permits issued as against seventy-seven for July last year, but the valuation of the buildings tells the story. This year the 113 permits were valued at \$296,840 while the seventy-seven for last year in July amounted to \$400,875. Even with this slump 1923 remains far ahead of 1922 in total valuation of the permits issued. The first six months of 1923 leads the corresponding period of 1922 by \$1,068,000. To August 1, the total number of permits issued numbered 688 while for the same period last year the total was 487. In spite of the slump in valuations for July, the total for the seven months is still approximately a million ahead of 1922.

MORE PARK IMPROVEMENTS**Recent Deal Affords Big Lake Frontage
for Park Purposes**

At the meeting of the Chamber of Commerce Thursday the action of the park board in purchasing thirty-one acres of land at the corner of Indianapo-

lis boulevard and Calumet avenue for a north side park was approved. The price paid was \$150,000. The park will have a frontage of 2,000 feet on Indianapolis boulevard, 1,000 feet on Calumet avenue and Wolf Lake and includes 1,100 foot frontage on Lake Michigan north of the railroad tracks. This recent transaction now gives the city 2,100 feet frontage on Lake Michigan. The park board will construct a pier into the lake which will tend to make more land. The railroads have agreed to build a tunnel under their tracks to avoid a dangerous grade crossing.

CALUMET BUILDING PROGRESS

M. V. Grimm, North Manchester, was awarded the contract for the construction of a school building at Channahon, Ill., near Joliet, for \$20,000.

A. C. Berry and Co., architects, has prepared plans for the alteration and remodeling of a school house in District No. 88, Joliet, Ill. The work will consist of a new heating and water plant and four school rooms.

The above firm is receiving bids to be opened September 1 for altering and remodeling the First Baptist church at Huntington, Ind. Pastor, C. M. Brodia.

Architects J. T. Hutton & Son have the plans out for additions to the Platt Food Company's plant, consisting of two buildings, 120x28 feet, and 30x40 feet. Each one will be of brick construction, one story high.

**TOTAL VOLUME OF CONSTRUCTION WORK IN MUNCIE SATIS-
FACTORY THIS SEASON****Tendency Was Toward Smaller Types of
Buildings**

While the general trend of construction work in Muncie this season has run more to the smaller types of buildings and no large structures of any consequence have developed, nevertheless, there has been a lot of work that kept everyone in the local building business busy.

Taken all in all, the year has been a good one for the local building construction interests. The labor situation, so often the crux upon which building has met its doom, has been good in Muncie in 1923, causing little or no annoyance and except for a scarcity of plasterers, a trouble with which the entire country has been afflicted, the labor supply has been adequate to meet the demand. This condition is attributed to the foresight of the contractors who, sensing the upward trend of wages in the larger cities, offset the threatening handicap by ad-

vancing the local wage scales a trifle. By such action the Muncie building trades mechanics were taken care of and in return stayed at home rather than roam about the country chasing the high wage lure.

Thus it was that the needed available labor supply was protected and the contractors were able to keep their working organizations going without hindrance. This was one of the main contributing reasons for a successful building season this year at Muncie.

MUCH HOME BUILDING DONE**Muncie Experiences Great Activity in
That Direction**

Efforts to alleviate the housing shortage in Muncie in 1923 has proved quite successful to date. Beginning with the opening of the new building season activity along house construction lines grew brisk and new residences of moderate cost began to spring up all about the city in the outlying districts.

As time went on the home building program grew in volume, showing greater efforts in that direction than had been evinced in years. The result has been that from five hundred to six hundred new homes have been erected locally this season. While many of these houses have been erected by realtors to be sold to prospective owners on the payment plan, they have gone a long way toward solving the housing shortage and have afforded a wealth of employment to local building trades mechanics who otherwise might have been forced to remain idle.

TEMPORARILY HELD UP**Muncie Masonic Temple Bids Ran High**

Bids that were considered rather high, in fact ran more than was contemplated, have been the cause of temporarily delaying the award of the general contract for Muncie's big Masonic Temple project. There were quite a few proposals submitted and much interest was shown by building men in the proposed completion of the structure. The building committee now has the figures under advisement.

**AUTO FILLING STATIONS KEPT
BUILDING ACTIVE****Many New Ones Built**

The effect of the automobile on the building construction volume of Muncie made itself decidedly felt in 1923, more so perhaps than ever before.

Hundreds of garages, mostly private, were built in the city this year to house the ever-increasing number of motors that are infesting the city. Then, too, the gasoline filling station put in its appearance on a greater scale than ever before, demanding the attention of the building fraternity.

Hardly a section of the city was left untouched by the auto filling station craze. Fifteen to eighteen of these structures were erected, some of them being quite pretentious while others were much less costly. They added considerably to the season's activity and did their share toward keeping up employment.

WHAT IS THE BUSINESS CYCLE?

Really That Period Marked By a Com-
plete Run of a Gamut of Influences.

This is a pertinent question today, at
a time when much is heard about busi-
ness trends.

In its discussion of the business cycle,
the Committee on Unemployment and
Business Cycles of the late President
Harding's Conference on Unemployment,
uses the term in its report just made
public to describe the series of changes
in business conditions which are charac-
terized by an upward trend toward a
boom followed by a downward movement
into depression.

Business men know that the term
"business cycle" is too simple to describe
accurately the complexity of the problem
involved. In reality the name covers a
long series of influences in which a more
or less unknown part is played by the
individual establishment, by the industry
of which it is a part, by conditions in
other industries and by credit conditions
and policies.

As the Committee says: "Analysis of
past cycles of business show certain com-
mon tendencies. If we begin the analysis
when business is reviving, in general the
characteristic features are increased vol-
ume of manufacturing, rising stock ex-
change prices followed by rising com-
modity prices, then by business expan-
sion and increased demand for credit
from both business men and speculators.
As a result of the advance of commodity
prices, money rates stiffen and credit
gradually becomes strained, and these
conditions may be accompanied by a cur-
tailment of credit for speculative pur-
poses.

"Then stock exchange prices fall; for

a while longer general business continues
to increase unevenly, transportation fa-
cilities are overburdened and deliveries
are delayed, the apparent shortage of
goods is intensified by speculative buying
and duplication of orders by merchants
and other buyers until credit expansion
nears its limit. Public confidence is then
shaken, resulting in widespread cancell-
ation of orders if the cycle is extreme.
This is always followed by liquidation of
inventories, and sharp and irregular fall
of prices. During the period of depres-
sion there is always more or less wide-
spread unemployment.

"The cycle which ended in the depres-
sion of 1921 was unusual both in the ex-
tent of proceeding expansion, and the
severity of the depression and in the
amount of unemployment."

To deal successfully with future de-
pressions business men must try to lay
their plans now.

LUMBER FROM CANE STALKS IN- TRODUCED IN BUILDING FIELD

Conservation of Available Lumber Sup-
ply Made Possible.

The steady and continued depletion of
forests throughout the country with the
consequent diminution of the available
lumber supply has caused people for
years much concern and has put men to
work seeking to develop a substitute that
would, when called upon, meet lumber
tests and take the place of that material,
thus not only relieving the demand, but
also conserving the lumber supply.

As the result of scientific experiments
a substitute has been developed in the
cane fields of Louisiana and has been
introduced into the building construction
field and is now in use after having been
put through the most rigid tests.

The method is one by which the stalks
of sugar cane, after the sugar has been
removed, is manufactured into a substi-
tute for wood, known as Celotex, and is
suitable for almost any purpose for
which wood is ordinarily required in
building.

The industry is still in its youth, but
is producing 125,000 feet of Celotex in-
sulating lumber daily. Three new units
of the central plant are under construc-
tion which will give the plant a capacity
of about 500,000 feet a day.

The plant is in Louisiana, across the
river from New Orleans. This location
was selected because of its proximity to

the source of our raw material, the sugar
cane fields, and the fact that there is a
deep water frontage and excellent rail-
way facilities. The plant represents an
investment of more than \$1,000,000.

The grounds cover more than forty-
seven acres, more than 15,000 tons of
fiber are in storage there. A sufficient
supply is reserved at various sugar
mills near to take care of production to
be turned out by the new units, which
will begin production early in Novem-
ber. A feature of the industry is that
each year an entirely new and practically
unlimited supply of raw material is
available so that the public is being pro-
vided with a building material that per-
forms six distinctive functions in build-
ing construction in view of the country's
diminishing timber supply. Since there
is no other use for the raw fiber save
when it is fed into furnaces, it readily
can be seen that there is raw material
in sufficient quantities to allow an in-
crease of the plants as desired.

The company has had many years of
experience in the fiber industry and now
has the basis for one of the largest in-
dustries in America. Offices have been
established over the United States with
agencies in England, Australia, South
Africa, China and Japan.

Statistics of the Southern cane-grow-
ing states show that the available raw
fiber in the United States and Cuba is
sufficient to produce 25,000,000 feet of
Celotex every day. It is a long, strong
fiber. The lumber produced from it re-
sists weather and vermin. It is sterile
and therefore is adapted for many uses
for which lumber is unfitted. When used
for building purposes Celotex has many
times the strength of ordinary lumber.
It can be applied directly to the studs of
a building in place of the ordinary wood
sheathing and will offer a stronger struc-
ture. It is also an insulator and a sound-
deadening material.

It is handled just as is ordinary lum-
ber. It is sawed, nailed and sanded, and
is used for sheathing in the building of
homes in place of wood sheathing. It is
used for interior finish and is adapted to
this, as it can be painted, tinted or
veneered.

In the last year or so there has been
spreading use of the material to walls,
floors and roofs of homes and other
buildings, because it shuts out heat and
cold. Insulation, combined with a build-
ing lumber of demonstrated strength, is
an achievement and a long step forward
in the building industry.

608 Kahn Bldg.
INDIANAPOLIS

*Church (rem.): Hartford City, Ind. Archt., Houck and Smenner, 123½ W. Main St., Muncie. Owner, the Christian Church, Hartford City. Contract let to Ed Clarke, Hartford City. Work started.

KOKOMO

Factory: 2 sty. and bas., 50x100. Private plans. Owner, Turner Mfg. Co., E. W. Turner, president, 112 W. Jefferson St. Brick. Plans in progress. Mature about February 1, 1924.

Factory (add.), 1 sty., 90x400, southwest side. Chief engineer, Harry Backert, c/o owners. Owner, Kokomo Steel & Wire Co., J. E. Frederick, Citizens' National Bank. Brick and steel. Mature this fall. Plans in progress.

Garage: 2 sty. and bas., Sycamore, near Market. Archt. not selected. Owner, Dr. W. J. Martin, 210 W. Mulberry. Brick and steel. Contemplated.

MARION

City Building (remod. interior from armory), \$5,000. Archt., Hiram Elder, Custer Building. Owner, City of Marion, c/o clerk, Claude Hamilton, G. Daniels Bldg. May decide to build new city hall. Revised plans drawn.

Factory: 1 sty. Archt. not selected. Owner, Smaltz Glove Co., F. M. Smaltz, Spencer Block. Brick. Contemplated.

MISHAWAKA

*Central High School: \$700,000, 2 sty. and bas., 200x120, Mishawaka. Archt., Perkins, Fellows and Hamilton, 814 Tower Court, Chicago, Ill. Owner, Board of School Trustees, H. W. Jones, president; E. Byrkit, secretary, Mishawaka, Ind. Owner taking bids to close September 6. Bedford Stone & Construction Co., Indianapolis, are figuring general contract. Brick, hollow tile and reinforced concrete construction, gypsum block partitions, concrete stairs, concrete floor construction with steel forms, architectural terra cotta trimmings, tile roof, comp. roof, suspended ceilings, steel windows, steel doors, steel columns, trussed roof, iron stairs, sawtooth skylight construction, vault doors, fire doors, metal stall partitions,

terrazzo floors and bases, marble work, tile floors, three boiler units 200 H. P. each, smokeless furnaces, vacuum pumps, boiler feed pumps, vacuum system, ash conveyor, motors, vacuum cleaning system, inter-communicating telephone system, clock system. Will contain 25 classrooms, study halls, gymnasium, auditorium, stage, office, laundry, free hand drawing rooms, Physics and Chemistry laboratories, commercial department, lecture rooms, bank, biology laboratory, green house.

MUNCIE

Lighting Fixtures: For Emerson and Garfield Schools, Muncie. Archt., Kibele and Garrard, 335 Johnson Bldg. Owner, Board of School Trustees, Muncie, Ind. Receiving bids to close August 21.

Chimney: For Indiana State Normal School, Eastern Division, Muncie, Ind. Archt., Kibele and Garrard, 335 Johnson Bldg. Owner, Indiana State Normal School, Dean of the Eastern Division, Muncie, Ind., taking bids to close August 28, at 2:30 p. m., for the erection and completion of the stack or chimney for the power house.

*Factory: \$50,000, 1 sty. and bas., 100x200. Private plans. Owner, Victory Garment Co., M. L. Shapera, president, 420½ S. Walnut St. Brick and steel. Mature in spring, 1924. Plans drawn.

Contracts Awarded

*Power Plant and Tunnel: \$45,000, "Indiana State Normal School," Muncie. Archt., Kibele and Garrard, 335 Johnson Bldg., Muncie. Owner, Board of Trustees, Indiana State Normal School, Eastern Division, Muncie. General contract let to L. W. Kimmel, Poneto, Ind. Boilers let to Hutzell & Co., Muncie, Ind. "Voigt" boilers used. Stokers and soot blowers not let. Stack bids close August 28.

*Church and Sunday School: \$55,000, 1 sty. and bas., 55x80, Madison St. Archt., Houck and Smenner, 123½ W. Main St. Owner, Madison Street M. E. Congregation, Rev. J. H. Runkle, pastor, 1406 S. Madison St., Muncie. General contract awarded to Michael and Lowdermilk Construction Co. Heating, plumbing, wiring and art glass not let. Excavating. Brick, stone trim.

*Church (rem. and new parish house), \$18,000. Archt., Houck and Smenner, 123½ W. Main St.

Owner, Grace Episcopal Congregation, D. D. Rose, chairman building committee. Work started.

NORTH MANCHESTER

Water Works (Improvement): Owner, Board of Trustees of the town of North Manchester, L. D. Ikenberry, J. A. Cook, A. B. Roger, Ira L. King, town clerk. Bids will be received at the office of the town clerk until 7 p. m., September 10, 1923. For drilling water well, vertical turbine pump, motor of sufficient size to drive pump, concrete foundation for pump and temporary wooden house over completed unit. (See legal advertising in this issue.)

PORTLAND

Residence and Garage: \$10,000, 2 sty. and bas., 30x55, Third and Meridian Sts., Portland. Archt., Abraham Bagley, Berne, Ind. Owner, T. C. Perideu, 426 S. Meridian St., Portland. Brick veneer. Preliminary plans in progress.

School (high): \$125,000, 2 sty., Wayne and Water Sts. Archt. not selected. Owner, Board of Trustees, Dr. W. D. Schwartz, president. Brick and steel and stone. Will select archt. this fall. Contemplated.

SHELBYVILLE

*Residence and Garage (bungalow type), \$15,000, Shelbyville, Ind. Archt., Bass, Knowlton & Co., 312 N. Meridian St., Indianapolis. Owner, E. M. Porter, Shelbyville, Ind. Owner taking bids. Frame.

Parochial School: The Roman Catholic Congregation, Shelbyville, are contemplating the erection of a new parochial school next spring. Brick.

*Stores (6) and Apartment Hotel (10 3 and 4-room apts.), \$50,000, Shelbyville. Archt., Bacon and Tislow, 31 W. Ohio St., Indianapolis. Owner, The Birely-Mardis-Stewart Realty Co., Joseph R. Mardis, president, Chas. Birely, secretary, Thos. D. Stewart, treasurer, Shelbyville. General contractor (superintendent of construction), D. W. Ballard, Shelbyville. Excavating. Brick. 2 sty. and bas., 72x135.

Value of Science in Door Making Proved

In the eleven years we have been making them, Evans Process Doors have firmly established the soundness of the principles incorporated in their construction. Their durability, sanitation, proof against perceptible shrinking and swelling have been fully demonstrated.

Carnahan EVANS Process Doors

are winning the approval of quality builders everywhere. They have been installed in some of the country's finest office buildings, hospitals, schools, hotels and residences. Their use is increasing annually.

Prices will be furnished gladly upon receipt of lists covering your requirements for special millwork and doors.

ST. PAUL

Township School: Adams School Township, Decatur county, Indiana. Archt. not selected. Owner, William Holland, trustee, St. Paul, Ind. Contemplated. Mature late fall or early 1924. Brick.

Church: \$15,000. Archt. not selected. Owner, Christian Congregation, Rev. Wood, St. Paul. Contemplated. Owners financing. Probably not mature before spring 1924.

MISCELLANEOUS CITIES

East Chicago: Junior High School Building, \$350,000 (20 classrooms and gymnasium). Archt., Karl D. Norris. Owner, Board of School Commissioners, William A. Fuzzy, president, Mrs. Bertha E. McQuaid, treasurer, Dan C. Morris, secretary, East Chicago. Archt. selected. Details undecided. Brick, fireproof constr.

Madison: "Martin Brown" Memorial Gymnasium, \$50,000. Private plans. Owner, Graham Brown (Lumber), Louisville, Ky., and Board of School Trustees, S. J. Bear, president, J. F. Read, secretary, W. C. Roth, treasurer, all of Madison. Plans in progress. Mature this fall.

Petersburg: Resolutions will be presented at the August meeting of the town board asking that a filtration plant be erected at the water works plant as a part of this year's improvement program for Petersburg. It is estimated that the plant will cost \$35,000.

Terre Haute: Office Building, "The Chanticleer Building," 2 sty. and bas. (4 store rooms and offices), Sixth St. between Wabash Ave. and Cherry St. Owner, The Deming Place Co., L. E. Waterman, president. Plans in progress. Bids soon. Brick.

Tipton: Gymnasium (community) and Auditorium, \$50,000, 1 sty. and bas., 88x150. Archt., Lewis Richards, Bates Block. Owner, Tipton Community Gym. Trustees, E. B. Brink, Bridge Department, L. E. & W. R. R. Brick and steel. Plans completed. Ready for bids in thirty days.

Contracts Awarded

Brazil: Greenhouse (3). Owner, the Cottage Hill Greenhouse Co., Inc., Al Dinkel, president, Brazil. General contract let to John C. Monninger Co., Chicago, Ill. Semi-steel construction.

Brookston: Bank Building, \$16,000. Owner, the Bank of Brookston, Brookston, Ind. General contract let to Stiles Construction Co., 159 E. Ontario St., Chicago, Ill. Cut stone, bank fixtures, vault door and granite awarded. Owner taking bids on steam heat, plumbing and wiring.

Columbus: Church, 1 sty., 20x28. Owner, the Christian Messenger Church, Rev. E. M. Bledsoe, pastor. Plans in progress. Frame construction.

Crawfordsville: Bank Building, \$100,000, 1 sty. and bas., 43x80. Archt. and engineer, St. Louis Bank Equipment Co., 811 Walnut St., St. Louis, Mo. Owner, Crawfordsville State Bank, Crawfordsville, Ind. Architect builds and awards separate contracts. Struct. steel let to the Insley Mfg. Co., Indianapolis; cut stone to Ingalls Stone Co., Bedford, Ind. Wrecking old building on site at present. Start construction in a few days.

Kendallville: Power Plant. Engineer, Frolich and Emery, 411 Second National Bank Bldg., Toledo, Ohio. Owner, City of Kendallville, S. D. Dickinson, superintendent, City Hall, Kendallville. General contract let to Leo Herman, Edgerton, Ind. (Allen county), \$16,500. Equip. let.

Petersville: School, \$38,000, Clay township.

Archt., E. E. Dunlap Co., Indianapolis. Owner, Edgar W. Trotter, trustee, Petersville, Ind. Contractor, S. W. Snively, Columbus, Ind. Foundation in.

Westport: School, \$60,000. Archt., E. E. Dunlap Co., Indianapolis, Ind. Owner, A. C. Moncrief, trustee, Westport, Ind. General contractor, Hege and Co., Columbus, Ind. Foundation in.

Warren: School, \$60,000, Jefferson township. Archt., E. E. Dunlap Co., Indianapolis. Owner, Joseph L. Wiley, trustee, Warren, Ind., R. F. D. General contractor, W. L. Pierce, Huntington, Ind. Excavating.

Zionsville: School, \$92,000, Eagle township. Archt., E. E. Dunlap Co., Indianapolis. Owner, Jesse F. Phillipp, trustee, Zionsville. General contractor, W. R. Dunkin and Son, Flora, Ind. Foundation in.

WANTED

Situation—As Construction Auditor or Accountant on building construction work. Backed by four years of experience on reinforced concrete and standard structural building work. Willing to go outside of Indianapolis if opportunity presents. Can furnish references. Address Box A. C., Indiana Construction Recorder, 312 East Market Street, Indianapolis, Ind.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

WATER WORKS IMPROVEMENTS

NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public that sealed proposals will be received by the Town of North Manchester, Ind., at the office of the town clerk thereof, until the hour of 7 o'clock p. m. on the 10th day of September, 1923, for the furnishing of all labor, material, equipment and superintendence required in the drilling of a water well not less than twenty-four (24) inches nor more than forty inches in diameter on property owned by the town adjacent to water works, which well will be guaranteed by con-

tractor to produce at the rate of five hundred (500) gallons of water per minute; and equipping said well with a vertical turbine pump which shall be capable of delivering water at the rate of five hundred (500) gallons per minute when discharging against a pressure of sixty-five (65) pounds. Contractor will also furnish and install motor of sufficient size to drive pump, concrete foundation for pump, and temporary wooden house over completed unit.

Bidder must give complete description of material and equipment to be installed in well.

Each bid must be accompanied by a certified check for three per cent (3%) of the amount of the bid, payable to the order of the Town Clerk of North Manchester, Ind., such check to be returned to bidder unless he shall be awarded work and fails to enter into a contract for the construction of said work within ten (10) days after the receipt of notice thereof, in which event check will be forfeited to the town.

Each bid must be accompanied by a non-colusion affidavit and any bid not so accompanied will be deemed informal and will not be considered.

The successful bidder will be required to furnish compensation and public liability insurance.

The town reserves the right to reject any or all bids and to accept any proposal which may appear to be to the advantage of the town.

(Signed) L. D. IKENBERRY.

J. A. COOK,

A. B. RAGER.

Board of Trustees of the Town of North Manchester, Ind.

Attest: Ira L. King, Town Clerk.

Celotex Used Throughout this Group For Strength, Economy, Comfort

Celotex as sheathing or lining is stronger than wood sheathing. Cheaper when applied than wood and paper. Nails direct to studs and rafters.

As sheathing, Celotex replaces wood and makes a good stucco base. As a plaster base, Celotex replaces lath and is also the most effective sound deadener.

Celotex has the insulating value of cork. It turns heat and cold alike as no other building lumber can.

When you, as an Architect or Contractor, erect a house with Celotex you provide the owner with comfort the year 'round and a 25% to 35% saving in the annual fuel bills as long as the house stands.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture. It is the only manufactured board on earth that will stand the test in outside walls. Nails direct to the studs of the building, saws and handles the same as wood lumber. It is not readily harmed by weather nor rough handling.

Talk to your lumber dealer, he stocks it. Ask him about the merits of this remarkable lumber. He knows. He can make immediate delivery, too.

Stock sizes: Thickness 7/16 in., width 4 ft., lengths, 8 ft., 8½ ft., 9 ft., 9½ ft., 10 ft. and 12 ft. Weight about 60 lbs. per 100 sq. ft.

There is a Use for CELOTEX in every Building

SOCIETY OFFICIALLY INVITES ILLINOIS ARCHITECTS TO ATTEND SOUTH BEND MEETING

Tri-State Building Session Plan Gets Under Way.

In line with the proposed scheme to merge the regular regional meeting of the Indiana Society of Architects, to be held at South Bend, September 6th, into a joint tri-state meeting of building interests the following invitation has been extended by the Society to Illinois architects:

To the Illinois Society of Architects:

The Indiana Society of Architects is endeavoring to have a Tri-State Meeting at South Bend, Indiana, September 6, 1923, of the Architects, Engineers and Contractors of Indiana, the northeastern part of Illinois and the southern part of Michigan. We are inviting members from your Society to be with us on September 6th for luncheon, at 12:30 noon; for the afternoon session, at 2:00 o'clock; and for the joint session in the evening, at 6:30 o'clock. All of these meetings will be held in the LaSalle Hotel.

We hope that you will have a large delegation present at this meeting and come prepared to have a rousing good time.

Yours very truly,
MERRITT HARRISON,
Secretary.

UNITED STATES ARCHITECTS INVITED TO PARTICIPATE IN PAN AMERICAN CONGRESS OF ARCHITECTS

To Be Held in Chile

The Second Pan American Congress of Architects will be held this year in Santiago de Chile from September 10 to 20 inclusive, under the patronage of the President of the Republic of Chile, the Ministries of Foreign Affairs, the Rectors of the University of Chile and of the Catholic University, and other distinguished agencies.

The Institute is most cordially invited

to send delegates. Officials of our own State Department, and of the Pan American Union in Washington, have expressed the hope that the architects of the United States will be represented.

The Pan American Union, at its own expense, is arranging for two exhibitions of American architecture. The State Department will expedite and make pleasant the journey of the American delegate or delegates.

All that remains is for the Institute to find one or more of its members who will go.

The Executive Committee at its recent meeting directed that this situation be brought to the attention of every member in the hope that one or more architects might be found who would be willing to combine a vacation with a real service to the profession and the Institute—by making the trip to South America to represent the A. I. A.

An attractive round trip rate is now offered by both the American and British Steamship Lines to New York via the Canal, West Coast, Trans-Andean Railway and the East Coast Lines. The actual time consumed in transit would be a total of nineteen days on the East and West Coast voyages and practically two days for the Trans-Andean trip. With ten days at Santiago at the Congress, and ten days in Buenos Aires, the entire trip could be made within two months.

The duties of the Institute delegate at the Congress would not be onerous. He would speak for the architects of the United States, and he would see that the exhibitions were properly placed. He would not be troubled with the details of such work, as ample assistance will be furnished locally. A knowledge of Spanish or French is by no means necessary.

Any member or members of the Institute willing to undertake this service should telegraph at once to President Faville, the Octagon House, Washington, D. C.

QUICK-SETTING LIME BLOCKS HAVE BEEN DEVELOPED.

U. S. Bureau Makes Announcement

A cast lime building tile for use in making partitions has been developed at

the Bureau of Standards by the Fellow of the National Lime Association. The material of which it is made sets so that it can be removed from the mold at the end of ten minutes. After twenty minutes it can be handled, and after seven days it has a compressive strength of one hundred pounds per square inch. It can be sawed, and nails can be driven into it.

The material is composed of five parts by volume of ground quick lime, ten of hydrate or slaked lime, and one of wood fiber. It is found to cure best when outdoors exposed to the weather. The new tile is about twenty per cent heavier than gypsum tile of the same size, and experiments are being conducted to see if the core volume can be increased without too great a sacrifice of strength.

The quick setting lime of which the tile is made was developed several months ago by the Bureau of Standards, and can also be used for other purposes. Difficulty is found in shipping it, however.

FORMER PRESIDENT OF ILLINOIS SOCIETY OF ARCHITECTS TO SPEAK.

Architect Davidson of Chicago to Deliver a Talk at Regional Meeting in September.

A tentative acceptance to speak at the South Bend meeting, as one of the representatives to present the architects' side of the building industry, has been received from Mr. Frank E. Davidson, Chicago, former president of the Illinois Society of Architects.

Owing to the fact that he has just recovered from a long, serious illness, Mr. Davidson was forced to qualify his acceptance with the provision that his health permit appearance.

He will take for his subject the encouragement of greater and closer co-operation between those two important elements of the industry, the architect and the contractor.

**NEW EVANSVILLE BUILDING CODE
READY FOR ADOPTION.****City Inspector Makes Recommendations**

An ordinance embodying a complete new building code for Evansville will be presented to the common council within a few weeks, Ed C. Kerth, building inspector, has announced. The code, as prepared by the city inspector is in the hands of a council committee composed of Henry Adler, Henry Diekmann, Edward Schmidt and Edward Keonemann, who have it under consideration.

Mr. Kerth said the code will prohibit shingle roofs in the fire limits, which are to be extended; it will include a plan for the gradual elimination of the open vault; control of the hazard and storage occupancies will be taken care of and certain buildings will be by law provided with sprinkler systems and fire retarding doors and partitions; wholesale and warehouse building areas will be limited; the contents and number of employes in certain classes of buildings will be limited, and new plumbing and electrical regulations will be included.

NO CHECK APPARENT IN EVANSVILLE BUILDING.**Steady Push Continues**

No slump is as yet indicated in Evansville building construction operations which continue to swing along at an active rate. Much of the work started earlier in the season has reached a stage of completion except the larger projects and good progress has marked their course of erection. As the earlier operations neared completion other new work has continually developed to occupy the attention of the contractors who have really had no slack time on their hands this season. Even now as the summer wanes there is a marked degree of activity on all sides in local building circles with new contracts steadily being awarded and new plans being developed by the Evansville architects. There is every indication that the local building activity is to continue right on into the fall and winter.

**CHEAPER TO BUILD TODAY THAN
IT WAS IN 1920****At Least That Is What Evansville Lumbermen Contend**

The information was advanced in Evansville the past week that local lumber prices, despite the great activity in home building construction, are 35 per cent cheaper than in 1920 and that the general decline in the cost of the entire house building operation at this time is at least 20 per cent off what it was three years ago.

CHIPS AND SHAVINGS.

General contractors, J. Bippus & Son, have completed the drug store and residence for Geo. Brown on Lincoln avenue, and the duplex apartment for Frank Freund on Blackford street. This firm also has under construction a new bungalow for Miss Emma Bernardin on Lincoln avenue, and alterations for the Shriners' Club.

Evansville construction interests are watching with interest the development of a \$100,000 hotel project for Degonia Springs in Warrick County just east of Boonville. It is being promoted by Evansville business men.

Edward Dubber was awarded the contract for the construction of an addition to the home of Miss E. Topp on Second street.

825 Calhoun St.

Phone 2001

HERE'S THE REASON**Hundred Thousand Population Level Put
Big Call on Building Endeavor.**

One answer to the cause for Ft. Wayne's great building construction spurt for the past year or so, especially the home building efforts put forth, is found in the figures brought out by the new city directory which, according to the customary way of estimating, show that the population of the city has an estimated population of 100,324.

Right along Ft. Wayne has shown a healthy growth as has been evidenced by

the steady and heavy demand for new business and industrial structures and more homes. The local building fraternity at times has been put to it to keep pace with the requirements, but has gone ahead at full speed and has gradually overcome, to a large extent, the glaring shortages that were made apparent when war matters caused an abandonment of normal construction efforts.

THE BUSINESS BAROMETER**Bank Clearings at Ft. Wayne Show
Further Gains.**

Last week's statement of the Fort Wayne clearing house continued to indicate heavy gains in Fort Wayne business. Total clearings exceeded those of the previous week by nearly \$200,000, while the gain over the corresponding week of last year was more than \$1,000,000.

**NEW COUNTY INFIRMARY
PROPOSED.****Officials Now Arranging Means For
Financing Big Project.**

County officials are now endeavoring to work out a plan for the financing of a new \$250,000 county infirmary building scheme. Several propositions are to be submitted for the consideration of the county council at its September meeting.

The county has a new 600-acre site and the new buildings proposed for the site are to be built with a view to meeting the immediate demand and then the other units will be added later. Construction operations will probably begin in the early spring if finances are arranged.

**PARK BOARD ADOPTS MEASURE
TO REGULATE BUILDING NEAR
CITY PARKS.****Recent Attempts To Erect Alleged Objectionable Structures Causes
Action.**

The resolution prohibiting establishment of certain businesses within 300 feet of any city park, which was submitted to the park board, at a recent meeting was officially adopted by the board. All business that may prove offensive or dangerous to the welfare of the park will be included under the resolution.

INCREASE OVER JUNE BUT DECREASE FROM JULY, 1922 FIGURES SHOWN BY LAST MONTH'S INDIANAPOLIS BUILDING RETURNS.

Year's Volume Still Ahead of That For 1922.

Building construction in Indianapolis during the month of July came back with a fair volume of business showing a 7.9% gain over June as regards the amount of money involved. Not only that but there was also a slight increase in the number of permits granted. The business though when compared with that of July a year ago was not so good, in fact it showed a 38.6% decrease from the estimated valuations recorded the corresponding period in 1922, this despite the circumstance that there were 250 more permits issued in July this season than during the same period last year. Though July added more than \$2,000,000 to the Indianapolis estimated valuations for new building operations, and carried the total for the year to August 1, up to \$16,632,994, the decrease of the last two months as compared with the figures for June and July last year has whittled the lead of the 1923 figures down perceptibly. The total estimated valuations for new building work in Indianapolis up to August 1, 1922, amounted to \$15,442,673, thus giving 1923 for the seven months a margin of \$1,210,321 or 7.7% to the good. The total permits issued in 1923 however, show to a little better advantage the 807 increase for this year revealing a 9.8% gain.

The Indianapolis building figures to August 1, are:

Period	Per.	Est. Val.
7 mos., 1923.....	8981	\$16,632,994
7 mos., 1922.....	8174	15,442,673
1923's margin	807	\$ 1,190,321

STATE A. B. C.'S BUSY ON CONFERENCE PLANS.

Interesting Program Now in the Making

Headquarters office of the Associated Building Contractors of Indiana is working industriously to whip plans in shape for the quarterly conference and joint meeting with architects to be held in South Bend, September 6.

The conference for the contractors will be held in the afternoon at which time sole attention will be devoted to contracting problems, and then in the evening the joint meeting of Indiana architects and contractors will be called to order.

Secretary C. C. Pierson of the Indianapolis Building Contractors' Association and also of the State A. B. C. was in Chicago this week furthering plans for the big meeting in September and arranging for speakers of prominence to present the contractors side of the building industry.

The individual meetings of the architects and contractors and also the joint gathering will all be held at the La Salle Hotel at South Bend.

GLORY FOR ALL

Indiana Building Industry Has Done Its Duty Nobly This Year.

Indiana has surely done herself proud in a building construction way during the first six months of 1923. While Indianapolis has turned in over \$14,000,000 worth of new building during that period, South Bend and Ft. Wayne together have matched their big sister's performance which is going some if any body asks you.

Both Ft. Wayne and South Bend have enjoyed unprecedented building activity this year and bid fair to add considerable more to the State's building construction volume before the year has run its course.

The other cities are all doing their bit nobly and this should be extended down even to the towns and country districts where the building construction though not large, naturally, has been active.

In view of the fact that the entire country has been busy building and the demand for labor and material has been unusually heavy Indiana has been fortunate in being able to put across the large building program that she has and bespeaks credit to the entire building industry of the State, Architects, Contractors, Mechanics, Material Supply Men and all others associated with the business.

SOME ITEMS IN PRESENT UTILIZATION OF WOOD WASTE

That some of what would otherwise be wood waste is being already utilized in the manufacture of useful products by the lumber and wood-using industries is shown by the following tabulation made recently by the Forest Service office in Portland, Oregon. This indicates the amounts of waste material used annually by various industries and also these quantities expressed in percentages of the total amounts used; that is,

lath is 100% made from waste material; 80% of all shade and map rollers are made from what would otherwise be wasted; 30% of all wood used for chairs and chair stock was formerly thrown away as refuse.

	Total Waste Used Annually Board Feet	Percent- age of Total Amount Used
Lath	680,000,000	100
Shade and map rollers	63,200,000	80
Chairs and chair stock	87,000,000	30
Matches and tooth- picks	25,000,000	30
Woodenware and novelties	101,000,000	25
Boot and shoe findings	16,500,000	25
Toys	7,250,000	25
Brushes	3,250,000	25
Dowels	1,200,000	10
Brooms and carpet sweepers	300,000	15
Boxes and crates ..	454,800,000	10
Furniture	94,500,000	10
Skewers and but- cher blocks	300,000	10

Total1,534,300,000

(From Bulletin National Association of Lumber Manufacturers).

THE INVADER

To Stop Him Is An Opportunity The
 National Association Should
 Not Neglect.

One interested in the building contracting business in the Calumet District is often forced to wonder if other cities in the State are afflicted with the same kind of contractors with which the District has to contend. Owing to the fact that the cities in northwestern Indiana are in such close proximity to Chicago most of the big building projects in the territory attract the attention of outside contractors who come in to figure with the result that a great deal of the work goes to these outsiders. These latter then come in to carry the building operation forward, and as the work progresses pay no attention whatever to the local wage scales or working agreements, instead, if they need men they just tilt the wages in order to secure the needed mechanics in order to rush the work through to completion. The result is that the men flock to the job paying the most money and the local contractors if they, too, don't keep step with the advancing wages find their jobs denuded of workmen.

Not only that, but the outsiders absolutely refuse to contribute any dues to the local association and in their selfishness indirectly do everything possible to demoralize local labor conditions, and when the mechanics grow arrogant and independent the outsiders vent their spleen on the local association for not being able to provide better conditions for them under which to operate.

It is such circumstances as this that make the efforts of the National Association seem a farce. One thing is sure the National Association of Building Trades Employers, Contractors, or, whatever they may be termed will be of no benefit to local city associations of contractors until they can formulate a plan that will compel contractors from one locality working in another to co-operate fully with the local association of the territory in which they are operating.

SHOULD MULTIPLY FIGURES BY TWO.

Big Bulk of Building In Hammond District Not Recorded.

A large amount of building done here is not shown in the building permit returns for Hammond. There is almost as much building being done in West Hammond, which is in Illinois, and of which we have no record, as is done in Hammond proper.

BABBLE WAS THERE BUT NO TOWER.

Union Arguments Presented in all
 Tongues.

Efforts to unionize the foreign population of Gary, employed in the steel mills, was started at a mass meeting on the south side August 12th. Speakers of all languages were present so that all might be given to understand what the meeting was about.

CALUMET BUILDING PROGRESS

KEEN COMPETITION OF CONTRACTING WORST ENEMY OF ASSOCIATION EFFORT.

Tells Again This Year.

Nineteen hundred and twenty-three has, in the running of its course, once more set forth the old, old story that the keen competition developed in building contracting is one of the greatest obstacles to organization plans. It is the one thing that keeps the contractors apart, under its lash the contractors, many of them, are driven far from the ideal path that is platted in the days of stress, and with building going good every fellow sets out for himself figuring on driving through to a galloping, successful, finish. During that period he gives no thought to the association endeavor and when a competitor presses him hard, selfishness grabs the rein, and wage tilting sinks in a cutting spur to increase the pace. Such tactics have not been uncommon this season and, when the race is run, will the return recompense for the result that must be reckoned with? Next spring these very men and others will recall the gruelling pace when wage matters come up for adjustment and standards set in 1923 are thrown up to them. Then it is the contractors will remember the association so carelessly brushed aside and they will turn to it for protection from the threat their very actions have created. Not only will they turn to their association but they will expect it to lead them out from the quagmire into which they so thoughtlessly plunged.

Labor is always on the job three hundred and sixty-five days a year always figuring the way out, and it is small wonder it is always ready to take advantage of the ambush into which the contractors so unwittingly find themselves. When they come to realize that there is a future and it is that future for which the association is working that year will tell a different story.

MUNCIE BUILDING CODE LOST ITS TEETH.

Revisions And Amendments Prove Its
 Undoing.

A building code, even to a certain extent, is something every municipality should have, it should regulate and restrict, that is its purpose, but it is hard to make it elastic enough to meet the ever new methods and materials that are entering the building construction field. Penal clauses incorporated in the original code frequently later on prevent the element of elasticity so much desired.

A building code is a mean thing to tamper with for such practice often times causes a lot of entanglement, dissatisfaction, discord over the various points for which a remedy is sought.

Muncie had a new code not so many years ago over which a great deal of thought and time was spent and at the conclusion of the effort the document was hailed as a wonder from which great things were expected.

Today Muncie is a good example of what tampering with a code will do.

There were those who, in formulating the code, bore ever in mind the fact that the prospective builder must be protected by certain restrictive clauses that would assure to him a well built, safe building. Later on it developed from certain sources that the restrictions were too binding and moves were instituted for amendments and revisions. These latter were accomplished and in the end the revisions and amendments grew to such an extent that the power of the code was broken and finally so much was rescinded that Muncie was finally shorn of the code heralded in the beginning as such a fine thing.

IF YOU DON'T PUSH, FOR GOOD- NESS SAKE KEEP AWAY FROM THE BRAKE!

Too Many Brakemen As It Is

The Blue Lightning Express reached its destination one evening eight hours late, and the engineer, rubbing his hands, said to the new brakeman:

"How's this for railroading, my son?" Great, said the new brakeman, "We're a little late, though ain't we?"

"It's that darn Horseshoe Hill," said the engineer. "In all my life I never had such trouble to get up that hill as I did today."

"Yes," said the new brakeman, "and she'd have slipped too, if I hadn't had the brakes on tight."—Los Angeles Times.

Sad to relate, all such brakemen are not confined to railroading, figuratively speaking they are in all lines of endeavor and contracting knows their ilk. Contracting has a lot of engineers in its ranks, men who would drive the whole train of the business up the hill and over the grade, men of discretion however, and again there is the type personified by the brakeman who as soon as they hit the grade forget the climb to be made, grow dubious, and think only of the slip. Immediately the latter clamp on the brake and make the engineers' task the harder. They think because they are "riding along" with all brakes set that they are doing a wonderful thing for the cause.

HOW TO GET RESULTS

United Effort Bound to Tell Call It by
What Name One Will

Here is a straight from the shoulder talk to the contractor, one that, while directed to the builder of Massachusetts by the Associated Contractors of that state, applies equally well to the builder in any state or city where there is a contractors' association. Particularly should the argument sink home in Indiana, where the Associated Building Contractors of the state have been engaged for several years in doing the very thing upon which the Massachusetts association stresses.

Here is the way the Monthly Bulletin of the Associated Contractors of Massachusetts presents the case:

"Mr. Contractor!

"Have you ever heard of Unions in the Building Trades? Do you like them, tolerate them, or despise them? It depends on your experience with them. You can't always admire their methods, but they do get results.

"Ten or fifteen years ago they were just organizing. The employers did everything to discourage them. They had to overcome hundreds of little petty jealousies among themselves. Some men were afraid to join; others wouldn't put any money in until they could see what they were going to get for it.

"You know what a factor Unions are in the Building Industry today. We don't have to go into detail telling how they fight and how they put through legislation which affects themselves and you; how they dictate wages and working conditions to you. They control your business every hour of the day.

"Do you know that for the past two years the contractors of Massachusetts have had a Union; an organization of contractors and sub-contractors? Do

you know what they have been doing during that time? They have met the same problems which confronted the Unions when they were organizing. Such an organization has had to combat opposition on the part of the Unions; indifference on the part of some contractors. They have overcome petty jealousies among themselves. They have established and are publishing a monthly magazine. They have organized a service department to keep the members in touch with one another and with what is going on in other sections of the country. They have put the organization on a firm financial footing. In fact, they have done everything which could be done in order to build a good solid foundation for such an organization.

"It is now time to build the structure. How big and how strong will it be? That depends on the other contractors and sub-contractors in the state. You are one of them. We need you. In Union there is Strength. It costs five dollars to join and ten dollars a year for dues. There are no extra assessments. This is only one-tenth of what your workmen pay into THEIR Unions."

The Indiana A. B. C.'s has done and is doing things for the contractor all the time. It is an older body than the one from Massachusetts and is financed somewhat differently but both are working in the same general direction, not to antagonize Labor but to protect the contractor when his interest may be assailed.

SLIGHT FALLING OFF OF BUILDING IN INDIANA CITIES SHOWN BY RETURNS FROM BUILDING INSPECTORS.

Permits Issued In Good Volume, But Money Involved Not Up To July, 1922 Amount.

The official figures submitted by the building inspectors of Indiana's nine leading cities show that building construction operations as far as the money involved was concerned showed a 15% falling off from the volume recorded in June, and was 6% less than the amount posted in July in 1922. Though the financial feature suffered by way of comparison the number of permits granted would tend to indicate that there was no let up to the activity as there were 3616 permits issued in July 1923, as against 2951 in June this year and 2381 in July, 1922.

At that the total estimated valuation of the new work licensed in July lacked only a quarter of a million dollars of reaching the \$6,000,000 level.

As for individual showings Indianapolis, Ft. Wayne and Richmond recorded gains over June this year, the other six registering losses. Five of the cities gained on their July, 1922, building performances, but these increases were not sufficient to offset the losses sustained by the other four municipalities.

Ft. Wayne again went over the million dollars mark, making this her fifth consecutive month to achieve that result. During the seven months of this year she has recorded four monthly totals of over \$1,000,000, and once she passed the \$2,000,000 figure. Indianapolis, since January 1st, has recorded, two \$3,000,000 months, three \$2,000,000 months and two \$1,000,000 months. South Bend to August 1st, has posted two \$2,000,000 and two \$1,000,000 building months.

But getting back to July one finds a new face at the head of the Indiana cities in the matter of gain over last year's July building. Evansville leads with 61 more permits issued for an increase of 63.6%, to be followed in this order: Ft. Wayne, 81 more permits, 59.4% gain; South Bend, 140 more permits, 38.5% gain; Gary, 58 more permits, 38.4% gain; Terre Haute, 116 more permits, 31.8% gain; Richmond, 4 more permits, 1.8% loss; Elkhart, 1 less permit, 11% loss; Hammond, 26 more permits, 25.9% loss; Indianapolis, 250 more permits, 38.6% loss.

The official city figures for July building are

Cities	Per.	1923		1922	
		Est. Val.	Per.	Est. Val.	
Elkhart	18	\$ 90,100	19	\$ 101,300	
Evansville	181	253,600	120	155,040	
Ft. Wayne	297	1,141,265	216	715,735	
Gary	145	411,325	87	297,145	
Hammond	113	296,840	87	400,875	
Indianapolis	1413	2,055,748	1163	3,349,348

Tenth St., \$1,781. Bridge No. 743-53 in Washington township, at Sixty-fourth St. and White river, \$4,365. Bridge No. 753-108 in Washington township, at east entrance Fair Grounds and Fall Creek, \$5,000. Crawfordsville Road Storm Drain No. 277 at Speedway City and Crawfordsville road, \$2,470.

Fort Wayne: Bridge over Maumee river. Owner, John H. Johnson, auditor, courthouse, Fort Wayne, taking bids to close September 12 at 10 a. m.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

WATER WORKS IMPROVEMENTS

NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public that sealed proposals will be received by the Town of North Manchester, Ind., at the office of the town clerk thereof, until the hour of 7 o'clock p. m. on the 10th day of September, 1923, for the furnishing of all labor, material, equipment and superintendence required in the drilling of a water well not less than twenty-four (24) inches nor more than forty inches in diameter on property owned by the town adjacent to water works, which well will be guaranteed by contractor to produce at the rate of five hundred (500) gallons of water per minute; and equipping said well with a vertical turbine pump which shall be capable of delivering water at the rate of five hundred (500) gallons per minute when discharging against a pressure of sixty-five (65) pounds. Contractor will also furnish and install motor of sufficient size to drive pump, concrete foundation for pump, and temporary wooden house over completed unit.

Bidder must give complete description of material and equipment to be installed in well.

Each bid must be accompanied by a certified check for three per cent (3%) of the amount of the bid, payable to the order of the Town Clerk of North Manchester, Ind., such check to be returned to bidder unless he shall be awarded work and fails to enter into a contract for the construction of said work within ten (10) days after the receipt of notice thereof, in which event check will be forfeited to the town.

Each bid must be accompanied by a non-colusion affidavit and any bid not so accompanied will be deemed informal and will not be considered.

The successful bidder will be required to furnish compensation and public liability insurance.

STACK NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids at 2:30 P. M., August 28, 1923, at the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Indiana, for the erection and completion of the stack or chimney for the power house. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check for five (5%) per cent of the amount of the bid. Bids must be made in accordance with the provisions of the plans and specifications prepared by Kibele & Garrard, Muncie, Indiana. Copies of plans and specifications may be found at the office of Kibele & Garrard, 335 The Johnson, Muncie, Indiana; at the office of the Registrar of the Indiana State Normal School, Terre Haute, Indiana; and, at the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Ind.

Board of Trustees of the Indiana State Normal School,
Helen C. Benbridge, Secretary.

SCHOOL BUILDINGS NOTICE TO CONTRACTORS

Notice is hereby given that on Thursday, September 13, 1923, until 1 o'clock p. m. at his office in the I. O. O. F. building in the city of Rensselaer, Ind., the undersigned will receive written sealed bids (use prescribed form No. 96 only) for the building (general contract) of two two-room brick school buildings in and for Newton School Township, said county and state, according to plans and specifications on file in my office.

Location: One near northwest corner Section 9, Township 29 North, Range 7 West; the other near the intersection of Sections 28, 29, 32 and 33, Township 29 North, Range 7 West.

At said time and place like bids will be received on heating and ventilating, plumbing and water supply, and electrical wiring for said buildings. Separate or joint bids may be submitted on those mentioned in this paragraph.

Estimate on each building, \$19,000.
A deposit of \$10 required for plans and specifications for general contract, \$5 for each of the others, which will be returned upon return of plans and specifications on or before date of letting.

Bidders required to accompany bid with certified check or draft, payable to said trustee for 5 per cent of bid as a guaranty that, if successful, he will enter into written contract and provide bond, to approval of trustee and advisory board within ten days after notice that contract has been awarded him, and upon failure so to do, the proceeds thereof to become the absolute property of said township.

Successful bidders to furnish certificate of the Industrial Board of Indiana showing his compliance with Section 68 of the Indiana Workmen's Compensation Act.

The right is reserved to reject any and all bids.
Dated at Rensselaer, Ind., this 20th day of August, 1923.

MARION FREELAND,
Trustee Newton School Township,
Jasper County, Indiana.

Sam'l Young, Architect, Monticello, Ind.
Chas. M. Sands, Attorney, Rensselaer, Ind.
August 25, 1923.

SCHOOL BUILDING NOTICE TO BIDDERS

Sealed proposals will be received by the Board of Education of the School City of Marion, Grant County, Indiana, at the office of the superintendent of schools until 12 o'clock noon, standard time, September 10, 1923.

The above proposal shall be for furnishing the necessary labor and material for the erection and completion of a fireproof Junior high and grade school building in accordance with the plans and specifications on file in the office of said superintendent, Marion, Indiana, or at the office of W. C. Findt, architect, high school building, Springfield, Ohio.

Such plans are on file for the purpose of public inspection at any time during regular office hours until the date for receiving bids.

The site of the proposed building is at Wash-

ington and Thirty-sixth streets.

Each proposal must contain the name of every person interested therein and must be submitted on blank forms, which forms will be furnished upon application to either the superintendent of schools or the architect.

Bids will be received as follows:

Bids for labor and material must be separately stated.

Bids will be received for the general construction of the entire work according to law, including heating and ventilating, electrical work, plumbing, gas fitting and sewerage.

Separate bids will be received from Items No. 1 to 11, inclusive, as shown on schedule attached to specifications.

Separate bids will be received for each of Items 12, 13, 14, 15, 16 and 17, as shown on schedule attached to specifications.

The board reserves the right to reject any and all the bids:

Each proposal must be accompanied by a certified check or a surety bond to the owner to the amount of 10 per cent of the total amount of the proposal as a guarantee that if successful, the contractor submitting the proposal will enter into a contract within ten days and begin actual work when instructed to do so.

Should any bid be rejected the above surety will be returned forthwith to the bidder. The surety of the successful bidder will be returned upon proper execution of the contract and bond. The successful bidder for any part of the work shall furnish the owner with a satisfactory surety company bond, which bond must be approved by the attorney for the board of education. This bond shall be equal to 100 per cent of the contract price, conditioned upon the faithful performance of the contract and full payment by said contractor for all material and labor used in the building, same to be in strict accordance with the laws existing in the State of Indiana.

The estimated cost of the above building is \$275,000.

(Signed) MARION CITY SCHOOL BOARD.
WILLARD ELKINS, President.
E. E. BLACKBURN, Secretary.
M. E. SHIRA, Treasurer.

Elbert E. Day, Superintendent.

BIG MEETING NEARING

Program Plans Contemplate a Memorable Gathering

With the South Bend regional meeting of the Indiana Society of Architects and the joint gathering with the Associated Building Contractors of Indiana scheduled for the same evening, September 6, only eleven days distant, the architects in charge of arrangements are actively engaged in shaping up arrangements and a program for the affair.

Architect E. R. Austin, South Bend, as local chairman to handle the details from that end, is co-operating with Mr. E. H. Hyman, secretary-manager of the South Bend Builders' Exchange, in preparing for the joint meeting of architects and contractors set for the evening of September 6. He is also working with Secretary Harrison on a program for the independent meeting of the Society to be held during the afternoon. This session will be devoted to the business of the Society and to a general discussion of matters pertaining to architectural practice and conditions throughout the state.

It has been proposed that, following this regular afternoon regional meeting, a sight-seeing trip be made about the city with stops here and there for visits to the big new Studebaker plant and other of the more notable structures of recent erection.

As for the joint meeting in the evening it has been suggested that a prominent local business man be secured to act as toastmaster. Architect I. K. Pond, Chicago, official representative of the Illinois Society of Architects, will be the principal speaker for the architects at this evening gathering of architects and contractors.

Return form postals are being prepared and are to be mailed out this week to all Indiana architects upon which it is earnestly requested that they specify whether they intend to attend the South Bend meeting or not and return at once to Secretary Harrison. It is important that these replies be received at once so that proper reservations for the dinner can be arranged for the architects. Don't pigeon-hole this card or just throw it away as is so often done by many, in-

stead, fill it in, it will only take a minute, and drop it in the mail. This affair is to be a real meeting, in fact, of a nature never before attempted in Indiana, and the response feature put up to the architects is a most important detail that the individual architect can take care of to assure the success of the plan now in contemplation.

ACCEPTANCE OF INVITATION TO BE PRESENT AT SOUTH BEND MEETING RECEIVED FROM ILLINOIS SOCIETY OF ARCHITECTS

Prominent Chicago Architect Named as Official Representative

In response to the invitation of the Indiana Society of Architects to the Illinois Society of Architects to attend the regional meeting of the former scheduled for South Bend Thursday, September 6, an acceptance has been received.

Secretary Merritt Harrison this week received the following communication:

Chicago, Ill., August 17, 1923.
Indiana Society of Architects,
Indianapolis, Indiana.

Gentlemen:

The Illinois Society of Architects, by action of its board of directors, accepts with pleasure the invitation you extend to attend the Indiana architects' meeting to be held at South Bend September 6. Just how many of our members will attend is unknown at this time, but you will be informed as soon as possible.

Upon the advice of Mr. Frank Davidson, the Illinois Society has selected Mr. I. K. Pond as its official representative and he will also be pleased to act as speaker for the architects at the evening meeting.

RALPH C. HARRIS,
Secretary.

FORMER COMMITTEE NAMED Those in Charge of Exhibits and Page- ants Retained.

Several weeks ago the standing committees of the Indiana Society of Architects as reorganized under the new administration were announced on this page but at that time the Pageants and Exhibits Committee report was missing.

Kurt Vonnegut, chairman of the latter committee, has announced his desire that the past year's personnel be retained. Thus the committee for 1923-1924 will be made up as follows: Kurt Vonnegut, chairman, Indianapolis; John Bayard, Vincennes; W. H. MacLucas, Indianapolis; Paul R. Werking, Richmond.

These men have a real task on their hands once a year and that pertains to the annual state architectural exhibit held usually along in midwinter at the John Herron Art Institute, Indianapolis. This affair really has attracted more attention each year than the architects of the state seem to realize. That they do not appreciate the interest the public takes in these annual exhibits is evidenced by the scarcity of exhibits the architects out in the state submit. This year it is proposed to increase the scope of the display and include decorative work and the other allied arts related to the practice of architecture and it is earnestly hoped that all Indiana architects will co-operate to make the exhibit an event that will bespeak the merit of the architectural endeavor put forth in Indiana. These exhibits are really a big step forward, put the public in closer touch with the meaning of plans and architectural service, draw much commendation from the press, afford a publicity not to be discounted and are worthy of the support of every Indiana architect.

NEW MEMBERSHIP CAMPAIGN TO BE LAUNCHED

Aid of All Members Sought

Nothing daunted by the failure to reach the goal he had set, rather, encouraged that as many new members were secured for the Society as were secured last year, Architect George W. Allen, renamed chairman of the membership committee, has set his mind on redoubling his effort this season. He is so enthusiastic about the good to be accomplished by the organization and the benefit to be derived by the profession at large that he is soliciting the aid of every member in an attempt to increase the membership.

Evansville Park Acreage Not Excelled by Any Other City of Her Size

The Evansville Chamber of Commerce some time ago sent out questionnaires to cities in the United States with a population of from 50,000 to 100,000 asking for data on public parks. The questionnaire asked for the number of parks, the amount of ground covered by parks and the tax maintenance per year. The following replies have been received, showing how Evansville ranks with cities of equal size throughout the country. It will be noted that there is just one other city that can boast as much acreage for parks as Evansville, which heads the list with 650 acres. Elizabeth, N. J., had no trouble capturing the booby price, with 33 acres of parks.

	Acreage	No. of Parks	Tax Main. Per \$100
Binghampton, N. Y.	15	459	.5
Canton, Ohio	9	172	.014
Elizabeth, N. J.	6	33	.05
El Paso, Texas	26	400	.065
Evansville, Ind.	15	650	.05
Flint, Mich.	16	650	.05
Ft. Wayne, Ind.	27	448	.05
Gary, Ind.	6	60	.03
Lansing, Mich.	12	256	.032
Long Beach, Calif.	10	160	.0326
Racine, Wis.	8	228½	.10
South Bend, Ind.	24	394	.05
Terre Haute, Ind.	15	520	.03
Topeka, Kan.	12	299	.05
Wichita, Kan.	11	335	.05

STILL OPTIMISTIC

Local Building Men Looking Forward to Renewed Activity

Not the least discouraged by the fact that Evansville building operations did not show a big forward movement in July and early August, local building material men are making provisions for an active fall according to those in close touch with the situation. Many

expect a new impetus to building construction when vacation days are over and fall sets in.

The city may not have shown the large volume turned in by some of the other places but the local building circles were never dull, in fact, there were numerous occasions when the contractors were put to it to find sufficient men to carry on their operations and keep pace with the demands put upon their working organizations. The volume of work done has to date exceeded that of recent previous years by a goodly margin.

CHIPS AND SHAVINGS

Construction work has been started by C. Kanzler and Son, general contractors, on the erection of a frame coal tippie for T. C. Bugg, coal operator, at Green Mound station, Ind. It will be 65 feet high.

Steady work progress is reported at the new Benjamin Bosse high school. Concrete for the ceiling slab of the top story has been poured and the brick work has been carried up to the roof line.

The Scarborough-Davies Contracting company is pushing work on the boiler house and smokestack for the William Blackman Floral company, Slaughter avenue.

LOCAL MEN BEGINNING TO FIG- URE ON TRIP TO SOUTH BEND

Fort Wayne to Send Delegation

The progressive spirit demonstrated by the State architects and contractors, in an endeavor to create a greater feeling of co-operation for the advancement of the building industry, as revealed by the plan to hold a joint meeting at South Bend in September has aroused much interest in Ft. Wayne.

At this time the prospect is beginning to bud, promising a good representation of Ft. Wayne contractors and architects at the South Bend affair. The event will afford northern Indiana building men their first real opportunity to get together with those from all

over the State and, if for no other reason, they should avail themselves of this big chance.

BREEZING ALONG

Fort Wayne Banking and Building Affairs Active

What two elements of a city's life better bespeak the prosperous conditions of that community than its banking and building construction activities? It is prosperity that makes for building and banking.

Both building and banking activities in Ft. Wayne this season have set a merry pace and held to the speedy gait right along, practically week in and week out, steadily outstripping the figures of the corresponding periods in 1922.

Last week business in local banking circles proved good according to the clearing house report, although the figures did not quite reach the total of the preceding week. The amount was over \$2,250,000, however, and several hundred thousand dollars over the total for the corresponding week last year.

The figures for last week, the previous one and the corresponding week in 1922 were:

Last week	\$2,257,199.25
Previous Week	2,339,994.63
Week of Aug. 18, 1922	1,746,787.05

DRAWS OUTSIDE NOTICE

Government Bulletin Comments of Fort Wayne's Great Building Per- formance

When a city does things on a big scale it doesn't take long for outsiders, even at a distance, to recognize the fact. Many thought early in the season that the unusual building construction activity that sprung up in Ft. Wayne was more or less of a sporadic nature as the volume mounted. Then the months rolled by and there was no perceptible diminution in the amount of new work, instead, month after month the volume held strong and million dollar totals became a regular thing. The gains registered over previous years stacked up well with monthly notable gains of other cities and Ft. Wayne took her place in the ranks of the country's cities of the monthly million dollar building permit class.

Her performance has at last drawn the attention of the U. S. Department of Labor which in its comment on industrial conditions for July makes special mention of what Ft. Wayne has done in building construction and refers to her greatest building boom in her history.

BUILDING PERMIT DIGEST

New Structure Classification for Six Months Interesting

A recapitulation of the building activity in Indiana for the first six months of 1923, according to the official report of City Building Inspector F. F. Hamilton, gives an interesting insight into the various directions toward which the building effort was exerted.

An analytical digest of the 7,568 permits issued shows this structural distribution: Repairs, additions, alterations, 3,715; 953 one-story buildings; 301 single two-story dwellings; 85 double one-story dwellings; 180 double two-story dwellings; 1,330 stables and sheds; 92 brick, non-fireproof buildings; 26 fireproof structures; 114 concrete block buildings; 20 tenement houses; 752 miscellaneous equipment changes. Fees collected this year for the issuance of the permits amount to \$23,096, as compared to \$12,526.70 during the same period in 1922.

SOMETHING DIFFERENT

That's the Word from South Bend Regarding the Big September Sixth Meeting

The conference of the Associated Building Contractors of Indiana at South Bend September 6 is to be held in the afternoon at which time sole attention will be devoted to contracting problems, yet it will be different from any thus far held, and the plan to be pursued promises greater interest.

Aside from the conference there will be a dinner and entertainment in the evening to be participated in jointly by the Indiana Society of Architects and

the A. B. C. of Indiana, the first one of its kind ever attempted in this state, which is only another evidence of the progressive spirit that is pervading the building industry of Indiana.

The event is down on the calendar as the one big day for the building industry of Indiana to which architects and contractors all are invited.

Every city contractors' association should urge that as many of their members as possibly can attend and take part in this get-together meeting.

There will be GOOD SPEAKERS, GOOD MUSIC, ENTERTAINMENT EXTRAORDINARY, GOOD EATS, and, above all SOCIABILITY.

An event not soon to be forgotten by those who may attend.

NEW STATE BUILDING BODY GETS DOWN TO BUSINESS

Advisory Committee Starts Off

The advisory committee of the Administrative Building Council of Indiana is buckling down to work with regularity now and is preparing for an active campaign to take care of its burden of the work that will mean a general standardization of building regulations and requirements throughout the state.

Chairman Cannon the past week called a meeting at which the architect, engineer, contractor and labor representatives responded and discussed moves toward preliminary details for action. The structural, mechanical and standardization committees will at once enter upon their various duties and map out fundamental basic charts for guidance by which to build up building regulations that may be advanced to assure better building in the state and afford a unity in general requirements that will apply to all localities.

BACK HOME IN INDIANA

Indianapolis Contractors Return From Delightful and Extensive Auto Tour

All they want now is another big building season that will afford the opportunity to lay up several more millions of bricks and they will be off on another "See America First" trip. Reference is made to James Hodgson and his son Will, well-known Indianapolis brick-mason contractors, who, with their wives, have just returned home from a 2,500-mile auto tour of the East. Their journey trailed through eleven states and even into Canada, they having visited Columbus, Wheeling, Washington, Baltimore, Atlantic City, Philadelphia, New York, Boston, Albany, Syracuse, Buffalo, Niagara Falls, Toronto, Cleveland and many other cities.

The returned tourists left Indianapolis over the National road and traveled over hard surfaced roads all the way there and back except for about sixty miles in all of detours. Oh yes, "Jimmie" also added that they had but one piece of misfortune, they picked up a nail over in Maryland for one puncture on the whole trip, and got back home away ahead of the schedule they had mapped out.

The Blue Ridge Mountains in the Virginias and the Berkshires in New England offered the most effective scenic

beauties of all the country traversed.

The tourists say they didn't feel lonesome until they got farther East and then for nine days they never saw an Indiana auto license though there were cars from most every other state. One day in the East they counted cars from thirty-nine different states.

During their four days' stay in New York they failed to see any Indiana license, and at Philadelphia saw one that was attached to a car that upon investigation proved to belong to two school teachers from Evansville, who were spending their vacation touring.

The Hodgsons say that all cities looked alluring till they reached New York and after that all seemed to fade away to just the ordinary, diminishing greatly before the recollections of the one big city. However, they admitted they were impressed favorably by Boston and the beaches there. No mention was made of what they saw on the beaches.

BUILDING PERMITS

\$5,000 and Over)

Week of August 16 to 23

Boiler House: \$125,000, 2 sty., 110x110. Owner, James Whitcomb Riley Hospital. General contractor, Cornell Engineering Co. Concrete. Excavating.

ONE THING LEFT UNDONE**How to Create Plasterers on Short Notice Still a Mystery**

Mr. Ford's gasoline carry-all has brought the country to the city and the city to the country; radio has made every farmhouse and city apartment kin; spooks speaking from the "farther bank" have convinced many that heaven is as dull as Main Street at dinner time, adrenaline seems to make going there a matter of choice. This year's skirts show that fashion covers a multitude of shins. The airplane laughs at distance and Prof. Einstein sneers at space. A New York newspaper has succeeded in printing the day's news in a form that makes it possible to read it all in ten minutes, other newspapers have succeeded in printing it in a form that makes it inadvisable to read it at all. The movies have wished Broadway manners and Fifth Avenue styles on every town on the map—even a large scale map. Jess Willard has shown that it is never too late to bend to the other fellow. William Jennings Bryan says that evolution isn't so, H. G. Wells says that it is. A young woman has succeeded in dancing for—see today's paper for the latest record—hours without a stop. The Anti-Saloon League has supposedly proved a lot of things. The bootleggers have demonstrated the freedom of the seas. The League of Nations has made wars impossible and inevitable. Many are pointing with pride to the beauties of normalcy; Lenine and Trotsky have demonstrated the beauties of abnormalcy. Everything worth doing has been done, and an answer found to every one of civilization's problems, everyone with this exception—how is it possible to make plasterers and lathers on short notice to supply the increasing demand? (Popular.)

WHAT HE NEEDED WAS AN ARK**Jup Pluvius Butted In With a Vengeance**

The secretary suffered the pangs of inconvenience along with his constituent contractors last week-end, only, his pangs were interspersed with the thrust of disappointment. He had his work all cleaned up, the old bus was in ship shape for a run over to South Bend and Elkhart for a visit over Saturday and Sunday. Then it happened! Along in the darkened hours of Friday night one of the worst storms of the season happened to cross the Calumet stretch and deluged with inches of rain in a very short space of time with the result that all the base-

ments in Hammond were flooded and it took him all day Saturday to get the mess cleaned up.

CALUMET BUILDING PROGRESS

The Northern Indiana Gas and Electric Co. has awarded the contract to the U. G. & I. Construction Co., Pittsburgh, Pa., for the construction of a 2-story brick sub-power station, 33 ft. x 98 ft., at the corner of Columbia avenue and 145th Street.

Architects A. C. Berry & Co., announce that the plans for the addition to the Lion Store, to be built on the rear facing on Sibley St., will be out for bids about August 27.

The construction company erecting the Ford plant just across the Illinois line near Hegewick expects to have the structure ready for occupancy about September 15. The latest report is that the large assembling plant in Chicago will also be moved to Hegewick.

The new sewage disposal plant will be ready to start pumping this week. The sewers on the South Side and the tunnel under the river have been completed and these together with the finished North Side sewers are to be hooked up with the pumping plant at once. Everybody is hoping the connections are made before another big rain comes along.

NOT MUCH MORE LOOKED FOR**Big Muncie Building Effort Just About Completed**

While activity in the Muncie building field continues fairly brisk due to the work started earlier in the season and which is still under way thus keeping things moving, there is an apparent lack of new work coming out, a fact that leads to the belief that the peak of local building has been passed. There is, however, nothing alarming about this condition, in fact, it seems it is just a natural condition judged from the general report regarding building operations throughout the country.

The general trend of building in most localities seems to be on the wane but, at that, the volumes recorded compare favorably in most instances with the amount of building construction transacted during the corresponding periods a year ago.

Muncie had a good volume of new construction work, mostly of the smaller types building, such as houses, in 1923, and the local contractors were looking for a let up in new work about this time.

Except for the general construction of the new Masonic Temple which may yet

be started this fall there is little more in prospect of a large nature for Muncie this season.

SMALLER CITY CONTRACTORS SHOULD SEEK TO ENCOURAGE ALL-YEAR-AROUND BUILDING ACTIVITY.**Would Profit Both Men and the Communities.**

With the closing in of fall, and next the approach of winter, there looms once more the indelible fact that building operations are ruled and governed by the seasons, have been for years, and up until only the last few years little or no effort was made to counteract the influence.

No place has suffered from the acceptance of the seasonable argument more than the smaller cities. Just as soon as the weather grew threatening or bad all citizens cast aside contemplated building work and decided to wait till spring, be their projects big or little. Contractors fell in with the scheme, mechanics just naturally figured on a dull spell, and all knocked off till warm weather rolled around. Such had been the custom for years and everybody accepted the condition created by precedent.

Larger cities, contractors and building men finding that the dawn of spring brought forth a great flood of work to cause a jam, delay, and annoyance, sought to break the spell and have, after much missionary work, succeeded, to a certain extent, in keeping things moving along except in the most severe weather.

What the larger building operators have accomplished the smaller city contractors can do, and do to their profit, to the advantage of the building trades mechanics, to the industry and their city. They should all concentrate upon a campaign to urge citizens to do alteration and addition work through the dull season. Such an arrangement would keep the building fraternity busy the year round and would get the small work out of the way by the time the new spring work appeared.

This is a matter that thoughtful building men are going into more earnestly every year and is one for the small city contractor to ponder over.

Only recently a special committee named by Secretary of Commerce Herbert Hoover, to study seasonal activities in the building construction industry made the following recommendations to offset the handicap under which the industry is laboring.

"Submit plans for proposed building to architects as early as January 15, instead of putting it off until March 15, or better still, send in plans all year around; let the city award contracts for public work at several times during the year, instead of in bunches; do all repair work in buildings already in operation during the few actually cold days (there are said to be only about 20 days of the 300 work days of the year on which work is not practicable), thus helping to avoid a labor shortage during favorable weather; order gravel, brick and lumber during the slow months and keep three great subsidiary industries on the move; institute a sliding scale of freight rates which would reward the buyer who orders his material when the railroad yards are full of idle freight cars."

Indiana Architects

**SOUTH BEND READY TO ENTER-
TAIN STATE ARCHITECTS
AND CONTRACTORS**

Individual and Joint Meetings Planned

Several weeks of work, consultation, correspondence and co-operation on the part of those having in charge the arrangements for the state A. B. C. conference and joint meeting of Indiana contractors and architects at South Bend has reached the stage where all details are completed and now all that remains to make this biggest gathering of the building industry in the history of Indiana a reality is the arrival of the architects and contractors from out over the state on the scene of action Thursday, September 6.

Each organization, the Indiana Society of Architects and the Associated Building Contractors of Indiana, will hold individual regional and conference meetings during the afternoon, and then in the evening the big joint meeting is to be held in the Turkish Room at the Oliver Hotel.

The program for the quarterly conference of the state A. B. C. to be held in the afternoon, as arranged by the association officials and E. H. Hyman, secretary-manager of the South Bend Builders' Exchange, is as follows:

1:30 P. M.

Conference called to order by President F. W. Jungclauss, Indianapolis.

Address of Welcome—Mayor Eli Seebirt, South Bend.

Response to Welcome—Walter O. Fassnacht, president of the South Bend Builders' Exchange.

2:15 P. M.

Report on State Building Code Action, legislative move and the result—Walter W. Wise, member of the Administrative Building Council of Indiana.

2:45 P. M.

Reports on conditions in building circles by delegates from the various cities represented at the conference.

3:45 to 4:30 P. M.

Round table discussion of a general character pertaining the State Building Industry.

4:30 to 5:30 P. M.

Group meetings of trades:

Group No. 1—Consisting of plumbers and steam fitters. Speaker, Frank A. Burget, master plumber, secretary of the Terre Haute A. B. C.

Group No. 2—Consisting of general contractors, masons, plasterers, painters, sheet metals and concrete contractors. Speaker, A. E. Kemmer, general contractor, Lafayette, first vice-president A. B. C. of Indiana.

Group No. 3—Consisting of electricians. Speakers, L. B. Snowden, electrical contractor, Gary, one of the original seventeen contractors who organized the state A. B. C., and Edward Troutman, electrician, secretary of the Peru A. B. C.

5:30 to 6:30 P. M.

Sight-seeing tour of South Bend, delegates to be the guests of the South Bend architects and contractors.

6:30 P. M.

Joint meeting of Indiana and Illinois architects and contractors at the Oliver Hotel. Dinner, addresses and entertainment. Speakers, I. K. Pond, prominent Chicago architect, member of the American Institute of Architects and the Illinois Society of Architects, who will be the spokesman for the assembled architects. H. B. Barnard, Chicago, general contractor, will speak for the assembled contractors.

LABOR SHORTAGE IN THE BUILD- ING FIELD

**National Association Urges Con-
tractors to Push Apprentice Training**

Everyone connected with the building industry is thoroughly familiar in a general way with the labor shortage which is facing it, yet when due consideration is given to the actual figures representing the various trades now as compared with a decade ago, it becomes apparent at once that the work of apprenticeship training, which is to a certain extent relieving the situation in a few localities, must continue.

A recent issue of a bulletin published by a local association contained an article to the effect that the trade school conducted by the organization had been discontinued because there was appar-

ently no further use for it, in view of the fact that there were enough mechanics available to take care of the construction needs of the community. In our opinion this is a serious mistake, and there should be no let up in the work which has been started, at least until the per capita ratio of building mechanics to all other people as represented in the census of 1910 has been approximated. The year 1910 has been adopted as a basis for computation in this article chiefly because at that time there was apparently no shortage of labor in the industry, and it is therefore logical to assume that the proportion of mechanics to all others was about right.

Therefore, using the United States census of that year both for the total number of people living in the United States, and also for the number in the various building trades, we find that in the case of the bricklayer there was a ratio of 1 to 543 or a total number of men engaged in the trade of 169,402. From the same source of information we find that the ratio ten years later had changed considerably and that there was only one bricklayer to every 805 people, or a total shortage of 63,362.

In the case of the carpenter, the ratio in 1910 was one to 112, while in 1920 it was one to 119, or a total shortage of 56,220. The painting trade shows a similar condition, there being in 1910 a ratio of one to 330 while in 1920 it was one to 425, or a shortage of 71,754. The plastering trade shows the greatest decrease of any. In 1910 the ratio was one to 1928, while in 1920 it was one to 2,762, representing a shortage of 16,559.

The above is true of practically all of the trades with the exception of plumbers, electricians and structural iron workers. In the first named trade the ratio in 1910 was one to 620, while in 1920 it was one to 511. The ratio for electricians was one to 764 in 1910 and one to 496 in 1920. For structural iron workers it was one to 8,048 in 1910 and one to 5,610 in 1920.

However, construction methods have changed to such an extent since 1910 that the apparent surplus in these last three trades has been assimilated. The average house today requires considerably more electrical and plumbing equipment than was the case thirteen years ago, while the modern fireproof office building furnishes more work for the structural iron worker than was the case formerly.

Again we urge that associations increase rather than decrease their activities along the line of trade education.—National Association of Building Trades Employers' Bulletin, Cleveland, Ohio.

—THE SOUTH'S FINEST OFFICE BUILDING—

All trim on this twenty-four story office building was assembled at the CARNAHAN factory with EVANS RING JOINT and given a coat of shellac enabling the contractor to finish the building in three months after the mill work order was placed.

The use of CARNAHAN MILL WORK in fine buildings like this, is one of the best evidences of the advantages of high grade millwork and the superiority of CARNAHAN QUALITY.

WE FIGURE THE MILLWORK COSTS THROUGHOUT WITHOUT OBLIGATION ON THE CONTRACTOR'S PART.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BUILDING NOTICE TO BIDDERS

Sealed proposals will be received by the Board of Education of the School City of Marion, Grant County, Indiana, at the office of the superintendent of schools until 12 o'clock noon, standard time, September 10, 1923.

The above proposal shall be for furnishing the necessary labor and material for the erection and completion of a fireproof Junior high and grade school building in accordance with the plans and specifications on file in the office of said superintendent, Marion, Indiana, or at the office of W. C. Findt, architect, high school building, Springfield, Ohio.

Such plans are on file for the purpose of public inspection at any time during regular office hours until the date for receiving bids.

The site of the proposed building is at Washington and Thirty-sixth streets.

Each proposal must contain the name of every person interested therein and must be submitted on blank forms, which forms will be furnished upon application to either the superintendent of schools or the architect.

Bids will be received as follows:

Bids for labor and material must be separately stated.

Bids will be received for the general construction of the entire work according to law, including heating and ventilating, electrical work, plumbing, gas fitting and sewerage.

Separate bids will be received from Items No. 1 to 11, inclusive, as shown on schedule attached to specifications.

Separate bids will be received for each of Items 12, 13, 14, 15, 16 and 17, as shown on schedule attached to specifications.

The board reserves the right to reject any and all the bids.

Each proposal must be accompanied by a certified check or a surety bond to the owner to the amount of 10 per cent of the total amount of the proposal as a guarantee that if successful, the contractor submitting the proposal will enter into a contract within ten days and begin actual work when instructed to do so.

Should any bid be rejected the above surety will be returned forthwith to the bidder. The surety of the successful bidder will be returned upon proper execution of the contract and bond. The successful bidder for any part of the work shall furnish the owner with a satisfactory surety company bond, which bond must be approved by the attorney for the board of education. This bond shall be equal to 100 per cent of the contract price, conditioned upon the faithful performance of the contract and full payment by said contractor for all material and labor used in the building, same to be in strict accordance with the laws existing in the State of Indiana.

The estimated cost of the above building is \$275,000.

(Signed) MARION CITY SCHOOL BOARD.

WILLARD ELKINS, President.

E. E. BLACKBURN, Secretary.

M. E. SHIRA, Treasurer.

Elbert E. Day, Superintendent.

August 25-September 1, 1923.

POULTRY HUSBANDRY BUILDING

NOTICE TO BIDDERS

1. Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of a Poultry Husbandry Building upon the grounds of Purdue University in West Lafayette, Indiana, in accordance with the plans and specifications prepared by and on file with Nicol, Scholer & Hoffman, architects, Lafayette, Indiana, will be received at the office of the undersigned at Purdue University up to 11 o'clock a. m., September 17, 1923, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

- (a) General construction.
- (b) Heating system.
- (c) Plumbing system.
- (d) Combination heating and plumbing.
- (e) Electric wiring system.

3. Plans and specifications relating to any of the above work may be secured from the architects, Nicol, Scholer & Hoffman, Lafayette, Indiana, upon deposit of \$25, which deposit will be forfeited to Purdue University if contractor fails to submit bid or return plans.

W. T. MIDDLEBROOK, Controller.

Insulating Lumber

OVER this Celotex sheathing goes a coat of stucco. The result is a strong house—warm in winter, cool in summer—and 25% to 35% of the fuel bill is saved.

Celotex as sheathing is stronger than wood. As insulation it has the value of cork.

Celotex is a rugged manufactured board that nails direct to studs and rafters. Weather or rough usage does not readily harm it. Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture.

The house above is being built by the Tee

Square Construction Company of Indianapolis, using Celotex as a sheathing.

Besides sheathing, Celotex is used for stucco and plaster base [instead of lath], roof insulation, sound deadening, interior and exterior finish.

Stock sizes: Thickness $\frac{7}{16}$ in., width 4 ft., lengths 8, 8½, 9, 9½, 10 and 12 ft. Weight about 60 lbs. per 100 sq. ft.

We'd like to send you samples and full information on this wonderful insulating lumber. Just let us hear you are interested. Use your letterhead, please. Address

PLANS FOR BIG REGIONAL MEETING OF ARCHITECTS AND JOINT SESSION WITH STATE CONTRACTORS COMPLETED

Large Crowd Indicated

Every evidence at this time indicates that the regional meeting of the Indiana Society of Architects scheduled for South Bend, Thursday, September 6, will surpass in extent even the enthusiastic contemplations of the men who for the past year fostered and advocated the regional meeting idea. These meetings, which have now been held regularly every quarter of the year for the past year and more, have lent a new interest to the workings of the Society. Held first as an experiment the regional sessions proved so attractive and drew out such good crowds that they were soon converted into a regular part of the program of the Society. They brought out architects who never before had taken any interest in the I. S. of A., and not a few of these newcomers later applied for membership and were accepted.

Regional meetings have been held in Indianapolis, Fort Wayne, Terre Haute and Evansville, and now South Bend is to have one which in character will be much broader than the previous gatherings. Additional arrangements were made some weeks ago for a joint meeting the same night with the Associated Building Contractors of Indiana which body was scheduled to meet September 6 at South Bend also. The governing boards of both organizations at once approved such a move and as a result an elaborate program has been worked out for an event that is the first of its kind held in Indiana.

Architects of Illinois and Michigan have been invited in to attend the meeting and Architect I. K. Pond, prominent in Chicago architectural circles and a member of the Illinois Society of Architects, has very kindly accepted the invitation to speak for the architects at the joint meeting.

The regular business session of the Indiana Society of Architects will be held at the La Salle Hotel during the afternoon at which numerous matters of

importance are to be brought up for attention.

Some time will be devoted to the membership feature and ways and means to increase it; also action is to be taken relative to the non-payment of dues and it is probable that all those who are in arrears without excuse will be dropped from membership.

Another question to be taken care of pertains to the appointment of a first vice-president, a vacancy occasioned by the recent death of Ewing Miller of Terre Haute. Action will also be taken on the death of another member Architect Charles Lembke, Valparaiso.

The proposition to establish a progressive tenure of office of board members, ranging from one to three years, is to be reported upon by Guy Mahurin, Fort Wayne, chairman of a special committee appointed to pass on the matter.

Then there will be various committee reports and a general discussion of things pertaining to the state architectural practice and profession.

Assurances have been received from Architect E. R. Austin, South Bend, in charge of local arrangements, that all details have been taken care of and that South Bend is prepared to extend to the Indiana architects, contractors and guests a hearty welcome.

Reservation cards mailed to the members of the Indiana architectural profession are already being returned to Secretary Harrison and the acceptance responses that are arriving are most promising, indicating a good attendance.

There will be a luncheon at the La Salle Hotel at noon for the architects and at the conclusion of the afternoon business session the architects will be taken for an auto tour of the city, after which they will be driven to the Oliver Hotel for the joint meeting with the contractors which will begin with a 6:30 p. m. dinner.

ARCHITECT G. W. ALLEN OUT FOR NEW SOCIETY MEMBERS

Seeking Earnestly to Build Up State Architects Body

Anent the new membership drive proposed by Architect G. W. Allen, Laporte, chairman of that committee of the So-

ciety, he has worked out a pledge card that he proposes to send to all members, each to individually pledge himself to endeavor to secure at least one new member this year.

There was a time when the Society did appear somewhat distantly removed from the majority of the Indiana architects and it was hard for them to realize that the organization was actually working in their behalf. Two meetings a year was not conducive to a creation of interest and what of that there was was inclined to fade during the six months' periods between sessions. However, a new order is in force now and the regional meetings actually carry the Society and its aims and purposes to the architects out over the state arousing a new interest through the personal contact that is afforded.

On that basis Mr. Allen is out to build up the membership and expects the help of all members in his scheme to make of the Society a militant, representative body of the profession in Indiana.

FINDS ALUMINUM PAINT MAKES RADIATORS LESS EFFICIENT

The aluminum or bronze paint generally applied to radiators greatly reduces their effectiveness and makes it necessary to have a larger surface for the same heating effect, according to experiments performed by Dr. W. W. Coblentz of the Bureau of Standards, United States Department of Commerce. Dr. Coblentz finds that the heat radiated from an aluminum painted radiator surface is less than a third of that emitted by a radiator of the same size painted with non-metallic paint, enameled, or simply allowed to rust.

On the other hand, he finds that aluminum paint is a very effective means of reducing the amount of heat transmitted through a thin material. Applied to the under side of a tent or awning it reduces by three-fourths the amount of heat from the sun which gets through the cloth, while if used on the cover of an automobile or ice wagon it cuts in half the heat let through and makes the temperature inside the vehicle more nearly that found in natural shade, thereby making it much more comfortable.

STEADY BUILDING MOVEMENT PREVAILING LOCALLY

Work Not Large But In Fair Volume

Building affairs in Evansville are moving along steadily with no special developments to attract unusual attention. Much of the early season work has been completed and the operations started later are well under way. There has been little to cause delays as, except in a few instances, material shipments have been prompt and the workmen have worked right on through the season seemingly satisfied with the working conditions. The scarcity of bricklayers and plasterers has been felt now and then and under the heavy demand these two trades threatened increased wage demands but in the end walkouts or strikes were prevented.

There is some estimating being done and contracts are being awarded but the nature of the work is just ordinary, running mostly to new homes and a few small commercial structures.

The trend of Evansville building all season has been inclined to steadiness and such a condition is looked for right on into the late fall.

REAL BUILDING TRADES TRAINING IN INDIANA SCHOOLS SHOULD BE ENCOURAGED

Would Mean Much to Indiana Situation in a Few Years

When will Indiana join the procession? Many cities in the country are actively engaged in efforts to replenish the shortages of men in the ranks of the building trades. Educational authorities have been interested in some sections and are ready to establish the teaching of the training departments of the school system. This is as it should be for then the vocational training will really fit youths for the future and equip them with a knowledge that will prove lucrative when their school days are over and they are ready to enter the business world. The money thus spent will be well invested and will bring big returns to the community where the effort is put forth in earnest.

What other states are doing Indiana

can do if the men of the building contracting fraternity will but get behind a worth while vocational building trades teaching effort.

In Philadelphia there are now classes in plastering for enterprising youngsters who wish to learn this lucrative trade, according to an announcement sent out by D. Knickerbocker Boyd, president of the Philadelphia Building Congress.

"The committee agreed," said the statement, "that the plastering trade offered to the young man one of the real opportunities of this present time. It was also recognized that this trade is one in which it is hard to induce young men to serve their apprenticeship unless some plan could be evolved whereby they could be taught more efficiently and paid while learning."

"Consequently a sub-committee on plastering was appointed to confer with employing plasterers and their journeymen, with representatives of boards of education and others."

A plan was worked out as a result of these conferences which led to the opening of the first class at the South Philadelphia high school last winter. Subsequent results have been so successful that plans are now arranged for regular courses in bricklaying for the boys.

REAP BENEFIT FROM EFFORT TO STABILIZE BUILDING MATERIAL PRICES

Big Building Volume Results

Realization of the fact that stabilization of building material supply prices is one of the most effective incentives to building construction activities, many Fort Wayne material men and builders waged an active campaign to that end this season, and to that effort may be attributed no little credit for Fort Wayne's phenomenal building year as compared with previous local building construction records. Despite the great demand occasioned by unusual activity, prices have remained steady with very few advances creeping in. The wisdom of this concerted effort toward stabilization is demonstrated by a resume of the monthly building figures showing a rolling up of totals never before reached in the local field and spelling for prosperity for the entire Fort Wayne building fra-

ternity, architects, contractors, material men and building trades mechanics.

That the local effort was in line with that exerted in other localities is evidenced by an interview recently given out by S. W. Strauss, New York City, one of the largest new building financiers of the country, who said:

"During the last sixty days fluctuations in building costs have been negligible. There have, of course, been advances and recessions here and there as the result of local conditions, but the underlying tendencies have been toward stability in costs. This important development may be taken as an indication that the activities of the industry will continue on an even keel for some time. Rapid fluctuations in building prices add to the perplexity of prospective builders and it will be greatly to the advantage of all concerned to have conditions continue along the same lines that now exist."

"While there have been some recessions in prices, which during the month of June amounted to 4 per cent for the average of all building materials, there is no likelihood that costs will come down to any appreciable extent. This is true largely because the shortage of buildings is so widespread and there is so much potential construction work in the country that pronounced cost decreases would immediately bring about abnormal building activity which, through the processes of competition would again force up the prices."

ACTIVITY IN BUILDING SUSTAINED BY CONTINUED HOUSE CONSTRUCTION OPERATIONS

Home construction continues to feature Ft. Wayne activities in the building field according to the records of the city building inspector's office. There has been somewhat of a slump in the launching of large building projects during August, in fact, no really large structures were started. Though the total estimated cost of the new work started this month will hardly reach the figures of previous months there has been no apparent letup in the general activity that has ruled about the city. There have been many new residence permits granted during the month and these, together with the large volume of new residences under way, is still putting a heavy demand on the available labor supply, there being no unemployment problem among the building craftsmen to cause worry.

The impression among the building men of the city is that the fall season will show a steady continuation of the local building effort with the possibility of an added impetus when everybody returns from vacation diversions and settles back to normalcy once more.

HARRY FENTON, WELL KNOWN INDIANAPOLIS ATTORNEY ANNOUNCES FORMATION OF NEW LEGAL PARTNERSHIP

State A. B. C. Counselor Expands Practice

The contractors are not the only ones who find their working organizations taxed to keep pace with existing conditions; it seems some attorneys find themselves in the same predicament.

Harry A. Fenton, Indianapolis, counselor for the Associated Building Contractors of Indiana and widely known throughout the length and breadth of the Indiana building construction field, has just made known a move of business expansion.

Mr. Fenton together with Edwin Steers, Louis Herbst and Anthony J. Klee announce the formation of a partnership for the practice of law under the firm name of Fenton, Steers, Herbst and Klee. The offices of this new legal combination will be located at 1106-1107-1108 National City Bank Building, Indianapolis.

BUILDERS AT INDIANAPOLIS RE-ORGANIZE BOWLING LEAGUE

To Open Season September 14th

Among the organized bowling forces that are about to open up activities on the Indianapolis alleys for the approaching winter season is the Builders' League of the city. This organization started some years back under the appellation of the A. C. E. (Architects,

Contractors, Engineers) League, has enjoyed several successful seasons and all the boys are "raring to go" again this year. Though the personnel of the league has changed very little from year to year the team names have done so and each aggregation represents some firm engaged in the local building field either in the contracting or material supply business, hence the new name, Builders' League.

The preliminary line-up of the organization as it now stands is made up of these teams: Robert Berner Structural Iron Co., Wege-Stanford Marble and Tile Co., Hugh J. Baker & Company, Conder and Culbertson, Jackson Supply Co., Allied Coal and Material Co., Indianapolis Electric Supply Co., and another team still to be named.

All teams will be made up of five men and the league games will be rolled regularly every Friday night, 6 to 8 o'clock, at the Central Alleys, following a definite schedule covering a span of probably twenty-nine consecutive weeks.

Preparations are being made to inaugurate the season Friday, September 14. Julius Warren is president and Walter Hillman secretary of the league.

PUBLIC MUST HELP

Contractors Can Not Alone Stop Wage Pyramiding or Bonus Advances

Some day, maybe, the contractors will come to. The folly of certain competitive methods seems to be dawning on many of the building trades employers, especially the practice of bidding up wages in order to secure help.

In the larger cities there is a determined step being taken to kill off the suicidal pyramiding of wages and the bonus to workmen practices. There is hardly a national or city association of builders that has not gone on record as opposed to these insidious influences that have preyed so upon the building industry. However, all the resolving in the world will do no good unless individually the membership carries the resolutions into effect and then stands solidly back of the effort and secures the aid of the Public in that stand.

One of the greatest drawbacks to the success of the move to kill off the pyramiding and bonus practice is the owner, not the contractor. The owner will brook no delay of his building project and when the contractor explains the wage scale and his inability to get men the owner frequently comes through, agrees to pay a bonus over the scale and tells the contractor not to say anything about it. He don't figure that the workmen talk among themselves and in no time the advances get breezed around to upset the whole local labor market.

Many Indiana cities have experienced this disorganizing influence and have seen wages tilted and men flock to one job then another and with it all no new supply of workmen was secured, instead the same old supply remained only to take advantage of the ever advancing wage.

When the owner, the public, is willing to back up the contractor on the wage scale stand and is willing to take the chances on securing labor from the available supply then, and not till then, will resolutions against bonuses and pyramiding get results.

J. Wesley Reed ----- President
E. E. Cole ----- Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**EFFICIENCY OF LABOR GIVES WAY
BEFORE HECTIC DEMAND****Wage, Not Skill, Is Uppermost In Minds
of Mechanics**

Observers who have watched and studied industrial activities covering a wide span of years often lapse into reflective moods and ponder upon the apparent passing of the former efficiency of employes in days gone by.

They compare present conditions with those that existed when lads became apprentices, learned their trades, worked at them conscientiously and with skill and thus provided the nation with their peak productive abilities. Such conditions stand in marked contrast to those that industry is now forced to meet.

A general lack of intensive training of workmen has combined with present abnormal fluctuations of supply and demand to make the average workman of today far less conversant with the niceties of his trade than his predecessor of a few years ago.

Constantly moving from one job to another in an effort to take advantage of temporary and abnormal conditions, the mechanic cuts down his efficiency. No matter how familiar he may be with the job in its generalities. This constant changing prevents him from becoming intimate with his fellow workmen, with those who supervise his work and with the particular operating policies of his employer. The factor of inefficiency, intangible as it may appear, is having marked effect upon the general labor conditions of the country.

The value of men trained to their jobs has been held by some experts to reach as high as 50 per cent over that of employes who are not thoroughly familiar with the fine points of their work and the organization in which they are employed. While this estimate may be rather extreme, it is certain that a wide margin rests between these two values, varying as regards the nature of the work.

The above is entirely independent of the artificial and arbitrary limitation of output that is practiced sometimes by labor organizations. Studies of this phase of the labor problem are highly interesting for they hold possibilities of developing a means whereby the demands for labor may be met without taking men from one job to another merely through the destructive process of raising wages higher and higher. In addition it is obvious that an increasing of efficiency of labor will have its effect in stabilizing industrial operations by holding down the unit cost of labor.

(From Bulletin of the Associated Building Contractors of America.)

SOME PROMISE ANYWAY**Completion of Big Building Operations
to Aid Labor Conditions**

Most of the larger buildings under construction in Hammond are nearing completion except the Hotel Indiana, which is also now making good progress. The completion of the larger buildings will release a good number of mechanics, a situation that will tend to relieve the shortage of labor on dwelling and home building operations.

CALUMET BUILDING PROGRESS

M. V. Grimm of North Manchester was awarded the contract for the school addition in District No. 88, Joliet, Ill., for \$20,000.

M. A. Dickover was awarded the contract to build the addition to the Pratt Food Company's plant, \$17,474, the contract covering wall, roof and floor construction.

Arch. A. C. Berry & Co. are preparing plans for a 40-room fireproof hotel building at Crown Point, Ind. Plans will be completed about September 15.

The new hotel building at Hammond has been leased for a period of 15 years to a man from Kankakee, Ill. The lease provides for an additional two stories within two years. It will be called the Indiana.

There has been such a demand for cement blocks that the factories have been compelled to run day and night right along.

AMONG THE ORIGINATORS**Muncie Contractors Deeply Interested
In South Bend Conference**

Several of the Muncie contractors are preparing to attend the State A. B. C. conference at South Bend, September 6th. Muncie contractors were among the sponsors of the first A. B. C. conference ever held in Indiana, back in 1920, at which time a joint meeting of the contractors of Anderson, Marion and Muncie was held at Anderson. The innovation proved so attractive that the joint meetings were extended to Muncie, Marion and Kokomo, finally resolving themselves into regular quarterly conferences and growing steadily in scope.

NEXT YEAR****Signs Point to Another Big Building
Season in 1924**

While Muncie and her sister cities of similar size have reached their building peaks and will now settle down to the ordinary customary run of fall building which can hardly be termed brisk it is satisfying to know that they, too, contributed their bit to the great volume of building that has made 1923 a wonderful building year all over the country.

But, that is not all. Encouragement for another good year next season comes from the indications that lead leading financiers interested in building to predict even greater activity in construction circles in 1924. It seems that inquiries for capital to finance building are picking up again after a temporary lull and many believe that the threatened fall slump in building is about to be counteracted and that activity is to be revived. Such a condition will probably have no great immediate influence in the smaller cities, but if the fall season finishes strong it will tend to build up a confidence that will make itself felt in early spring building contemplations and start things off with a rush. If such is the case this influence will carry to the smaller localities and have an encouraging effect there.

This influence is bound to exert itself for, according to the best information available, the housing shortage has only been reduced by about 25 per cent during the past four years. It is estimated that in a third of the cities and towns of the United States having a population of more than 8,000 there are inadequate school facilities. In addition to the house and school shortage there is an almost unprecedented demand for commercial buildings.

Such being the condition it is believed that there will be such an impetus given to building by June 1st, 1924, that all cities and towns will again be booming with building activities.

Muncie contractors are hoping along the above line and will seek to encourage working conditions that may make that hope a reality.

A NEW WEDGE INSERTED**How Far Will It Cause a Split?**

As if the building construction field was not seething and boiling enough! But no, someone had to inject more agitation and—he or they did.

Over at Indianapolis the Klan serum was shot into the Labor sphere and up went the Central Labor Union higher than a kite. The injection of the Klan argument into the C. L. U. affairs stirred up a real boiling and as a result some of the largest building trade groups have "taken the air." Resignations by the following organizations have resulted: Carpenters Local No. 75; Painters Union No. 47; Sheet Metal Workers No. 41; Hoisting Engineers and Electrical Workers No. 481.

STANDARDIZATION NEEDED IN THE BUILDING CONSTRUCTION INDUSTRY

Has Been Started, Should Be Continued

One of the marvels of present day industry is the production of a certain low-priced automobile. It is in a price class by itself, and its enormous production is made possible largely by standardization. The building industry can well afford to observe the lesson taught in the standardized production of this car.

Already steps have been and are being taken to eliminate some lost motion due to production of unstandardized commodities. The Common Brick Manufacturers' Association was instrumental in causing many common brick manufacturers to make their product in standard unit size. The National Paving Brick Manufacturers' Association has cut out an unbelievable number of odd sizes of paving brick and the paving brick industry is now working on the standard unit plan.

For years the lumber men have been making standard sizes of timbers—sometimes at a loss when it came to lengths. There have been sporadic efforts made to furnish odd lengths and widths, the thought being that often standard sizes were cut and wasted on the job, but the standard size practice has been too deeply planted to be uprooted easily.

When it comes to sash and doors, interior trim, mouldings, etc., there is a lack of co-ordination that is appalling. The National Moulding Book lists thousands of patterns, many of which are so similar as to appear identical to the casual eye. Considerable effort has been put in, weeding out odd patterns, but

there is still a lot of standardizing to be done. In other lumber units such as siding, etc., there are many patterns, many of which could be eliminated without injury to the trade. The effect of standardization to the producer and dealer would be increased production, less waste, larger stocks of standard materials, no small lots of odds and ends insufficient to complete any job, increased efficiency and profits.

On the other hand, some claim a loss in beauty, or esthetic value. But let it be pointed out that with the bewildering varieties of materials from which to choose, any number of our large city streets are built up with houses as similar as a crate of eggs—a wearying monotony and repetition of unvarying sameness. The elimination of some thousand or so odd sizes of various materials could not affect the builder for the worse.

Besides, it is usually apparent in most of these stock commodities, that they were brought into being "without benefit of clergy" and their creators, not being wedded to beauty or esthetics, have, "out of wedlock," produced a progeny as unbeautiful as numerous.

Consider then the builder whose eye is trained to utility not to beauty, confronted with these illegitimate forms, which he is obliged to build into a completed structure. The wonder is that our structures are not worse than they are. A few simple, beautiful, standardized forms could not but help to improve the appearance of many buildings which are built without planning or supervision of a trained architect.

The architects should welcome any movement toward standardization, for they would not be forced to sell their wares—knowledge of art, sense of beauty, experience in construction, perfection of design, delicacy of balance, etc.—in competition with a shapeless, formless mass. To the architects would come that class of people who, hunger for charm, or beauty, or an elusive something which they feel, but cannot express. At present these people, many of them with considerable wealth, but with a lack of knowledge, are led into building structures, which to their untrained perceptions, seem an answer to their craving for something different. This quite large class of people presents a field which architects—real architects—have been unable to reach.

And while the standardization of ma-

terials is in progress, why not urge standardization of architects? Other professions, such as medicine, dentistry, law, etc., are controlled by law, but under existing conditions any one with pencil, T-square and drawing board may hang out his shingle as "ARCHITECT" and none may say him "Nay!"

And while we're standardizing let's standardize builders. Even the unions insist that a man or boy spend some time as an apprentice before being given a journeyman's card. But any one may call himself a contractor so long as he can spell-bind an owner into signing on the dotted line. Licensing contractors would wipe out a lot of waste, it would put fly-by-night builders out of business. It would protect "life, liberty and the pursuit of happiness" by eliminating shoddy, shiftless work. It would raise the standard of ethics; it would help draw architects, builders, and material men into a closer relationship.

While standardization may be good for materials, it is infinitely better for men—so let the good work go on 'til the standardized platform on which stand all branches of the industry, wipes out existing evils and offers the building public a square standardized deal all through.—Building Industry.

TAKE ACTIVE PART IN GREAT HOME BUILDING OPERATIONS

Three Billions Advanced by Building Loan Bodies

The present amount invested in home-building mortgages by building and loan associations in the United States is approximately three billion dollars, millions of dollars more than the total amount which all the life insurance companies in America have invested in their entire real estate mortgage holdings, according to figures compiled by the National Association of Real Estate Boards from official reports.

Rapid increase in the part building and loan associations are taking in the financing of home-building throughout the country is indicated in the fact that one-third of the total assets of these associations has been acquired within the last three years. The three-billion dollar fund represents the savings of a total membership of approximately 6,000,000.

INDIANAPOLIS

SCHOOLS (8) \$1,447,358.00

1. Separate sealed bids, as outlined below in Paragraph 3, calling for group bidding, will be received by the board of school commissioners of the city of Indianapolis, at its offices, 150 N. Meridian St., Indianapolis, Ind., for the building of eight public school houses, including general construction, heating and ventilating, plumbing and electrical work, which several classifications must be bid upon separately for each building.

2. These buildings are as follows, estimated costs not including architects' or engineers' fees:

School No. 23, estimated cost.....	\$ 98,380.00
School No. 30, estimated cost.....	130,963.82
School No. 38, estimated cost.....	182,352.00
School No. 62, estimated cost.....	191,878.00
School No. 67, estimated cost.....	207,964.00
School No. 70, estimated cost.....	193,500.00
School No. 75, estimated cost.....	210,300.00
School No. 76, estimated cost.....	232,021.00
	\$1,447,358.00

3. Bids upon three of these buildings, viz., Group 1, Nos. 62, 70, 75, will be received until 2 o'clock p. m., Thursday, Sept. 27, 1923, and then opened for consideration.

Bids upon another three of these buildings, viz., Group 2, Nos. 30, 23, 76, will be received until 2 o'clock p. m., Monday, Oct. 8, 1923, and then opened for consideration.

Bids upon the remaining two of these buildings, viz., Group 3, Nos. 38, 67, will be received until 2 o'clock p. m., Monday, Oct. 15, 1923, and then opened for consideration.

4. Any contractor shall have the right to bid upon any one, or more, or all of these buildings, but must confine his bidding to the group and time called for as set out in Paragraph 3. If all of the bids of either group one or two should be rejected at the time set for receiving such bids, then, under such circumstances, there being no change in plans and specifications for such group of buildings, new bids upon same will be receivable and acceptable at the time set for receiving bids upon Group 3, namely, Monday, Oct. 15, 1923. Under like conditions, if all bids of Group 3 should be received, new bids thereon will be receivable and acceptable until 2 o'clock p. m., on Monday, Oct. 22, 1923.

5. All bids must be made upon proposal blanks prepared by the board, which blanks will be supplied by the architects, the engineers, or by the business director upon application. A separate bid must be made for each classification set out in Paragraph one (1) for each building. If any contractor desires to bid upon the whole of either group in any classification he may, in addition to his separate bids upon each building which is absolutely required, file an alternative bid covering the whole group which shall in all ways conform to all requirements relative to bids upon single buildings.

6. Each separate proposal shall be presented in a separate sealed envelope which shall be plainly marked to indicate the character of work bid upon and the number of the building to which such work relates, as, for example, "Bid for General Construction School No. 23"—or for heating and ventilating, or plumbing, or electrical work, as the case may be.

7. Each bid must be accompanied by a check for three (3) per cent of the maximum bid, which must be drawn payable to the Commissioners of the City of Indianapolis, and certified

good by a responsible bank or trust company of Indianapolis.

8. In case a bidder whose bid shall be accepted shall not within five days after notice of such acceptance perform his bid by entering into a written contract with the said board, in the form made part of the specifications, to execute the work bid upon and construct and complete the same, and within that time secure the performance of his contract by a bond in the form made part of the specifications, with surety, or sureties, to the approval of the board, then his certified check and the proceeds thereof shall be and remain the absolute property of the board as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the board.

9. For information and for plans and specifications for the buildings called for consult the following architects or engineers:

For School No. 23—Bass, Knowlton & Co., 312 N. Meridian St., Indianapolis.

For School No. 30—E. E. Dunlap, Eleventh and Delaware Sts., Indianapolis.

For School No. 38—E. E. Dunlap, Eleventh and Delaware Sts., Indianapolis.

For School No. 62—McGuire & Shook, 320 Pythian Bldg., Indianapolis.

For School No. 67—Kopf & Woolling, 403 Pythian Bldg., Indianapolis.

For School No. 70—Vonnegut, Bohn & Mueller, 610 Indiana Trust Bldg., Indianapolis.

For School No. 75—Rubush & Hunter, 430 American Central Life Bldg., Indianapolis.

For School No. 76—Charles H. Byfield, 923 People's Bank Bldg., Indianapolis.

Concerning heating and ventilation, plumbing and electrical work for schools Nos. 30, 38, 62, 75, consult Snider & Rotz, engineers, 703 Merchants Bank Bldg., Indianapolis. Plans and specifications are also on file in the office of the Board where same may be inspected.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

POULTRY HUSBANDRY BUILDING

NOTICE TO BIDDERS

1. Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of a Poultry Husbandry Building upon the grounds of Purdue University in West Lafayette, Indiana, in accordance with the plans and specifications prepared by and on file with Nicol, Scholer & Hoffman, architects, Lafayette, Indiana, will be received at the office of the undersigned at Purdue University up to 11 o'clock a. m., September 17, 1923, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

- (a) General construction.
- (b) Heating system.
- (c) Plumbing system.
- (d) Combination heating and plumbing.
- (e) Electric wiring system.

3. Plans and specifications relating to any of the above work may be secured from the architects, Nicol, Scholer & Hoffman, Lafayette, Indiana, upon deposit of \$25, which deposit will be forfeited to Purdue University if contractor fails to submit bid or return plans.

W. T. MIDDLEBROOK, Controller.
September 1, 1923.

HIGH SCHOOL BUILDING NOTICE TO CONTRACTORS

The undersigned Board of School Trustees of the School City of Alexandria, Indiana, hereby gives notice that on Wednesday, October 3, 1923, until 10:00 o'clock a. m. at the office of the Superintendent of City Schools in the High School Building, in the City of Alexandria, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building, and at the same time and place, will also receive sealed bids and proposals for the installation of the Heating and Ventilating, and the Plumbing, Sewerage and Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Alexandria, Ind.

The estimated cost of the proposed building is Seventy-six Thousand Dollars (\$76,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed, and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by certified check for 5% of the amount of said bid; each bid for the heating and ventilating shall be accompanied by certified check for 10% of the amount of said bid; and each bid for the plumbing, sewerage and wiring shall be accompanied by a certified check for 10% of the amount of said bid. These checks must be made payable to the Board of School Trustees of the School City of Alexandria, Ind.

dana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of School Trustees for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then, he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Alexandria, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, 345-347 Farmers Trust Building, Anderson, Ind.

Copies of said plans and specifications may be obtained from the office of the architect upon the deposit of Fifteen Dollars (\$15.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for the receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

DR. W. R. THOMAS, Pres.,

J. S. WALES, Secy.

J. W. SULLIVAN, Treas.

Board of School Trustees of the School City of Alexandria, Ind.

F. W. STOLER, Supt.

Sept. 8-15-22, 1923.

SCHOOL BARN NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public generally that sealed proposals will be received by Charles Wright, Trustee of Chester Township in Wabash County, State of Indiana, at his office in the Post Office building on Walnut street in the Town of North Manchester, Indiana, until the hour of 2:30 o'clock p. m., on the 1st day of October, 1923, for the construction and completion of a frame barn to be built on the Chester Township High School lot in Chester Township, Wabash County, State of Indiana, all in accordance with plans and specifications on file in his office.

Each bid must be accompanied with a certified check of fifty (50) dollars, payable to the Trustee of said township. Such check to be returned to bidder unless he shall be awarded the work and fails to enter into a contract for the construction of said work within ten days after the receipt of notice thereof in which event the check will be forfeited to the township.

Each bid must be accompanied by a non-collusion affidavit, and any bid not so accompanied will be deemed informal and will not be considered. The successful bidder will be required to furnish compensation and public liability insurance.

The successful bidder shall enter into a bond with approved surety in the sum of seven hundred (\$700) dollars for the faithful performance of the contract and the payment of all obligations arising thereunder.

The said Township Trustee hereby reserves the right to reject any and all bids and re-advertise for bids.

CHAS. WRIGHT,

Trustee of Chester Township, Wabash County, Indiana. Post Office address, North Manchester, Indiana.

SOUTH BEND MEETING BRINGS OUT FINE REPRESENTATION OF STATE ARCHITECTURAL PROFESSION

Joint Meeting a Success

Interest in the regional meetings for Indiana architects as instituted and promulgated by the Indiana Society of Architects continues to increase right along as time goes on. This fact was once more demonstrated at South Bend, Thursday, September 6th, at which time the fourth regular affair of that nature was held under the auspices of the I. S. of A.

It was most gratifying to the officers of the Society to realize the appeal that these meetings carry when from all parts of Indiana the members of the profession began to gather in good time. It was a fine representative crowd of architects who responded Thursday. They came from the north, the south, the east and the west and were eager for action. Among the cities represented were Indianapolis, Evansville, Elkhart, East Chicago, Lafayette, Connersville and South Bend and other places. There were many men present who never before had attended a meeting of the Society and it is hoped a new spirit has been aroused in the organization and the work it is seeking to accomplish in the interest of the architectural profession and the building industry of the State.

The meeting this week marked an epoch in the state building construction industry in that it was broadened out and in connection with it a joint session was held with the Associated Building Contractors of Indiana at the Oliver Hotel in the evening. Not only were the State Architectural Profession and the contracting interests largely represented but even material interests were present as also were delegates from the Illinois Society of Architects.

The keynote of the evening meeting was co-operation between those of building affairs that the whole building industry of the State might get a square deal and be advanced.

The featured speakers of the gathering were Architect I. K. Pond, Chicago, who represented the architectural interests, and H. B. Barnard, Chicago, general contractor, who spoke for the building contractors.

Preceding the joint meeting the architects held a business session in the afternoon at the LaSalle Hotel, while the A. B. Co's did likewise at the Oliver Hotel. Then there were sight-seeing tours of the city after which a dinner was served at the Oliver to be followed by the big meeting.

CHOOSING AN ARCHITECT

You Can Not Be Too Careful

"You can not be too careful in the selection of an architect these days," said an owner a few days ago. "It is surprising that anyone should say anything of this kind when we have so many talented architects offering their services to us each feeling that he is much more competent than any other who might offer his services. Another thing that makes it surprising is that we are supposed to be living in an age when one would think too that the ability of architects who profess to do a particular class of work is about equal.

"An architect today must not only be a good designer and a good planner but he must be able to design and construct a building that will work out along the lines of its occupancy as well as from a financial viewpoint, in fact, must be as complete as we agreed upon when the structure was in contemplation.

"Along with this and most important is that an architect must be a business man. He must be able to know a survey and approximate the cost of the work as a whole from the start or at any point in the construction of the building. For illustration, my architect received a bill from one of the contractors for charges in my first building, aggregating \$43,000. This staggered him as it did myself. However, my architect was not staggered very long. He went over the work and when he got through auditing the bill we found that we owed the contractor \$400. It was not easy to do this. The contractor was an able man; he thought he knew his business better than we did. It looked like an impossible case, but we won out and did not go into court at that, but we had to know our business as you see.

"Take another building. Two build-

ings were similar in many respects; practically alike insofar as cubic contents is concerned. One cost me \$3,000,000 and the other \$4,000,000. I had two different architects and they were different. One knew his profession and his business and the other did not. A million dollars is a big lot of money to lose, isn't it? But that is what I am compelled to do solely because I retained an architect who did not know his business. The same rule applies whether it is a big building or a small building. It doesn't make any difference.

"So you see an architect should be a genius; a compound of many complex qualities of a high order."—(The Economist.)

LICENSE LAWS AND THE COURTS

Legal Wallop Handed Licensed Legislation in Pennsylvania

The Pennsylvania Engineering License act was recently declared unconstitutional by the courts of that state.

A careful reading of the court's decision would indicate that should similar test suits be brought in other states that many of the existing professions license acts would probably meet with the same fate; amongst which might be mentioned the present license laws of Tennessee, Indiana, Michigan and Minnesota. In fact, it is exceedingly doubtful if there is a single license law now in effect in any state of the Union, except only the State of Illinois, that would pass a rigid scrutiny by a court of record.

It will be recalled that the Illinois state law survived a test in the supreme court some years ago and any amendments which have since been made to the act, have undoubtedly strengthened it from a legal standpoint.—(Bulletin of Illinois Society of Architects.)

A PRACTICAL TEST PROPOSED

Evansville School Instructor to Endeavor
to Train Boys In Building Trades

In an effort to encourage Evansville boys to enter the building field a new proposition is to be tried out at the Governor Street School this fall. Vocational Training Instructor Jonas T. Jewett is sponsoring the move.

A class of sixteen boys, ungraded students, are to be put to work on a new addition at the Governor Street School as soon as the fall term opens. As now planned the boys will be given several hours daily study in the fundamental theories of building and the remainder of the time will be spent on practical work on the proposed structure for the purpose of mastering certain of the building trades in order to become proficient as building mechanics.

BIG GAIN FOR BUILDING IN AUG.
OVER SAME PERIOD LAST YEARLocal Volume to Date Exceeds Entire
1922 Operation

So steady and uniform has been the building volume of Evansville for the past few months, showing regular gains over the corresponding periods a year ago, that City Building Inspector Edward Kerth, after sizing up the local conditions and situation, predicts that the total value of building for which permits will have been issued by the end of the year will amount to \$4,000,000 or more in 1923.

With a third of the current year yet to go, the record of building permits issued from the city building inspector's office show 1923 has already passed the mark set during 1922. During the eight months already elapsed \$3,080,142 in permits have been granted as compared to \$3,069,734 during the entire twelve months of last year.

An indication of the general monthly increase during this year over last is shown in the number of permits granted during August of both years. This year there were 211 and last year 141. The total estimated valuation of the permits in August, 1922, was \$169,540 and this year it is \$271,865.

That an effort is being made to meet the housing problem is evident, for, of the valuation of permits taken out in August, \$228,000 were for residential purposes.

EXPOSITION.Effort to Encourage More Home
Ownership.

Interest in building at Evansville has been so keen for the past year or so and so many have erected new homes that there are those who trace this activity to the Home Complete Expositions that have been held annually, sponsored by contractors and others engaged directly and indirectly in the building industry.

Home construction work has boomed steadily, evidence of which is apparent in all sections of the city bristling with new homes. In order to aid prospective builders and encourage a continuation of this construction effort another Home Show will be held in Evansville this fall. The affair will be located at the Coliseum and is scheduled for October 1 to 6.

SHARP DECLINE IN FT. WAYNE
BUILDING OPERATIONS

August Figures Fall Off Precipitately

The break had to come, other cities felt the slump in building construction sooner than Ft. Wayne did. Locally the activity, as marked by the city building records month after month, was the greatest in 1923 that Ft. Wayne has ever experienced.

Spring came accompanied by a great wave of building effort. This latter continued right on through the summer up to early August when a let up began to make itself felt. Long before the month had run its course those in touch with building affairs realized that August would fall short of the million dollar building totals recorded by each of the five preceding months. Sure enough, when September first came and the totals for August were arrived at it was found that 254 permits were issued for a total estimated valuation of \$691,978.

This was 43 permits and \$449,287 below the July totals. Not only that but the August building business this year was \$942,596 or almost a million dollars less than that of August, 1922.

An analysis of the past month's permits granted shows that of the 254 total permits issued 104 were for residences.

FAST APPROACHING 1922 RECORD
BUILDING FIGURESMore Than \$9,000,000 Worth of New
Work Started In Ft. Wayne
This Year

Though the slump in August building in Ft. Wayne caused some disappointment nevertheless the over a half a million dollars total added a nice sum to the building total for the eight months of 1923, carrying the figures up to and over the nine million dollars level to September 1st. This is \$3,783,855 in excess of the total for the corresponding period a year ago, a gain of 69.5%.

As the year's building figures now stand to date they lack but \$407,692 of equaling the entire total posted for the whole of 1922, and there are four more months to go this year.

The monthly building totals as recorded to September 1, both in 1922 and 1923, are:

Month	Est. Val. 1923	Est. Val. 1922
January	\$ 390,885	\$ 136,660
February	420,330	191,035
March	1,450,000	573,375
April	1,939,275	582,385
May	2,166,085	701,285
June	1,022,539	903,455
July	1,141,265	715,733
August	691,978	1,634,574
Total	\$9,222,357	\$5,438,502

LOCAL BANK CLEARINGS ALSO
DROP

Business Not So Brisk

Bank clearings in Fort Wayne last week showed a decrease of more than \$130,000 over that of the previous week, according to the report of the local clearing house. The clearings for the week were nearly \$200,000 more than the corresponding week of last year. The total clearings for the week were \$1,896,722.59.

WAIVER OF LIEN

Axebrod, Joseph, as owner, and Jesse Meredith, as the contractor, to tear down and remove dwelling house, known as 1030 S. Illinois St., and improve and erect new building according to contract for \$5,710.

ONCE MORE MONTHLY BUILDING VOLUME AT INDIANAPOLIS SLUMPS

Residence Work Only Thing That Saved the Day

Indianapolis in company with many other cities is experiencing a check of building operations. The first impressive let-up occurred in June when there was a decided decrease in the money involved in the construction of new projects for which permits were granted. July staged a comeback with a \$2,055,748, but August failed to carry on and slipped back again, dropping even below June's \$1,905,000 total.

According to the official figures of the city building inspector's office, August was the second lowest building month of the year. During the month just past there were 1,415 permits issued for a total estimated valuation of \$1,756,530. There were 134 more permits granted in August, 1923, than in August, 1922, but the total valuations showed a decrease of 15.3 per cent.

An interesting phase of the building operations for August pertains to the house construction work that was done; in fact, it represents 60.5 per cent of the whole volume of business. Of the total of \$1,756,530, \$1,091,725 went toward the erection of new houses, 195 permits for such structures having been granted during the month.

There were 43 permits granted for new commercial buildings, the total esti-

mated valuation being given at \$189,099. The remaining portion of new work for which permits were issued covered hundreds of remodeling and repairs jobs which, taken in the aggregate, made quite a total.

INDIANAPOLIS DELEGATION GOES TO SOUTH BEND

Early Thursday the Indianapolis delegation to the big joint meeting of state architects and contractors at South Bend left for the scene of action.

This meeting had its origin at Indianapolis and for the past few weeks state A. B. C. headquarters has been busy co-operating with the South Bend Builders' Exchange arranging the details.

As soon as it was learned by the Associated Building Contractors of Indiana that the Indiana Society of Architects had a regional meeting planned for South Bend the first week of September, the machinery was set in motion to hold that affair and the quarterly conference of the A. B. C.'s on the same day and in the evening hold a joint session of the two organizations.

The scheme met with instant favor and the gathering Thursday of this week was the result.

Those in the Indianapolis contractors' party who went to South Bend were: Fred W. Jungclauss, president of the Indianapolis Building Contractors' Association, and also of the State A. B. C.'s; O. C. Pierson, secretary of both organizations; Walter W. Wise, Joe Hayes, Harry A. Fenton, counselor of the A. B. C.'s, and J. H. Owens, field representative.

WHEREIN THE BUILDING CONSTRUCTION VOLUME PLAYED A BIG PART

Effect Apparent In Cement Movements

Production of Portland cement in July was somewhat greater than in June and more than 1,000,000 barrels greater than in July last year. Total production for the month was 12,620,000 barrels, according to the United States Geological Survey. For the first seven months of this year production was very close to 75,000,000 barrels—an increase of more than 28 per cent over the best previous record for that period.

Shipments from the mills during July amounted to about 13,700,000 barrels—an increase of 400,000 barrels over June, but slightly under July, a year ago. Shipments for the seven months' period ending July 31, were approximately 76,000,000 barrels, a quantity greatly in excess of that moved in any similar period during past years.

COURT HOLDS THAT STRIKES TO FURTHER BOYCOTT ARE ILLEGAL

Important Decision Rendered In Building Case

The Illinois Supreme Court recently handed down a decision which states that strikes called in furtherance of boycotts are illegal. The case grew out of a strike which was called on a general contractor who was buying material from a millwork concern which refused to maintain a strictly union shop. The manufacturing company obtained an injunction

restraining the Carpenters District Council of Chicago from intimidating or coercing customers and when a strike was declared to enforce the boycott, the president of the Council and one of the business agents were cited for contempt and fined \$500 each. The case was carried to the Appellate Court and the same opinion was rendered. From there it was taken to the State Supreme Court which body upheld the decision of the two lower courts.

BUILDING PERMITS (\$4,500 and Over)

Week of August 30 to September 4.

Laundry (Add.) 3 sty. 63x145. \$35,-000. Archt., Russell N. Edwards Co., Union Trust Bldg. Owner, Progress Laundry Co., 428 E. Market. Contractor, Service Construction Co., Castle Hall Bldg. On foundation. Brick.

LUMBER PROBLEM A GROWING ONE**Building Industry Feeling the Pinch**

One of the most important questions now confronting the building industry is, how to overcome the shortage of lumber and the consequent high price?

Col. Wm. B. Greely, Chief of the Bureau of Forestry, makes the statement that the transportation charges involved in the moving of the timber supply to points of consumption has made retail prices so high that the demand for lumber is falling away.

Twenty-eight states produce less lumber than they consume. In 1920 only five states provided more lumber than they consumed. The average lumber haul between sawmill and consumer has increased 34 per cent over a period of seven years.

A timber famine as to the eastern and central parts of the United States is not hypothetical or distant, it is here. The evidence of such a condition is found in the smaller and poorer houses being constructed, the reduction in number and maintenance of farm buildings.

Lumber and paint for ready cut one story, five room houses was listed in 1915 at \$883.00, but today the same item shows an increase of over 200 per cent.

The scarcity and the high price of good lumber has led to the increased use of inferior qualities. There is probably not a single wood fabricating industry east of the Mississippi or north of the Ohio or Potomac Rivers that today does not use wood distinctly inferior in intrinsic quality to that used twenty years ago. There is necessity now for teaching a vastly needed lesson of economy and of the adopting of new woods to old uses.

A large corporation has been formed in Louisiana for manufacturing inside finish and sheathing from sugar cane stalks after the juice has been extracted. The claim is made that the product obtained makes a fine substitute for lumber and in the near future the corporation will be able to turn out 250,000 sq. ft. of finished product daily. The claim is also advanced that the price of this material is most reasonable and that the material will take a finish equal to any hard wood. Something like this substitute will have to be used or in a few years lumber will become so scarce that the price will be prohibitive.

CALUMET BUILDING PROGRESS

Guy Young, general contractor, has put plasterers to work on the parsonage for the Greek Catholic Church and has started the brick work on the church building.

Plasterers are busy on the M. E. parsonage. Morris Bros. have the general contract on this project.

Witter Bros., contractors for the Whiting Garage Co. building on Indianapolis Blvd., is ready for the roof trusses.

Morris Bros. were awarded the general contract for the construction of a building for Joe Meyers. It will be 1 sty., 50 ft. by 200 ft. of brick construction. The same contractors also have a gas filling station for Reynolds & Willis at Sheffield and Goslin St.

The fifth floor of the new Hotel Indiana is about completed. Though a cinder fill concrete roof is to be installed shortly, provision has been made to add two additional floors when necessity demands.

THOUGH MORE INTERMITTENT AND LESS CONSTANT TROUBLE BESETS SMALL CITY CONTRACTOR**A. Good Reason Why Association Effort Should Be Exerted**

All things considered the building construction operator in the small city has his troubles in proportion to the burden that is shouldered by the contractor in the larger localities. Said troubles may not flare up as frequently as those in the big cities nor linger around with the same tenacity, and yet when they do come they weigh heavily on the local building industry and remedies must be applied if the threat to business is to be removed. Since the building operations in the smaller cities are limited, naturally it is important that all obstacles to the carrying through of the year's program be removed.

Jurisdictional disputes, the bane of the big operator's life, are not so frequent in the smaller cities and as a result there is not the call for the close co-operation that creates more or less of a tie between the big city contractors. The tendency on the part of the small city and town contractors is to go it alone, muddle through, as it were, individually.

But, there are times when the problems and menaces that arise do assume

proportions that call for concerted action on the part of the small city contractors and then, not versed in the way of working as a whole they are lost. There is fight in the ranks but no esprit de corps and it is no wonder that in the end their spirit is broken and they drift back to the go-it-alone spirit and seek to get out the best way they can.

In the small city there is as much call for a militant association effort as there is elsewhere where there is more building. There is the wage scale matter that is just as important in settlement and in that sense requires that the contractors act in harmony and unison. In such local adjustments the contractors should stand together and not only that but should, in reaching a local agreement, be a unit in knowing outside conditions so as to protect the local labor supply against the lure of big city scales.

It has always been a hard proposition to foster and further local contractors associations in the small cities, and yet when real trouble arises the contractors rush about looking for the association they failed to support and expect to get association machinery into operation when there is little or no experience in operating such machinery.

Yes, there is need for associations in the smaller cities and until the contractors there realize it and bend their combined efforts in that direction they and their businesses will suffer, a prey to every inimical force that arises not the least of which is individual selfishness.

Muncie knows the experience of a house divided against itself and until the whole contracting fraternity gets together the experience will repeat itself time and time again. Nor is Muncie alone, there are many other cities in the same position.

MANY CONTRACTORS HAVE SAID "OH WHAT'S THE USE?"**Owners Yelp, Yet Fail to Do Their Share**

Muncie contractors and those of other cities of Indiana can back up E. A. Roberts, secretary of the Cleveland Builders' Exchange, who in referring to the annual dispute over wages and working rules recently, said:

"In these annual controversies over wages and working conditions the most discouraging feature to the contractor has been the attitude of the average owner and the speculative builder. Year after year, contractors have united in taking a firm stand at much sacrifice to themselves, in opposition to demands which they have deemed unjust and hurtful to the industry. Committees have been appointed to secure the co-operation of owners who have been asked to allow their jobs to remain idle until the question could be settled. Some owners thus appealed to have been good enough to comply with the request for a limited time, but usually a demand has been made that the contractor proceed at once with his work, either this or the contract will be cancelled and the owner will take over the work himself. This one weakness has done more to lose battles for the employers than all else combined."

STATE A. B. C. CONFERENCE PROVES ATTRACTIVE.

Builders From Fifteen Cities Respond
To Call.

Convincing in the extreme was the evidence presented at South Bend September 6 that there is an appeal, an interest not to be denied, in the quarterly conference for contractors idea that the Associated Building Contractors of Indiana has been promoting and following for the last year or so. No greater substantiating testimony is needed to justify the policy of the State A. B. C. along the above line than the response that was received last week when many contractors from fifteen different Indiana cities, and several from Chicago who are operating in Indiana, reported at South Bend to attend the third quarterly conference of the State Association.

Following the opening of the meeting by President Fred W. Jungclauss, Indianapolis, an address of welcome was extended to the Indiana builders by Mayor E. F. Seebirt, South Bend, to which Walter W. Fassnacht, president of the South Bend Builders' Exchange, replied:

Short talks were also made by Attorney H. A. Fenton of Indianapolis; A. E. Kemmer, Lafayette; Max Irmscher, Fort Wayne; F. A. Burget, Terre Haute, and L. B. Snowden, Gary. The speakers pleaded for greater organization, setting forth, one and all, that which had been accomplished in their localities through such effort, which would not have been accomplished by individuals alone. They declared that every other branch of the industry is highly organized, therefore, urged the builders to get behind their local and state organizations because unorganized forces can not hope to compete with organized ones. One of the most interesting features

of the afternoon had to do with a report on the State Building Code by Walter W. Wise, Indianapolis, member of the State Administrative Building Council, who made a very comprehensive report on the activities of the Council and the work it had undertaken to accomplish for the building industry in Indiana and the public. Particularly pleasing to the contractors assembled was this demonstration of co-operation between the architects, contractors, engineers and labor, all of whom are working together to perfect through the Building Council a standardization of building requirements and regulations throughout the state.

A considerable portion of the afternoon was given over to a general discussion of the building situation and conditions as prevailed in Indiana. Reports concerning the above were made as follows:

Colfax—A. A. Gill. Not much work, have all the men needed.

East Chicago and Indiana Harbor—John Rahn. Building operations a little slack at present, outlook fairly good; bricklayers \$1.50 per hour; laborers \$1.87½ per hour. General contractors help each other by loaning men. Labor and conditions very satisfactory.

Elkhart—J. J. Hostettler. Building quite active. Bricklayers \$1.35 per hour; carpenters \$.75 per hour; common labor \$.50 to \$.60 per hour. Housing shortage, 300 to 400 residences needed. Carpenters, open shop; bricklayers and plasterers, closed shop. No labor troubles.

Fort Wayne—Geo. Schack and Max Irmscher. Building operations good, everybody busy, hard to get men to association meetings on account of being too busy to attend. Bricklayers \$1.35 to \$1.50 per hour. Plasterers' scale, \$11.00 per day, paying \$1.50 per hour, shortage of plasterers. Common labor \$.50 to \$.60 per hour (not organized). Carpenters \$.90 to \$1.00 per hour. Open and closed shop men work together on same job. Mason contractors employing the limit in apprentices. Conditions very satisfactory.

Goshen—A. F. Toelle. Building quite active. Shortage of plupbers, scale \$.95 per hour; common labor \$.40 per hour. Conditions very good.

Gary—E. F. Cramer and L. B. Snowden. Building slacking up on account of the high cost, both commercial and residences, money not so easy to borrow. As to apprentices, plasterers 2, lathers 3, bricklayers none, electricians none.

Indianapolis—C. C. Pierson. Situation easing up in the shortage of men. Bricklayers and plasterers have no more

employees than usual but are getting better productivity. Building permits holding their own. Mason contractors giving real attention to apprentices and are employing the limit. The apprentice question should be made an organization matter rather than an individual matter.

Kokomo—E. L. Danner. Kokopo not overly active, mostly small work; large work pretty well along. Shortage of bricklayers and plasterers; outside contractors paying more than the scale in order to get men.

Lafayette—Jacob Evans. No trouble, everything going in good shape, except shortage of plasterers. Trouble between lathers and contractors all settled. Apprentices: Mason contractors, 2; plasterers 2; carpenters 2. Conditions very satisfactory.

Logansport—L. E. Wickersham. Building operations confined mostly to residences and repair work. Carpenters \$.75 per hour; common labor \$.40 per hour. No shortage of help.

South Bend—T. L. Hickey. Lots of building, most all of the big work closed shop; residential work mostly being done by real estate and building companies majority open shop. Housing situation easing up. Common labor attempted to organize, but so far has not made any progress. Bricklayers situation not so acute, paying \$1.50 per hour; plasterers \$1.50 per hour, mostly old men, practically no young men following this trade in South Bend. Carpenters plentiful, \$1.00 per hour; sheet metal \$1.00 per hour; painters \$.75 to \$.90 per hour. Common labor plentiful, \$.50 to \$.60 per hour. Bricklayers' apprentices, 15 working.

Terre Haute—F. A. Burget. Shortage of bricklayers, plasterers and plumbers. Common labor \$.40 to \$.50 per hour. Common labor attempted to organize to demand \$.60 per hour, however was not successful. Contractors all busy, conditions very satisfactory. Apprentices: Plumbing 6, bricklayers 4, plasterers 3, other crafts employing some, did not know how many. Total number of apprentices employed in Terre Haute 25 or more.

Just before adjournment Mr. Danner, Kokomo, moved that the conference extend a vote of appreciation and thanks to the South Bend Builders' Exchange for the co-operation extended to make the conference a success, to which there was a unanimous vote of approval.

An auto tour of the city then followed, terminating at the Oliver Hotel where a special dinner was served for both the state contractors and architects, who

Satisfactory Bending and Shipping by

Direct Mill Service

The economical way to buy reinforcing steel with reliable service

THE POLLAK STEEL COMPANY

GENERAL OFFICE, CINCINNATI

spent the remainder of the evening in joint session, some two hundred of the building fraternity being present.

Bert Slaughter of the Board of Public Works, South Bend, presided most capably, enlivening the evening with well chosen remarks interspersed with keen humor. The speakers for the evening were Architect I. K. Pond and General Contractor H. B. Barnard, both of Chicago, who made interesting and inspiring addresses. Both spoke of the need for the architectural and contracting professions to work in harmony to bring order out of chaos now existing in the building industry and declared in the present day the two interests should co-operate with each other more than ever for the advancement of the building construction industry.

WELL-KNOWN AND PROMINENT INDIANA ARCHITECT ANSWERS LAST SUMMONS

MacMillan H. Johnson, Terre Haute, Stricken

Once again the Indiana Society of Architects must bow its head at the passing of one of its most valued members, and in the passing the state architectural profession suffers a great loss. Almost unbelievable is the word that comes from Terre Haute this week end announcing the untimely death of Mac Millan H. Johnson, senior member of the architectural firm of Johnson-Miller and Miller of that city.

All the more keenly was the shock of this information felt because of the fact that but two short months ago Ewing H. Miller, junior member of the above firm was stricken down following an operation for appendicitis. To Warren D. Miller, ex-president of Indiana Society of Architects, the sole surviving

member of that sterling triumvirate of architects, the most sincere sympathy of the members of the Indiana architectural profession goes out.

Mr. Johnson, a young man, gifted in his chosen profession, though sorely afflicted some years ago by infantile paralysis was one of the most likeable and gracious men of the Indiana architectural professional ranks and his demise will be the source of deep regret among his myriad of friends in building and other circles.

The deceased died suddenly at his home in Brazil from a stroke of apoplexy Wednesday evening. Funeral services were held Friday, interment being made at Brazil.

In addition to many other fraternal and civic orders to which he belonged, Mr. Johnson was a member of the American Institute of Architects, the Indiana Society of Architects, and the advisory committee of the Administrative Building Council of Indiana.

News of the Week

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

HIGH SCHOOL BUILDING NOTICE TO CONTRACTORS

The undersigned Board of School Trustees of the School City of Alexandria, Indiana, hereby gives notice that on Wednesday, October 3, 1923, until 10:00 o'clock a. m. at the office of the Superintendent of City Schools in the High School Building, in the City of Alexandria, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building, and at the same time and place, will also receive sealed bids and proposals for the installation of the Heating and Ventilating, and the Plumbing, Sewerage and Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent

Evans Ring Joint

All trim on a great many schools and public buildings was assembled at the CARNAHAN factory with EVANS RING JOINT and given a coat of shellac enabling the contractor to make speed in finishing the job.

CARNAHAN MANUFACTURING CO.

General Sales Office and Factory,
LOOGOOTEE, IND.

MAKERS OF SPECIAL MILLWORK FOR EXACTING BUILDERS

of City Schools in the City of Alexandria, Ind. The estimated cost of the proposed building is Seventy-six Thousand Dollars (\$76,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed, and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by certified check for 5% of the amount of said bid; each bid for the heating and ventilating shall be accompanied by certified check for 10% of the amount of said bid; and each bid for the plumbing, sewerage and wiring shall be accompanied by a certified check for 10% of the amount of said bid. These checks must be made payable to the Board of School Trustees of the School City of Alexandria, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of School Trustees for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then, he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Alexandria, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, 345-347 Farmers Trust Building, Anderson, Ind.

Copies of said plans and specifications may be obtained from the office of the architect upon the deposit of Fifteen Dollars (\$15.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for the receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

SCHOOL BARN NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public generally that sealed proposals will be received by Charles Wright, Trustee of Chester Township in Wabash County, State of Indiana, at his office in the Post Office building on Walnut street in the Town of North Manchester, Indiana, until the hour of 2:30 o'clock p. m., on the 1st day of October, 1923, for the construction and completion of a frame barn to be built on the Chester Township High School lot in Chester Township, Wabash County, State of Indiana, all in accordance with plans and specifications on file in his office.

Each bid must be accompanied with a certified check of fifty (50) dollars, payable to the Trustee of said township. Such check to be returned to bidder unless he shall be awarded the work and fails to enter into a contract for the construction of said work within ten days after the receipt of notice thereof in which event the check will be forfeited to the township.

Each bid must be accompanied by a non-collusion affidavit, and any bid not so accompanied will be deemed informal and will not be considered. The successful bidder will be required to furnish compensation and public liability insurance.

The successful bidder shall enter into a bond with approved surety in the sum of seven hundred (\$700) dollars for the faithful performance of the contract and the payment of all obligations arising thereunder.

The said Township Trustee hereby reserves the right to reject any and all bids and re-advertise for bids.

CHAS. WRIGHT,

Trustee of Chester Township, Wabash County, Indiana. Post Office address, North Manchester, Indiana.

Sept. 8-15, 1923.

WATER WORKS IMPROVEMENT NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public that sealed proposals will be received by

the Town of North Manchester, Indiana, at the office of the town clerk thereof, until the hour of seven o'clock p. m., on the 1st day of October, 1923, for the furnishing of all labor, material, equipment and superintendence required in the drilling for a water well not less than twenty-four (24) inches nor more than forty inches in diameter on property owned by the town adjacent to water works, which well will be guaranteed by contractor to produce at the rate of five hundred (500) gallons of water per minute into the town water mains, and equipping said well with a vertical turbine pump which shall be capable of delivering water at the rate of five hundred (500) gallons per minute when discharging against a pressure of sixty (60) pounds. Contractor will also furnish and install motor of sufficient size to drive pump, concrete foundation for pump, and temporary wooden house over completed unit.

Bidder must give complete description of material and equipment to be installed in well.

Each bid must be accompanied by a certified check for three per cent (3%) of the amount of the bid, payable to the order of the Town Clerk of North Manchester, Indiana. Such check to be returned to bidder unless he shall be awarded work and fails to enter into a contract for the construction of said work within ten (10) days after the receipt of notice thereof, in which event check will be forfeited to the town.

Each bid must be accompanied by a non-collusion affidavit and any bid not so accompanied will be deemed informal and will not be considered.

The successful bidder will be required to furnish compensation and public liability insurance.

The Town reserves the right to reject any or all bids and to accept any proposal which may appear to be to the advantage of the Town.

(Signed) L. D. IKENBURY,

J. A. COOK,

A. B. RAGOR,

Board of Trustees of Town of North Manchester, Indiana.

Attest: IRA L. KING,

Town Clerk.

CELOTEX

INSULATING LUMBER

Celotex is a strong, light, weatherproofed, durable building lumber made from the long, tough fibres of cane. No other construction lumber in the world is like it.

As sheathing, nailed direct to studs, Celotex replaces wood lumber, makes a stronger wall and gives the insulating value of cork. Celotex, under any roofing, cuts the loss of heat and prevents condensation of moisture.

As a sound deadener, Celotex is ideal. It holds plaster and stucco perfectly. Replaces sound deadener and lath at a noticeable saving.

The house sheathed with Celotex saves 25% to 35% of the usual fuel bills.

If you want a quiet, comfortable home, cool in summer, cheaper to heat in winter, stronger, lower in first cost and in upkeep, you will build with Celotex. Celotex gives insulation without extra cost.

Stock sizes of Celotex are: Thickness, 7/16 in.; width, 4 ft.; lengths, 8 ft., 8½ ft., 9 ft., 9½ ft., 10 ft. and 12 ft. Weight, about 60 lbs. per 100 sq. ft.

Consult your architect. See your dealer.

SOUTH BEND EXTENDS HEARTY WELCOME TO STATE ARCHITECTS

Regional Meeting Best Ever Held

To all intents and purposes the selection of South Bend as the site for the I. S. A. regional meeting, September 6th, was a fortunate and wise one. As a result of that choice one of the best regional meetings ever held followed, and in addition presented an opportunity whereby the members of the architectural profession and those of the building contracting business from all over the state were in a position to combine their forces and gather in a joint meeting, an event the nature of which never before had been attempted in Indiana.

The morning of the 6th had not progressed far when the architects began arriving at the La Salle Hotel, South Bend's new hostelry where they were greeted and welcomed by a committee of local architects headed by E. R. Austin, who had made arrangements for the day's plans.

Along about noon the visiting architects were conveyed by autos to the Studebaker Company's mammoth plant where on the seventh floor of the administration building, a sumptuous mid-day luncheon was served in the company's attractive dining room. It was there a most pleasant hour and a half was spent around the festive board, old acquaintances being renewed and new ones formed, sociability ruling lavishly.

Later the assembled architects adjourned to a large reception or committee room where the business meeting of the day was called to order by President Griffin of the Society, twenty-one architects from various sections of the state answering present in addition to quite a few guests connected with the profession who had been invited in.

The first matter taken up referred to the passing on of two of the members of the Society, Ewing Miller, Terre Haute, 2nd vice-president, and Charles Lembke of Valparaiso. The loss to the I. S. of A. through the demise of these men was deeply regretted and resolutions expressing that thought were passed, ordered entered upon the minutes and the secretary was instructed to have copies of the resolutions sent to the bereaved families.

The death of Mr. Miller caused a vacancy in the executive force of the Society and attention of the members was directed toward the selection of a successor to fill out the unexpired term.

The names of three members as candidates to fill the vacancy were placed before the meeting, resulting in the election of Rodney W. Leonard, Frankfort.

Secretary Harrison then made a report on the members who were delinquent in the payment of their dues, men who had not even deigned a response to numerous letters that had been sent to them. There was considerable discussion as to what action should be taken in this matter and Chairman G. W. Allen of the Membership Committee was called upon for an expression of thought. He stated that while he and his committee were anxious to build up the membership of the I. S. of A. at the same time he thought that to make the organization a militant, virile one the dead timber should be cut out and he for one favored the dropping of the delinquents. That seemed to cinch matters and a resolution to that effect was passed unanimously, a provision being made that the secretary once more communicate with the delinquents regarding the attitude of the Society and after two week's grace strike from the membership the names of all men who were still delinquent without a valid excuse.

While dealing with the question of membership, Mr. Allen was again called upon and explained his plan for a drive to increase the roll of the Society. He made an earnest plea that every member aid him and his committee in this endeavor. In conclusion he submitted the names of three architects who had applied for membership.

Next followed a discussion of the attitude of the State Board of Accounts toward public building construction and the part the architect, his plans and specifications played in the matter. A letter from State Examiner Lawrence F. Orr was read in which he announced that the board desired to co-operate with the architects and would welcome reciprocity from the architectural profession in working out conditions that would assure good buildings to the public. It was moved, seconded and carried that the Society go into the subject with the Board in an attempt to institute a plan whereby quality rather than price would be the guiding motive and thus make Indiana more than a dumping ground for cheap inferior building materials which in some cases are now run in as substitutes for proven standard materials.

In the absence of Architect Fermor S. Cannon, Indianapolis, chairman of the Advisory Committee of the new Administrative Building Council of Indiana, Secretary Merritt Harrison read a lengthy detailed report submitted by

Mr. Cannon that proved enlightening and interesting, setting forth completely every action and move that had been made by the Council since its establishment in an effort to give to the state in time a codified standardization of building regulations and requirements that will apply equally all over Indiana. The report was received with favor and the progress made to date was a source of gratification to the members of the Society which has been seeking for several years to secure for the State a universal building code or its equivalent, standardized building construction regulations and requirements.

That completed the business meeting following which the architects were taken through the Studebaker plant from one end to the other and shown how the automobile in all stages of construction is manufactured. This was one of the most interesting features of the day.

Next the architects were again loaded into waiting autos and taken on a sight seeing trip around the city, stops being made here and there for visiting and inspecting some of South Bend's most recently completed structures. These latter consisted chiefly of schools and a new \$300,000 hospital. The trip extended out through the parks and residence sections where it was evident that great improvement strides had been put forth. One of the projects that aroused much interest was the development of the housing scheme of the Studebaker Corporation, where hundreds of attractive homes had been built to care for employees. The treatment was artistic and appealing.

A return trip was then made to the Oliver Hotel where the architects joined with the Associated Building Contractors of Indiana at dinner, after which a most interesting joint meeting was held.

The architects present were: Everett I. Brown, Bluffton; H. M. Griffin, Connersville; Guy Mahurin, Ft. Wayne; Herbert Erickson, Walter Hudson, Gary; Addison C. Berry, G. H. Buckley, Hammond; Layton Allen, Herbert Foltz, Merritt Harrison, L. A. Turnock, Indianapolis; John Bruck, Kentland; G. W. Allen, Wm. Allen, Laporte; Hubert Garriott, Logansport; E. R. Austin, W. E. Elwood, Geo. Freyermuth, W. W. Schneider, Roy Shambleau, Ernest Young, South Bend. Special guest, Architect I. K. Pond, Chicago, ex-president Illinois Society of Architects.

CONSTRUCTION ACTIVITY HOLD- ING UP WELL

Contracting Fraternity in Evansville Kept Stepping

Locally the fall building season has opened actively with much construction work under way, contracts being awarded right along, estimates being asked of the contractors, and a fair volume of prospective work indicated from the architects' offices, where plans are now in course of preparation.

As has been the order for the past month or so, no large projects are featuring the building progress of the city; instead, construction efforts are pointed toward home building and smaller business structures with a great deal of addition and remodeling work thrown in for good measure.

Conditions that rule in the Evansville building field are very favorable, as there is no wage dissension, the available labor supply is adequate to meet the need of the contractors and material deliveries are causing no delays. All in all, the building business locally has entered upon the last lap of the year in good shape and promises to continue so right up into the dead of winter.

CHIPS AND SHAVINGS

General contractors J. Bippus & Son have their organization going full time. This firm expects to have the new Shrine Club completed by October 15, has started a new six-room home for Alex Bippus and has a number of remodeling projects under way.

Scarborough-Davies Co., general contractors, have begun work for the erection of six residences on Bellemead avenue, near Kentucky avenue.

REVIVAL OF BUILDING ACTIVITY SHOWN BY AUGUST PERMITS

Whole Country Involved

Building activities throughout the United States continue to show increased tendencies, according to official reports of August building permits made to S. W. Strauss & Co., New York City. In

183 leading cities and towns there was a gain of 10.4 per cent over August, 1922, and a gain of 4.2 per cent over July this year, although during the last decade August building permits in the principal cities revealed a loss from July every year excepting three.

Approximate stabilization in the building material market prevailed during the month, the Strauss survey states.

In eastern states there was a gain of 7.25 per cent over last August and a loss of 1.87 per cent from July. In the central states there was substantially no change in the amount of permits issued during August this year as compared with the same month a year ago, out there was a loss of 2.5 per cent from July. The south revealed a gain of 17.6 per cent over August, 1922, and a gain of 32 per cent over July. The far west gained 41 per cent over last August and 27.7 per cent over July.

The rank of the ten leading cities in permits issued in August were: New York, \$51,715,000; Los Angeles, \$22,249,262; Chicago, \$20,134,150; Philadelphia, \$8,246,280; Baltimore, \$4,945,320; Cleveland, \$4,746,725; Washington, D. C., \$4,286,358; San Francisco, \$3,915,300; Newark, \$3,686,900, and Milwaukee, \$3,009,975.

HEARD FROM AT STATE CONTRAC- TORS' CONFERENCE

Attention Drawn to Local Building Ef- fort Put Forth This Year

Ft. Wayne contractors were represented at the State A. B. C.'s conference at South Bend, September 6th by Max Irmischer, president, and G. W. Schack, secretary of the local Builders' Exchange. Max is one of the charter members of the state contractor's organization, which was formed in Ft. Wayne some six years ago and has taken an active interest in its affairs ever since the beginning.

Nor was Ft. Wayne's great building year allowed to get by unnoticed when reports from the various cities were called for at the conference. It was shown that the city has just experi-

enced a year of unprecedented building activity, that all contractors have been busy and that conditions have been satisfactory though labor shortages did develop now and then under the unusual demand.

A feature of the report that made a most favorable impression had to do with the fact that the Ft. Wayne mason contractors were doing all in their power to encourage apprentices and were employing the latter to the limit.

FORT WAYNE EXCHANGE GOES BACK TO PERMANENT SECRETARY

Affairs Prove Too Important to Be Treated as a Side Issue

Another change in the administrative force of the local Builders' Exchange has been made by the appointment and induction into office of G. W. Schack as secretary, who will devote all his time to the affairs of the organization.

Following the resignation some months ago of E. P. Dailey, who acted as secretary for several years, the members of the Exchange voted to retrench and do away with a paid secretary. Since that time several members, who volunteered, have sought at different times to fill the office, but in each case individual business interests proved too absorbing to allow for proper attention to the secretaryship the duties of which were numerous and compelling, requiring more time than was figured on.

Finding that the interests of the Exchange were suffering from the experiment of non-paying secretaryship, the members have rescinded their former action and have named a permanent secretary, Mr. Schack, to handle the business of the Exchange.

Fort Wayne contractors are now convinced that to keep an organization alive there must be a live man on the job all the time, that the Exchange can't function properly unless such a condition exists.

FINE BUILDING CONTEMPLATED

To House Physicians and Dentists Ex- clusively

Prospects for another fine building for Ft. Wayne developed the past week when a move was started to finance the project of the Wayne Pharmacal Co.

It is proposed to erect a seven story structure which, when completed, will be one of the most modern and thoroughly equipped physicians' and dentists' building in the country. Clearing of the site at Berry and Ewing streets is to be started at once and it is hoped to have the structure ready for occupancy August 1, 1924.

Residence: \$5200. 2412 East 16th. Owner, G. B. Watkins, contract let to Krebay Constr. Co., City Trust Bldg.

INDIANA BUILDING CONSTRUCTION SLUMPS IN AUGUST, GAINS IN SOME PLACES FAILING TO OFFSET LOSSES.

Total Estimated Valuation Slightly Short of Five Million Dollars.

Quite a falling off of building construction was the order in Indiana in August, if the permits issued reports of the building inspectors of the ten leading cities are to be taken as a criterion. The slump in building, as shown by the official figures, was the most decided one that has occurred this year. Not only did the August total estimated valuation record a 11.8% decline from the figures registered for July but went even farther, recording a loss of 17.1% when compared with the August, 1922, total.

The past month was the third successive one to fall behind the corresponding month in 1922, a decline in building construction having been apparent in Indiana ever since June 1st, as a whole, though individual cities here and there have shown gains locally from month to month.

While Elkhart showed the greatest loss as against the August, 1922, figures the most noticeable reversal of form was that of Ft. Wayne, which city right along has been recording great gains monthly with million dollar totals. Came August and when it had run its course Ft. Wayne was 57% behind the volume of building posted the corresponding month last year, and 38% in arrears of the July, 1923, business. Other cities to record losses were Gary 35%, Richmond 28%, Indianapolis 15%, Terre Haute 1.4%.

There is, however, a little cheer to be gained from the August report in that three cities recorded gains, Hammond 104%, Evansville 60% and South Bend 12%. Then, too, the combined total of permits issued by the ten cities, exceeds the like total for August, 1922, to the extent of 355 permits.

Following are the official figures for August, 1923, and the corresponding period a year ago:

Cities	Per.	Est. Val.	Per.	Est. Val.
Elkhart	17	\$ 53,050	19	\$ 134,100
Evansville	211	271,865	141	169,540
Ft. Wayne	256	698,203	221	1,634,574
Gary	109	265,727	90	409,910
Hammond	112	265,385	63	130,000
Indianapolis	1415	1,756,530	1291	2,074,941
Muncie	89	82,775	No	Record
Richmond	48	31,175	48	43,770
South Bend	506	1,355,149	594	1,209,406
Terre Haute	252	184,785	193	187,450
Total	3015	\$4,964,644	2660	\$5,993,691

SOMEWHAT OF A DISAPPOINTMENT**More Expected of the Coal Commission**

There were many who somehow conceived the idea that when the Coal Commission was organized it would pave the way to an elimination of many of the annoying vexations that had arisen annually relative to the coal situation. Among the suppositions were these: The doing away with the yearly strikes and shut down of the mines; an avoidance of the annual rise in coal prices when settlements between operators and miners were effected; also that the commission would make a thorough investigation of the entire coal situation and be able to inform the long suffering public who was to blame for the prevailing condition, the operator, wholesaler or retailer, or whether or not there was any collusion between the operators or miners.

The advance information relative to the settlement of the anthracite strike carrying a promise of possibly an added dollar to the price of a ton of coal does not appeal greatly to the consumer who had hoped there would be no advance to the already exorbitant price.

It is true that the Coal Commission has reported in some detail, but, that detail is so vague that the ordinary layman, who must buy and burn coal, knows just about as much now as he did before the report was submitted. What the Public really desires from the Commission is a definite statement of causes of and a placing of the responsibility for the high prices of coal. The men making up the personnel of the Commission are thoroughly competent to digest the facts and present a statement of conditions as they actually exist. It is up to them to do this so the people will know where the blame, if there is any, should be placed.

GOING TO CELEBRATE**Industrial Possibilities of the City to be Displayed.**

Hammond is billed for a great Industrial Exposition, October 8 to 13. There is to be a structure 1,000 feet square in which to house the various booths, each to be 9x12 ft. for exhibit purposes. Already 115 of these booths have been sold. In addition there is to be a great open air theater that will accommodate 10,000 people. Stages are to be placed at each corner of the theatre for vaudeville attractions. The stages will be 54 feet across. In the center of the exposition grounds, in Harrison Park, will be located an automobile booth 48x150 feet. The exposition building will have a thou-

sand feet of frontage on both Waltham and Lyman streets. General contractor Rufus Danner has been awarded the contract for the erection of the building.

It is planned to spend from sixty to seventy thousand dollars on the exposition and an attendance of 125,000 people is expected.

104% GAIN MADE OVER AUGUST 1922 BUILDING**Both Permits And Valuations Increased**

According to the official report of City Building Inspector Henry Vis, Hammond in building operations in August ran well ahead of the work done in August a year ago.

A tabulation of the building record for the two months shows:

	Per	Est. Val.
August, 1923	112	\$265,385
August, 1922	63	130,000
This year's gain	49	\$135,385

ANOTHER NORTHERN INDIANA CITY SHOWS BUILDING GAIN

Gary also had a fairly good month of building in August. Inspector Erickson reports 109 permits issued for a total estimated valuation of \$265,727. The latest returns bring the year's total up to 773 permits issued for an estimated valuation of \$3,042,441, or \$1,100,000 more than was registered for the same period in 1923.

PREVENTED**Business Caused Calling off of South Bend Visit.**

Several of our contractors and the secretary had intended to visit the State A. B. C. Conference at South Bend, September 6th, but at the last minute some matters pertaining to the big industrial exposition arose that kept us at home.

WILL NOT RECOGNIZE THE NEED**Why Small City Contractors' Organization Work Gets No Farther.**

It is harder to hold an organization of contractors together in Muncie than it is in cities many times her size. In the first place, naturally, there are not the contractors, and then, too, there are not the building annoyances to arise that constantly beset the builders in the larger municipalities. As a result, the small city contractors are farther apart and it is difficult to convince them that they have a mutual interest. A few may build large structures, others, in the majority, confine most of their efforts to house building and work of a smaller nature. On the other hand, not a few of the builders in the small cities operate out in the rural districts and feel that

affairs as they rule in the city are not of their concern.

Some of these men realize what organization would mean to the industry in their section and strive to that end; they interest others who are receptive to the idea, but, fail to appreciate the fact that it requires finances in the form of dues to carry on the work. These latter imagine that the dues should pay tangible dividends and fail to recognize the common good that results. Because the result is not doled out in dollars and cents they lose interest, fail to pay up and gradually fall by the wayside.

Then, too, there is the contractor who utterly refuses to have anything to do with the organization, but is ready at all times to take advantage of any propitious conditions the organization may bring about. However, this very man feels free, in going it alone, to do as he pleases and when a pinch comes will boost wage scales that the organization fought to establish just so he can secure workmen.

Thus it is that things are kept in an upset condition and a more or less antagonistic, selfish attitude exists amongst the contractors. The men who impede forget that it is their actions that do so and, when chaos reigns, point back and say, "well, what has the organization accomplished?" They even go so far as to expect the organization on a moment's notice to right all wrongs.

As opposed to such methods is the never sleeping Labor organization to which the contractors' men belong. These workmen pay their dues for they know that indirectly the benefit return will be theirs, that it is only possible through organization.

All of which goes to prove the truth of that old saying, "There are none so blind as those who will not see." It is that which makes the holding of an organization together in the smaller city such a task.

BRICKLAYERS HOLD STATE CONVENTION AT MUNCIE**All Sections Represented.**

Delegates to the number of over one hundred gathered in Muncie the past week to attend the two days' session of the Bricklayers International Union state convention.

The affair was held at the Roberts Hotel, business sessions being held throughout both days. Among the speakers were Mayor John C. Quick, Judge C. W. Dearth, Delaware County Circuit Court; Thomas Priest, First International Vice President, and John Gleason, Treasurer.

PRESIDENT COOLIDGE SAID

"There is no right to strike against the public safety by anybody, anywhere, anytime." These words have the undoubted ring of true Americanism. They will go down in history and be quoted long after the lips that uttered them are still and beyond affirmation or denial.

It is almost a pity that the words "against the public safety" were not left out of the above utterance, for there is no denying that a strike of any sort is against the safety of some considerable part of the public and to the actual lasting advantage of no one unless he belong to the class sometimes known as professional agitators.—(Bulletin, Buffalo Builders Exchange.)

PRaises Building Callings But Deplores Conditions.

Prominent Chicago Contractor Makes
Strong Plea For Co-operation Be-
tween Architects and Con-
tractors.

Regardless of the fact that some men are architects and others are contractors, H. B. Barnard, Chicago, prominent general contractor, in speaking recently to the architects and contractors of Indiana assembled in joint meeting at South Bend, asserted all were builders, had a mutual interest and, that being the case, should work together and co-operate to advance the building business, the industry, to a high plane. Such a result, he said, was possible only through association effort and co-operation between the individual associations. He said it was pleasing to note the evident harmony and co-operation that existed between the Indiana architects and contractors as expressed by the South Bend assemblage and hoped such effort would be continued.

Referring particularly to the contractor he stressed upon his out-of-door avocation, his diversified calling and his ability to keep out of a rut in that he was not compelled to do the same thing over and over again. Building is a calling of which to be proud, despite the fact that all sorts of appellations are directed at the contractor and building men, said Mr. Barnard, and they all should work together to discredit such aspersions and put the business in a respectful light.

Building conditions have changed of late years, the speaker asserted, things seem out of joint, out of plumb, they will be straightened out, leveled, in time, but it can't be done in a day, a week or a year. There is not the efficiency

among mechanics today that formerly existed, few of them take pride in their work. He then gave examples of carelessness among workmen to show some of the trials that confront contractors and he pleaded with the architects to aid the contractors in an endeavor to encourage apprentices, to train young men in the proficiency of the building trades.

It is a hard pull to build today, said Mr. Barnard. Prices are high and the public is dissatisfied but, since 90 per cent of a building operation, taking into consideration the production, transportation and erection of material, is represented by Labor, no reduction in construction costs can be expected till Labor prices are leveled in proportion to other quotations. He compared the cost of producing a hog for market, of grain, with building trades wage scales to show that things were clear out of level.

As for inducing young men to enter the building sphere, the speaker said architects and builders must not overlook the fact that boys today are inclined to balk at a dirty job, they want a means of employment where they can be dressed up. The architects and contractors must work together to overcome this antipathy to honest work on the part of the rising generation.

The great trouble is that this country is living today on a vast stored-up wealth as a result of the Great War, but the time is coming when Europe's bankrupt nations will be forced to resort to production since they can't buy, and then they will enter into competition with this country—the gold stream that has been flowing in will be shut off and the leveling to normalcy will begin.

As against that time the architects and contractors were counseled to teach their sons a trade, no matter how much education they may have, that they may be fully prepared to cope with a condition where men will have to work and give an honest day's service for money received.

In conclusion those present were urged to carry the word back home that all builders, architects and contractors, must co-operate and strive in harmony to bring order out of chaos as it exists in the building field.

SOUTH BEND MAKING GREAT BUILDING RECORD IN 1923.

One Day's Issuance of Permits Almost
Million and a Half Dollars.

All previous yearly building records at South Bend have been shattered and 1923 has several more months to go before the year has run its course. Not

only that, but all daily records of the city building inspection department for total estimated valuations covering permits issued have gone into the discard, and further, it is probable that when September, 1923, is ended all monthly high totals will have been topped.

The big building day of the year in St. Joseph County's metropolis came September 6th when the estimated valuation for permits granted reached a total of \$1,450,000, almost \$150,000 more than the entire amount recorded in August. This total also exceeded the monthly figures posted in January, February, April, May and July. It also equals fifty per cent or more of the entire yearly total to date of many other Indiana cities.

When the September 6th building figures were put on the books they sent South Bend's figures for the year up to that time soaring, making a total of \$10,550,935 for the expired term of 1923, which compared with the entire returns for 1922, \$10,098,035, the best yearly building record ever made in South Bend, gives 1923 to date a margin of \$468,900 to the good.

The building strides made by South Bend this year have never been equaled by any other Indiana city except Indianapolis and the record she has made is one of which her citizens may well be proud.

BUILDING TRADES BEING TAUGHT IN BUFFALO

Another Effort Started to Train Building
Trades Mechanics

Bricklaying, plastering and plumbing will be taught at the new McKinley Vocational School in Buffalo according to the "Express," published in that city. The courses will extend over two years, and are so arranged that a boy devotes one-half of his time to shop work and the other half to related subjects such as trade mathematics, drafting, industrial history, etc.

The time is not far distant when the teaching of building trades will be as much a part of the public school system as is English, history, mathematics or any other subject today. Local associations looking for ways in which to make future conditions better in the construction industry can render no better service than to insist that trade education be placed on a par with academic education. INDIANAPOLIS.

World War Memorial Building: \$10,000,000 (monumental building and two office buildings), office buildings, 4 sty. and bas., 142x55 each. Archt., Walker and Weeks, 1900 Euclid Bldg., Cleveland, Ohio. Owner, Indiana World Memorial Commission, Paul R. Comstock, Secy., Indianapolis. Plans in progress. The office buildings will be ready for bids this fall. Stone.

College Buildings: "Fairview Park." Archt. not selected. Landscape Archt., Lawrence V. Sheridan, Hume-Mansur Bldg. Owner, Butler College; Hilton U. Brown, President Board of Trustees; Arthur V. Brown, Chairman; Dr. Henry Jameson, Vice-President, and Dr. Ale, President of Butler College, Indianapolis. Preliminary surveys being made. The first unit to be built will be the stadium (seating 65,000). This will probably mature in the spring.

Power Plant Development: \$25,000,000, on Cumberland River, Burnside, Ky., Pulaski County. Owner, the Cumberland Hydro Electric Co., c/o Henry A. Mansfield, President Mansfield Engineering Co., 1011 Fletcher Trust Bldg., Indianapolis, and John M. Aufderheide, third floor, Guaranty Bldg., Indianapolis. Owners financing. Probably mature late winter.

***Consolidated Grade School:** \$100,000, 2 sty. and bas., 8 rooms, Dist. No. 7 and 8, Center Township, Marion County, located at 36th and Gale Sts., Indianapolis. Archt., Donald Graham, 1128 Hume Mansur Bldg., Indianapolis. Owner, William H. Evans, trustee, 215 East New York St. Room No. 217, Indpls. Owner receiving bids to close October 10th at 10:00 A. M. Brick, reinforced concrete, fireproof construction, stone trim, comp. roof, slate blackboards, terrazzo floors, linoleum, direct-indirect steam heating and ventilating system, metal sash, hollow tile, septic tank, private water system, reinf. concrete floors and stairs. Will contain Manual training and domestic science departments.

Power House: 1 sty., 38x30, Ogden St. Archt., D. A. Bohlen and Son, Majestic Bldg. Owner, The Taggart Baking Co., Alexander Taggart, Pres., 18 N. New Jersey St. Archt. taking bids to close at once. Brick reinforced concrete, ash hopper, brick stack, Bedford stone trim, steel stairs, metal sash, 5

ply composition roof on concrete, iron work.

Country Club: \$100,000. North Meridian Street. Archt., Osler and Burns, 210 Penway Building. Owner, The Meridian Hills Country Club Realty Co., Alexander M. Taggart, Prest., Taggart Baking Co., Frederick M. Ayres, Prest., L. S. Ayres and Co., Anton Vonnegut, Prest., Vonnegut Machinery Co., Oscar Schmidt, Prest. Lorenz Schmidt & Sons, Dr. Louis Burckhardt, Robert H. Hassler, Prest. Hassler Shock Absorber Co., William M. Rockwood, Secy. Rockwood Mfg. Co., John G. Rauch, (Attorney) Russell T. Byers, care of American Central Life Insurance Co., all of Indianapolis. Architect just selected. Details undecided. Will prepare plans this winter, to be ready for bids about March 1st.

Service Building: 1 and 2 sty. "James Whitcomb Riley Hospital," Indianapolis. Archt., Robert Frost Daggett, 960 Consolidated Bldg., Indianapolis. Owner, John W. Cravens, Secy. Board of Trustees, Indiana University, Bloomington, Indiana. Sealed bids will be received at 12 noon, October 9, at the office of the architect. Brick.

***High School:** 2 sty. 124x75. Mooresville, Indiana. Archt., W. H. Gars, 818 Fletcher Trust Bldg., Indianapolis. Owner, Board of School Trustees, Mooresville. and Walter T. Keller, Trustee of Brown School Township, Mooresville. On working drawings. Brick, new heating unit for three schools, brick stack, composition roof.

***School Building** (consolidated high and grade), \$150,000 (12 class rooms, assembly room, combination gymnasium and auditorium, stage, two domestic science and two manual training rooms, cafeteria, kitchen), Warren Township, Marion County, Indianapolis. Archt. and engineers, Harrison and Turnock, 500 Board of Trade Bldg., Indianapolis. Owner, Edward J. Hecker, trustee, 5241 E. Washington St., Indianapolis. On working drawings. Will advertise for bids in 60 days. Brick, hollow tile, comp. roof, steel sash, reinf. concrete coal bunkers and boiler room, slate blackboards, rolling partitions, built-in-ward-robbs, mastic floors, steam heating, private water system, septic tank.

Boys' School: (Superintendent's Residence, Reinforced Concrete Coal Bunkers and Rem. Administration Building: Archts. and engineers, Harrison and Turnock, 500 Board of Trade Bldg., Indianapolis. Owner, Board of Trustees, Boys' School, Jesse A. Green, Ft. Wayne, Ind.; F. L. Thomas, Indianapolis; Perry Davis, LaFayette, Edwin M. Carter, Rockville, Ind.; Chas. A. McGonagle, Plainfield, Ind. In addition to building, construction will include extension of

heating plant and tunnel work. On working drawings. Owner ready for bids on material shortly.

City Hall (rem. heating system), Linton, Ind. Archt. and engineer, Harrison and Turnock, 500 Board of Trade Bldg., Indianapolis. Owner, City of Linton, Cletus Gill, clerk, Linton, Ind. Work consists of the installation of a cast iron sectional boiler, vacuum pump, addition steam lines to jail building, brick stack, carpenter work in coal storage room. General contract let to Geo. F. Chapman, Linton, Ind. "Ideal" boiler has been purchased.

Apartment Building (80 Apts.), \$400,000. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, company organizing, c/o Archt. Plans in progress. Definite data later.

Apartment Building (36 Apts.) and **Garage** (46 cars): \$180,000. Archt. and owner, Frank B. Hunter, 912 State Life Bldg. Preliminary plans in progress. Brick.

***Automobile Sales Building:** \$175,000. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, name withheld for present. Sketches completed. Definite data shortly. Brick.

Apartment Buildings (2): 1 \$110,00; 1 \$90,000. Archt., George and Mac Lucas, Consolidated Bldg. Owner, company organizing, c/o Lawrence W. George, 1153 Consolidated Bldg. Plans in progress. Brick.

***Church:** \$42,000, Franklin, Ind. Archt., A. A. Honeywell 413 Penway Bldg., Indianapolis. Owner, Baptist Church, A. L. Powell, chairman building committee, Franklin, Ind. Low bidder, Roy Bryant, Franklin. Remodeling church basement and Sunday school annex. Brick, stone trim, steam heat, flat roof, pipe organ, 2 sty. and bas., 58x70.

***Church:** \$60,000. 2 sty. and bas., Fountain St. Archt., W. H. Gars, 818 Fletcher Trust Bldg. Owner, Fountain Street M. E. Church, 2007 Fountain St., Rev. Philip S. May, pastor, 2025 Fountain St. Plans in progress. Brick, stone trim.

Double Residence: 2 sty. and bas. 44x70. No. Pennsylvania St. Between 39th and 40th. Archt., T. A. Winterrowd, 332 American Central Life Bldg. Owner, Emil Mantell (Clothing) 131 West Washington St. Bids in; under advisement. Brick veneer, asbestos roof, furnaces, garage.

Residence (6-room Dutch Colonial), Speedway City, Indianapolis. Archt., Roger Williams, 4025 Kenwood Ave., Indianapolis. Owner, A. L. Hopkins, 44 W. 14th St., Speedway City, Indianapolis. Owner receiving bids. Frame asphalt shingle roof, furnace heat, hardwood floors.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

HIGH SCHOOL BUILDING NOTICE TO CONTRACTORS

The undersigned Board of School Trustees of the School City of Alexandria, Indiana, hereby gives notice that on Wednesday, October 3, 1923, until 10:00 o'clock a. m. at the office of the Superintendent of City Schools in the High School Building, in the City of Alexandria, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building, and at the same time and place, will also receive sealed bids and proposals for the installation of the Heating and Ventilating, and the Plumbing, Sewerage and Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Alexandria, Ind. The estimated cost of the proposed building is Seventy-six Thousand Dollars (\$76,000.00).

All bids must be in writing, on forms provided, therefor, delivered, signed, and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by certified check for 5% of the amount of said bid; each bid for the heating and ventilating shall be accompanied by certified check for 10% of the amount of said bid; and each bid for the plumbing, sewerage and wiring shall be accompanied by a certified check for 10% of the amount of said bid. These checks must be made payable to the Board of School Trustees of the School City of Alexandria, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of School Trustees for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Alexandria, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, 345-347 Farmers Trust Building, Anderson, Ind. Copies of said plans and specifications may be obtained from the office of the architect upon the deposit of Fifteen Dollars (\$15.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for the receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

DR. W. R. THOMAS, Pres.,

J. S. WALES, Secy.,

J. W. SULLIVAN, Treas.

Board of School Trustees of the School City of Alexandria, Ind.

Sept. 8-15-22, 1923.

WATER WORKS IMPROVEMENT NOTICE TO BIDDERS

Notice is hereby given to bidders and to the public that sealed proposals will be received by the Town of North Manchester, Indiana, at the office of the town clerk thereof, until the hour of seven o'clock p. m., on the 1st day of October, 1923, for the furnishing of all labor, material, equipment and superintendence required in the drilling for a water well not less than twenty-four (24) inches nor more than forty inches in diameter on property owned by the town adjacent to water works, which well will be guaranteed by contractor to produce at the rate of five hundred (500) gallons of water per minute into the town water mains, and equipment said well with a vertical turbine pump which shall be capable of delivering water at the rate of five hundred (500) gallons per minute when discharging against a pressure of sixty (60) pounds. Contractor will also furnish and install motor of sufficient size to drive pump, concrete foundation for pump, and temporary wooden house over completed unit.

Bidder must give complete description of material and equipment to be installed in well. Each bid must be accompanied by a certified check for three per cent (3%) of the amount of the bid, payable to the order of the Town Clerk of North Manchester, Indiana. Such check to be returned to bidder unless he shall be awarded work and fails to enter into a contract for the construction of said work within ten (10) days after the receipt of notice thereof, in which event check will be forfeited to the town.

Each bid must be accompanied by a non-collusion affidavit and any bid not so accompanied will be deemed informal and will not be considered.

The successful bidder will be required to furnish compensation and public liability insurance.

The Town reserves the right to reject any or all bids and to accept any proposal which may appear to be to the advantage of the Town.

(Signed) L. D. IKENBURY,
J. A. COOK,
A. B. RAGOR.

Board of Trustees of
Town of North Manchester, Indiana.

Attest: IRA L. KING,
Town Clerk.
Sept. 22-29, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, William H. Evans, as trustee of Center school township, of Marion county, Indiana, and the advisory board of Center township, of said county and state, will, until the hour of 10 o'clock a. m. on Wednesday, the 10th day of October, 1923, at the office of said trustee, 215 East New York street, Room No. 216 in the city of Indianapolis, Ind., receive sealed bids for the erection, construction and completion of a two (2) story, and basement, brick, fireproof school building, for the use of said school township; also for construction and installation of a heating and ventilating system therefor; also for the construction and installation of the plumbing and water supply system therefor; also for the construction and installation therein of an electrical system with all proper fixtures; all in accordance with the drawings, plans and specifications for such proposed work adopted and approved, and as prepared by Donald Graham, architect, 1126 Hume-Mansur building, in said city, and now on file in the office of said trustee, and of said architect, and in the office of the state board of accounts in the Statehouse, Indianapolis, Ind. All bids therefor will be opened and publicly read at 10 o'clock a. m. on said 10th day of October, 1923, at the office of said trustee in the presence of said trustee and advisory board. Said building, and said systems connected therewith, are to be constructed on the school property of said township, located at Gale and Thirty-sixth streets, in said Center township.

Bidders desiring duplicate copies of the drawings and specifications for their own personal use, may obtain the same by depositing \$10 for the general construction documents, which money so deposited will be refunded if such drawings and specifications are returned in good condition on or before the time above fixed for receiving bids.

All bids must be on Form No. 96 prescribed by the state board of accounts, and each bid must be accompanied by a certified check for not less than 3 per cent in amount of the gross bid submitted, payable to the trustee of Center school township, Marion county, Indiana, and the said check of any accepted bidder shall be cashed by the payee, and the amount thereof retained by him as agreed liquidated damages, in the event that such accepted bidder fails to enter into a proper contract for the work for which his bid shall be accepted, and to give the proper approved bond required, within ten days from and after the date of the acceptance of such bid. All checks of unsuccessful bidders will be returned to the respective bidders.

Within ten days from the date of the acceptance of any bid, the accepted bidder will be required to enter into a proper written contract to construct and complete the work covered by such bid, including the furnishing of all material and labor in conformity with the plans and specifications therefor, and also to furnish a proper bond with approved security for the faithful performance of such contract according to the terms thereof.

Each bidder will be required to state in his bid the date upon which he will complete his work. The respective contracts will contain the usual provisions on this subject.

Each bidder shall file with his bid the non-collusion affidavit required by statute and the successful bidder before entering into his contract shall present a certificate from the industrial board showing that he has complied with Section 68 of Indiana workmen's compensation act.

The said school trustee and said advisory board expressly reserve the right to reject any and all bids, and to take reasonable time to investigate the bids and qualifications of the respective bidders before acting on bids submitted. The estimated cost of the entire work is \$100,000.

Dated this 18th day of September, 1923.

WILLIAM H. EVANS,
Trustee of Center School Township.
FRED B. BROWN,
BOYD W. TEMPLETON,
WILLIAM C. KASSEBAUM,
Members of Advisory Board
of Center Township.

TRACED ENTERTAININGLY THE DEVELOPMENT OF THE CON- TRACTOR AND ARCHITECT

Both Must Co-operate, the One With the
Other, Asserts Speaker

Inclined to be satirical Irving K. Pond, Chicago, past president of the American Institute of Architects, and representing the Illinois Society of Architects, in speaking at South Bend to Indiana architects and contractors traced the development of the architect and contractor down through a mere period of 10,000,000 years, as he put it, nor did he overlook Indiana's keen interest in the development of the engineer while the architect was left out in the cold.

To begin, Mr. Pond said his arising to address the assemblage was an awesome moment for him as, when he accepted the invitation to speak, he had anticipated a gathering of no such proportions. Further, he had always entertained an awe for the contractors which was then accentuated by the many present.

Mr. Pond said in part:

"As has been said, we are all builders; the architect erects buildings in his dreams and the contractor materializes them. Such has been the order since away back there 10,000,000 of years ago when nobody thought of comparing the cost of a hog with a plasterer's daily wage. It all started with the cavemen who built their places of abode then sallied forth and grabbed the first women they met for wives. For protection they piled up stones to block the entrances to their caves, that is, they made the women pile the stones, exploited Labor you see; these were the contractors.

And then appeared other cavemen who showed more discretion; they built by order, piled up the stones artistically and went forth and picked out pretty women for wives; these men were architects, they instituted symmetry, system, rythm. In a way they were dreamers and needed the builder to balance their dreams; the two have been working together ever since."

Passing hurriedly through the intervening centuries, Mr. Pond showed how beauty began to be a building ideal of man and briefly outlined the great works of Sir Christopher Wren and Michael

Angelo. But these wonderful artists could not foresee the future, he pointed out, and in due time their buildings began to show unforeseen defects in their construction, requiring the aid of engineers and contractors to strengthen and preserve them for future generations.

By these examples Pond sought to bring out the fact that the architect needs the aid of the builder in carrying out his plans and in the present day needs it more than ever.

He referred to the architect as enjoying his work and getting joy out of the creations that work produces. Though the architect dreams the speaker said, he wonders if the world would have been as rich as it is if the architect hadn't practiced, hadn't dreamed.

There is, he continued, much agitation for licensing architects now days though in olden times architectural gems were produced and no thought given to the matter of license.

At this juncture he took a dig at the way Indiana has treated the practice of architecture, pointing to the engineer's license law which compels an architect to secure an engineer's license in order to be an architect and cited as an example his own experience when he had a project to build in Indiana. He said he wished it understood that as an architect he was speaking as an engineer in Indiana on architecture.

In conclusion, Mr. Pond said, all real architects, as the great ones before them, dream and have dreamed structure, and in the fulfillment of those dreams the contractor is needed. These two great elements working together and co-operating as is now the tendency means much to the future of building.

INFLUENCE EXERTED BY I. A. A. GROWS MORE EVIDENT EACH MONTH

Attitude of Architects Toward Each
Other Augurs Well for the Future

Never was there ever a better demonstration of the improved relationship that the architects of Indianapolis bear toward each other, as a result of the function of the Indianapolis Architects Association, than was brought out at the regular monthly meeting of the association Wednesday evening, Septem-

ber 19, at the Hoosier Athletic Club. It really was the big feature of the meeting and no one present but could feel the changed relationship influence as it prevails today in contrast to that which existed some years back. This altered condition is the direct result of the continued mingling and association through the activity of the city architects' body which has brought the members to a better understanding of each other given them a chance to meet on a common ground, air their grievances and thresh them out to a solution. Matters that appear aggravating, complex and conducive to misunderstanding, are now gone into freely in open discussion and straightened out. There is a frankness of expression from the individual architects that is refreshing, and while opinions may be at wide variance all are accepted with a tolerant attitude that never would have been possible in the olden days. Not only that, but there seems to be an inclination toward compromise that frequently has soothed threatening and troubled situations. How different is this condition from the former one when architects dared not express themselves so openly, instead, kept their grievances to themselves and in so doing allowed gossip, innuendo to be bandied about to aggravate and urge suspicion on until the whole profession suffered.

There are architects who neglect to attend these meetings failing to realize what they are missing and the inspiration that is born of them. It is really a great work that the association is carrying on and from it the architectural profession of the city is deriving a benefit that in time will be inestimable.

Just previous to adjournment attention was called to the recent death of Architect Mac Millan H. Johnson, Jr., Terre Haute, senior member of the firm of Johnson-Miller and Miller, an occurrence deeply regretted and referred to as an irreparable loss to the profession. High tribute was paid to the deceased as a man, his ability as an architect and his loyalty to his profession. The passing of Mr. Johnson and Mr. Ewing Miller within a few months period was termed as a real calamity to the architectural profession of Indiana. The secretary was instructed to extend to the bereaved family a message of sympathy from the Indianapolis Architects Association.

STARTLING BUT TRUE

Building Wages Now Highest In The History of The Industry.

The Contracting Record and Engineering Review in a recent issue presented some startling facts that seem to indicate that a "buyers' strike" is more than imminent. We quote from the article as follows:

When you are dining at the Ritz, and notice that the florid gentleman at the next table is a little unfamiliar with the clubs used in playing the nine-course dinner, do not hasten to conclude that he is a prospector recently returned from the Labrador gold fields. He may not even be the retired cattleman that he resembles. More than likely he is the bricklayer who helped to build the apartment that is going up next door.

For today there is no such thing as common labor. If you are a contractor you know the bitter truth of these words. If you are not, harken to the writer in the "Wall Street Journal," who says that labor in the building trades is now receiving the highest wages in history:

"While the union wage scale varies between \$9 and \$10 a day for the various trades, the actual minimum paid is \$12, the ruling rate being \$14 to \$16 a day (in New York City).

"As high as \$25 is reported as being paid to members of the trowel trades in the environs of New York City. In some Long Island towns plasterers recently went on strike for \$27 a day. Double time is also demanded for overtime. Instances are known where plasterers' pay has run to \$250 a week."

This same condition exists, though in varying degree, in every section of the country. Wages on the average are approximately 155 per cent above the 1913 level. This figure is estimated on an average \$14-a-day wage in the New York district—a fair figure according to contractors' reports. According to "Boston New Bureau," building trade labor is only 85 per cent as efficient today as in 1913.

Decreased efficiency is ascribed to various causes. During the war period re-

quirements for admission to the labor unions were not severe, due to the lower calibre of men then available. Another reason is the psychological reaction of the laboring man under improved conditions. It is a matter of economic history that every wage increase has occurred at a time of booming business, and has been followed by curtailed efficiency.—(Monthly Bulletin Buffalo Builders' Exchange.)

CHIPS AND SHAVINGS

The finishing touches are being put on the new \$15,000 home of Dr. V. Jordan on Howard street. George Miller & Sons are the contractors.

A west side home development program is contemplated for next year, at which time fifteen new residences are proposed for construction. These homes will be started in the spring.

Work on the new Lodge school is to be begun shortly provided no remonstrance is filed against the bond issue by September 24.

While the home building is going ahead by leaps and bounds the architects report a falling off in larger structures.

GETTING DOWN TO REAL BUSINESS AGAIN

Interest in Builders' Exchange to Be Revived

Plans are now under way to start an active winter season for the local Builders' Exchange. During the summer the contractors had so much work on hand, and there were also so many other diversions bobbing up that it was hard to get the members out for regular meetings, as a result these were called off through the heated months. Now that cool weather has arrived and work is letting up to some extent a new effort is to be made to revive interest in organization matters.

A regular schedule of meetings is to be worked out and a membership cam-

paign is to be launched in an endeavor to build up the association and weld the contractors of the city together so that the interests of the builders may be treated mutually both for protection and advancement.

KEEP IT MOVING

Plea Advanced for Support of National Jurisdictional Awards Board

The National Board for Jurisdictional Awards has been functioning for more than three years and during that time has made many decisions and stopped jurisdictional strife on construction work in all parts of the country. With possibly one exception, its decisions have been accepted as made by all of the unions in the building industry and contractors' and architects' organizations.

The good it has done for the industry has been recognized as beneficial by both the employers and union men, and, with the exception referred to, all agree that the board should be maintained and its decisions respected by all in any way connected with the building industry. The board has accomplished more in its short existence than all other trade bodies combined have in the past fifty years. Its officers and members serve without salary and give at least four weeks of their time every year towards helping to make better building conditions for all. Let all interested get behind it and keep it moving in its great work.—September Bulletin of Building Construction Employers' Association, Chicago.

DRIVING IN A FEW NAILS.

The editor of the Bulletin for the Building Construction Employers' Association of Chicago, recently drove these licks home.

Bricklayers and plasterers continue to command a high premium wage. All parts of the country report the same condition with little hope of any change.

Holding organizations in line and keeping its membership keyed up to the importance of pulling together is some job. Personal and selfish interests seem more paramount than standing for principles that are essential for all engaged in the industry.

SOUNDS LIKE MABLE'S FELLOW WHO SAID, "CONCRETE, THAT'S ME ALL OVER!"

Statistics show that the state using the most cement in 1922 was California with Arizona second. The state using the smallest amount was Mississippi with Arkansas second.

None filed with Marion County Recorder this week.

LET UP IN BUILDING GENERALLY REGARDED AS ONLY SEASONABLE**Stability of Costs Only Thing Needed to Send 1924 on Prosperous Course**

Building construction activity in Indianapolis which has been booming along in unprecedented volume for months has shown a tendency in the past few weeks to slow down considerably. An investigation for the cause develops the fact that owners who had contemplated projects in mind have hedged because of the lateness of the season and high construction costs. As a result of this turn any number of building projects have been held in abeyance till next spring.

There is every prospect that next year should be a good building one provided a stability of costs can be effected. That is the crux to the situation. It is realized generally that no great construction cost declines can be expected from indications as building needs are great structural requirements still being in arrears, a condition that is bound to create a big demand for labor and material. While such an influence is not conducive to price or cost declines there can be no justification for higher figures along those lines. Thus there should be a strong tone to steadiness and stability lending encouragement to a great building impetus by spring.

As much as lower prices might be desired sharp declines would prove most detrimental even more so than the high prices now prevailing for no action can be expected on a falling market.

Late season contract prices did ease up slightly and encouraged some owners to go ahead with their projects as

they felt no further declines could be expected and that prices were at a rock-bottom level, and to hazard a guess at this time their judgment appears to have been sound.

It was a banner year for building in Indianapolis and though activity has sloughed off it was no more than had been expected and most building men are entertaining hopes for another good season in 1924.

SCHOOL COURSES NOW CREATING CERTAIN APPRENTICES THAT ARE FILLING GAPS**Why Not Turn Manual Training Courses to Advantage of the Building Industry?**

Recently at an impromptu discussion of architects at Indianapolis the information was advanced by several of them that some of the boys who had come out of high school after taking courses in drafting had proved themselves most competent. One architect said that one of the boys he had employed was a fine workman, turned out neat, clean drawings and could letter better than any other man in the office.

Again, boys who have been taking up the printing courses in the local public schools, 7th grade and high school, have proved their worth and promise to furnish in time new competent material for the printing ranks.

Here is evidence that such training courses in the schools are worthy of encouragement and it seems that a determined effort on the part of contractors' associations to induce the school authorities to institute courses in the building trades would go a long way to answering the much discussed apprentice question.

The apprentice problem is a big one, too big for individuals to try to solve, it will take the concerted effort of the contractors' associations to reach the solution that will make for an encouragement that will induce the boys to take up and enter the building trades field. Until the contractors do make a determined move to create more apprentices the labor shortage problem will be ever present to confound and impede the building industry.

If drafting courses have proven profitable to the practicing architect and the printing business is to profit from the printing trades courses why should not the manual training courses be made to profit the contractors and the building business?

troubles are little ones by comparison with some of the trials and tribulations of the other countries, especially those of Europe, and our government is not so bad after all, is not bad at all, everything considered. There are a lot of disgruntled foreigners who, not being able to get along at home, have come over to our country to try to tell us what we ought to have, what we ought to do, and more's the pity they are allowed to prate their wares, but, there is plenty of that good old thankful Americanism that is going to keep the good old flag flying, away up there at the top of the mast, over the millions of homes of the free in the land of the brave.

prices were going and the result was that many, many projects were held up. Owners were inclined to play it safe and wait, contractors not sure of the trend also played it safe and left a margin for increased construction and operating costs that made figures run high and caused a postponement of the contemplated projects. Building activity waited while everybody and everything thereto connected waited.

Finally, then, a fair degree of stability appeared, a condition that lent assurance and inspired confidence, and though Labor and material supply prices were high they have held steady and firm, resulting in the past few months of an enormous volume of building going ahead.

Demand is bound to affect prices, one can not escape that influence, but when readjustments of prices must be made stabilization should be sought for by every building man not only in Indiana but all over the country and the readjustments should be made speedily and not allowed to drag along over a period of months.

Wage scales are primarily made to effect a stabilization of Labor prices and the contractors' associations work hard on that matter, not in an antagonistic mood toward Labor, but for the purpose of lending a future certainty against which to figure. However, not infrequently are there contractors in Indiana who turn right around and spill the beans by tossing the scales into the discard by tilting and offering bonuses.

Here is a point for contractors and material men in Indiana to remember—stabilization of price and cost means more to their business than any other element entering into their affairs.

BIG INDUSTRIAL SHOW TO BE A REAL EVENT.

Preparations Underway.

Plans for the Hammond Industrial Exposition Automotive and Fashion Show, to be given at Harrison Park, October 8 to 13, are rapidly coming to a head. The fair will be the biggest of its kind ever staged in northwestern Indiana. One hundred and twenty booths have already been sold to Manufacturers, Merchants, Real estate firms, Auto dealers and other interested parties. Ground was broken last Wednesday for the buildings. The first unit to be erected will be the Auto Show Building, which in itself will be 260 ft. long and it will accommodate 40 exhibits of autos. The next to be erected will be the 250 foot stage for the spectacle, "Indiana," which will be presented by a cast of about 1,000 people, all to be from Hammond.

MOUNTING

Hammond Yearly Building Volume Promises Goodly Amount.

Building Inspector Henry Vis reports 36 building permits issued from September 6th to 13th, value \$49,725. The total so far this year is 872 permits for an estimated valuation of \$3,679,425.

RIGHT UP WITH THE REST

Hammond Stacks Up Well With Larger Cities.

Though Hammond does not class as a 100,000 population city, nevertheless, as far as business transacted statistics go, the amount of business by her places her fiftieth in a list of 64 cities larger than she is. Such a showing is significant and speaks well for Hammond enterprise and progressiveness. During one week in August she had bank clearings that totaled \$3,614,100.

DISAGREEMENT DOES NOT IMPLY COMPLETE DISSATISFACTION WITH GOVERNMENTAL SYSTEM.

Foreign Agitators Will Find Real Americanism Too Strong For Them.

While we may all have our disagreements as to the advantage and disadvantage of certain moves made by the Government, nevertheless, after all, our

TRYING TO SQUARE HIMSELF

The weather man was kind to the Calumet District for once. The recent heavy frosts down state which did considerable damage gave this northwest section the go-by.

CALUMET BUILDING PROGRESS

Building activities seem to be letting up to some extent, that is, if the supply of workmen available these days is to be taken as a criterion.

Workmen have about finished the terra cotta cornice on the new hotel and the contractors expect to complete the roof this week.

The Champion Corporation has opened its new grey iron foundry which promises to become one of the most important departments of the plant.

SOMETHING TO STRIVE FOR

Stabilization All Important In The Building Industry.

Recently in commenting on conditions a man prominent in the commercial world said that if a stabilization of prices was effected it would go a long way toward making business move forward. He continued further and asserted it was not that prices, higher now than in 1913, 1915, 1917 or so forth, were impeding things so much as it was that they fluctuated and fluctuating prices always retarded for people will not buy when such a condition exists.

No industry is more subject to the above fluctuation than that of building. Every Indiana city has experienced the uncertainty of building construction activity the result of the scrambling of prices, as it were, both as to Labor and material. There was a time not so long ago when prospective builders grew timorous not knowing just which way

MEETINGS SUCH AS HELD BY STATE CONTRACTORS AT SOUTH BEND IN THE END WILL TELL.

Organization Spirit Growing.

And yet some contractors can't see or hear the call for association effort. Surely the appeal, the need, for it is there else why would building contractors of fifteen Indiana cities drop their affairs for a day and travel miles that they might meet with their colleagues in industry? Those men are of the vital force of the building industry, the progressives; they know and feel the need of consultation, the advantages to be gained by an interchange of ideas, the power that lies back of unity of action.

That was what inspired the conference at South Bend, that gained a response and resulted in a meeting latent with promise.

Not only in Indiana is there this manifestation of organized effort but it is state wide in other states and is growing all the time.

No attempt is made to place any restrictions on members, instead, only the best practices and methods are recommended to be accepted or rejected as pleasure sees fit, yet, there are contractors who hold aloof though willing to take advantage of any benefits that may result from association effort.

Hanna: School (rem), Hanna Twp. Owner, George Dennison, trustee, Hanna Ind. General contract let to George A. Weaver, Auburn, Ind.

***Liberty:** School, \$110,000. Archt., Wilson B. Parker, Board of Trade Bldg.,

Indianapolis. Owner, P. B. Nye, trustee, Liberty, Ind. Contractor, Harry E. Pinnick, 112 S. Tenth St. Richmond, Ind. Foundation in, starting brick work.

***Newcastle:** Industrial Building and Recreation Hall \$75,000. Archt., Herbert Foltz, Wild Bldg., Indianapolis, Ind. Owner, Indiana Village of Epileptics, Newcastle. General contractor, Bowyer Constr. Co., Newcastle. On brick work.

Valparaiso: Factory, \$35,000. 1 sty. 60x215. Archt. and general contractor, The Carnegie Co., 189 West Madison St., Chicago, Ills. Owner, McGill Mfg. Co., Valparaiso, Indiana. Pouring foundation. Brick.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, William H. Evans, as trustee of Center school township, of Marion county, Indiana, and the advisory board of Center township, of said county and state, will, until the hour of 10 o'clock a. m. on Wednesday, the 10th day of October, 1923, at the office of said trustee, 215 East New York street, Room No. 216, in the city of Indianapolis, Ind., receive sealed bids for the erection, construction and completion of a two (2) story, and basement, brick, fireproof school building, for the use of said school township; also for construction and installation of a heating and ventilating system therefor; also for the construction and installation of the plumbing and water supply system therefor; also for the construction and installation therein of an electrical system with all proper fixtures; all in accordance with the drawings, plans and specifications for such proposed work adopted and approved, and as prepared by Donald Graham, architect, 1126 Hume-Mansur building, in said city, and now on file in the office of said trustee, and of said architect, and in the office of the state board of accounts in the Statehouse, Indianapolis, Ind. All bids therefor will be opened and publicly read at 10 o'clock a. m. on said 10th day of October, 1923,

at the office of said trustee in the presence of said trustee and advisory board. Said building, and said systems connected therewith, are to be constructed on the school property of said township, located at Gale and Thirty-sixth streets, in said Center township.

Bidders desiring duplicate copies of the drawings and specifications for their own personal use, may obtain the same by depositing \$10 for the general construction documents, which money so deposited will be refunded if such drawings and specifications are returned in good condition on or before the time above fixed for receiving bids.

All bids must be on Form No. 96 prescribed by the state board of accounts; and each bid must be accompanied by a certified check for not less than 3 per cent in amount of the gross bid submitted, payable to the trustee of Center school township, Marion county, Indiana, and the said check of any accepted bidder shall be cashed by the payee, and the amount thereof retained by him as agreed liquidated damages, in the event that such accepted bidder fails to enter into a proper contract for the work for which his bid shall be accepted, and to give the proper approved bond required, within ten days from and after the date of the acceptance of such bid. All checks of unsuccessful bidders will be returned to the respective bidders.

Within ten days from the date of the acceptance of any bid, the accepted bidder will be required to enter into a proper written contract to construct and complete the work covered by such bid, including the furnishing of all material and labor in conformity with the plans and specifications therefor, and also to furnish a proper bond with approved security for the faithful performance of such contract according to the terms thereof.

Each bidder will be required to state in his bid the date upon which he will complete his work. The respective contracts will contain the usual provisions on this subject.

Each bidder shall file with his bid the non-collusion affidavit required by statute and the successful bidder before entering into his contract shall present a certificate from the industrial board showing that he has complied with Section 68 of Indiana workmen's compensation act.

The said school trustee and said advisory board expressly reserve the right to reject any and all bids, and to take reasonable time to investigate the bids and qualifications of the respective bidders before acting on bids submitted. The estimated cost of the entire work is \$100,000.

Dated this 18th day of September, 1923.

WILLIAM H. EVANS,
Trustee of Center School Township.

FRED B. BROWN,
BOYD W. TEMPLETON,
WILLIAM C. KASSEBAUM,

Members of Advisory Board
of Center Township.

Home of Harry Mitten, Architect, Syracuse, New York. Celotex used for insulation on walls and roof, for sound deadener in floors, for plaster base on interior walls.

You Can't Beat Celotex!

Celotex has the insulating value of cork. A house with walls and roof sheathed with Celotex can be heated in winter for two-thirds the usual fuel cost. In summer a Celotex house is cool. You can't beat Celotex. Celotex is a rugged building lumber made from the long tough fibres of cane. Nails direct to studs and rafters. Is not easily damaged by weather nor by ordinary rough handling.

As a sound deadener, Celotex is ideal. It

holds plaster and stucco perfectly.

Stock sizes: Thickness, 7/16 in.; width, 4 ft.; lengths, 8, 8½, 9, 9½, 10 and 12 ft. Weight about 60 lbs. per 100 sq. ft.

We want to put samples and complete information in the hands of every contractor, lumber merchant, home builder and architect in the country. If you do not know all about Celotex, please write us. The Celotex Company, 111 West Washington Street, Chicago, Illinois.

HOLDS FOR RIGID PLAN INSPECTION RATHER THAN ARCHITECT'S LICENSE LAW.

Protection of the Public Is The Main Thing At Issue.

It occurred at South Bend.

Previous to the calling to order of the recent regional meeting of the I. S. of A., a group of architects, gathered in the lobby of the La Salle Hotel, were informally discussing various phases of the building industry and situation that was most entertaining even to an outsider.

Finally the subject drifted around to plan preparation, inspection, supervision, license for architects, and the relation of building inspection departments and certain public officials, who inspect and approve plans, to matters architectural.

Particularly was reference made to the city building inspection departments and their various ways of handling plans. It was the consensus of opinion that in many cities the efficiency of the building inspection departments is handicapped by a lack of sufficient funds to carry through inspection of buildings, the force of inspectors in most cases being too limited to cover the ground that active building operations demand.

It was also brought out during the discussion that in many instances the inspection departments are most exacting with an architect relative to his plans, while a builder or some owner will appear with a sketch on brown wrapping paper, or a leaf from a tablet, and the inspectors will go over same and supply a lot of data to show material sizes required, trusses and sizes of steel beams, and will even draw in lines. In fact, complete the sketches by inscribing figures and other details necessary to make the plans understandable. However, though accepting such incomplete plans from an owner or builder, the same departments demand completed details from an architect before they will give him consideration. The question arises, "Why make fish of one and flesh of another?"

Architect I. K. Pond, Chicago, past president of the American Institute of Architects, who was present referred to the custom of building departments in Europe advancing the information that over there plans when submitted by any one are either approved or rejected, they

are either right or wrong. No suggestions are advanced. If an architect's plans are rejected and any questions are asked as to what is wrong, the only answer he gets is, "You should know, that is your business; it isn't ours to show you how to make plans." Just so an owner must submit correct plans, no question is asked as to who prepared them, but, whoever did must have been qualified to meet the building requirements or the plan don't go through.

Mr. Pond was of the opinion that if city building departments were conducted properly, if they inspected rigidly and impartially, simply with a view to protecting the health and safety of the Public, there would be no need for an architects' license law, for under such custom nobody could make plans and get by with them unless he was qualified. In conclusion, he held that if a layman, contractor or builder could produce plans that guaranteed safety, Public health and welfare why should not such men make plans, for potentially they were architects whether called so or not.

FACE SMILES AND FORTABLES.

The reader probably will wonder why this peculiar heading appears in the Bulletin. At the same time one might wonder why many face smiles and fortibles appear in drawings and specifications prepared by architects.

In order that any curiosity may be allayed at once, it might be well to state that a very young, unsophisticated man, at one time insisted on calling a "facsimile" a face smile. Many years later when this same person was actively engaged in architectural practice, he was shown a blue print on which was the title "Shop Drawing Fortables." A curious person in his office inquired what a fortible was and after a great deal of puzzling concentration without success in solving the problem, it was necessary to suggest that perhaps the title should read "Shop Drawing for Tables."

One may be curious to know the reason how these idiosyncracies might be allied with the practice of architecture. It is a common human failing to see but not perceive and this is especially accentuated because much depends upon the perception of that which is in the drawings or specifications before their publication. Closely bound in with this attitude is the necessity for constant

close application in the matter of checking drawings and specifications. Those who are responsible for checking these documents must ever keep before them the fact that face smiles and fortibles in their own practice may be boomerangs. —(Bulletin Illinois Society of Architects.)

INDIANA ARCHITECT APPOINTED TO A. I. A. WAR MEMORIAL COMMITTEE.

Merritt Harrison Named By President Faville.

Following the plan proposed by the American Institute of Architects that one member from each chapter be selected to serve on the A. I. A. War Memorial Committee has given Indiana representation on that body.

Announcement was received in Indianapolis this week from E. C. Kemper, Executive Secretary of the A. I. A., by Merritt Harrison that he had been named by President W. B. Faville, San Francisco to represent Indiana on the War Memorial Committee. Horace Wells, Philadelphia, is chairman.

Mr. Harrison has accepted the appointment.

"PENCIL SKETCHES"

What does the W in Chairman Allen's name stand for?

Work for new members in I. S. A.

The man who does not associate with men of his own profession is not likely to be broad-minded.

Life is what we make it. Why not make it good?

Did you hear that noise in the north? That was George asking you for that one new member.

Austin, you are some chairman. I. S. A. will not soon forget its regional meeting at South Bend.

We all liked Mrs. Studebaker's cooking; shall want to eat with her again soon.

Don't wait for a new man to ask for an application blank; go get him first!

Office, 411 Sycamore St.

BUILDING SITUATION GOOD

Labor Shortage Righting Itself.

Local building operations, though of no great proportions as related to sizes of structures, continue to show marked progress with many of the projects rapidly nearing completion. As the older operations are gotten out of the way new projects invariably put in their appearance to require the attention of the contractors. Activity in building construction circles though naturally not as strong as during the summer months is, nevertheless, brisk and there is practically no unemployment among the building trades mechanics. Under the easing up of building that has occurred in the past month or so the Labor situation has improved and the contractors are in a better position to secure men to meet requirements.

As matters now stand Evansville should enjoy a fairly good Fall building period.

ASSOCIATION ACTIVITY NIL FOR SOME TIME.

Later on Questions Will Arise That Will Demand Collective Attention.

Summer weather and the building activity that comes with that season is anything but conducive to association interest. Such has been Evansville's experience. The contractors are all so busy they don't have time for meetings and it is impossible to get them to come out. If they do have spare moments there are so many diversions for relaxation that they lean toward them and seek such means to get out from under business cares. As a result of such conditions the association in Evansville has just remained dormant the last few months and put forth little or no effort.

Several times calls were sent out for meetings but it was impossible to muster the proverbial "Corporal's Guard." However, there will come a time when the need for the association of contractors is felt and they will be on hand. When the cooler weather sets in and the demand upon the contractors' time is not so great an effort will be made to resume

regular meetings at which to make preparations for next season's business.

CHIPS AND SHAVINGS

Contractor Jacob Schmidt has completed the duplex apartment building at 519-21 S. Evans avenue, that has been under his supervision.

The new furniture store building in the 1300 block on Main street, for the Handy Furniture Co., will be ready for occupancy shortly.

Many new residences about the city, some very handsome ones and others modest but modern in details, are nearing completion and stand forth prominently as the result put forth this year to relieve the demand for homes.

While the city call on local architects' services has been insistent all season, at the same time both Evansville architects and contractors have done much work in surrounding territory extending even into Illinois and Kentucky.

General contractors Geo. L. Miller & Sons, are still taking new contracts and when the year has run its course will have established quite a record for home building this year.

INTEREST IN BUILDERS' EXCHANGE BEING REVIVED.

New Secretary Rounding Up The Scattered Membership.

There is a new spirit prevailing around the Builders' Exchange these days and interest in the organization is picking up. The experiment of conducting an Exchange with a temporary secretary proved unsuccessful. How could it be otherwise? A part time unpaid secretary had his own business affairs to attend to and naturally could not give the required attention to the business of the Exchange. As a result interest in the organization fell off and the membership drifted away and apart and the effort made itself felt in building contracting circles.

The men who realized what the Exchange meant to the industry, a headawarded and the work started.

through which mutual matters could be transacted collectively rather than individually under the unorganized influence, read the hand writing on the wall and called the old members together and established a permanent secretary in office once more.

The present incumbent, Geo. Schack, found a big problem on his hands, but he set to work with a will and is slowly but surely bringing order out of chaos. He is rebuilding the membership and has already revived interest in the Exchange. Regular meetings which were abandoned during the summer are to be put back on the calendar and an active winter season started.

The new secretary is on the job every day and is deeply engrossed in working out plans for the restoration of the practical function of the Exchange. Its a big job but George says he is going to put it across.

LARGE PROJECT OUT FOR BIDS

Shriners Ready to Start on Big Temple

The prospect for more big building work in Ft. Wayne this fall and a chance to add materially to the city's already big volume of construction operations developed this week when plans were put out among contractors for estimates on the proposed \$600,000 Shrine Temple, bids for which are to be in October 20.

The building, of handsome design, is to be erected on West Berry street, down town and will add greatly to the architectural possessions of Ft. Wayne. It will be five stories high, 158 ft. x 162 ft. and when completed will be one of the finest Shrine buildings in the country. There will be a large auditorium, lounging, social and dining rooms, a big kitchen and administration offices. Archt. Guy Mahurin, Ft. Wayne, prepared the plans.

BOND SALE MEANS START ON BIG SCHOOL BUILDING PROGRAM.

Nearly a Million Dollars to be Spent on New Structures.

Bonds to the amount of \$979,000, the proceeds to be used to further a large school construction program in Ft. Wayne were sold this week and the chances are that actual construction work will be started late this fall.

The School Board contemplates the erection of six buildings and additions to meet the heavy demand that has been put upon the present school facilities.

The only thing that has delayed the launching of this big venture was the disposal of the bonds and, now that the sale has been made, the members of the School Board contemplate advertising for bids soon in order to get the contracts started.

INTERNATIONAL MASON CONTRACTORS ASSOCIATION GOING TO THE BOTTOM OF THE APPRENTICE PROBLEM.

Plan To Institute Complete Check And Record System.

A meeting of executive board members of the Mason Contractors Association of the United States and Canada held at Indianapolis this week brought to light the information that this organization is working diligently on the apprentice matter as it pertains to the brick laying craft.

The international body of mason contractors at the last annual convention pledged itself to encourage apprentices to the fullest extent of its ability in order to protect the business against continued depletion in the future of skilled mechanics in the ranks. To that end a census of apprentices is being taken. A permanent card index system has been installed wherein the names of apprentices, being employed both by member mason contractors and also non-members, are filed together with a complete record of date indentured and other remarks. By means of such records the association will be in a position to check up on what progress is being made in getting new potential labor supply into the brick-laying industry and what men are encouraging apprentices and those who are not.

When the new record system is completed a determined effort will be made to enlist the aid of all mason contractors in the work of helping to replenish definitely the ranks of the skilled brick-layer mechanics. Further, detailed reports and checks will be kept on the progress made by the boys and their movements should they change jobs or their living locations.

The situation as it relates to the avail-

able supply of brick-layers the country over is a serious one as there is a marked shortage of skilled help due to the fact that year after year death and other causes have depleted the ranks and few new men were taking up the trade.

Realizing the ever growing shortage the Mason Contractors Association of the U. S. and Canada has set to to remedy the menace to the building industry. The effort is most commendable and laudable and should be backed solidly by every mason contractor in this country and Canada. Not only that but there is a suggestion in it for every other contractors association which if harkened to and followed would in time afford a grasp of the apprentice situation that would be of inestimable value.

Those at the Indianapolis meeting were: Prest. A. K. Hitzman, Cincinnati; Secretary, Walter T. McGarvey, Cincinnati; R. M. Gillespie, St. Louis, and Harry Fenton, Indianapolis, attorney for the association.

BUILDING PERMITS

(\$4,500 and Over)

Week of September 20 to September 27

Residence: \$15,000, 3240 Fall Creek Parkway. Owner, Leon Joyce (contractor), 317 N. Summit St. Owner builds and awards separate contracts. Excavating.

Residence: (double), \$10,000, 2354-56 Central Ave. Owner, L. Markowitz, 1212 Cornell. Contract let to C. C. Ayres, 646 Fort Wayne Ave.

Store and Factory: \$10,000, 15th and Senate. Owner, Harry Farber, 2440 N. Meridian. Contract let to Avey Building Co., 5128 Park Ave.

Power House: \$10,000, 402 S. Illinois. Owner, E. C. Atkins Co., 402 S. Illinois. Owner builds and awards separate contracts. Brick stack let to Heinicke Co. Brick.

Power House: \$10,000, 1940 Barth Ave. Owner, Bemis Indianapolis Bag Co., 1940 Barth Ave. General contract let to Robert Hackney, 1006 W. New York St. Brick.

Residence: (double), \$8,000, 2430-32 Bellefontaine. Owner, M. E. George, at site. Owner builds.

Residence: (double), \$7,500, 929 E. 53d. Owner, G. B. Taylor, at site.

Residence: \$7,500, 734 Greer St. Owner, Albert Vielhaber, 732 S. East St. Contract let to Frank Zimmerman, 926 Greer St.

Residence: (double), \$7,500, 621-23 N. Beville. Owner, S. C. Kirkpatrick, 2307 E. 38th St.

Residences: (2), doubles, \$7,500 each, 2205-07 and 2201-03 E. New York St. Owner, Z. E. Slaughter, 301 N. Hamilton Ave. General contract let to James L. O'Mara and Son, 1030 Albany St.

Residence: \$6,500, 326 N. Oakland. Owner, John V. Weber, 206 S. Oriental. General contract let to George F. Brewer, 220 N. Gray St.

Residence: \$6,300, 1805 Koehne. Owner, O. L. Carter, 1813 Koehne. Day work.

Residence: \$6,500, 127 E. 50th. Owner, Frank E. Wilson, at site. Frame.

Residence: \$5,700, 462 Audubon Road. Owner, Walter Herman, c/o contractor. Contract let to Mark Clift, 4125 Byram Ave.

Residence: \$5,300, 5127 E. North St. Owner, C. Olsen, 5232 E. North. Owner builds.

Residence: \$5,000, 4717 Carrollton. Owner, G. W. Flood. Contract let to M. C. Bird, 4810 Carrollton.

Residence: \$5,000, 1921-31 Adams St. Owner, Hunter Realty Co., Lemcke Bldg. Day work.

Residence: \$5,000, 4016 Winthrop. Owner, Ernest Newlin, 2712 Indianapolis Ave.

Residence: \$5,000, 746 Berkley Road. Owner, Spiegel-Brown Constr. Co., 42d and College.

Residence: \$5,000, 24th and Webster. Owner, William Burroughs, at site. Brick veneer and frame.

Residence: \$4,500, 5123 Guilford. Owner, C. H. Specker. Contract let to C. S. Clifton, 1415 N. Tuxedo.

Residences: (2 doubles), \$3,200 each, 1018-20 and 30-32 Troy Ave. Owner, Dan W. Le Gore, 2856 Central Ave.

Residence: (double), 2 houses, 2442 Northwestern. Owner, O. J. Ensley, 2062 Central Ave. Frame.

Residences: (8) \$2,000 each, 824, 1012, 1020 S. Holmes. Owner, John S. Spann & Co. Owner builds.

INDIANA BUILDING VOLUME FOR EIGHT MONTHS IN 1923 HAVING SURPASSED THAT FOR ENTIRE YEAR OF 1921, IS FAST APPROACHING RECORD FIGURES OF 1922.

April Figures Greatest Ever Posted In Indiana.

Though the monthly building statistics from Indiana's leading cities for the first eight months of this year show that there has been a general recession of building construction activity since April, at which time building operations reached the peak, nevertheless, during the eight months there was building in sufficient volume to carry the total for the first three quarters of 1923 up to within 15% of the entire total for 1922, and 2.59% beyond the 1921 building operations.

Comparing the figures of 1923 from January 1st, to August 31st, inclusive, with those of the corresponding period a year ago the result reveals that 1923 leads by a good margin, 4914 more permits having been issued this year than last for an increase of \$12,767,504, or 34.29% in estimated valuation.

Going back over previous monthly building figures and even covering those to September 1, 1923, one finds that the building record made in April this year, when permits totaling an estimated valuation of \$9,251,114 were issued, was the greatest building month in Indiana's history.

The figures as recorded monthly to September 1, in 1923 and 1922, are:

	1923	Est. Val.	Per.	1922	Est. Val.
Month					
January	1258	\$ 3,538,818	720	\$ 1,298,386	
February	1044	3,273,476	949	1,873,180	
March	3116	9,029,671	2189	3,788,118	
April	3979	9,251,114	3032	5,270,955	
May	3835	7,397,507	3360	6,072,117	
June	2951	6,795,510	2609	6,813,884	
July	3616	5,747,064	2381	6,119,969	
August	3015	4,964,644	2660	5,993,691	
	22814	\$49,997,804	17900	\$37,230,300

COURT MAKES INTERESTING RULING**Lowest Responsible Bidder Defined**

An interesting definition of what is meant by the lowest responsible bidder is to be found in a decision rendered by the Supreme Court of Pennsylvania.

The term "lowest responsible bidder," which long has been a perplexity in its application to conditions surrounding the making of awards has been analyzed officially to the degree of forming the subject of a decision by the above court.

As interpreted by the court the term does not mean the lowest bidder in dollars and cents, nor does it mean that a board of public officials capriciously may select a high bidder regardless of responsibility or cost. Continuing to outline the dictates of the term the court says, "What the law requires is the exercise of call to their assistance the means of information at hand to form an intelligent judgment. The bidders should be investigated to learn resources, facilities, judgment and efficiency as builders."

The court held that the board involved in the case before it did not investigate and for not doing so censured the officials for omitting that important step. However, the court held that, in as much as the board had ample knowledge of the successful bidder and the merit of his work, the contract could be awarded. This might do in private affairs, but will not pass when public funds are at stake; the board in this case was not bound to investigate, and if a bidder measured up to the requirements of the law as a responsible party the board could not capriciously award the contract to another.

CALUMET BUILDING PROGRESS

The Contractor on the Gary-Michigan City Concrete Road (Dunes Highway) reports that the last link at Bailytown will be completed by November 1st, and opened for traffic about the 15th.

A Chicago Syndicate of doctors has purchased 80 acres near Fremont on the Dunes Highway and will build a sanitarium consisting of 13 buildings. The work will be started early next spring.

Rufus Danner & Co., were awarded the contract for the one story brick addition, 50x80, to the Lion Store for \$11,000. Heating and plumbing are not included in the above contract.

J. Wesley Reed has the building for

the heating plant at the central high school ready for the roof. Also the smoke stack is about completed.

Danner & Co., have the auto exhibit building for the big industrial exposition under roof. The outside walls are up for the main building and the contractors have started a force of men on the theater building.

Rhoades & Graves have the apartment building on Indiana avenue ready for the roof. They, too, have six bungalows under construction. When finished they will have built this year three apartment buildings, one garage and sales room and twenty bungalows. This firm is planning for business on a larger scale next year.

Wm. Love, administrator for the Rim-bach Estate, is having plans drawn for a three story store and office building to be located just west of the new addition to the lion store on Sibley street.

It looks at present as if there was going to be an easing up in building construction. Several business blocks, apartment houses, and hotels are about completed a condition that will release more mechanics for other lines of building. There is no let up yet in home building operations as the demand still exceeds the supply.

It is estimated that we are still short 2,500 new homes and at the present rate of increase in population it will take three years of steady building to catch up with the demand.

The new hotel building is making good progress during this nice cool weather.

STATE CONVENTION ACTION GETTING RESULTS.**Apprentices Being Employed By Indiana Contractors.**

According to the information brought out at the recent conference of State contractors at South Bend, there was one bit that was particularly pleasing to the men who have the future of building conditions at heart. It seems that the contractors in many localities in Indiana have more than just listened to the apprentice encouragement arguments that have been advanced and have actually taken up the matter definitely.

Last January at Michigan City at the State A. B. C. convention the delegates pledged themselves to see that apprentices were encouraged. Many months have elapsed since then and little has been said on the subject. However, when a show down was called for at the South Bend conference reports showed that quite a few of the cities represented there

were possessed of contracting interests that actively were pushing the apprentice feature and employing young men to the full quota as permitted by union regulations. This is most gratifying and if continued with a will will aid before long in solving the labor shortage.

One draw back regarding the employment of apprentices is that few boys know anything about building and in the rush occasioned by the heavy demand for buildings the boys are a hindrance rather than an aid. There is a way to overcome this impediment and that is to train the boys in manual training schools along the fundamentals of the various trades and on plan reading, then, when out of school and ready for work they will be equipped to some extent to plunge in and aid. As long as there are manual training schools why not use them to real advantage.

The labor shortage problem will not work itself out, it has had years to do it but the shortage is no nearer a solution, in fact it has grown more aggravating as time rolled on, but, the contractors at least appear to be taking the matter in hand and, not only in Indiana, but all over the country, the apprentice question is receiving serious attention and a ways and means is being sought to encourage the boys to take up building craftsmanship.

BUILDING IN SMALL CITIES ABOUT WOUND UP FOR THIS YEAR.**Lack of Figures Fails to Emphasize Building Activity That Goes on in Smaller Communities.**

Small city building construction activity is confined these days mostly to residential construction, the larger work having been practically all cleaned up. If statistics were available in all Indiana cities the total would show that there was a vast volume of building work that never reaches the record books.

Muncie, Elkhart and Richmond are the smallest cities who record all building operations. Some cities require permits when a sidewalk or street is to be blocked or used where building is to be done, otherwise no record is made. In that territory where there is no building supervision the figures, if available, would be interesting.

The prospect, from indications at this time, is that the 1924 season in the county seats and other cities and towns will develop another large volume of house building operations.

STEEL ORGANIZERS USE NEW TACTICS.

Organizers attempting to unionize steel mill workers are using entirely different tactics than were employed in 1919. The eight hour day which has been very generally adopted can no longer be used as an argument, but the organizers are now endeavoring to secure for the workers the same wage for the eight hour day that was formerly received for twelve hours. There is nothing heard about calling a strike at this time, while four years ago the men were called out when only about 5 per cent were organized. Organization of the steel workers is now going forward in the Cleveland, Chicago and Bethlehem districts, and will be extended to Pittsburgh and other steel centers shortly.

BUSINESS OUTLOOK

A Mental Bucking Up Urged

Notwithstanding the gloomy forebodings of the pessimists business is on a fairly stable basis and the threatened building slump freely predicted earlier in the year has failed to materialize. True there was a slight let up a few weeks ago, but a careful study of statistics shows that this has happened every summer for a number of years. With material manufacturers catching up on back orders as a result of increased plant facilities, and no prospects of any serious labor troubles in the near future, the industry is faced with a condition that will mean uninterrupted activity for the balance of the year. The only difficulty at present is the labor shortage, but contractors will have to continue to work short handed until the trade school movement which has been given a good start begins to turn out skilled mechanics in sufficient numbers to make their presence felt.

Organizations can do something in the way of offsetting the work of the professional crepe-hangers who are going up and down the country telling people that the present era of prosperity cannot last and that a serious depression is just around the corner. It is an accepted fact among psychologists that the state of one's mind has a decided bearing on the conditions of ones health, and the same is just as true in business. The business of building will be good just as long as those in it believe that it is. There is an old saying to the effect, "that there is nothing good or bad but thinking makes it so." Therefore, let everyone who may be tempted to think that next year will not be as good as this one has been, resolve to banish the thought from his mind, and in its place carry the idea that the present period of construc-

tion activity will continue for many months to come.—(Weekly Bulletin of National Assn., of Bldg. Trades Employers.)

INDIANA FIRM SEEKS TO MEET GREAT BUILDING DEMAND.

Makes Extensive Plant Alterations.

One hears much of the great building movement, and an avalanche of figures descends to impress upon the Public the enormity of the volume of construction work that is going on, labor shortages are discussed at length, and a thousand and one things pertaining to building are trotted out and aired. However, little is said of the effort of the material manufacturers to keep pace with the rush so as to be able to keep things moving forward.

Here is one instance, the Carnahan Manufacturing Company at Loogootee, Ind., has increased its capital stock from \$40,000 to \$200,000 and, in order to properly take care of the constantly growing demand for their production of high grade millwork and veneered doors, has in the past four months greatly increased its capacity by re-arranging the entire factory, adding several large and expensive pieces of new and modern equipment and electrifying the entire plant, making practically all machines direct connected individual motor drive, the power for which is supplied by a 250 K V A Wagner Generator, operated by their already adequate steam power plant.

ARE CONTRACTORS BUILDING "CATHEDRALS?"

Young men do not enter the building trades simply because we tell them it is profitable and that the branch they adopt is a useful trade.

Young men fight shy of an industry that has lost its ability to make heroes of its leaders; that holds no chance for hero worship and that offers no opportunities for an expression of the herd instinct and individual originality.

The young man of today looks to that trade or profession which, to him, holds the greatest romantic appeal. He who dons overalls and grasps the trowel cannot envisage himself as some day taking the contractor's position and station, or marrying the contractor's daughter and, as a successful contractor, of grasping a modicum of the world's respect, adulation and applause.

This may be because of the inherent mediocrity of those who stand at the top of the trade or it may be because of the failure of the builders to properly

present the romantic side of the building industry to the youth who stand tiptoe at the threshold of life.

In a certain fargone age when an individual craftsmen might work a lifetime on a church we can imagine a mason of that day saying to a casual inquirer: "I am building a cathedral." Today, ask a building craftsman of his work and he will respond: "I am working this week for John Brown at \$12 a day."

There is a difference between building a cathedral and working for \$12 a day. We wonder if the solution of the apprenticeship problem does not rest primarily in our method of approach?—(Bulletin of National Association of Builders' Exchanges.)

WELL KNOWN INDIANAPOLIS EN- GINEER HOME FROM LONG MOTOR TRIP OF IN- SPECTION.

Member of Firm Has Close Call In The West

After a twenty-two hundred mile motor trip through the East, on which he visited many large industrial plants for the construction of which he was instrumentally responsible, O. E. McMeans, well-known Indianapolis engineer, president of the engineering firm of McMeans & Tripp, has returned home. Twenty years of practice has extended the operations of this firm over a large section of the country.

Among the plants visited were those of the Geneva Preserving Co., Geneva, N. Y.; Edgett-Burnam Co., Newark, where a large power plant has just been completed, the Beech-Nut Packing Co., and W. N. Clark Co., both at Rochester, N. Y.; Stittville Packing Co., Northeast, Pa., and Frederick Packing Co., Frederick, Md.

Other important projects now under construction from plans of McMeans & Tripp, and under their supervision are the Ft. Atkinson Canning Co., Atkinson, Wis., a group of six fireproof buildings and modern packing house equipment, also The Southland Citrus Packing Co., Lakeland, Fla., and The Polk-Co., Homestead, Fla.

A. H. Worsham, chief engineer of McMeans & Tripp, who is in western Montana directing the construction of a number of large industrial plants there, has just sent out word back to Indianapolis of a narrow call he had. While on a motor trip to Yellowstone Park along a road 10,000 feet above sea level, his car cast a wheel, but did so along a level stretch of road instead of in one of the thrilling mountain passes.

***Hotel:** (40 rooms), Crown Point, Ind. Archt., A. C. Berry & Co., Hammond. Owner, New Crown Point Hotel Co., Crown Point. Plans nearing completion. Architect will be ready for bids in two weeks. Brick.

LOGANSPOUT

Fire Station: \$35,000, Sixth and Race Sts. Archt., Carl Horn, Citizens Loan and Trust Bldg. Owner, Board of Public Works, City Hall. Plans in progress. Brick, stone trim.

***High School:** (side addition), 2 sty., 69x96, \$40,000, Argos, Ind. Archt., Allen and Garriott, Masonic Temple Bldg., Logansport. Owner, Board of School Trustees, Lloyd Slater, president, Argos, Ind. Plans in progress. Brick, stone trim, steam heat extensions, metal lockers. Will contain gymnasium and auditorium.

PETERSBURG

Hospital: \$10,000, remodeling from old Goodlet Morgan Homestead, located on the Winslow and Petersburg Roads. Owner, Petersburg Hospital Ass'n. Contemplated. Probably mature late winter. General alterations.

Manse: 2 sty. and bas. Owner, the Baptist

Church, Rev. F. R. Barnaby, pastor. Starting work.

Residences (2): Clifton Heights. Owner, Rev. F. R. Barnaby. Starting work. Frame.

PRINCETON

***War Memorial Building:** \$150,000, 3 sty. and bas. Archt., J. W. Gaddis, American National Bank Bldg., Vincennes. Owner, Board of Trustees, Gibson County Coliseum, Princeton, Ind. Architect making a few changes in the plans. Will advertise for bids some time this fall; rather undecided at present.

***Commercial Garage:** Princeton, 1 sty. and bas., 80x94. Archt., Osterhage and Sutton, Citizens Trust Bldg., Vincennes. Owner, Ed. Robinson (Chevrolet dealer), Princeton. General contract let to J. O. Sickels, Princeton. Heating and plumbing let to V. R. Smith, Princeton, Ind. Electric wiring to Gibson Electric Co., Princeton. Brick and steel.

SOUTH BEND

***Office Building:** (for physicians), 7 sty. and bas., 56x100, Colfax Ave., South Bend. Archt., Minchen and Apitz, 19 W. Jackson Blvd., Chicago, Ill. Owner, E. F. Allardt, South Bend. Archt. taking bids to close soon. H. G. Christman Construction Co., South Bend, are figuring general contract. Brick, reinforced concrete, fireproof construction, elevators, composition roof, steam heat, tile and marble work, special plumbing.

***Club House:** \$100,000, 2 sty. and bas., 66x160. Archt., E. A. Mayo, 53 W. Jackson Blvd., Chicago, Ill. Owner, the Progress Club, Mrs. Richard Elbel, president; Sarah Lyons, secretary; Mrs. Granville Ziegler, South Bend. Plans about completed. Architect ready for bids in two weeks. Brick, stone trim, steam heat, comp. roof. Will contain auditorium, studios, 2 stores, kitchen, dining room, stage.

BUILDING PERMITS ISSUED

Residence: \$8,000. Owner, Miss F. Gosbel, 508 E. Wenger St. Contract let to J. C. Hansen, 521 Sherman Ave. Brick veneer. Excavated.

Residence: \$7,000, 525 River Ave. Owner, A. W. Holycross, 216 S. Lafayette. Owner builds. Frame. Excavated.

Residence: \$7,000, 1110 N. O'Brien St. Owner, Mrs. J. A. Finkenbinder, 707 S. Columbia St. Excavated. Frame.

TERRE HAUTE

Boys' Dormitory: \$150,000, 2 sty. and bas., "Allendale," Terre Haute. Archt., Shourds-Stoner Co., 511 Tribune Bldg., Terre Haute. Owner, Gibault Home for Boys, Rev. Michael J. Gorman, in charge, Allendale, Terre Haute. Preliminary plans in progress. Mature late fall. Brick, stone trim.

Lodge Building: (Eagles), \$60,000, 2 sty. and bas. Archt., Reintjes and Floyd, 523 1/2 Ohio St. Owner, Eagles Lodge. Plans in progress. Architect will not ask for bids before March, 1924. Brick, stone trim.

School: (township grade), \$20,000, 1 sty., 70x32 (2 rooms), Richland Twp., Green County, Ind. Archt., Thomas and Allen, 26 1/2 S. Fifth St., Terre Haute. Owner, Amos Emery, trustee, Bloomfield, Ind. Plans in progress. Owner will not advertise for bids until late winter. Brick, stone trim.

Residence: (Dutch colonial), \$8,000. Archt., Reintjes and Floyd, 523 1/2 Ohio St. Owner, James L. Walsh. Plans in progress. Frame, furnace heat, asphalt shingle roof, tile bath, hardwood floors.

Gasoline Service Station: \$8,000, 5th and Cherry Sts. Private plans. Owner, The Standard Oil Co., Terre Haute. Plans in progress. Bids shortly. Brick.

Contracts Awarded

School (Administration Building and Library), \$30,000, 2 sty. and bas., 65x25. Archt., Shourds-Stoner Co., 511 Tribune Bldg. Owner, Board of School Trustees, Terre Haute. General contract let to North Raffin Construction Co. Heating and plumbing let to Prox and Burget, Terre Haute. Brick.

Residence: \$11,000. Archt., Reintjes and Floyd, 523 1/2 Ohio St. Owner, H. H. Jefferson. General contract let to E. J. Dooley. Excavated. Stucco.

Department Store: (general alterations), \$25,000. Archt., Reintjes and Floyd, 523 1/2 Ohio St. Owner, Terre Haute Dry Goods Co. Starting work. Day labor.

Printing Plant (general alterations), \$100,000, 823 Ohio St. Archt., Johnson, Miller & Miller, 30 N. 5th St. Owner, The Viquesney Printing Co., 614 Ohio St. Starting work. Owner builds. Work consists of rem. old garage into printing plant, new partitions, floors, rewiring, metal ceilings, plastering and painting.

Residence and Garage: \$10,000. Archt.,

Reintjes and Floyd, 523 1/2 Ohio St. Owner, W. E. Evans, 2110 N. 7th St. General contract let to R. E. Meyer, 1901 Washington Ave. Brick veneer. Foundation.

Schools (2): heating systems. Archt., Johnson, Miller & Miller, 30 N. 5th. Owner, Board of School Trustees. Contracts let to Freitag and Weinhardt Co.

Residence: \$8,000. Private plans. Owner, J. J. Anleitner, 105 S. 17th. Owner builds. On foundation. Frame.

VINCENNES

Church: \$40,000, 2 sty. and bas., Fairfield, Ill., Wayne County. Archt., Osterhage and Sutton, Citizens Trust Bldg., Vincennes. Owner, First Christian Church, Rev. J. A. Jacobs, pastor, Fairfield, Ill. Plans in progress. Brick, stone trim, art glass, steam heat, rolling partitions, pipe organ. Will contain Sunday school room, kitchen, dining room, social rooms.

Courthouse: \$307,000, Newport, Ind. Archt., H. L. Fillinger, Dana, Ind. Associate architect, John B. Bayard, Main St., Vincennes, Ind. Owner, Board of County Commissioners, Vermillion County, W. T. Sanders, E. E. Randolph, Joel Hollingsworth, and Mortimer Lewis, auditor, Newport, Ind. Plans in progress. Will probably not advertise for bids before March 1. Stone.

High School and Remodeling Gymnasium: \$145,000, Sullivan, Ind. Archt., John B. Bayard, Main St., Vincennes. Owner, Board of School Trustees, Sullivan, Ind. Plans nearing completion. Owner will advertise for bids this fall. Brick, stone trim.

Grade School: (add. and rem.), \$30,000, Bloomfield, Ind. Archt., Osterhage and Sutton, Citizens Trust Bldg., Vincennes. Owner, Board of School Trustees, Dr. E. R. Mason, president, Bloomfield. Revising plans. Mature late winter or early spring. Brick.

Window Glass Plant: (2 factory buildings, boiler house, power plant, warehouse and producer building) \$500,000, Vincennes. Archt. and Engineer, Simplex Engineering Co., Washington Trust Bldg., Washington, Pa. On foundation. Archt. builds. Brick and corrugated iron.

MISCELLANEOUS CITIES

Lebanon: Hospital (addition, 6 rooms). Archt., John Frost, Reporter Bldg. Owner, F. J. Witham Memorial Hospital, Lebanon. Preliminary plans in progress. Brick.

Odon: School (plumbing and water system). Archt., Osterhage and Sutton, Citizens Bank Bldg., Vincennes, Ind. Owner, Board of School Trustees, S. E. Pershing, secretary, Odon, Ind. Start work shortly.

Whiting: Bank Building (rem. and add.), Whiting. Archt., K. M. Vitzthum & Co., 605 N. Michigan Ave., Chicago, Ill. Owner, the First National Bank, F. J. Smith, president, Whiting. Architect taking bids to close at once. Brick, stone, 2 sty., bas. and mezzanine, 15x50, comp. roof, marble and tile work, sidewalk light, bronze

doors, steam heat, reinforced concrete vault doors, bank fixtures.

Mishawaka: Central High School, \$600,000. Archt., Perkins, Fellows & Hamilton, 814 Tower Court, Chicago, Ill. Owner, Board of School Trustees, Mishawaka, Ind. General contractor, Ralph Sollitt and Sons, South Bend, Ind., and 5 N. La Salle St., Chicago, Ill. Heating, ventilating and plumbing let to Chapman and Phelps, Sturgis, Mich. Tile work let to F. E. Gates Marble and Tile Co., Indianapolis. Excavating. Brick, reinf. concrete.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, William H. Evans, as trustee of Center school township, of Marion county, Indiana, and the advisory board of Center township, of said county and state, will, until the hour of 10 o'clock a. m. on Wednesday, the 10th day of October, 1923, at the office of said trustee, 215 East New York street, Room No. 216, in the city of Indianapolis, Ind., receive sealed bids for the erection, construction and completion of a two (2) story, and basement, brick, fireproof school building, for the use of said school township; also for construction and installation of a heating and ventilating system therefor; also for the construction and installation of the plumbing and water supply system therefor; also for the construction and installation therein of an electrical system with all proper fixtures; all in accordance with the drawings, plans and specifications for such proposed work adopted and approved, and as prepared by Donald Graham, architect, 1126 Hume-Mansur building, in said city, and now on file in the office of said trustee, and of said architect, and in the office of the state board of accounts in the Statehouse, Indianapolis, Ind. All bids therefor will be opened and publicly read at 10 o'clock a. m. on said 10th day of October, 1923, at the office of said trustee in the presence of said trustee and advisory board. Said building, and said systems connected therewith, are to be constructed on the school property of said township, located at Gale and Thirty-sixth streets, in said Center township.

Bidders desiring duplicate copies of the drawings and specifications for their own personal

use, may obtain the same by depositing \$10 for the general construction documents, which money so deposited will be refunded if such drawings and specifications are returned in good condition on or before the time above fixed for receiving bids.

All bids must be on Form No. 96 prescribed by the state board of accounts, and each bid must be accompanied by a certified check for not less than 3 per cent in amount of the gross bid submitted, payable to the trustee of Center school township, Marion county, Indiana, and the said check of any accepted bidder shall be cashed by the payee, and the amount thereof retained by him as agreed liquidated damages, in the event that such accepted bidder fails to enter into a proper contract for the work for which his bid shall be accepted, and to give the proper approved bond required, within ten days from and after the date of the acceptance of such bid. All checks of unsuccessful bidders will be returned to the respective bidders.

Within ten days from the date of the acceptance of any bid, the accepted bidder will be required to enter into a proper written contract to construct and complete the work covered by such bid, including the furnishing of all material and labor in conformity with the plans and specifications therefor, and also to furnish a proper bond with approved security for the faithful performance of such contract according to the terms thereof.

Each bidder will be required to state in his bid the date upon which he will complete his work. The respective contracts will contain the usual provisions on this subject.

Each bidder shall file with his bid the non-collusion affidavit required by statute and the successful bidder before entering into his contract shall present a certificate from the industrial board showing that he has complied with Section 68 of Indiana workmen's compensation act.

The said school trustee and said advisory board expressly reserve the right to reject any and all bids, and to take reasonable time to in-

vestigate the bids and qualifications of the respective bidders before acting on bids submitted. The estimated cost of the entire work is \$100,000.

Dated this 18th day of September, 1923.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for October 1, 1923, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the publisher of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, Indianapolis, Indiana; editor, Donald Campbell, Indianapolis, Indiana; managing editor, none; business manager, Donald Campbell, Indianapolis, Indiana.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock.) Donald Campbell, Indianapolis, Indiana.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is — (This information is required from daily publication only.)

DONALD CAMPBELL, Publisher.

Sworn to and subscribed before me this fourth day of October, 1923.

(SEAL) JUNE STEELE, Notary Public.

(My commission expires December 22, 1924.)

ARCHITECTS INVITED TO ATTEND BIG MEETING OF INDIANA BUILDING INTERESTS AT PURDUE UNIVERSITY

Same Scheduled For November 15

Tentative plans for a meeting of the Indiana Society of Architects have been worked out for November 15, that promise one of the most interesting gatherings ever held by that organization.

Recently an invitation was received from Prof. Knapp, of Purdue University, in charge of extension work at that institution, inviting the I. S. of A. to meet in Lafayette at Purdue. Prof. Knapp, who is one of the three representatives of the state engineering profession on the Advisory Committee of the Administrative Building Council of Indiana explained in his invitation that it was his idea to have the architects, contractors and engineers meet in joint session at Purdue and ask in Labor representatives also, suggesting November 15, as the date for the meeting.

The proposition was put up to the members of the Board of Directors who have signified their approval of it and have decided to make it a regional meeting to which all Indiana architects are to be invited.

As matters now stand it is proposed to hold an I. S. of A. directors meeting at 10 a. m., to be followed by a noon luncheon of architects at one of the Lafayette hotels.

Following the luncheon the architects are to be taken to Purdue University at 1:30 p. m., for a tour of inspection.

Then at 3 p. m., it is proposed to hold a joint conference of architects, contractors, engineers and Labor representatives in the auditorium at the university at which there will be discussions pertaining to the Administrative Building Council of Indiana, Standardized General Conditions of Specifications and Contracts and the Apprenticeship Problem. In addition the Extension Department of Purdue will provide speakers who will deliver talks on pertinent matters of interest to the men engaged in the building industry in Indiana.

In the evening there will be a banquet at the Home Economics Building at the university to which all those attending the meeting will be invited.

An invitation similar to the one ex-

tended to the state architects' society has also been sent to the other building interests in Indiana and indications are that this gathering will be one of the most representative meetings of building men ever held in this state.

It is significant of what organization is accomplishing when an institution of Purdue's calibre comes forward with such a broad invitation to the State Building Industry, according to it and its organizations of allied interests a recognition such as no institution has heretofore granted it at a single sitting.

This action on the part of Purdue University reflects credit upon the Indiana Society of Architects and the other organizations and should cause every architect to stop and consider whether the effort of the I. S. of A. has not been well spent. Then, too, every Indiana architect owes it to himself to see to it that his profession is largely represented at Lafayette on November 15.

NEWLY CHOSEN MEN TO REPRESENT I. S. OF A.—SEND IN THEIR ACCEPTANCES

Regret Lamentable Circumstances That Arose To Necessitate Their Selection.

Letters of acceptance of appointment and election to offices made by the Indiana Society of Architects have been received from the two members concerned.

Rodney W. Leonard, Frankfort, who was elected at the South Bend meeting as Second Vice President, to fill the vacancy caused by the death of Ewing Miller of Terre Haute, has acknowledged his notice of election and expresses his gratification at being selected to fill out the unexpired term of Mr. Miller, though voicing sincere regret at the loss sustained by the Society in the passing of that late lamented gentleman.

Walter Scholer, Lafayette, recently named to serve as one of the three representatives of the I. S. of A. on the Advisory Committee of the Administrative Building Council of Indiana, has written in to Secretary Merritt Harrison much in the same vein as Mr. Leonard, announcing his appreciation at being selected to represent the Society though deploping the fact that death had intruded to claim M. H. Johnson, Jr., Terre Haute, the original appointee.

PUBLIC OFFICIALS READILY HARKEN TO JUST PLAIN OF ARCHITECTS

Result of Real Committee Action

Every organization has its committees but that isn't saying they all function. Many committees are mere names and the only time they are ever heard of is at annual meetings when they are mentioned in connection with appointments. Therefore, it is refreshing to read of a committee that actually functions and it seems the Public Action Committee of the Illinois Society of Architects does that very thing.

The attention of the Illinois Society was called to the fact that there were flagrant infractions of the State License Law practiced at Winnetka, Ill., and the Public Action Committee was trotted out to function. The members investigated, learned the facts, and then put the matter up to the town board.

Did it do any good?

Read this as set forth by the Illinois Society Bulletin:

(Incorporated in 1869)

VILLAGE OF WINNETKA

August 30, 1923.

Illinois Society of Architects,
Gentlemen:

It has been brought to the attention of the officials of the Village of Winnetka that certain architects have been practicing in that village without having qualified under the Illinois law. We suggest that the village officials and the Illinois Society of Architects co-operate in eradicating this illegitimate practice and we are willing to do our full part in this. No architects' plans will be approved by the officials of this village unless the architects are able to produce the certificate from the Department of Registration and Education of the State of Illinois, showing that they have successfully passed the examinations and are authorized to practice in this State.

Yours very truly,

JOHN S. MILLER, Jr.,

President.

That is getting somewhere and shows what can be accomplished if real sincere, earnest committee effort is exerted.

LAST MONTH'S BUILDING ACTIVITY HELD UP WELL

Much House Work Under Way

September building operations in Evansville held up well and showed a brisk activity all through the month. There was a fairly good issuance of permits at the city building inspection department throughout the month though the projects licensed to go ahead ran to the smaller kinds of construction work, repairing, remodeling and additions, of which there was much.

Home building efforts continued active, the number of new residences standing well up in the list of permits issued.

There is still considerable new work contemplated according to reports and a busy fall is indicated if this prospective work develops.

HOLDS FOR OFF SEASON HOME CONSTRUCTION WORK

Advantages of Winter Building Advanced for Consideration of Prospective Home Builder

An argument for late fall and winter home building that contains much of merit and fact has been advanced by an Evansville lumber man who has spent fifty years in the building game. He declares that in view of labor conditions, as well as the market for other essentials in home building, the best time to build will be the fall and winter of 1923-24 for the reason that during the cold months the supply of labor is better, the mills are less crowded with rush orders and the general trend of prices in the things needed for building a home is down.

Not alone that, but when the home is completed, in the spring, it is usually the case that home furnishings of all sorts are cheaper than during the winter—there will be no need to heat the home for several months and in fact the home that is completed in early spring received about the same proportion of price favor in furnishing as it does in construction, which is considerable.

He further says that the excavation work can be completed while the ground

is soft and that the actual construction can start when the general rush has slowed down.

CHIPS AND SHAVINGS

The Scarborough-Davies Contracting company has just completed an addition to the plant of the Standard Brick company East Side plant, Green River road near Kentucky avenue.

J. R. Wilkinson, contractor, has started work on the erection of a one-story brick addition to the plant of the Star Furnace and Foundry company.

Plastering on the new addition to the city building, Walnut and Third streets, has been completed. Carpenters started placing sash in the new building this week.

NO UNEMPLOYMENT AMONG SKILLED BUILDING TRADES MECHANICS

Local Force Kept Busy All Through the Season

The effect of the building construction activity that has been sweeping over Ft. Wayne all season is very apparent at the State Employment Bureau. While hundreds of applications for work have been filed and most of these applicants placed there has been a very noticeable absence of appeals for employment from the building trades mechanics. Fact of the matter is there has been such a heavy local demand for building craftsmen that any skilled mechanic who really wanted to work had no trouble finding employment in Ft. Wayne the past season and even up to now. At times the contractors were actually put to it for help and at no time were building trades mechanics over plentiful.

Even common labor was in demand most of the time but of late there seems to have been a slack somewhere. During September over three hundred applications for work were filed with the bureau by laborers but most of these were readily aided to employment as there was a steady call for such help.

Such a state of affairs has been a fine thing for the city for the great

building program that has prevailed in 1923 has kept the building mechanics employed at good wages. These mechanics in turn are free buyers and spenders and have made business flourish.

WORK ON NEW THEATRE BUILDING HAS BEEN STARTED

New Amusement Structure for Calhoun Street

Excavation for the new \$80,000 theatre building at Pontiac and Calhoun streets is already under way and within a short time contracts for heating, lighting and minor work will be awarded, according to O. C. Brunswick, architect in charge.

The theatre building, which has not been named, is being built by Heliotes and Lambrakis. It is to be of a new type of terra cotta construction on the Calhoun street frontage. The main entrance will be in the center of the structure, as it faces the street, while on either side store space will be for rent. The upper floor of the two stories is to be reserved for offices.

FACTORY ADDITION CONTEMPLATED

\$50,000 Machine Shop to Be Built

An addition to the present machine shop of the Western Gas Construction company is being planned. It will cost approximately \$50,000.

The new building will be a two-story extension at the east end of the present machine shop along Buchanan street to Winter street and will be 90 feet long by 85 feet wide. The structure will be of brick and steel. It is expected that the plans will be completed soon and contract let in the near future so work can be started this fall.

The new addition is to be built to enlarge the facilities of the company and to relieve the present congestion of the shops.

SOUTH WAYNE BAPTIST CHURCH TO ERECT AUDITORIUM

Actual Building Will Probably Be Started in Early Spring

Another project to add to the already large amount of new church construction that has been going on in Ft. Wayne was announced the past week.

The members of the South Wayne Baptist Church are planning for the erection of a new \$50,000 auditorium addition to their Sunday School.

Plans have been completed to finance this project and those back of the proposition expect no trouble in getting it under way.

SOUNDS GOOD, BUT IS ONLY A DROP IN THE BUCKET

Even With Restrictions Removed Immigrants Won't Solve Labor Shortage in the Building Field

According to a recent report issued by the Department of Labor 307,522 male immigrants were admitted to this country during the fiscal year ending June 30th, last. Of this number 12,305 were carpenters; 2,550 were painters and glaziers; 1,197 were plumbers; 3,276 were masons; 521 were stone cutters; 512 were sheet metal workers; and 83,552 were common laborers. This will be welcome news for contractors, but when it is remembered that there was a shortage of practically 65,000 carpenters in 1920 as compared with 1910 it becomes evident at once that the number of foreign workmen coming to this country will never enable us to catch up with the shortage, even if the immigration laws should be more liberal. The only hope lies within the industry itself, and again it is urged that contractors not only take a more active interest in the problem of apprenticeship training, but insist that the building trades be taught in every public school of the country. A prominent educator recently made the statement that educational standards are rapidly changing and he made the prediction that courses of instruction ten years hence would be vastly different from what they are today. Contractors here is a real opportunity; as the transition is being made during the next few years insist that the proper training of apprentices in your industry be given the recognition that rightfully belongs to it. (Bulletin of the National Association of Building Trades Employers.)

CHANGES MADE IN MEMBERSHIP OF NEW STATE BUILDING BODY

New Appointments Necessitated Through Force of Circumstances

Recent developments have intruded to cause several changes in the original personnel of the Administrative Building Council of Indiana, the body that came into being as a result of an act passed by the last legislature, and for the establishment of which the contractors, architects, engineers and representatives of Labor throughout Indiana worked in co-operation.

A few weeks ago a vacancy in the advisory committee of the council was caused by the death at Terre Haute of Architect M. H. Johnson, Jr., one of the three representatives of the state architectural profession. The Indiana Society of Architects named Architect Walter Scholer, Lafayette, to succeed the late Mr. Johnson and the Governor has appointed him.

Another vacancy has now occurred in the administrative committee with the appointment to the Public Service Commission of Judge Samuel R. Artman, chairman of the Industrial Board. The latter, under the act governing the Building Council, was on the administrative committee and served as secretary, having been thus named by his colleagues.

Thos. Roberts, Lagrange, has been appointed to succeed Judge Artman on the Industrial Board and will also succeed to the administrative committee of the Building Council. However the naming of the new secretary to fill Judge Artman's place will be up to the committee members.

Work on perfecting plans for the action of the Building Council is going right along and a meeting of the advisory committee is scheduled for Friday, October 12.

PRESENT BUSINESS CONDUCT DEPLORED.

Forceful Speech Made By Prominent Credit Authority.

A most interesting business talk was made at Indianapolis last week by J. H. Tregoe, New York City, secretary of the National Association of Credit Men, that was most timely, who said in part: "Gentlemen: I am not in a mood to speak lightly today, in fact, I am of a serious turn of thought in view of the fact of recent occurrences, three great calamities, I would term them—the death of President Harding, the quake disaster in Japan and the breakdown of the League of Nations." He said, "though his faith had not forsaken him. He hoped," he said, "and believed in President Coolidge; he was cheered by the response made by America to Japan's call for aid, and he trusted the European threat of war would be brushed away somehow."

Turning to business, he continued: "I deplore the fact that enterprises are continuing to operate on a war basis and that profits are in jeopardy because costs can not be controlled."

"It seems that we haven't the backbone to tell some of these people to go to the loneliest spot of creation and stay there," alluding to those responsible for

the continuation of war-time costs.

He said, "the higher wage demands of the anthracite miners in the East was not justified, and if efforts are made to put on the railroads the increases granted to the miners, the solvency of the railroads will be threatened."

"We in our country can not remain happy with the rest of the world unhappy, and our business can not be at its best while the business of the rest of the world is unsettled."

Mr. Tregoe said credit men, in mercantile institutions, can do harm to some persons, as well as to their own firms, by giving them credit when they can not rightfully use it. He urged co-operation among the credit men, asserting that a credit manager who will not co-operate with others of his profession is retarding the profession.

Mr. Tregoe said that limited credit and currency in the eighties caused an era of low prices. The development of "credit technique," he said, caused business to take great strides and the proper handling of credit matters now will steady business and hold it to an even keel.

LEARN WHILE SLEEPING**New Method Should Make a Hit In Certain Circles.**

Times change, and with the times fashions in education.

The school text books inform us that Abraham Lincoln laid the foundation for his future greatness by studying in the flickering light of a log fire. Some years later burning the midnight oil became the distinguishing mark of the scholar. Then, in turn, Mr. Edison stepped in to substitute the midnight Mazda for the student lamp, and studying late into the night remained the price of future fame—at least according to the text-books and biographies. If any of the world's great leaders arranged their working schedules so that they could do all their work by daylight, and spend their nights in sleep, the books have overlooked the fact. However, there are many things relative to great men that the books don't tell us about.

Now, for another revolution in educational circles. It seems that hollow eyed wrestling with knotty problems of knowledge while the electric bill mounts higher and higher will become a thing of the past, and instead of such a situation the student will be in such a position that he can retire, switch on the radio, and have knowledge injected into his subconscious mind while he sleeps.

This may seem a college's boy's dream of paradise. It isn't, it is an up-to-date educational proposition that has to some extent been proved out by the United States Navy. Like many other important discoveries it was hit upon by chance. Chief Radio Mate Phinney of the naval air station at Pensacola, Fla., is the man who suggests that painless education is a possibility. He went to sleep at the switch and when he awoke found that he had been receiving sub-consciously all the time he was in dreamland.

This should be good news to college, and trade school students. Think what it would mean if bleak matters like differential calculus, latin, history, and how to master a trade could be left until bedtime. Waking hours could be devoted to the study of really important matters such as, the proper slant at which to tackle a flying end or full back, what to do when a partner doubles a no trump bid and whether trousers should or should not have cuffs. Then, too, why would it not be possible to put a few husky lads to bed, turn on the Radio suggester, and wake them up full fledged plasterers, brick-layers, lathers, or any other kind

of a craftsman desired. This latter method would prove of value to the contractors the country over as they are so short of help now days.

CALUMET BUILDING PROGRESS

Plans for the Crown Point Hotel building will be ready for estimates October 15.

A. C. Berry & Co., is making tentative plans for an ice cream factory for the Hammond Dairy Co. The building will be of brick construction 50x75 ft

Architect Mac Turner is preparing plans for a store and flat building to be erected in Indiana Harbor. The structure, 2 sty. and bas., 35x110 ft., is estimated to cost \$30,000.

The latter architect will also receive estimates about November 1, for the construction of a furniture store and flat building on State street for Julius Arkins. It will be 2 story and basement, 62x116 ft., to cost \$50,000.

Wm. Schmueser is having plans drawn for a brick garage and salesroom on Lafayette street, 50x110 ft. The Nash Sales Co., will occupy the building when completed.

NOT SO BAD**Building Operations While Small Held Up Well In Muncie In September**

While not developing any great volume of building construction in Muncie, September nevertheless had \$81,439 checked up to its credit by city building inspector G. O. Driscoll, which compared favorably with some of the previous months when building activity is supposed to hold sway. The figures most naturally would suggest that there weren't any large projects. There were 96 permits granted, mostly for repairing, remodeling and additions while a few covered small residences. This work of a lesser construction nature might seem on its face rather insignificant, and yet, to the building trades mechanics is most welcome as it is keeping them fairly well supplied with employment, a thing that to date has not caused much worry among the trades locally. Taken all in all the building business in Muncie this year has been good under a steady and continued activity.

MUNCIE ASSURED OF FINE MASONIC TEMPLE**Project of Long Standing Now To Be Completed.**

Now that the general contract for the superstructure of the new \$700,000 Ma-

sonic Temple at Main and Madison streets, has been awarded the late fall will be marked by the final steps toward the completion of the best building project brought out in Muncie for some time.

The local Masons have long contemplated a fine lodge home and are now in a position to realize their dream. The foundation was put in last winter and the structural steel frame contract was placed during the summer.

David Eshelman and Son, Anderson, were the successful bidders on the general contract for the completion of the superstructure. Work on the new building has been started.

When completed the new temple which is to be six stories high, 116x199 ft., will be one of the finest in the state. Plans for the building were prepared by Architects Kibele and Gerard of Muncie.

OHIO AND INDIANA CONTRACTORS MOVING AHEAD IN THE SAME DIRECTION**Actual Results Now Developing From Organized Co-Operative Effort.**

Indiana's action in establishing an Administrative Building Council finds a somewhat similar move in Ohio where a State Board of Building Standards has been created. Both bodies will have for their object better building construction for their respective States and are due to a great extent to the co-operation exercised by the contractors amongst themselves and acting in conjunction with other building interests.

Section Four of the Indiana law creating the Council states in effect that it shall be the duty of the council and it shall have power, jurisdiction and authority; to administer, execute and enforce any and all laws now in force or hereafter enacted in this state relative to the construction, repair, or maintenance of places of employment and public buildings, as shall render the same safe and sanitary.

To ascertain, fix and order such reasonable standards, rules, regulations, classifications, approval of plans and specifications of places of employment and public buildings as shall be necessary to carry out the purpose of this act.

In Ohio the purpose of the act establishing the Board of Building Standards is "To provide that all buildings within certain limitations shall be so constructed, erected, equipped and maintained that they shall be safe and sanitary for their intended use and occupancy. The act does not apply to single and two-family dwelling houses. The Board has the power to report to the General Assembly Amendments to existing statutes as well as additional legislation. It also has the power to establish equivalents, and to recommend to any public agency or municipality regulations pertaining to buildings."

Here is concrete evidence of the good that can be effected when contractors are organized, and benefit is bound to accrue in time not only to the contractors, but the whole building industry. Both acts are fine pieces of constructive legislation and are a credit to the progressive spirit that is slowly but surely being instilled into the ranks of the contractors of those two great sister states, Ohio and Indiana.

A. B. C. QUARTERLY CONFERENCE ASSUMES NEW PROPORTIONS.

To Be Held At Purdue University Jointly
With Other Building Interests.

Preliminary plans for the Third Quar-
terly Conference of the Associated Build-
ing Contractors of Indiana have been
worked out forecasting a meeting of in-
tense interest for the builders of the
State. The time set for the gathering is
set for November, 15th, at Lafayette,
Ind.

The present arrangements are the out-
growth of an invitation forwarded to the
State Contractors' Association by Prof.
W. A. Knapp, Purdue University, As-
sistant Director of Extension Service at
that institution, in which he expressed
pleasure if the contractors would consider
the holding of their next conference at
Lafayette with Purdue University as the
meeting place. He suggested that the
affair be made a joint conference with
the Indiana Architects and also the En-
gineers of the State, and also proposed

that representatives of Labor be invited
to be present.

This evident official recognition of the
various elements of the building industry
of Indiana and the efforts toward con-
structive co-operation that are being ex-
erted by these fundamental and basic
branches of the industry through the
agent of organization was most gratify-
ing to the builders who immediately took
the matter up with representatives of
the Indiana Society of Architects and
the Indiana Engineering Society to learn
if such a proposition was agreeable with
those organizations. The idea met with
instant favor and it was mutually agreed
to call the meeting for November 15th,
the gathering to be known as a "Con-
ference of Indiana Builders."

After a consultation with Secretary
Merritt Harrison, of the Indiana Society
of Architects, Field Representative J. H.
Owens, of the Associated Building Con-
tractors of Indiana, was delegated to
proceed to Lafayette early this week to
look into the preliminaries. There he
went into consultation with representa-
tives of Purdue University and commit-
tees composed of local architects and con-
tractors at which the machinery for the
proposed meeting was set in motion.

As matters now stand it is proposed
that separate meetings of the Directors
of the I. S. of A., and A. B. C., repre-
sentatives be held at 10 a. m., at one of
the University buildings to be designated
later. Following these morning sessions
there will be a joint luncheon of the con-
tractors, architects, engineers and Labor
representatives at noon at the Home
Economics Building of Purdue. At the
conclusion of the luncheon arrangements
will have been made to take all those
attending on a tour of inspection of the
University. This trip is to be made at
1:30 p. m.

Later on in the afternoon, about 3
p. m., the joint conference will be called

to order and a comprehensive program
relative to the building industry of Indi-
ana will be gone into. Among the mat-
ters to be brought up for special atten-
tion will be a discussion of the work of
the various organizations who have been
instrumental in the establishment of the
recently created Administrative Building
Council of Indiana, the work that has
been done and is contemplated by the
Advisory Committee of the Council;
Standardized Contracts; The effect of the
seasonable influence on building opera-
tions and a means of minimizing this in-
fluence so that rushes and slacks may be
avoided as far as possible and building
kept moving the year round.

That evening there will be a dinner at
one of the downtown hotels for all
delegates present for which another in-
teresting program is to be arranged.
This night affair will be in charge of the
Extension Service of Purdue and speak-
ers of well known ability are to be se-
cured to talk on building and construction
topics of especial interest to the archi-
tect, contractor, engineer and Labor man.

Similar notices, such as was received
by the Associated Building Contractors
of Indiana, were dispatched to the other
State building organizations and have
been accepted in the spirit in which they
were sent. This is the first meeting of
its kind ever called in the State and
since Purdue has fostered it a great deal
of interest has been aroused throughout
Indiana building circles. Wherever dis-
cussed expressions of favor are to be
heard and at this early date indications
are developing that betoken a large at-
tendance, the most representative of the
building interests ever held in Indiana.

Arrangements have been completed
whereby the Fowler Hotel, Lafayette,
will be the downtown headquarters at
which visiting delegates may assemble
and register after which they will be per-
sonally conducted to the University
where the conference is to be held.

***Township High School:** \$70,000, Jefferson Twp., Putnam county. Archt., Johnson, Miller and Miller, 30 N. 5th St., Terre Haute. Owner, Gilbert Ogles, Trustee, Rural Route No. 6, Greencastle, Ind. Revising plans. Ready for bids soon. Brick.

***School:** (administration bldg. and library). Archt., Johnson, Miller & Miller. Owner, Board of School Trustees. Contract let to North-Rafin Constr. Co. (Note corrections).

MISCELLANEOUS CITIES

Brazil: County Heating Plant, 1 sty., 30x44. Engineer, Carl E. Rouse, c/o The Stout Furniture Co., Brazil. Owner, Board of County Commissioners, Court House, Brazil. Plans about completed. Owner will advertise for bids in 10 days. Brick, 2 steam heating boilers with capacity of 10,000 square feet of radiation. The present smoke stack at the jail will be used.

***Crown Point:** Tuberculosis Hospital, \$350,000. Archt., Karl D. Norris, Calumet Bldg., East Chicago, Ind. Owner, Board of County Commissioners, George M. Foland, auditor, Crown Point, Ind. Bids ran high. All bids rejected. Will revise plans to lower cost.

***Kokomo:** Church and Sunday School, \$65,000. Kokomo, Union and Jefferson Sts. Archt., O. L. Lenski and Howell and Thomas, 151 Broad St., Columbus, Ohio. Plans in progress. Bids in 30 days. Brick, stone trim.

***Greencastle:** Fraternity House, \$60,000, Greencastle. Archt., Robert Frost Daggett, Consolidated Bldg., Indianapolis. Owner, Delta Kappa Epsilon, E. C. Atkins, Pres. Evans Woollen, Jr., V-P., Indianapolis. Excavating and foundation work, Walter R. Heath, Greencastle. Owner taking bids on superstructure. Walter R. Heath is figuring.

Jasper: Gas Filling Station, \$6,000, 9th and Main Sts. Private plans. Owner, The Standard Oil Co., Indianapolis and Jasper. General contract let to Edward Hemmerlein, Jasper. Brick. Start work shortly.

***Sellersburg:** High school, 60,000. Archt., Clifford Shopbell & Co., Furniture Bldg., Evansville, Ind. Owner, Board of School Trustees, Sellersburg, Ind. Owner taking bids to close October 25th. Brick, 10 rooms.

Contracts Awarded

***Michigan City:** Stores (2) and Offices (20), \$50,000. Michigan City. Archt., R. Levine and E. P. Rupert, 822 West 70th St., Chicago, Ill. Owner, R. Levine, 822 West 70th St., Chicago, Ill. General contract let to Rowley Bros., 332 S. LaSalle St., Chicago. Brick.

New Middletown: 5 miles southeast of Corydon, Ind. Church, \$20,000. Owner, Methodist Church, New Middletown, Ind. (Harrison county). Starting work. Brick. Owner builds.

Rochester: Motion picture theatre (rem. from garage). Owner, Theatre Company, R. K. & M. garage building. General contract let to Stephen Parcel, Rochester, Ind. General alterations and

raising walls 12 feet higher.

Tell City: Church, \$30,000. Owner, Methodist Church, Dr. Ward, Supt. Starting work. Brick, stone trim.

Tipton: Memorial Building (gymnasium, community rooms and auditorium), \$77,000. 1 sty. and bas., 88x150. Archt., Lewis Richards, Barlow Block, Tipton. Owner, Common Council off the City of Tipton and the Trustees of the Tipton War Memorial, S. R. Standerford, Mayor; Nina D. Smith, City Clerk, and Trustees E. B. Brink, Floyd Ramsay, J. C. Tolle, Tipton. General contract awarded to Milo Cutshall, Akron, Ind., \$70,780; heating and plumbing let to Compton and Sons Co., Tipton, \$7,640; electric work let to Carter Electric Co., Tipton, \$825.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SUPERINTENDENT'S RESIDENCE NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Control of the Indiana Boys' School at Plainfield, in Hendricks county, Indiana, will receive sealed proposals until 10:00 a. m., November 2, 1923, at the office of the superintendent of the Indiana Boys' School, for the construction of a superintendent's residence. Bids will be received on a sub-contract basis as follows: Excavation, grading, cement and concrete work; masonry work; miscellaneous iron and steel; rough lumber, carpenter and mill work; sheet metal and roofing; lathing, plastering and stucco work; tile work; painting and glazing; finished hardware; steam heating system; plumbing and water supply system; electrical work and electrical fixtures.

All bids will be opened and publicly read at a meeting of the Board of Control at 10:00 o'clock A. M., November 2, 1923, at the office of the superintendent, at the Indiana Boys' School, in Plainfield, Indiana.

All work is to be executed in accordance with plans and specifications prepared by Harrison and Turnock, architects and engineers, 500 Board of Trade Building, Indianapolis, Indiana, and approved by said Board of Control, and now on file in the office of said superintendent of the Indiana Boys' School at Plainfield, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and the office of the Architects and Engineers.

Bidders desiring duplicate copies of drawings and specifications for their own personal use may obtain same by depositing ten dollars for

the general construction documents, which money so deposited will be refunded if such drawings and specifications are returned in good condition on or before the time above fixed for receiving bids.

All bids must be on Form No. 96, prescribed by the State Board of Accounts.

Each bidder shall file with his bid the non-collusion affidavit required by statute and the successful bidder before entering into his contract shall present a certificate from the Industrial Board showing that he has complied with Section 68 of the Indiana Workmen's Compensation Act.

The said board of control expressly reserves the right to reject any and all bids, and to take reasonable time to investigate the bids and qualifications of the respective bidders before acting on bids—not more than ten days.

Dated this 11th day of October, 1923.

FRED L. THOMAS,
JESSE A. GREEN,
PERRY DAVIS,
EDWIN M. CARTER,
Board of Control,
Indiana Boys' School.
CHAS. A. MCGONAGLE, Supt.

Oct. 13-20, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given by William H. Penrod, trustee of Marion school township, Owen county, Indiana, that up to two o'clock p. m. on the 20th day of October, 1923, at his office at Patrickburg, Indiana, said trustee and his advisory board will receive sealed proposals for the construction of an eight-room school building to be erected at Patrickburg, Indiana, in accordance with the plans and specifications now on file at the office of said Superintendent.

The estimated cost of the proposed building is \$20,000.00. All bids must be made out on standard form of bid blanks, and accompanied by a certified check for 4% (four per centum) of the amount of the bid, guaranteeing that the bidder, if awarded the contract, will accept the same and give bond for the faithful performance of said contract. Such bond for the faithful performance of such contract. Such checks should be forfeited to the trustee in the event that the bidder to whom the contract is awarded, refuses or fails to enter into a proper contract with proper surety.

Duplicating copies of the plans and specifications are on file at the office of Johnson, Miller & Miller, architects, No. 30 North Fifth Street, Terre Haute, Indiana, and may be obtained by the bidders wishing to figure. The plans can also be obtained from the County Superintendent of Schools, Spencer, Indiana.

Trustee reserves the right to reject any or all bids.

Dated at Patrickburg, Indiana this 25th day of September, 1923.

WILLIAM H. PENROD, Trustee.
October 13, 1923.

Saves $\frac{1}{3}$ the fuel bill

Celotex is a rugged building lumber that has the insulating value of cork. Celotex sheathing and lining on walls and roof will cut fuel bills 25% to 35%.

Weather does not easily damage Celotex nor does ordinary rough usage.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture.

Besides sheathing and lining, Celotex is also used for plaster base, roof insulation, sound

deadening, exterior finish and stucco base. Stock sizes: Thickness, $\frac{7}{16}$ in.; width, 4 ft.; lengths, 8 ft., $8\frac{1}{2}$ ft., 9 ft., $9\frac{1}{2}$ ft., 10 ft. and 12 ft. Weight about 60 pounds per 100 sq. ft.

Manufactured by The Celotex Company, 111 W. Washington St., Chicago.

We want to put samples and full information in your hands. You may write the company in Chicago or one of the representatives below.

ENTERTAINING TALK ON EUROPE MADE TO INDIANAPOLIS ARCHI- TECTS BY ONE JUST RE- TURNED FROM THERE

Advantage of Association Meetings Again Demonstrated

When one is privileged to attend such enjoyable meetings as are held regularly each month by the Indianapolis Architects' Association the thought will not down that such gatherings mean much to the Capital City architects who take advantage of these sessions and would mean more and be of inestimable value to the local profession if all the city's architects would turn out. Then, too it seems a pity that every city of any size in Indiana is not possessed of a local architects' association where the members of the profession could gather regularly for a discussion of local conditions, matters of mutual interest, and an exchange of good fellowship. It is these features that make the Indianapolis architects' meetings something to which to look forward. Nor is the influence that they have bred unnoticeable, or the change for the better in the attitude of the men toward each other unfelt. With no intent to speak disparagingly of the profession, one can easily recall only a few years back when it would have been almost an impossibility to have gotten a crowd of architects together and maintained harmony for three hours at one sitting. Today the architects not only gather and preserve a harmonious atmosphere, but they freely discuss their work and actually get together in an effort to reach a solution that will eliminate the drawbacks that are encountered in the practice, seek for means to advance the profession and make for better buildings. There can be no question as to the broader view that has been brought to and instilled in the architects by this medium of meetings that has permitted them to become better acquainted and created a fine developing sense of individual understanding. Sometimes the discussions are heated and there is a wide variance of opinion and yet there is always prevalent a willingness to listen to an expression of views in an effort to seek the best way out of a situation or reach an amicable,

just understanding in the settlement of disputes.

There have been times even up to recent dates when criticisms of certain practices and methods have been indulged in and yet the entering into such criticisms has in the end, thrown a new light on matters that has cleared the atmosphere and brought a ray of enlightenment to benefit all concerned.

There was a regular monthly meeting again Wednesday of the Indianapolis Architects' Association at the Hoosier Athletic Club, which began with the customary 6:30 p. m. dinner, paving the way to several pleasant hours to follow.

Routine business was quickly dispensed with and Clarence Martindale, former well-known Indianapolis architect who has just returned from two and a half years sojourning in Europe, was given the floor. Mr. Martindale made an informal talk touching upon his itinerant, things architecturally as he found them; also he threw an interesting light upon conditions as they exist in Europe today as gained by one passing through the various countries.

His reference to the architecture of England, France, Germany, Switzerland, Austria and Italy was most interesting. He spoke of the design, treatment of details, use of materials and interior plans. His contrast of the efforts of European and American architects and the results achieved was most interesting. In detail, he elaborated upon the impressions gained by an American architect traveling on the continent studying the architecture of the various countries. He referred to the old and the new and made special mention of the beauty of the ancient Greek temples and theaters erected many years before Christ, the massiveness of Roman arenas still to be found here and there and the exquisite minuteness with which interior detail and furnishings were carried out in projects worth while.

Then, too, he spoke briefly of studio life and said there was a seriousness to be found in the work of American and English students not apparent among the French who are groping around continually with little success for new ideas. He further stated that the products of the students today do not show the merit

very noticeable in the work of the students ten or fifteen years ago.

The speaker said there was not much building, except housing projects, in the countries he visited. As to labor conditions, he said there is no labor trouble to speak of outside of England. On the continent everybody is working, but in England "The Dole" has created a chaotic condition, for it has put a premium on idleness, men knowing that when unemployed they can collect a government allowance that will sustain them. Strikers, too, have taken advantage of "The Dole" and by it have been enabled to hold out and continue their strikes. Intended to relieve the unemployment situation in England, "The Dole" legislation has simply aggravated matters until working conditions and industry is in a bad way.

Architect Martindale's remarks delivered along informal lines and interspersed with humorous incidents that he had experienced made up a most interesting evening.

The speaker announced that he expected to return to Europe in April to resume the study of sculptoring that he has taken up.

LAFAYETTE JOINT CONFERENCE ENDORSED

Move Started to Have Good Crowd of Indianapolis Architects Present

Mention was made Wednesday night at the meeting of the Indianapolis architects to the proposed regional meeting of the I. S. of A. and the joint conference of architects, contractors, engineers and Labor representatives to be held at Purdue University, Lafayette, November 15, and the idea was heartily endorsed.

Architect Herbert Foltz, who attended the joint meeting of architects and contractors held in South Bend in September spoke glowingly of that affair and suggested that the Indianapolis architects should take more of a hand in these meetings. The architects present at Wednesday night's gathering intimated that they favored the trip to Lafayette November 15 and would work to interest a large delegation of Indianapolis architects to make the journey.

BRISK ACTION TOWARD HOME BUILDING CONTINUES

Is the Real Feature in Local Building
Construction Circles

Activity in Evansville building construction still holds mainly to home building operations which are brisk and if anything more active this fall than ever before. The demand for homes is still heavy despite the fact that many hundreds of houses have been erected this season. Evansville, like other cities, had a big crimp put in her housing facilities by the non-construction war period and then came the readjustment spell before real building effort could be put forward. This forced discontinuance, and extended lull, of building operations as a result of circumstances created a condition wherein the city found herself really cramped for structures, especially homes, and a demand grew to such proportions that all the effort put forth since building activity was resumed has not sufficed to raise the supply up to needed requirements.

However, each succeeding year has found Evansville building harder than ever and 1923 is no exception to that rule. There is every indication that the home construction effort being put forth this fall will continue right on up to and into the winter with the indication that spring will usher in another great building year.

While private owners are carrying forward their contemplations on a good scale, there is also a large volume of speculative construction work in progress that in its own way, serves to fill the breach and enables citizens to own homes who otherwise could not do so.

COMMON BRICK PROVES FIRE RESISTIVE POWER UNDER SEVERE TEST.

U. S. Bureau Makes Experiment

A startling discovery has been made by the U. S. Bureau of Standards, which may prove an epoch-making event in the efforts of brick manufacturers toward producing homes of lower cost. A test

structure of the new Ideal Hollow Wall—the low cost wall developed recently by the whole common brick industry—has come with flying colors through a severe fire test made by the Bureau, the test structure standing up well after the experiment.

A small building was specially constructed for the test with Ideal walls eight inches thick, and the interior filled with discarded wooden furniture. Everything combustible within the building was completely destroyed, but the brickwork showed no ill effects whatever.

One of the recent plant additions in Evansville is that for the National Furniture company's plant, West Keller St., now under construction by B. B. Johnson and Son, brick contractors.

FT. WAYNE BUILDING FIGURES FOR SEPT., 1923 SURPASS THOSE OF INDIANAPOLIS.

Local Operations Score a Triumph

One of those rare occasions as it relates to building and one that is most gratifying to Ft. Wayne occurred in September when the local building returns for the month surpassed those reported from Indianapolis. This is the first time in years that Ft. Wayne over a month's period has been able to outstrip Indianapolis in the building construction race and the chances are that it will be some time before there is a repetition of such a performance. The fact remains that Ft. Wayne stepped out in front of the Capital City in September and local builders are proud of the last month's record.

While Indianapolis issued thirteen hundred and twenty-one more permits than Ft. Wayne did the latter city's estimated valuations on the work for which permits were granted ran \$127,981 ahead of the total estimated valuations posted at Indianapolis.

The returns from the city inspection departments of the two cities for September, 1923, are:

Cities	Per.	Est. Val.
Ft. Wayne	175	\$1,707,930
Indianapolis	1496	1,656,949

DEATH TAKES EXCHANGE MEMBER

Announcement of the death a few days ago of Ray Vodemark caused quite a shock and sorrow in Fort Wayne building circles where he was well known.

The deceased was secretary and treasurer of the J. C. Kreidt Company, sheet metal contractors. The funeral was held Saturday, October 6.

DECIDED IMPROVEMENT IN BUILDING IN FT. WAYNE REGISTERED IN SEPTEMBER.

Big Gain Shown Over August

Only a few years back there was a commonly used and favorite expression heard on all sides, "They never come back." However, the worm has turned since those days, first the Allies "came back" during the great war, and "come backs" in business, athletics, all kinds of sport and other walks of life have been the rule rather than an exception of late years.

In line with that thought building construction in Ft. Wayne in September, after quite a slump in August staged a real "come back" not only showing a gain of \$1,076,727, or 154.2%, over the August building volume, but also a decided gain over June and July. The official figures given out by the city building inspection department show that September was the third best building month experienced in Ft. Wayne this season.

As compared with the local returns for the corresponding period a year ago the September figures while revealing that fewer permits were issued nevertheless the estimated valuations ran \$1,066,965 more than those recorded in September, 1922, a gain of 150%.

The official figures are:

Months	Per.	Est. Val.-
September, 1923	175	\$1,774,930
September, 1922	225	707,965

PROSPECT OF GOOD BUILDING SPELL RIGHT ALONG

Renewed Activity Noticeable in Construction Circles

Evidence at hand indicates that local building operations will continue active even into the late winter season. Residence building operations have shown little or no let up to date and there is still much talk of contemplated dwellings. In addition to this work a new activity has developed along larger structural lines all of which is most encouraging at this late period of the building season.

None this week.

BACKED UP ONCE MORE

Indianapolis Building Figures for September Prove Disappointing

Again the building volume turned in at Indianapolis the past month showed that the tendency on the part of owners to slow up on building operations is still prevalent. While there were eighty-four more permits issued in September than in August, the total estimated valuation was 5.7 per cent less. The figures for the month just past were the second lowest monthly ones recorded in Indianapolis in 1923. As compared with September, 1922, they showed a 14.1 per cent loss.

Two other Indiana cities registered better building permit records than Indianapolis, who with \$1,656,949, trailed South Bend (\$2,208,688) and Fort Wayne (\$1,774,930). Though South Bend took the lead of Indiana cities in June building it is the first time in years that Indianapolis has been crowded back into third place, a circumstance that bespeaks the great amount of building construction work that is being carried on in South Bend and Fort Wayne.

The September 1922 and 1923, building returns for Indianapolis are:

Month	Per.	Est. Val.
September, 1923	1,496	\$1,656,949
September, 1922	1,163	1,928,956

WHAT DID YOU LOSE IN THE FIRE?

Every Fire Costs You Indirectly

What did you lose in the fire?

What, you didn't have any fire? Well, you lost anyway. Even if you had a fire and were fully insured, you were a big loser. Why? Because the insurance companies are collecting from you and from all of us enough money in premiums

to cover all their "losses" and show them a profit. This is no reflection on the insurance companies. They have to do that or go out of business.

But why should we pay for the other fellow's carelessness? The idea in this question is not to evade the payment of insurance premiums, but to lessen the amount of them by working together for the elimination of carelessness and the use of flimsy building construction. The man who builds with inflammable materials is just as much at fault as the man who carelessly tosses away a burning match, or who uses wood containers for the hot ashes from his stove or furnace. When fire-safe construction such as concrete and other recognized materials costs only 3 to 5 per cent more, the man who deliberately tempts fate with inflammable construction, literally hasn't got a leg to stand on.

In the face of these facts, who is more responsible than the builder of inflammable structures, for our staggering annual fire loss of more than 500 million dollars and the toll of 15,000 lives and 17,000 injuries?

NO WAY TO GET AROUND THIS

Shouldering of Responsibilities by Members Essential to Life of Any Organization

The successful operation of any employers' organization depends upon the loyalty of its members and the support morally and financially they give it. No association can hope to continue with a membership who duck their obligations, fail to pay their dues and leave it to someone else to supply the funds to properly sustain it.—Bulletin of the Building Construction Employers' Association, Chicago, Ill.

LUMBER PRICES 30% OFF THOSE OF 1920

Further Declines Hardly Likely

Retail lumber prices today are nearly 30 per cent lower than they were during the peak of 1920 as the statement recently issued by the National Lumber Manufacturers Association. Whether or not the price of lumber will drop still further is problematical in the face of the forest area of the country constantly decreasing, and the distance from the supply to the industrial centers increasing. There will be undoubtedly a stiffening of prices on Pacific coast lumber as a result of the earthquake in Japan inasmuch as that country is almost wholly dependent on the northwest for its supply.

PRODUCTION OF LUMBER, LATH AND SHINGLES, 1922-1921

Government Figures Interesting

The Department of Commerce announces that the total production of lumber during 1922 in the United States was 31,426,922,000 feet. This is an increase of 16.5 per cent when compared with the cut reported for 1921, but a decrease of 9 per cent compared with the cut for 1919.

The production of lath was reported as 2,905,595,000 in 1922 and 1,970,696,000 in 1921, and the production of shin-

gles 8,068,585,000 in 1922 and 6,843,187,000 in 1921.

Comparing the statistics for 1922 with those for 1921, the greatest changes are shown for the western states, the states in that region apparently having recovered from the severe depression of 1921.

In 1922 yellow pine contributed 36.6 per cent of the total cut for all kinds of wood, Douglas fir 21.4 per cent, and western yellow pine 6.6 per cent.

The figures for 1921 and 1922 are not strictly comparable. In 1922 the output of mills cutting under 50 thousand feet each was omitted and in 1921 the cut of custom mills was omitted. The cut of neither class, however, materially affected the totals.

BUILDING PERMITS

(\$4,500 and Over)

Week of October 4 to October 11

Business Building: \$20,000, 44x89, Washington and Rural Sts. Archt., Fernor S. Cannon, 21 Virginia Ave. Owner, R. D. Brown, c/o architect. General contract awarded to Ostrom Realty Co., Peoples Bank Bldg. Brick.

Residences (2): \$11,000 each, 301-307 Buckingham Drive. Private plans. Owner and builder, Realtor Building Co., Lemcke Bldg. Excavating

Residence: \$7,500, 4611 Penn. Owner, James Miller. Contract let to William F. Nelson, 4211 College. Excavating.

Residence (Double): \$8,000, 4825-27 College. Owner, A. H. M. Graves, 3538 N. Meridian St. General contract let to I. J. Clark, 319 W. 28th St. Excavating.

Residence: \$8,750, 5137 Washington Blvd. Owner, Columbia Building Co. Owner builds. Excavating.

Residence: \$8,500, 41 W. 48th. Owner, George W. Watkins, 415 E. 50th. Owner builds. Frame. Excavating.

Residence: \$7,500, 3859 Winthrop. Owner, C. J. Williams, 423 Berkley Road. Owner builds. Excavating.

Residence: \$6,000, 5274 Winthrop. Owner, G. B. Taylor, at site. Excavating.

Residence: \$7,000, 210 Berkley Road. Owner, J. M. Ritter, 324 Berkley Road. Owner builds. Frame. Excavating.

Residence: \$5,000, 752 Kreber. Owner, L. M. Dunning, at site. Excavating.

Residence: \$4,200, 2259 N. La Salle. Owner, W. C. Porter, at site. Contract let to L. W. Schupp.

Residence: \$5,000, 2136 Park. Owner, Mrs. Emma Tesler, at site. Contract to William Hickman, 1206 N. Tuxedo.

Residence: \$4,500, 1031 Reisner. Owner, Andrew Miller. Contract let to K. E. Clark.

Residence: \$5,000, 3201 W. Tenth. Owner, Frank Kanalec, 1138 N. Sheffield.

Residence: \$5,000, 4725 Sunset. Owner, Irene M. Spence, 440 E. Vermont St.

Residences (2) doubles: \$7,000 each, 3225-27 and 3250-52 Bellefontaine. Owner, Rollins Purcell, at site.

Residence: \$7,000, 4825 Washington Blvd. Owner, Frank Woolling, 408 E. 50th. Owner builds.

Residence: \$8,000, 5340 Julian. Owner, J. Mullane, 5448 East Washington. General contract let to Theodore Sander, 401 Orange St.

Residence: \$7,000, 1125 N. Arsenal. Owner, J. J. McEowen, 2018 Brookside Ave.

Residences (2): \$4,500 each, 227 and 231 N. Tremont. Owner, Frank Perkins, 254 N. Pershing. Owner builds.

Residence: \$6,000, 5207 E. Washington. Owner, John Larison, 5117 E. Washington. Day work. Excavating.

Residence: \$6,500, 5239 N. New Jersey. Owner, R. Elerick. Contract let to I. N. Darter, 3015 Boulevard Place.

Residences (2): \$3,200 each, 4507-4465 Winthrop. Owner, Dollman-Hauser Realty Co. Frame.

Residence (Double): \$5,000, 5334-36 College. Owner, C. E. Holladay, at site.

Tuberculosis Hospital Promoters Engulfed by High Estimate Waves

The inability of contractors who figured the proposed tuberculosis sanitarium at Crown Point to come within the estimate of \$315,000 caused the calling of a special meeting October 8th of the architect, Karl D. Norris, East Chicago, members of the Lake County Manufacturers' Association, representatives from the Tuberculosis and Medical Associations and the county commissioners at which time a ways and means were discussed for carrying out the original plan to erect the sanitarium. It is intimated that to follow the present proposed plan for the new institution the construction costs would reach nearly \$600,000, which is approximately double the appropriation that was made by the County Council.

TRACK ELEVATION SCHEME NOW UNDER CONSIDERATION

Estimated to Cost \$5,985,000

There was a big meeting, not so big as important, in Hammond the other night that has a great bearing on the future of the city. Assembled at the gathering were the city officials, members of the Chamber of Commerce, and the chief engineers of the various railroads entering the city. The topic up for consideration was track elevation and the engineers have turned over to the city officials proposed plans for the work. The preliminary estimates submitted by the railroad engineers are as follows: Erie, \$2,200,000; Michigan Central, \$1,750,000; Nickel Plate, \$1,018; Monon, \$1,017,000. The plans and estimates were left with the public officials for future study and another meeting of the above men and organizations is to be called later; no date having been decided upon at this time.

CALUMET BUILDING PROGRESS

Architects report that there has been a noticeable decrease in the demand for new plans. However, the speculative home builders are going right along at a merry clip.

Architects J. T. Hutton & Son are preparing plans for a garage and auto sales building at 115-117 Lafayette street for the Grover-Bartlett-Nash Co. W. H. Beckman has been awarded the contract for the foundation.

FIGHT THIS SACRIFICE

Battle Cry for Contractors, "Build So It Won't Burn"

Did you know that every minute of the year we pay out \$1,000 for fire losses, and that one human life is consumed by flames every half hour? A thousand dollars a minute—two lives an hour—a terrible toll, and a needless one.

It has been estimated that 1,500 fires break out in the United States every twenty-four hours. Every one of these fires is caused by some improper condition, usually one which is the result of negligence, and which can be removed with little or no difficulty.

Anyone who allows rubbish to accumulate in or near a building is just as negligent as he who carelessly tosses his glowing match into the pile. Electric irons and other appliances, when left turned on, cause many fires. The use of wooden boxes for ashes is like sending an invitation to the nearest fire station. Metal containers for matches and for oil mops and dust cloths will prevent many fires. Eighty-five per cent of all fires are preventable—that is, are the result of downright carelessness. Every owner can help cut down this waste by removing these causes around his property.

The exclusive use of fireproof structures would cut our fire loss to but a fraction of its present figure. And when confronted by the fact that fire-safe construction, such as concrete in various forms as well as other types costs but 3 to 5 per cent more than inflammable construction no building owner can justify himself in risking a contribution to our already tremendous fire loss, to say nothing of our sacrifice of human lives.

TREND OF COMMODITY PRICES

General Inclination Upward Over Figures a Year Ago

The September issue of the Purchasing Agent contains a chart showing the trend of commodity prices since September 1, 1922, in which 100 is used as a base and the date of January 1, 1922, as the point from which computations are made. Following is a list of a few commodities of special interest to builders:

	Sept. 1922	Sept. 1923
Building materials	101.2	110.6
Coal	-----	108.8
Steel products	116.5	137.8
Lumber	93.1	105.5
Paint products	103.5	99.3

BIG INDUSTRIAL EXPOSITION LAUNCHED AT HAMMOND**City Indulging in Holiday Fest**

Everybody in Hammond for the past few weeks has been busy as an old hen in a truck patch getting ready for the opening of the big Industrial, Auto and Style Show that came into being Monday, October 8. The city was all dressed up in gala attire and at noon Monday things got under way with an elaborate parade through the business district, an affair that was witnessed by thousands of home folks and visitors. A big historical pageant was a real feature. There was the old-fashioned prairie schooner, oxen drawn, and a big band of Menominee Indians, frontiersmen and all that went with the pioneer days. Then various floats depicted the development of the Calumet district down to the present day. The official opening was a regular lid lifter and ushered in the largest and most elaborate exposition ever put across in this section of the state. People are coming in from far and near, indicating an attendance that will even exceed the anticipations of the exposition promoters.

IMPORTANT IMPROVEMENTS AT HAMMOND COMPLETED**Should Eliminate Old Annoyances**

A spirit of thanksgiving has taken hold of Hammondites. The new waterworks has been put into operation and also the pumps at the sewage disposal plant have been started. Everybody is living in hopes that the new order will mean a passing of the old water famine bogey that always popped up in dry weather, and that there will be no more backing up of the sewers when heavy rains set in. In the old days it was a great situation, dry weather set up a cry for water and when the drought was ended steady rain brought fears of flood. Let's hope "them days is gone forever."

SEPTEMBER BUILDING FIGURES**Gain Shown Over Last Year**

City Building Inspector Henry Vis came forward with the Hammond building statistics for the month of September showing that the operations this year were in excess of those for the corresponding period in 1922. This latest dope adds a little more to the 1923 figures

BURNING UP HALF A BILLION A YEAR

Appalling Waste Traceable In Great Measure to Carelessness

In spite of its enlightened populace, unequalled prosperity and industrial leadership, our nation is paying an immense annual tribute to a powerful enemy. War is being waged against this enemy continually, but our fight is made ineffective by indifference within our own ranks. That enemy is FIRE.

Our tribute to this enemy in 1922, as shown by Bradstreet's, was \$410,889,350. Uninsured and unreported losses would bring this figure to well over \$500,000,000. Think of burning up half a billion dollars' worth of bank notes! And that is exactly what we are doing.

A comparison of our losses with those of our European neighbors puts us to shame. In 1913, the year before the great war, the losses of leading European nations ranged from 11 cents to 49 cents per capita. At that time our losses were \$2.10 per capita—more than four times the highest European figure.

The worst of it is that in spite of much effort expended on educating the public to greater care and the use of firesafe construction, in nine years the American per capita fire loss has jumped from \$2.10 to \$4.75—an increase of 125 per cent.

When we compare the thickly populated European nations with our own open spaces and comfortably settled cities, all excuse for our fire waste vanishes. European nations long ago learned to use firesafe building materials and in their cities inflammable dwellings are not permitted. America, too, can reduce her immense annual fire loss to negligible proportions by insisting on firesafe construction.

SOUTH BEND AGAIN LEADS STATE IN BUILDING CONSTRUCTION FOR SEPTEMBER, A MONTH FEATURED BY NUMEROUS GAINS

Official Figures Show the Month to Have Been Best Building Period Since the
Late Spring

Several outstanding features mark the building performance put across in Indiana during the month of September as shown by the reports made by the building inspectors of the ten leading cities from which official building figures are obtainable. First and foremost, the figures show that the month just past was the best monthly building period in Indiana since May, individual gains of nice proportion being registered over June, July and August. Also a gain of 55.4 per cent was made on September, 1922, 726 more permits having been issued this September than during the corresponding period a year ago. No comparative figures are available at Muncie as no 1922 building record was kept there at that time. However, of the other nine cities seven showed gains and two registered losses when compared with the September, 1922, figures. Seven showed gains and three showed losses as against the August, 1923, record.

South Bend once again stepped out in front to lead the entire state in building in September, turning in \$2,208,688 worth of work for which permits were granted. Following South Bend came Fort Wayne with \$1,774,930, while Indianapolis still showing evidences of a slump, apparent for the past several months, had to take third place, a situation unusual in Indiana building construction annals.

In the matter of gain over the building record of September, 1922, Evansville showed to best advantage, with ninety-four more permits granted and 160 per cent advance in estimated valuation. Fort Wayne registered 150.7 per cent gain, though issuing fifty less permits than a year ago. Gary gained 124.2 per cent; South Bend showed 123 more permits and 107.3 per cent gain; Elkhart, nine more permits, 59 per cent gain; Terre Haute, 101 more permits, 25.3 per cent gain; Hammond, twenty more permits, 8 per cent gain. Indianapolis issued 333 more permits but registered a 14.1 per cent loss; Richmond's loss was 44.8 per cent.

The official figures for September, 1923, and September, 1922, are:

Cities	September, 1923		September, 1922	
	Permits	Est. Val.	Permits	Est. Val.
Elkhart	23	\$ 55,400	14	\$ 34,950
Evansville	214	291,320	120	111,729
Fort Wayne	175	1,774,930	225	707,965
Gary	—	384,416	—	171,440
Hammond	94	155,450	74	154,200
Indianapolis	1,496	1,656,949	1,163	1,928,956
Muncie	96	81,439	No Record	
Richmond	—	38,800	—	70,417
South Bend	500	2,208,688	377	1,065,104
Terre Haute	269	212,181	168	169,288
Total	2,867	\$6,859,573	2,141	\$4,414,049

LABOR BANKS INCREASING

Looks Like Someone Is Saving Money

There are now ten Labor Union banks scattered through the country, with at least 13 more projected. The wage-earners of the country are no longer estimating their quick assets at millions but at hundreds of millions.

ARTISTIC AND LASTING EFFECT NOW POSSIBLE WITH CAST STONE.

Has Big Influence In Holding Down Con- struction Costs.

Cast stone for building trim, an in-

novation in Indiana, has proved its usefulness and is growing in popularity and use in direct proportion as architects are coming to the realization that the product is of a material as lasting as natural stone and can be made in many textures and colors an impossibility with natural stone itself. Ornamental details can be obtained with cast stone at a nominal cost whereas the same design carved in natural stone would make the cost prohibitive.

Cast stone is being manufactured steadily now by the Klinestone Manufacturing Company, Fourteenth street and Sherman Drive, Indianapolis, and is being furnished for industrial buildings, schools, churches, apartments, public buildings and homes.

The illustration is made from a photograph of a lot of door trim for the Magnolia Building.

All trim on this twenty-four story office building was assembled at the CARNAHAN factory with EVANS RING JOINT and given a coat of stain and shellac enabling the contractor to finish the building in three months after the millwork order was placed.

Better quality, EXCELLENT SERVICE and a whole-hearted co-operation with the Architect and Contractor have been responsible for repeat orders.

Prices will be furnished gladly upon receipt of lists covering your requirements for special millwork.

*Store and Apartment (1 store, 3 apts.), \$18,000. Archt., W. D. Teeple. Owner, D. Feingold Co., 508 S. Eddy St. Plans completed. Brick.

*Store and Shops: 2 sty., 30x46, Eddy and North Shore Blvd. Archt. and owner, W. D. Teeple. General contractor, Paul Lieder, 1343 Randolph St. Foundation in. Brick.

*Stores and Apartment: \$12,000. Owner, Jacob Paskin, 1610 S. Prairie. Contract let to J. Belkin, 309 Wenger St. Brick veneer.

Warehouse: \$7,500, 416-20 Fellows St. Owner, W. W. Sibley, 1295 St. Joe St. Starting work.

TERRE HAUTE

*Commercial Garage: \$50,000, 1 and 2 sty., 60x140, N. Sixth St. Archt., Shourds-Stoner Co., 511 Tribune Bldg. Owner, the Deming Land Co., L. E. Waterman, president. General contract awarded to William Caton and Son, 900 S. Eighth St. Heating and plumbing let to O. A. Toelle. Electric wiring let to Miller Electric Co., all of Terre Haute. Brick, reinforced concrete, wood and steel.

MISCELLANEOUS CITIES

*Brazil: County Heating Plant, 1 sty., 30x44. Engineer, Carl E. Rouse, c/o the Stout Furniture Co., Brazil. Owner, Board of County Commissioners, Court House, Brazil. Plans about completed. Owner taking bids to close November 6 at 11 a. m. Brick, 2 steam heating boilers with capacity of 10,000 square feet of radiation. The present smokstack at the jail will be used. Charles J. McCulloch, auditor.

Connersville: Automobile Building (will include 10 store rooms, storage room, sale room, repair room, offices). Owner, the Connersville Dealers' Association. The firms interested in the project are: Jackson, Monroe agency; Green Brothers, Overland agency; Fichtman & Cooley, Ford agency; Stewart Sales Company, Oldsmobile; Orville Baker, Jewett; Dragoo & Jerman, Oakland; G. C. Decamp, Reo; Ward Halliday, Buick; Harry Myers, Dodge; Sam Balsam, Lexington and Durant; Worster-Handley Hardware Company, Studebaker; George R. Beeson, Chevrolet.

Gary: Stores (6), Apartments (8), \$60,000. Archt., L. H. Warriner, 673 Broadway. Owner, McGrams Bros., 694 Broadway. Owner taking bids. Brick, stone trim, comp. roof, steam heat, In-A-Door beds, refrigerators, terrazzo and tile work.

*Huntington: Church (1 sty. add., 40x60, and general alterations), \$20,000. Archt., A. C. Berry & Co., Ruff Bldg., Hammond, Ind. Owner, First Baptist Church, Rev. C. M. Brodie, pastor, Huntington. Owner taking bids to close about November 1. Brick, brick tower, tile roof, comp roof, art glass.

Muncie: Manufacturing Plant (new buildings and extensions). Owner, Ball Bros. Manufacturing Co., Muncie, Ind. Preliminary plans in progress. Brick, steel, concrete, steel sash, comp. roofs. Definite data, later.

Monticello: City Hall (2 sty. add., 28x26 and 20x20) and general alterations, \$10,000. Chalmers, Ind. Archt., Emanuel Young, Monticello. Owner, Town Board, John Ward, Clerk, Chalmers, Ind. Plans completed. Owner will advertise for bids shortly. Brick.

Contracts Awarded

*Greencastle: Garage, \$25,000, 1 sty., 73x108. Private plans. Owner, William Randall, 212 W. Franklin St. Foundation in. Brick and steel.

*Richmond: Filling Station, First and Main. Archt., R. N. Turner, Dayton, Ohio. Owner, Refiners Oil Co., Richmond. Contract let to Fred C. Grote, Greenville, Ohio. Brick. Start work at once.

*Whiting: Masonic Temple, Theater, Stores and Offices, \$100,000, 118th St., Whiting. Archt., Clarence Hatzfeld, 7 S. Dearborn St., Chicago, Ill. Owner, Masonic Lodge No. 612, F. & A. M. 428, 119th St., Whiting, Ind. General contract let to Ehrickson and Christianson Construction Co., 7215 Vernon Ave., Chicago, Ill. Steel let to Atlas Iron Works, Chicago, Ill.

BRIDGES

Indianapolis: October 24, 1923, at 10 a. m., by Commissioners of Marion County at Indianapolis, Ind., for a bridge, No. 729, in Wayne township, estimated cost, \$1,672; bridge No. 723, Wayne township, estimated cost \$2,220; bridge No. 756-99, Warren township, estimated cost \$16,816; Crawfordsville road storm drain, estimated cost \$3,569. Leo K. Fesler, auditor.

Indianapolis: Bridges, \$700,000, 1 bridge, Kentucky Ave., over White River, 960 feet long, to cost \$400,000; 1 bridge at Oliver Ave., over White River, 650 feet long, to cost \$300,000. Engineer, John Elliott, City Hall. Owner, Board of Public Works, City Hall. Plans in progress. Mature early 1924. Reinforced concrete.

REPRESENTATIVE WANTED

Large eastern corporation desires representation for the sale of Gypsum Roof Slab in Indianapolis and vicinity. Straight commission basis. Best of co-operation, advertising, etc. Act quick. Box 44, Indiana Construction Recorder, 312 E. Market St., Indianapolis.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE TO BIDDERS

PURDUE UNIVERSITY HEATING AND POWER PLANT ELECTRICAL ENGINEERING BUILDING

1. Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of a Heating and Power Plant and an Electrical Engineering Building upon the grounds of Purdue University in West Lafayette, Ind., in accordance with the plans and specifications prepared by and on file with Nicol, Scholer & Hoffman, Architects, Lafayette, Ind., will be received at the office of the undersigned at Purdue University up to 11 o'clock a. m., November 12, 1923, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

- (1) Heating and Power Plant
 - (a) General Construction
 - (b) Plumbing System
 - (c) Electric Wiring System
- (2) Electrical Engineering Building
 - (a) General Construction
 - (b) Plumbing System
 - (c) Heating System
 - (d) Combination Heating and Plumbing Systems
 - (e) Electric Wiring System

(3) Combination bids in addition will be received for the following, provided separate bids are submitted for the items listed under 1 and 2 above:

- 1a and 2a
- 1b and 2b
- 1c and 2c
- 1d and 2d
- 1e and 2e

3. Certified checks in amount of 3 per cent of the bid submitted will be required for proposals under items (1) and (2) paragraph 2 above.

4. Plans and specifications relating to any of the above work may be secured from the architects, Nicol, Scholer & Hoffman, Lafayette, Ind.,

upon deposit of \$25 per set, which deposit will be forfeited to Purdue University if contractor fails to submit bid or return plans.

W. T. MIDDLEBROOK, Controller.
Oct. 20-27, 1923.

SUPERINTENDENT'S RESIDENCE NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Control of the Indiana Boys' School at Plainfield, in Hendricks county, Indiana, will receive sealed proposals until 10:00 a. m., November 2, 1923, at the office of the superintendent of the Indiana Boys' School, for the construction of a superintendent's residence. Bids will be received on a sub-contract basis as follows: Excavation, grading, cement and concrete work; masonry work; miscellaneous iron and steel; rough lumber, carpenter and mill work; sheet metal and roofing; lathing, plastering and stucco work; tile work; painting and glazing; finished hardware; steam heating system; plumbing and water supply system; electrical work and electrical fixtures.

All bids will be opened and publicly read at a meeting of the Board of Control at 10:00 o'clock A. M., November 2, 1923, at the office of the superintendent, at the Indiana Boys' School, in Plainfield, Indiana.

All work is to be executed in accordance with plans and specifications prepared by Harrison and Turnock, architects and engineers, 500 Board of Trade Building, Indianapolis, Indiana, and approved by said Board of Control, and now on file in the office of said superintendent of the Indiana Boys' School at Plainfield, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and the office of the Architects and Engineers.

Bidders desiring duplicate copies of drawings and specifications for their own personal use may obtain same by depositing ten dollars for the general construction documents, which money so deposited will be refunded if such drawings and specifications are returned in good condition on or before the time above fixed for receiving bids.

All bids must be on Form No. 96, prescribed by the State Board of Accounts.

Each bidder shall file with his bid the non-collusion affidavit required by statute and the successful bidder before entering into his contract shall present a certificate from the Industrial Board showing that he has complied with Section 68 of the Indiana Workmen's Compensation Act.

The said board of control expressly reserves the right to reject any and all bids, and to take reasonable time to investigate the bids and qualifications of the respective bidders before acting on bids—not more than ten days.

Dated this 11th day of October, 1923.

FRED L. THOMAS,
JESSE A. GREEN,
PERRY DAVIS,
EDWIN M. CARTER,
Board of Control,
Indiana Boys' School.
CHAS. A. McGONAGLE, Supt.

Oct. 13-20, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given by William H. Penrod, trustee of Marion school township, Owen county, Indiana, that up to two o'clock p. m. on the 20th day of October, 1923, at his office at Patrickburg, Indiana, said trustee and his advisory board will receive sealed proposals for the construction of an eight-room school building to be erected at Patrickburg, Indiana, in accordance with the plans and specifications now on file at the office of said Superintendent.

The estimated cost of the proposed building is \$20,000.00. All bids must be made out on standard form of bid blanks, and accompanied by a certified check for 4% (four per centum) of the amount of the bid, guaranteeing that the bidder, if awarded the contract, will accept the same and give bond for the faithful performance of said contract. Such bond for the faithful performance of such contract. Such checks should be forfeited to the trustee in the event that the bidder to whom the contract is awarded, refuses or fails to enter into a proper contract with proper surety.

Duplicating copies of the plans and specifications are on file at the office of Johnson, Miller & Miller, architects, No. 30 North Fifth Street, Terre Haute, Indiana, and may be obtained by the bidders wishing to figure. The plans can also be obtained from the County Superintendent of Schools, Spencer, Indiana.

Trustee reserves the right to reject any or all bids.

Dated at Patrickburg, Indiana this 25th day of September, 1923.

WILLIAM H. PENROD, Trustee.
October 13, 1923.

LAFAYETTE CONFERENCE PLANS
SHAPING UPMeeting Marks Great Forward Move-
ment in Building Construction
Circles

As time narrows down toward the date for holding the proposed Indiana Builders Conference at Purdue University, Lafayette, Indiana, November 15, to which the Indiana Society of Architects' members, Associated Building Contractors of Indiana, engineers and Labor representatives have been invited, those sponsoring the joint conference are active in completing details that will assure a meeting of proportions and interest never before staged by the above four important factors of the state building industry.

Headquarters for the meeting will be established at the Fowler Hotel for registration purposes.

As plans now stand it is proposed that the Indiana Society of Architects and the A. B. C. of Indiana hold individual regional meetings and quarterly conferences at 10 A. M., November 15, at some building on the Purdue campus, location to be announced later. At noon all delegates are to assemble at the Home Economics Building for lunch and then visit the various buildings of Purdue on an inspection trip.

The big joint conference will start at 2:30 P. M., Prof. W. A. Knapp, Assistant Director of Purdue University Engineering Extension Service, to preside. Prof. A. A. Potter, Dean of Engineering, will deliver an address of welcome to which Architect F. S. Cannon, Indianapolis, Chairman of the Advisory Committee of the Administrative Building Council of Indiana, will respond.

Then will follow various reports, chief of which will be one pertaining to the action taken by the Administrative Indiana Building Council, that recently created official body composed of State officers, architects, contractors, engineers and Labor representatives.

Standard agreements and seasonable building operations are to be discussed, to be led by some prominent architect and a contractor who are to be named shortly.

Quite an elaborate 6 P. M. dinner meeting is to be arranged for at the

Fowler Hotel that evening, the speakers at which are to be Prest. Edward Elliott of Purdue; Prof. W. K. Hatt also of that institution, and State Senator F. Harold Van Armon, Evansville. The toast master for the evening dinner has not as yet been selected.

Members of the committee in charge of local arrangements are: Architect Walter F. Scholer, Contractors A. E. Kemmer and Jacob Evans, and Prof. W. A. Knapp, all of Lafayette.

WELL KNOWN TERRE HAUTE
ARCHITECTURAL FIRM EF-
FECTS REORGANIZATIONPrepared to Carry On Though Sorely
Stricken by Tragic Blow

Announcement has just been made by Architect Warren D. Miller, Terre Haute, that he has taken into partnership Ralph O. Yeager and that the firm name hereafter will be Johnson-Miller-Miller & Yeager. The former office location will be retained at 30 North Fifth street.

A reorganization of the well known architectural combination of Johnson-Miller and Miller was necessitated because of the tragic calamity that was visited upon the firm when the senior and junior partners, Mac Millan H. Johnson and Ewing H. Miller were suddenly called by Death within a few months of each other.

Mr. Yeager, the new partner, is a graduate of the University of Pennsylvania, and for the past two years has been engaged in architectural practice in Chicago. He worked in the offices of Mundie and Jensen, and also those of Graham, Anderson, Probst and White.

AROUND THE STATE

Werking and Son, architects, Richmond, Ind., announce the removal of their office from the Palladium Building to larger quarters in Rooms No. 307-311 American Trust and Savings Bank Bldg., Richmond.

Mahurin and Mahurin, architects, Ft. Wayne, Ind., announce the removal of their office from 124 West Jefferson St. to Room No. 226, Brown-Cooper Bldg., Ft. Wayne.

ILLUSTRATED MATERIAL LEC-
TURES PLANNED FOR ARCHI-
TECTSAttractive Programs for Winter Season
Contemplated

If plans carry, a series of programs is assured for the regular monthly meetings of the Indianapolis Architects' Association this winter that will make these gatherings the most interesting ever held. As now contemplated, it is proposed to accept proffers that have been made for illustrated lectures on the manufacture and use of various building materials.

Among the talks scheduled are those by Architect Knickerbocker Boyd, Philadelphia, of the Structural Service Bureau; Mr. Walker, secretary of the National Associated Tile Manufacturers; Engineer Everlath of the Warren-Webster Co., and one on cement and stucco by a representative of a large nationally known cement manufacturing company.

The dates and places of meeting for these affairs will be announced later.

"PENCIL SKETCHES"

It is always easier to stand off and criticise than it is to rush in and help.

Did you get the blue prints and pledge cards? Well, most of the fellows filed them in the waste basket.

Addresses is what our stenographer puts on letters or what some fellows try to give at conventions.

Judging from the pledge cards' returned we have 25 swimmers and 100 floaters.

Service: Is the large city architect doing a greater service for humanity than the small town architect who is serving the people in his community doing the work the big fellow will not do?

BEST BUILDING MONTH SINCE MAY RECORDED IN EVANSVILLE

September Figures Surpass Those of
Summer Months

While reports from other localities indicate that there has been a tendency on the part of building construction operations to slow down to some extent no such evidence has developed in Evansville. Activity in building circles has continued steady to strong right along through the past few months and September came along to turn in the best record registered since May, lacking just a little over \$6,000 of equaling those early season figures when building op-

erations are getting under good headway. Not only that, but the September figures stood out considerably in advance of those of the supposedly good building months of June, July and August.

The past month's record was a big improvement over that for the corresponding period in 1922, 214 permits having been issued as against 120 a year ago, while the estimated valuation of \$291,320 was encouraging when compared with the \$111,729 posted in September, 1922, a gain of 160.7% resulting.

HOME SHOW ATTRACTS BIG CROWDS

Interest in Home Building Still Keen

Evansville's second big Home Complete Show at the G. A. R. Memorial Coliseum the past week drew big crowds nightly and from the enthusiasm displayed, impressed with the fact that interest in home building has not abated.

The show was complete from every point of view with well arranged building material and home furnishing displays that attracted steadily, drew forth countless inquiries and netted many substantial orders for exhibitors.

If the interest shown in the big build-

ing show is to be taken as a criterion the end of Evansville's extensive home building efforts is in no way of letting up soon.

CHIPS AND SHAVINGS

Steady progress is being made by the Scarborough-Davies Contracting company in the construction of six bungalow homes for the Lincoln Mortgage company, on Bellemeade near Scholz avenue.

Work was started Wednesday by the M. J. Hoffman Construction company on the construction of a one story brick addition to the plant of the Evansville Enameling company, Fulton avenue.

Remodeling of the second story of the DeJong building, 316-20 Main street will provide 15 modern office rooms. It is expected to have the rooms ready for occupancy by November 15. The cost of the improvements will be about \$10,000.

Work has been started on the new Unit No. 6 at the plant of the Graham Brothers Truck company, Stringtown road. The footings have been placed and the foundations poured.

STATE CONTRACTORS ANNUAL CONVENTION MATTERS DISCUSSED

Local Exchange Anxious to Co-Operate
to Make Gathering a Memorable One

Though still several months distant members of the Ft. Wayne Builders Exchange are beginning to turn their attention to the Annual Convention of the Associated Building Contractors of Indiana, scheduled to be held in Ft. Wayne, January 22, 23 and 24, 1924.

At a recent meeting of the exchange the convention was discussed and it was decided to extend a formal invitation

to the A. B. C. of Indiana and offer to ing contracting interests of Indiana. that organization the hearty co-operation of the local exchange to make the later to act in conjunction with the State convention a complete success and the A. B. C. officers in arranging local debut ever held by the associated build-tails for the big annual meeting.

FAR OUT IN FRONT OF ALL PREVIOUS BUILDING RECORDS

Ft. Wayne's 1923 Building Volume Now 20% Ahead of Entire Volume for 1922

Fort Wayne is having the greatest building year in her history, and when the September permit record was written across the books the total figures for the first nine months of 1923 recorded the greatest volume of building construction ever posted in any year in Fort Wayne, and still there are three more months to go before 1923 will have run its course.

To October 1 this year's figures are \$1,826,902, or 20.8 per cent ahead of the entire volume of building recorded in 1922. The figures for the first nine months this year are 77.7 per cent in excess of those for the corresponding period in 1922, while 523 more permits have been issued this year than last during the same time.

The monthly record as given by the city building inspector for the first nine months of 1923 and 1922 is as follows:

Months	Permits	1923		1922	
		Est. Val.		Permits	Est. Val.
January	99	\$ 309,885		42	\$ 136,660
February	61	420,330		47	191,035
March	281	1,450,000		180	573,375
April	383	1,939,275		269	582,385
May	327	2,166,085		269	701,285
June	314	1,022,539		201	903,455
July	297	1,141,265		216	715,735
August	256	698,203		221	1,634,574
September	175	1,774,930		225	707,965
Total	2,193	\$10,922,512		1,670	\$6,146,469

GETTING BUSY

Apprentice Training Taken Up by Educational Authorities and Contractors

The Apprenticeship Committee of the Pittsburgh, Pa., Builders' Exchange met recently with Dean C. B. Connelly of the Carnegie Institute of Technology and a member of the Board of Public Education of the Pittsburgh public schools and discussed plans for co-operation of the builders with both the public and Carnegie Tech Schools.

It is necessary to work out considerable detail to reach a decision as to the manner in which the work will be conducted. (Builders' Bulletin, Pittsburgh, Pa.)

WOULD MAKE CONTRACTOR EMPLOYERS ANSWERABLE FOR WEATHER CONDITIONS

English Building Mechanics Want Insurance Against Lost Time

At the recent convention of the National Federation of Building Trade Operatives of England, which corresponds to the Building Trades Department of the American Federation of Labor in this country a movement was started to secure full pay for all time lost on account of bad weather. It is not at all unlikely that a similar demand will be made by American building mechanics at some future time.

LABOR ADOPTS RESOLUTION AGAINST INJUNCTION

At the second annual convention of the Trade Union Educational League, recently held in Chicago, a resolution was unanimously adopted defying anti-labor injunctions. It has always been understood that organized labor was unalterably opposed to injunctions, but this is believed to be the first time in the history of the movement that such a decided stand on the question has been taken.—Monthly Bulletin of National Association of Building Trades Employers.

INDIANAPOLIS BUILDING OPERATIONS FOR 1923 BUT SLIGHTLY AHEAD OF THOSE FOR 1922

Let Down of Past Five Months Has Had Telling Effect.

The gradual and steady slowing down of building construction in Indianapolis, as indicated by the monthly reports issued by the city building inspector, has had the effect of holding back the 1923 building record for the first nine months of the year until it stood October 1 at just 3 per cent ahead of the same record posted for the corresponding period a year ago. In April building in Indianapolis reached the peak, \$3,215,976 representing the estimated valuation of the work for which permits were issued during that month, figures that surpassed the same month the year previous. Then a decline seems to have set in each month, except June, showing a lesser amount of building than the previous month, and September turned in the second lowest monthly volume of work registered so far this year.

January, February, March and April all showed big gains over the records of corresponding periods in 1922. Since May the monthly reports for 1923 have all fallen short of those of the year before with the result that the big gains posted during the first third of the current year have almost been wiped out and it will require constant and steady building effort during the last quarter to better or even equal the 1922 building construction record.

A comparative table, month by month, given below shows that up to October 1 there have been 1,264 more permits issued than up to October 1, 1922, but the gain in the estimated amount of money involved amounts to but \$599,903.

Month	Permits	Est. Val.	Permits	Est. Val.
January	619	\$ 2,021,138	403	\$ 580,706
February	545	1,601,282	576	1,170,398
March	1,438	3,028,839	1,218	2,065,051
April	1,761	3,215,976	1,693	2,566,382
May	1,809	2,805,011	1,798	3,420,847
June	1,396	1,905,000	1,323	2,289,941
July	1,413	2,055,748	1,163	3,349,348
August	1,415	1,756,530	1,291	2,074,941
September	1,496	1,656,949	1,163	1,928,956
	11,892	\$20,046,473	10,628	\$19,446,570

REALIZE DRASTIC ACTION IS NECESSARY

A. F. of L. Plays to Protect Existence

One would be led to believe from recent developments that the officers of the American Federation of Labor are reaching the point where they can see more clearly the ever-glowing handwriting on the wall and are beginning to realize that, in order to hold the respect and confidence of the thinking people of America, they must purge their ranks of the loud and blatant radical elements, or, through dissention in their own ranks and the withdrawal of the support of the conservative laboring people of the country, the great Labor Federation will meet with serious disaster and disintegration.

While some of the things William F. Dunn, communist leader from the Silver Bow Labor Council of Butte, Mont., said at the recent A. F. of L. convention in the West are perhaps true of the Federation and will give the leaders something to think about, nevertheless, the Federation was wise in expelling him from the floor of the convention and revoking his membership. It is such men as Dunn and Foster and their ilk who will ultimately wreck the organization of Labor unless the curb is applied strongly and firmly upon their activities and preachments.

RESTRICTED RESIDENCE DISTRICT PLANNED

Deal Just Consummated With That End In View

A syndicate, headed by Woods-Martin & Co., realtors, has purchased 585 acres adjoining the city on the south, south of 15th avenue, east of Columbia avenue, to Kennedy avenue, and south to the Little Calumet river. The tract comprises several truck and small farms, it will be sub-divided into an ideal residence district with boulevards, parkways and parks. The different sections will be restricted to certain classes of buildings; for instance, no business houses will be allowed in the residential districts. The deal involves about \$350,000 and the site is an ideal location for high class dwellings.

The lack of a proper building district for the better class of dwellings around Whiting, East Chicago and Indiana Harbor is causing a good many of the plant heads and foremen to locate in Hammond.

HAMMOND'S BIG FALL SHOW COMES UP TO ANTICIPATIONS

Success All Around Crowns Exposition Effort

The exposition has proved a great success with ideal weather. Up to Saturday the attendance had been all the management could expect. The display in the 147 booths and the auto show is wonderful. Every line of local business and manufacture is well represented. The Indiana Pageant while more of a National than a State character was a splendid portrayal of the different stages of the development of the country from pioneer days up to the present time.

DETERMINED EFFORT TO BE MADE TO EFFECT PEACE

Would Reorganize Chicago Building Trades Council

The Labor situation in the building trades circles in Chicago is giving the American Federation of Labor considerable concern and President Donlin of the Building Trades Department has been instructed to go to Chicago within the next sixty days and organize a new Building Trades Council in place of the two warring councils that are now in the field. In this way it is hoped to bring about peace in the ranks of the building trades mechanics in Chicago.

ANOTHER BOOST FOR THE HIGH COST OF LIVING

Professional Men, Not Laboring Men, Get Busy

What a great thing it would be if all the people could go on a strike for a year against sickness. At a meeting Wednesday night of the Medical Fraternity, Calumet's overworked doctors passed a resolution that hereafter all calls on Sundays and holidays would be charged a double fee of five dollars per call.

CALUMET BUILDING PROGRESS

The new hotel building adds quite an improvement to the appearance of the downtown district. The erection of the building is practically completed and a large force is at work on the plastering and interior finish.

Danner & Co., general contractors, have the Lion Store addition ready for the roof.

A syndicate of bankers and real estate men has opened up a new sub-division between South Hohman St. and the State line. It is planned to invest \$650,000 in high class dwellings to be put on the market in the spring of 1924.

BUILDING FIGURES FROM MUNCIE BESPEAK PROGRESSIVE SPIRIT THAT PREVAILS THERE

Has Official Building Inspection Department Where All Projects Must First Be Approved

Outside of Richmond and Elkhart Muncie has to her credit a system of keeping tab on her building construction progress such as none of the other smaller cities in Indiana possess. As a result, Muncie is in a position to take her place with Indianapolis, Ft. Wayne, South Bend, Evansville, Terre Haute and other Indiana cities, and through official building figures herald to the rest of the State and country the building construction strides that she is making. While the volume of work done naturally is not as large as that transacted in the communities of greater size, nevertheless, these regular monthly reports indicate that the building that is going on is being carried forward under the approval of a city building inspection department, a system that means the city is building up along the lines of the latest approved methods, taking into account the factors of safety, sanitation and general public welfare.

CEMENT PRODUCTION AGAIN BREAKS RECORD

Over 13,000,000 Barrels Produced in September

According to figures of the U. S. Geological Survey just released, production of Portland cement in September eclipsed all previous records for any single month. For the first time the 13,000,000 mark was reached, the exact quantity produced being 13,109,000 barrels. Production for the nine months ending September 30 was slightly over 101,000,000 barrels, or more than was produced in any full year prior to 1922. Last year's nine months record output was exceeded by about 24 per cent.

Shipments from the mills during September, although less than in August, were greatly in excess of any corresponding month in past years and were about 10 per cent over September, 1922. For the first nine months of this year shipments were substantially in excess of 104,000,000 barrels or 18 per cent greater than during the corresponding months of last year.

Unquestionably the cement industry has made a remarkable record this year in taking care of the demands placed upon it. Starting the year with nearly 2,000,000 barrels less in stock than at the beginning of 1922, it has in nine months shipped about 16,000,000 barrels more than during the first nine months of 1922 and yet stocks in manufacturers' hands are more than 750,000 barrels greater than on September 30 last year.

**MORE THAN JUST LOW FIGURES
INCLUDED IN AN HONEST-
TO-GOODNESS LOW BID**

**Other Elements Required to Assure a
Thorough Job**

That for which many men in the building industry, architects, contractors and material supply men, have contended for a long time has been substantiated by the Supreme Court of Pennsylvania in a recent decision regarding the lowest responsible bid.

Often times owners in an eagerness to economize, public officials to please constituents, or contractors to protect their figures, and consequently themselves, can see only the dollars and cents side of the low bid and fail to take in the responsible angle of the low bid. A low bid with the responsibility element removed means little, except possibly trouble. Any one can make a guess and bid, it has been done, but in this day and age such methods are dangerous for all involved.

Realizing the latter fact, the law, according to the Pennsylvania court's analysis, requires the exercise of intelligent judgment in the consideration of bids. It is incumbent upon public officials upon receiving bids not only to consider the lowness of the bid but also to investigate to learn the resources, facilities, judgment and efficiency of the bidders.

If such is required legally of public officials in order to protect tax payers and assure the best effort and material in the execution of public building projects it naturally follows that the private owner-builder, who is not so closely protected by the law should be

all the more alert to see that his low bid includes responsibility, quality and service, for such inclusion only makes a really low bid if he desires his money's worth and a well built project.

BRAZIL CLAY COMPANY DENIES REPORTS

Confusion of Names Causes Misunder- standing

We have information received from several sources the past month, that many are under the impression that the Brazil Clay Company, Brazil, Indiana, is in the hands of a receiver. We take this means to correct this erroneous impression, advising that it is the Clay Products Company, who unfortunately was connected with the Dollings' Company, which was placed in the hands of receivership and that the Brazil Clay Company has no connection with them whatever.

BRAZIL CLAY COMPANY.

WELL KNOWN INDIANA BRICK MANUFACTURER RETIRES.

Donates Plant To His Children.

An announcement of reorganization has been made to the building industry of Indiana by the Poston-Herron Brick Company, Attica, Ind.

Originally the firm was known under the name of C. E. Poston, the owner, who for years has operated in Indiana supplying brick over a wide territory for the state building construction demand.

Recently Mr. C. E. Poston decided to retire and presented his brick manufacturing establishment to his children, who organized under the Poston-Herron Brick Co., name.

Those connected with the firm received it unencumbered and in a prosperous condition, and hope by following the business methods pursued by the donor to maintain the long standing popularity that has been enjoyed by the former company.

APPRENTICE TRAINING IN BUILD- ING TRADES GENERALLY AP- PROVED

Country-Wide Response From School Authorities

Letters recently sent out by the National Association of Building Trades Employers to school superintendents in over one hundred leading cities of the

country, urging that the building trades be taught in the public schools, have aroused favorable responses. Many officials have replied advising that such schools are now under way, while others state that they are working on the problem and hope to be able to start classes in the near future. A number of superintendents have asked that the Association furnish them with data on courses now being conducted in the building trades, stating they are interested in the work. Practically all of the replies received so far indicate that the contractors themselves are as a rule keenly interested in the proposition, and in only one instance did a superintendent report that the employers were antagonistic.

The above illustrates in a vivid way that educators who from time to time have been accused of only being interested in training the minds of those in their charge, have come to see that it is also important to train the hands as well. With school officials in a different frame of mind on the subject of trade education, it should be a comparatively easy matter for contractors to insist that the teaching of the building trades be incorporated in the public schools of the country.

BUILDING OPERATIONS

Survey Shows Let Up of New Work, But Belief Expressed for Another Ac- tive Season in 1924

Reports from over the country indicate that building activities are slowing down, but this relates in the main to the starting of new work rather than to actual operations. Last spring the amount of work started was beyond the capacity of the industry, resulting in competition for mechanics and the payment of bonuses above regular scale rates until increasing costs caused new undertakings to be held up. The diminished demand has disposed of the bonus system to a great extent and the excitement has subsided, but work is going on at about as high a rate as before.

Among the country's leading architects and builders the opinion prevails that building operations next year will be on a scale sufficient to keep the available force of skilled workmen generally employed. No doubt the trend of building costs will have something to do with it.—Monthly Bulletin the National City Bank of New York.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE TO BIDDERS

PURDUE UNIVERSITY
HEATING AND POWER PLANT
ELECTRICAL ENGINEERING BUILDING

1. Sealed proposals to the Board of Trustees of Purdue University for furnishing labor and materials for the construction of a Heating and Power Plant and an Electrical Engineering Building upon the grounds of Purdue University in West Lafayette, Ind., in accordance with the plans and specifications prepared by and on file with Nicol, Scholer & Hoffman, Architects, Lafayette, Ind., will be received at the office of the undersigned at Purdue University up to 11 o'clock a. m., November 12, 1923, at which time the bids will be publicly opened and read.

2. Separate sealed proposals on Form 96 prescribed by the State Board of Accounts will be received for the following:

- (1) Heating and Power Plant
 - (a) General Construction
 - (b) Plumbing System
 - (c) Electric Wiring System
- (2) Electrical Engineering Building
 - (a) General Construction
 - (b) Plumbing System
 - (c) Heating System
 - (d) Combination Heating and Plumbing Systems
 - (e) Electric Wiring System
- (3) Combination bids in addition will be received for the following, provided separate bids are submitted for the items listed under 1 and 2 above:

- 1a and 2a
- 1b and 2b
- 1b and 2d
- 1c and 2e

3. Certified checks in amount of 3 per cent of the bid submitted will be required for proposals under items (1) and (2) paragraph 2 above.

4. Plans and specifications relating to any of the above work may be secured from the architects, Nicol, Scholer & Hoffman, Lafayette, Ind., upon deposit of \$25 per set, which deposit will be forfeited to Purdue University if contractor fails to submit bid or return plans.

W. T. MIDDLEBROOK, Controller.

Oct. 20-27, 1923.

PIPE AND FITTINGS
NOTICE TO BIDDERS

Bids will be received by the board of trustees of the Indiana State Normal School at 2 p. m. November 8, 1923, at the office of the president of the Indiana State Normal School at Terre Haute, Ind., for the pipe and fittings for the new heating plant to be erected at the Eastern Division of the Indiana State Normal School located at Muncie, Ind. Bids must be made on Form 96 prescribed by the state board of accounts and must be accompanied by a certified check equal to 5 per cent of the amount of the bid. Bids must be made in accordance with the plans and specifications prepared by Kibele & Garrard, architects, Muncie, Ind. Copies of the plans and specifications may be found at the office of the dean of the faculty of the Eastern Division of the Indiana State Normal School, Muncie, Ind.; at the office of Kibele & Garrard, architects, 335 the Johnson, Muncie, Ind., and at the office of the registrar of the Indiana State Normal School, Terre Haute, Ind. Estimated cost of the piping and connections is \$17,000.

**TURNS WINTER'S COLD**

Home of Harry Mitten, an architect of Syracuse, N. Y., who used Celotex for insulation on walls, and roof, for sound deadener in floors, for plaster base on interior walls.

SHEDS SUMMER'S SUN

You can't beat Celotex!

Celotex lumber has the insulating value of cork. A house with walls and roof built of Celotex can be heated in winter for two-thirds the usual fuel cost. And in summer a Celotex house is cool. You can't beat it.

Celotex is a rugged building lumber made from the long, tough fibres of cane. Nails direct to studs and rafters just like ordinary lumber. Is not easily damaged by weather nor by ordinary rough handling.

We want you to know all about Celotex. Just phone or write one of us for samples and full information.

HOLDS INDIANA ZONING AND CITY PLAN LAWS NOT MENACED BY MISSOURI COURT RULING

City Plan Commission Attorney Extends Assurance

The status of the Indianapolis city plan law is not threatened by the recent decision of the Missouri Supreme Court which held the St. Louis zoning ordinance to be invalid. That ruling caused considerable comment and many there were who predicted that as a result of the decision city plan and zoning laws all over the country would go into the discard.

According to an opinion given out by J. Clyde Hoffman, attorney for the Indianapolis City Plan Commission, local city plan advocates need not fear for the future of Indiana city plan ordinances now in effect or those that will result from the enactment of the law by the 1921 legislature under which legislation such ordinances are possible of creation.

Mr. Hoffman in his opinion says:

"Those who have been interested in the recently enacted zoning ordinances in Indianapolis and other Indiana cities were alarmed by the newspaper accounts of the decision of the Supreme Court of the State of Missouri in holding the zoning ordinance of the city of St. Louis invalid. A careful study of the opinion of the court handed down in that case shows that we, in Indiana, need not fear the effect of the Missouri ruling in our zoning ordinances for two reasons.

"1. The state of Missouri has never enacted an enabling act authorizing cities expressly to pass zoning ordinances and the decision of the court determines only that the St. Louis ordinance was not authorized by the general grant of power to the city of St. Louis under its charter. In Indiana we have an enabling act which expressly grants to cities the power to pass zoning ordinances and so far the ordinances passed by Indiana cities conform to the power granted by the Legislature.

Rehearing Expected

"2. The Missouri case was very poorly considered by the majority of the court as was evidenced by the fact that only three judges out of the seven signed the majority opinion and a

fourth judge, for reasons entirely different from that of the other three, concurred in the result. A careful study of these opinions shows conclusively that he was the only one of seven judges who held the views set out in his opinion. As a matter of fact therefore, less than a majority of the court decided one of the main points in issue, and this has been set up as a ground for a rehearing by the city of St. Louis. On the other hand, three judges of the court in a dissenting opinion, much better reasoned and based on better authority, hold the zoning ordinance valid.

"It is quite likely therefore that a rehearing will be granted and it is possible that the court will hold differently on such rehearing. In passing, it may be said that no other state Supreme Court has finally declared zoning ordinance void as not within the police power, while on the other hand eight or more State Supreme Courts have upheld such ordinances as valid. It is safe to assume that the force of this poorly considered decision will not be very far reaching in its effect upon zoning ordinances which have been regularly passed under authority of state law."

TESTS SHOW HOW MUCH LOAD HOLLOW TILE WALLS CAN CARRY

Experiments Furnish Data That Will Obviate Waste

Wasteful use of building materials, with consequent increase of construction costs and rents, is often due to lack of knowledge of how much load these material can safely bear. This situation prompts architects, contractors and the framers of building codes to call for an amount of material they know will be safe, without knowing whether or not it is excessive.

Avoidance of such waste can be brought about by furnishing the building industry with reliable data as to the strength of the different materials used and of the different types of construction so that each piece of material entering into the construction of the building can carry all the load it is safe for it to carry, and no more. The bureau of standards of the department of commerce has one of the best equipped laboratories

in the country for the measurement of such factors, and for many years past it has been engaged in testing the strength of bricks, tile, cement and other fireproof materials.

This bureau has just published the results of thirty-two tests on walls of hollow tile. These walls were four feet long by twelve feet high and were six, eight and twelve inches thick, representing the outer wall of a house. Among other results, these tests showed that a wall with the hollow spaces or cells of the tile set vertically is nearly twice as strong as one in which the cells are placed horizontally.

These tests are described and the results given in Technologic Paper No. 238 of the bureau of standards, entitled "Some Tests of Hollow Tile Walls." Copies may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. The price is 5 cents, cash.

CONNERSVILLE ARCHITECT MOVES TO NEW OFFICE LOCATION

Joe Fallon Makes Change

Announcement is made by Architect Joe Fallon, Connerville, that he has changed office locations. Formerly located on Central Ave., he has moved his business quarters to Room 8, Thornburg Annex.

"PENCIL SKETCHES"

Architects are said to be dreamers but they wake up when they get up against brick and mortar to carry out their designs.

Business is like an elevator—it either goes up or it goes down.

Lots of good men just out of the I. S. A. door are ready to knock for admission. Why let them skin their knuckles?

Remember thy kidders, Nolan, in the days of thy youth, that you may inherit the kingdom of safe construction.

Another county heard from for I. S. of A.—two from Lake county this time.

SEEM TO FAIL TO REALIZE THE POWER THAT INTEREST WOULD BESTOW

Contractors Too Careless of Their Interests

Conditional influences, more or less of an outside nature, play a big part in the building contracting business swaying it this way and that, almost, one might say, with reckless abandon, as it suits selfish interest. And yet it would seem from the lethargic interest many contractors show toward the combatting of those things that threaten their business that they are willing to sit idly by and are content to take that which the ebb and flow leaves or brings in to them without turning their hand to stem or stabilize the tide.

If every contractor would more seriously consider his business and resolve to devote some time and thought to the upbuilding of the construction industry, a number of definite results could be accomplished. The labor shortage could be ameliorated through the establishment of trade schools; pernicious laws, sponsored by organized Labor and detrimental to the best interests of the contractors, could be defeated, both in the various state legislatures and in the National Congress, and in their place laws could be passed which would make conditions infinitely better for the employers; greater interest would be manifested in local, State and National organizations, and in place of having only a handful at meetings of these associations, men would be willing to attend and take part in the discussions which are always of interest.

There is almost no end to the problems besetting the contracting business that could be solved by concerted action on the part of contractors through associations, if they as a body, would be willing to enter upon united effort.

Contractors should throw off this lethargy and everywhere resolve to devote some time and thought to the upbuilding of the building construction industry. Until they do they must continue to swirl in the currents and eddies, caused by the flood of influences that seethe about them, remain much as drift.

WAYS TO GET AROUND UNEMPLOY- MENT IN THE BUILDING CON- STRUCTION INDUSTRY

Remedies Advanced

While the present year with its great building construction volume has put a demand upon the available skilled Labor supply that makes the mention of unemployment in the building field sound foolish, nevertheless, such a condition lurks just around the corner all the time, for building is subject to lapses. Big men in the industry have not been so blind or narrow as not to realize the danger.

A. P. Greensfelder, St. Louis, recently prepared an excellent paper that was read before the American Construction Council, a treatise that dealt with unemployment, offering remedies for it and also lengthening the building season to take up the slack.

Among the most salient points brought out were: Education of the public through advertising; seasonable discounts among material supply manufacturers, as well as contractors; holding back public work until other business slows up; stocking up of material by manufacturers and dealers.

CLOSING OF REALTY DEAL MEANS ANOTHER BIG SCHOOL FOR THE SOUTH SIDE

Building of Thirty Rooms Contemplated

With the purchase of a whole city block of land in the Harrison Hill district, L. C. Ward, superintendent of city schools, announces that the proposed new Harrison Hill grade school would soon become a reality.

It is proposed to erect, at a cost of approximately two hundred and seventy-five thousand dollars, a building containing 30 rooms to care for the children of the south side. It has been apparent for some time that the new South Side high school building for all its size, will not be sufficient to care for both the grades and the high school next year, he added. Unless the new Harrison Hill building

can be completed by the school opening date of next year, a number of portables will be needed there.

Work on the new building will be pushed with all possible haste, now that the ground upon which to build has been secured. It is hoped to start excavation before cold weather sets in. Preliminary architectural plans for the building have already been drawn.

OTHER SCHOOL PLANS SOON READY FOR BIDS

Hope to Relieve Congestion of Attend- ance Next Year

Complete and final plans drawn by Architects Griffith & Goodrich for the new 20-room addition to the James H. Smart grade school, Pontiac and Smith streets, have been approved by the city school board.

The blue prints call for a separate one-story building to cost approximately one hundred and seventy-five thousand dollars to be situated just south of the present 16-room school.

As soon as the plans have been approved by State officials at Indianapolis bids for the construction work will be advertised for.

The Smart school now contains 1,000 children housed in the original building and 16 portables. At the present rate of growth there will be at least twelve hundred children there in September, 1924, school officials predict, hence, every effort will be made to rush the new work through to completion by that time.

SHRINERS CHANGE DATE OF NEW TEMPLE CONTRACT AWARD

Bids Opened October 27

The time for receiving contractors' bids for the construction of the \$600,000 Shrine temple was extended one week by recent decision of the building committee. This made the date for the opening of the bids October 27.

GROWTH OF CITY NOW MORE REGULAR

Suburban Building Activity Shifts to Relieve Lop-sided Trend

While Fort Wayne in former years showed a distinct tendency to grow lop-sided toward the southwest and the northeast than in any other direction, this year when the greatest building boom in the city's history came about, the scene of residence building shifted and the expansion direction was changed, structures multiplying to the southwest and northwest.

PLANS ON FILE

Bids are being received by the Board of School Trustees, Piqua, Ohio, for two school buildings, Bennett and Wilder schools. Archt., Schenck and Williams, Arcade Bldg., Dayton, Ohio. Bids close at Piqua, October 31. Plans are on file room 316, Peoples Bank Bldg., Indianapolis.

Plans and specifications are on file at this office for the construction of a heating and power plant and an electrical engineering building at Purdue University, Lafayette, Ind. Trustees of Purdue University are receiving bids, to close November 12 at 11 a. m.

WAIVER OF LIEN

None filed with Recorder of Marion county this week.

ATTEMPT STARTED TO PREVENT
LABOR WAGE SCALE TIE-UP
IN THE SPRINGEarly Threshing Out of Question Now
Being Advocated

In view of the uncertainty that always befalls the building outlook for the following season, due to the fact that labor wage scales have to be readjusted each spring, there are those contractors in Indianapolis who are advocating an early start toward a satisfactory readjustment so that matters may be straightened out with expediency when the appointed time arrives so that no great delays may be encountered to cause a tie-up in the local building field with a resultant economic waste.

There are both contractors and Labor representatives who realize the folly of a serious breach between the employers and the workmen on the wage and working agreements question and both elements are exerting an influence to hold matters in hand and effect an equitable understanding that will work to the future advantage of the industry.

The various unions have not formally begun consideration of their wage demands to be presented next spring, shortly before the expiration of the existing scale, but members have discussed their desires informally and it is on these desires that the demands usually are based. Some of the individual workmen want an increase and others believe it would be advisable to demand only a continuance of the present scale. It is not known which group is in the majority.

It is intimated that recently a prominent contractor called upon other members of the Indianapolis association at a meeting to start considering their program for 1924 regarding a wage scale.

The uncertainty regarding the price of material and labor creates some hesitancy in bidding on building projects contemplated for next year and makes the volume of construction indefinite.

CARPENTERS DECIDE TO STAY OUT
OF A. F. OF L.Turn Down Proposition to Re-Affiliate
With Big Labor Body

One of the outstanding features of the recent Building Trades' Department convention, which preceded the meeting of the American Federation of Labor at Portland, Ore, was the decision of the Brotherhood of Carpenters and Joiners not to reaffiliate with the department. It will be recalled that at the Denver meeting, two years ago, the carpenters withdrew from the Building Trades' Department on account of the metal trim controversy. Announcement was made by John Donlin that no carpenters' delegates can be seated in any council as long as their union remains outside of the department.

JURISDICTIONAL BOARD TO MEET
SOON AT WASHINGTON

Numerous Disputes to Be Taken Up

The next meeting of the National Board for Jurisdictional Awards will be held in Washington, D. C., the week beginning November 12th. Among the matters up for consideration will be:

Request for a re-hearing of decisions on asphalt shingles.

Request for a re-hearing of decisions on metal trim in re: hollow metal door and trim for elevator enclosures.

Request to amend decision on cutting chases or channels in brick, tile and masonry, etc.

Dispute over setting of bathroom accessories.

Dispute over placing of Zinitern.

There is a possibility that a request for a re-hearing of the re-enforcing rod question will also be made, but at this time the matter has not been officially brought to the attention of the board.

A REMARKABLE PERFORMANCE

Building in 1923 Boomed Right Along
Despite Barriers

When one considers the vast volume of building construction that has come to pass during 1923 and then recalls the barriers that have had to be surmounted to effect such a volume the record that has been piled up is really a remarkable one. There surely was an impetus back of it all that could not be headed off.

Cities large and small have builded, and that, in the face of high prices.

Contractors, many of them, have sought to hold things within reason, but the wage scales agreed upon were pretty well "shot to pieces" by other contractors who under the pressure of time and work

tilted scales or offered bonuses. Then, too, in some cases owners paid the bonus in order to cover up for the contractor on the job.

All of which made it rather soft for the building trades mechanics who under the shortage of skilled labor have reaped a harvest as owners and contractors sought to secure men to carry on the work. Though builders are working more in unity than in former years, still there is a keen edge to the competitive nature of their business that will tell and from which they can not escape when pressure is brought to bear, for when men are needed, and the other fellow is willing to pay his help to hold them, one is almost forced to meet that competition. It is a condition suggestive of the first law of self-preservation.

And yet, with Labor reaching out to take advantage of the situation created by contractors bidding against each other for help causing advanced Labor costs, building boomed along under the highest wages ever paid, running up a volume in Indiana, at least, that promises figures for 1923 never before reached.

ing made to turn Hammond upside down. First, a large school building was moved several squares from its original site and now the big Rimbach dwelling is to be shunted a block south from its present location. Charles Neidow undertaker, has purchased the structure, will move it and remodel same into an undertaking establishment with chapel and convert the upper floor into apartments. Architects A. C. Berry & Co., preparing the plans, has estimated the alteration work to cost \$20,000. Bids are to be asked about November 10.

DOWN THE SUNNY SIDE OF THE STREET

Path Being Traversed by Busy Local Contractor

Charles Rhoades, our genial friend and busy builder, is fast qualifying for the migratory bird class. Each fall when the first frost begins to tinge nature's panorama Charles allows his thoughts to lean toward Florida and soon inclines himself in the direction of those thoughts. Right now he is preparing for the "hop-off" for the southland, about November 1. His partner, Bernard Graves, will look after the firm's interests while Charles is away.

Many of Hammond's contractors would that finances would permits them to make the trip, to feel the exhilaration of the south's balmy breezes, too, instead of remaining home to feed the gaping maw of the insatiable furnace.

COAL SHOVELING TO BE OUT OF VOGUE IN 6,000 YEARS

But Some to Shovel Now Is What Is Most Desired

It isn't so much as to how long the natural coal resources will last but rather how coal may be secured when needed and how the available supply in the bin may be conserved and used to best advantage.

The editor of the Coal Trade Journal announces that at the present rate of consumption it will be 6,033 years before the available supply of coal is used up. Such information is, at least, reassuring. However, what worries the average citizen most is not how many thousand years the buried deposit of

coal will hold out; he is more concerned about the miners keeping steadily at work, and how long he can conserve the shiney lumps in the coal bin and keep the home fires burning.

All of which prompts this thought, a ton in the bin is worth a hundred tons in the mine, when it comes to keeping warm.

MORE TRAFFIC CONGESTION

Hammond Cluttered Up With Automobiles

If the ownership of automobiles shows the same increase for the next five years as that of the past five we will have to double deck all of the downtown streets to provide parking space. As it is now, it is almost impossible to get through the streets of an evening.

CALUMET BUILDING PROGRESS

Property owners along Sibley street have finally agreed to the idea of widening that thoroughfare ten feet on each side.

Bids are to be requested of contractors along about November 1 for the construction of a branch library at Oak and Hoffman streets. Plans are being prepared by Architects J. T. Sutton & Son. The building, estimated to cost \$20,000, will be one story high, 37.6 feet by 77 feet.

The general contract for a \$5,000 one-story store and residence in Douglas Park was awarded to Morris Bros.

General Contractor Guy Young has been awarded the work of repairing school buildings at Hessville and Saxony.

There is some talk of calling a joint meeting of the contractors of Gary, Hammond, East Chicago and Indiana Harbor in the near future for a general discussion of building matters and for the purpose of creating more solidarity in the ranks of the contractors. The time and place has not been definitely decided upon.

E. E. COLE.

ANOTHER WALLOP AT BUILDING
Rain and Snow Put Quietus to Active Operation

It appeared last week as if the weather man took a few days off and let weather conditions run amuck. The situation may have been propitious for umbrella menders, those who had shower sticks for sale, and overshoe merchants, but for building it was awful. Three and a half inches of rain fell from Tuesday night till Friday morning, then the refrigeration system got going and the first snow of the season showed up; the beautiful, thank goodness, was confined to a few scattering flakes.

BIG PROJECTS HANG IN THE BALANCE

Importance Attaches to Street Widening Proposition

The committee appointed to investigate and make an estimate on the proposition to widen Hohman street twenty feet more on the south side from State street to Carrol street is now busy on the survey. It is expected that the preliminary estimate will be submitted shortly to the board of works. There are several large building projects waiting on the final decision in the matter.

LABOR AND MATERIAL COSTS IN BUILDING

For Labor or Material Men to Wage
"Pot Called Kettle Black War"
Is All Foolish

In recent discussions of building costs Dr. John M. Gries, chief of the Division of Building and Housing of the Department of Commerce, has been erroneously quoted as saying that "labor charges account for so small a proportion of the construction cost of the average house that increases in labor charges have little bearing on total building costs."

It is interesting to ascertain exactly what Dr. Gries did say, says a public statement recently issued by the National Lumber Manufacturers Association. It appears that a talk by Dr. Gries before officials of the Bureau of Standards was authentically reported in a Department release as follows:

"Figures were given showing the relative importance of different items of construction costs for a certain house. Of these, labor charges accounted for only 26 per cent; materials cost 29.3 per cent; land 19 per cent; contractor, 12.6 per cent; financing, 6.7 per cent; architect and real estate fees, 6.4 per cent. These figures show that it is not generally possible to blame one single factor, such as high labor or material costs for high prices of houses. He said that while the daily wage of building tradesmen might seem high to a man employed all the year, they were not necessarily high when the seasonal character of the employment was considered."

* * * A substantial saving in labor costs could be realized if arrangements

could be made for employment during a larger part of the year. He added, 'Similar savings in costs of equipment and contractors' overhead could be effected by a more extended building season.'

As the National Lumber Manufacturers Association pointed out in its release, the circulators of the idea that labor costs in the erection of a building are so small a part of the whole that it makes very little difference whether labor receives a large percentage increase or not, omitted to notice that precisely the same line of reasoning with different premises abstracted from Dr. Gries's statement, would prove that it makes relatively little difference whether materials cost much more or less. If the materials are only 29 per cent of the cost of a \$5,000 house, or \$1,450, an increase of 10 per cent in the price of materials will represent an increase of only \$145 in the whole house bill, which relatively is next to nothing. As a matter of fact, Dr. Gries referred to a "certain house" which cost \$10,500 and not a \$5,000 "average" house as was quoted.

Dr. Gries's statement made it very clear that there are other factors in building costs besides those of labor and materials, which cannot rightfully be charged to either. In fact, the other factors in the case of the particular house he had in mind amounted to almost as much as the sum of materials and labor. He pointed out that little relief from the high cost of building could be expected from reductions in any single factor—the thought being that relief, if any, must come from an all-around reduction of building costs.

Exaggerations by contractors and material men on the one side, Dr. Gries remarks, and labor on the other, of the costs chargeable on the other side in building, are harmful to both. When as has occasionally been done, material men assert that 90 per cent of the cost of a building is labor and on the other hand, labor economists calculate, as has been done, that the material costs of a building are as high as 80 per cent, both sides make themselves so ridiculous that the public loses confidence in both.

(October Bulletin National Lumber Manufacturers Association.)

WATCHFULNESS NEEDED OVER FIELDS OF DUTY

Each Element of Construction Industry
Should Observe Boundaries

Too much stress cannot be laid upon the necessity of each element of the con-

struction industry gaining a definite knowledge of the scope of its duties and being guided thereby in its activities. Because of the somewhat indistinct boundaries which seem to exist at times in some places between the duties of the architect and those of the contractor, every emphasis should be laid upon efforts to increase efficiency through close adherence to the policy of "Unto every man his field of work."

From time to time cases are brought to the attention of the Associated General Contractors where contractors are required by specifications to shoulder responsibilities which they should not be asked to assume, and which should find a resting place elsewhere. The contractors then are at a loss to know what should be added to their bids to cover contingencies which might be invited by such responsibilities.

An instance which may be taken as indicative of this situation recently was brought to light in specifications from which the following quotation is made:

"All the work must be executed in accordance with the requirements in force of the local building, plumbing, health and fire departments and any other municipal and state departments, or of any other officials having jurisdiction. Similarly all the work must be completed so as to comply with the latest rules and regulations of the fire insurance exchange or board of fire underwriters having jurisdiction for the minimum insurance ratings.

"Wherever the minimum requirements of the said exchange or board are referred to it shall be taken to mean the requirements of the said exchange or board for its minimum insurance ratings.

"If subsequent rulings should require additional work, the contractor must submit the matter to the architect for adjustment as provided for in the paragraph of this section entitled 'Modifications and extra work.'

"Each contractor must therefore verify the validity of any work called for in the contract documents and details before ordering any material or completing any of his work.

"Any confliction between the rulings or regulations of the departments and officials hereinbefore mentioned and the contract documents must be reported to the architect immediately, and the contractor will be held responsible and accountable for any errors or violations arising from his failure to comply with the regulations embodied in this paragraph."—(News Letter of Associated General Contractors of America.)

INDIANA ARCHITECTS, ATTENTION!

Don't overlook the Builders' Conference to be held at Lafayette, Ind., Thursday, November 15, under the auspices of Purdue University.

Indiana architects are cordially invited to attend and, as this is to be a representative conference of the fundamental elements of the state building industry, architects, contractors, engineers and Labor, it behooves state architects to see that the profession is well represented.

A program assuring an entertaining and enlightening afternoon has been arranged and time devoted to this affair will be well spent.

The meeting is sponsored by the Engineering Extension Service of Purdue and has been endorsed by the Indiana Society of Architects and the Associated Building Contractors of Indiana.

Invitations have been sent out and while it is too early for the receipt of acceptances, nevertheless, the importance of the matter to come before the meeting is of such an important nature that a good attendance is looked for.

The meeting at 320 Peoples Bank Building will be called to order by Chairman Fernor S. Cannon at 1 p. m.

INDIANA CHAPTER A. I. A. SPONSORING BIG MEETING FOR ARCHITECTS

State Architectural Profession Invited

Invitations have just been issued to all members of the Indiana Chapter, A. I. A., Indiana Society of Architects, Indianapolis Architects' Association and Architectural Draftsmen to attend a meeting to be held Wednesday, November 7, at the Lincoln Hotel, Indianapolis, under the auspices of the Indiana Chapter, for which an interesting program has been arranged.

The meeting will be preceded by a 6 p. m. dinner following which talks will be made by Knickerbocker Boyd Philadelphia, Pa., F. A. I. A., former secretary of the institute, and F. W. Walker.

Mr. Boyd is consulting architect for the Associated Tile Manufacturers and Mr. Walker is executive secretary of that organization.

The former will speak on specifications for tile work, craftsmanship and co-operation of architects with industry. Mr. Walker will take for his subject "Methods Employed in Tile Production." All of which refers to ceramic and decorative tile.

There will also be a general or round table discussion following the addresses of the evening and it is urged that architects come prepared to participate in same and feel no hesitancy in asking questions.

Architect Herbert Foltz will preside. A special request is made that all those contemplating attending notify Secretary Cannon, 21 Virginia avenue, Indianapolis, at once so that proper reservations can be made immediately.

SHOWS OVERBURNED LIME IS CAUSE OF "POPPING" IN PLASTER

Lime which has been overburned or which has been burned during hydration is the cause of popping in plaster, tests made at the Bureau of Standards have shown. In this type of failure small particles appear to expand and push themselves out of the plaster, leaving tiny holes. In extreme cases these holes may be sufficiently large or numerous to be unsightly. It has been shown that popping will not be serious if the lime is ground fine enough to pass a number 50 sieve, as in that case the lime will be completely hydrated during the mixing and application, or else the particles of defective lime will be too small to cause noticeable holes.

These tests were made in co-operation with the National Lime Association, the Contracting Plasterers' Association, and the International Plasterers' Union. Ninety-eight panels were erected containing different impurities in different sized particles. It was found that, with the possible exception of sand, impurities other than overburned lime did not cause popping no matter how coarse they were.

DEPARTMENT OF COMMERCE ISSUES HANDBOOK ON BUILDING INFORMATION

The Department of Commerce has issued a handbook for prospective home owners entitled "How to Own Your Home," prepared by John M. Gries, Chief and Jas. S. Taylor of the Division of Housing and Building.

This book contains valuable information for the benefit of those who are inexperienced and will be a great help to them in making a decision relative to building.

Copies can be secured from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each.

CITY BUILDING INSPECTORS INVITED IN

Classification of Buildings and Floor Loads to Be Discussed

That which promises to be an interesting meeting is to be held Friday, November 9, by the Advisory Committee of the Administrative Building Council of Indiana at the Peoples Bank Building, Indianapolis.

It is a regular gathering of the committee but has been enlarged to include all the city building inspectors of the state who have been invited to attend as there is to be a general discussion on the data upon which the committee has been working and in which the inspectors should be greatly interested.

The discussion will cover a proposed classification of buildings as relates to structure and occupancy; also time will be devoted to a consideration of the matter of proper, safe and secure floor loading.

HOME BUILDING TO GO BIG AGAIN NEXT SEASON

Prospects Good for Such Construction to
Head the Volume in 1924

An analysis of a nation-wide survey amongst architects to get an approximate line on the trend of prospective work for next year shows this distribution of the various types of building construction: Housing, 35%; educational structures, 20%; public buildings, 20%; commercial buildings, 15%; industrial construction, 10%.

MOVES STARTED TO REHABILITATE RANKS OF PLASTERING TRADE

Employers for, and International Union
Endorses, Teaching of
Apprentices

If present indications carry, the chances are that, at least in a few years, the serious shortage in the available supply of labor in the plastering trade will be greatly relieved.

Most all of the local employer groups affiliated with the Contracting Plasterers' International Association have pledged themselves to the movement, and now that the Plasterers' International Union has endorsed the idea it is believed that within a comparatively short time schools will be started in practically all of the large cities of the country.

A contemplated reduction of the term of apprenticeship from four to three years is under way with the understanding that if an apprentice boy is to serve only three years before becoming a journeyman this entire period must be devoted to intensive training.

COMPUTE BREAKING STRENGTH OF GLASS

Government Carrying On Series of Interesting Tests

For some time back the U. S. bureau of standards has been investigating the breaking strength of sheet glass. The results obtained by breaking sheet

glass in frames has been computed, and a comparison of this data shows in the case for the uniform hydraulic loading of glass over its entire area, that the thickness has considerable effect upon the strength obtained. Thin glass gives a strength that is quite high in proportion to its thickness.

This strength decreases rapidly with decrease in thickness, determinations having been made for glass from 1-10 to 1/4 inch thick. Glass when tested in frames and loaded in the center shows a strength almost comparable with that which it would exhibit acting as a beam, supported on two ends only.

The results above described have been obtained by using a single size of sheet, and the tests will now be repeated on sheets of various sizes to determine if this has any effect on the values obtained.

AWARD FOR SHRINE TEMPLE IS DEFERRED

Bids Under Advisement

The contract for the construction of the auditorium building of Mizpah Shrine Temple has not been let by the committee as had been planned. After discussion over the six bids submitted, the committeemen thought it best to take the figures under advisement, and no definite date was set for the selection of the successful bidder.

The bids submitted in order from lowest to highest figures on furnishing labor, materials and building the structure, are as follows:

Buesching, Hagerman & Co., \$463,000; Charles R. Vermuth & Sons, \$497,223; Indiana Engineering & Construction Co., \$499,000; Yeager & Sons, \$518,770; Max Irmischer & Sons, \$533,996; Bedford Stone & Construction Co., \$573,658.

Work on the structure is to begin immediately after the contract is let and it is hoped that the excavation at least will be completed this winter.

The auditorium, as described by Guy Mahurin, the architect, will be of brick with terra cotta trimmings, steel and reinforced concrete. It will have a seating capacity of 3,500.

ACTIVE MEMBERSHIP CAMPAIGN NOW UNDER WAY

New Exchange Secretary Busy

The building-up process of the local Builders' Exchange is being carried on with a will by Secretary Geo. Schack, who for the past few weeks has been active amongst the contractors stirring up new interest in the organization.

One of the greatest barriers in the way of progress for an organization of contractors is prosperity and Secretary Schack is finding it so at this time. All the builders are so busy and so interested outside that they can't find time to attend meetings. However, there is another day coming when contractors will find need for an organization and it is against that day that the new secretary is preparing.

Though it looks like an uphill game at present the secretary says he intends to continue his campaign for an enlarged membership until he has reached the goal he has set.

BIG LOCAL PUBLIC IMPROVEMENT CONTRACT LET

Covers Utilities for Large Residential
Section

Contracts calling for the improvement of Lafayette place, Fort Wayne, to the extent of \$275,000 have been awarded to the Grace Construction Company by the board of public works. The contract, which had been divided into several sections covering paving, sidewalks, water and gas mains and ornamental lighting posts and equipment throughout the big subdivision, was accepted by the board as a whole on the recommendation of property owners and realty promoters who appeared before the board to urge this method.

BUILDING ACTIVITY MAKES SELF FELT IN EMPLOYMENT MARKET

Demand for Laborers Unusually Heavy

The biggest week ever experienced at the local office of the Indiana state free employment bureau in the placing of applicants for work was experienced recently, according to an announcement made by Fred C. Schmeling, manager.

The demand for common laborers is steadily increasing and 100 more laborers could be placed with different construction companies in the city at this time, it is declared.

INDIANAPOLIS CONTRACTORS PREPARING TO ATTEND LAFAYETTE CONFERENCE

Interest State-Wide

Information received from Purdue University and the local committee of builders who are handling the arrangements for the builders' conference at Lafayette, Ind., November 15, is to the effect that all details have been completed and a fine program has been arranged for the entertainment of the visitors who attend.

Correspondence indicates that contractors all over the state are aroused to the significant importance of the approaching meeting and are preparing to visit Lafayette on that day.

Quite a few Indianapolis builders are arranging to make the trip and are requesting that reservations be made for them, which means that the Indianapolis Building Contractors' Association will have a good delegation on hand when the crowd gathers at Lafayette.

CALUMET CONTRACTORS HOLD CONFERENCE AT GARY

Representatives of Four Cities Met Friday This Week

There was an enthusiastic and representative gathering of building contracting men of the Calumet district at Gary Friday night, who assembled in response to a special call for a conference of a

joint nature between the contracting interests of Gary, Hammond, Indiana Harbor and Whiting.

Building conditions, organization matters and plans for unity of action for contractors to follow in handling the problems of builders, as they arise to confront in the Calumet district were among the topics discussed. There was much interest displayed and it is hoped that other meetings of a similar nature may be held from time to time in the various cities in the Calumet section of the state and thus bring the contracting interests in closer touch with each other for the mutual advancement of the industry.

The Gary meeting was warmly endorsed by the State A. B. C., who sent Field Representative J. H. Owens to attend as the official delegate of the State Contractors' Association.

BUILDING METHODS IN MANY WAYS STILL PRIMITIVE

High Construction Costs Traceable to Some Extent to the Above Fact

There has been less development of the small labor-saving machine in engineering construction than is to the credit of either the constructor or the equipment manufacturer. Equipment for mass operations, as the steam shovel and concrete mixer, has been advanced far in mechanical perfection and in employment. So have special machines like the trench excavator and the paving mixer. It is in machines for individually small operations that development has lagged. Building construction, which is pronouncedly a series of non-continuous processes of great variety, furnishes a particularly good example. Except for the high development of pneumatic tools in steel erection, we find very few light-task, labor-saving machines used. Carpentry, plastering, painting are, most commonly, hand operations on large buildings and are always manually performed in residence and other small building work. Why should acres of plaster in a modern large office or commercial building be put on with hand trowels and other acres of painting be a pail-and-brush operation? Why should yards of concrete floor be laboriously smoothed with hand floats? It is not beyond inventive skill to devise usable tools. Indeed we already, it would appear, have the elements of successful tools in the cement gun the sand blast, the paint sprayer and the wooden floor finisher.

All the backwardness does not, however, lie with the equipment manufacturer. Neither the contractor nor the artisan has progressed much beyond primitive thought in conducting many building operations. It does not seem possible for them to project their imagination beyond the hod and trowel in plastering or the bristle brush as a means of applying paint. Perhaps this is provocative speech, but that is exactly what the building contractor and his workmen deserve. In speaking publicly recently of his industry one of the most prominent building contractors of the country said: "In the building industry

alone, among leading industries, primitive methods still prevail." Again he said: "The high cost of building is traceable to the lack of progress in the building industry toward developing improved methods." Indeed a little more ingenuity exercised by builders in devising new machines and methods and a little less in inventing subterfuges for constructive thinking would greatly help present building conditions.—Editorial in a recent issue of Engineering News-Record.

BUILDING PERMITS

Week of October 25 to October 31

*Office Building (add. to factory), \$40,000, 131 N. Alabama. Owner, Furnas Ice Cream Co., 131 N. Alabama. General contract, J. G. Karstedt Construction Co., Lemcke Bldg. Wrecking old building. Start work shortly. Brick.

Residences (2): \$16,000 and \$15,500, 1633 and 1641 N. Meridian St. Owner and builder, H. L. Simons, 4244 N. Capitol Ave. Excavating. Brick veneer. Two garages.

J. Wesley Reed ----- President
E. E. Cole ----- Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**AS HIGH LIGHTS IN THE NEGATIVE****Contrasts That Came to the Secretary**

The secretary was back at his desk; he had been to a big meeting of business men, and, being a secretary, had been an invited guest. A prominent speaker had extolled the virtues of co-operation, unity of purpose, etc., all of which came back to the secretary as an echo and its impressiveness sank in. He had returned to the office happy, to him the whole world was wrapped in sunshine.

Pitching into his work, where he had left off, he set about with new vim and his thoughts harked back to the big meeting. He grew tired from the pace he was setting and leaned back to rest.

Behold! Before him stretched a scene. The room was as a fairyland a veritable bower of flowers, beneath which were long tables and about them were assembled many, many men; happy, jolly men, their faces beaming with the glow of intelligence.

The secretary started and would have cried out, but a voice seemed to whisper in his ear, "Sh! Disturb them not. Those men are members of the Amalgamated Contracting Interests, all broad minded, unselfish fellows who believe that the best way to progress is to help the other fellow and thus advance the whole. Their aim is to overcome petty spites and jealousies, to work out their problems together, stick to their agreements, to plug not for themselves alone but to seek to endeavor to promulgate ways and means for the benefit of the Building Industry and thus make of Building Contracting a profession of which they may all well be proud."

Closing his eyes the secretary meditated. When he aroused himself to look once more upon the realization of his dreams his disappointment was keen; the scenes had been shifted. Such a conglomeration as he saw! There were many men, also, and their countenances were clouded with frowns and scowls; they were wrangling bitterly and turning their backs on each other.

"What have we here?" exclaimed the secretary.

"Sh!" Again sounded the warning voice. "Don't you know? Those are unorganized contractors who wish to go their own way and will not support organized effort that tends to mutual benefit. There is no understanding among them, and Rumor, with crafty glee, holds full sway, mercilessly hitting here and there, scheming always to hold these men apart and make them vassals of her will."

Sorely troubled, the secretary pondered,

to be brought suddenly to himself when one of the colored population stuck his head in at the office door and said, "Say boss, do you-all know whah I cain get a job?"

And the secretary turned on his desk light, crowded the big meeting back into his thoughts for future reference, and went back to his letter writing.

TIME OF MEETINGS CHANGED**Effort Made to Get Away From Influences That Affected Attendance**

A change in the B. T. E. A.'s calendar has been decided upon. Owing to the fact that there seemed to be various other meetings on Tuesday nights to interfere with the attendance at the B. T. E. A.'s assemblages, it has been voted to change the meeting night from Tuesday to Monday, and to hold the regular monthly meeting every third Monday.

AND YET THE PUBLIC GROWLS**Forgets Its Part in Boosting Costs**

As an instance of what a fight by contractors to keep construction costs down means to the public, and the whole-hearted support the latter will bestow when the suction interferes with said public's business, here is a concrete example:

The contractor for the new hotel building stood out with his fellow contractors against the recent advanced wage demand of building laborers in the Calumet District with the result that operations on the hotel structure came to a stop.

Enter the attorney for the new hotel owners who brought pressure to bear through the contractor's bonding company and forced him to meet the demand of the union laborers.

The gist of the matter is, the public is selfish when it wants something, especially building, it brooks no interference; it only builds once, that is individually, and it don't give a hang for the other fellow who may wish to build later. Some impatient owner will knock a wage scale galley west, little recking the far flung influence such action will exert in the building field and its effect on future building construction affairs. And yet, that very public who is so adverse to the stabilization process the contractor is trying to effect will turn on the construction industry and rail about the exorbitant costs charged and the unreasonable wages paid Labor, yet it is instances similar to the one that has just occurred in connection with the hotel as above noted that sends wages soaring despite the effort of the contractors.

CALUMET BUILDING PROGRESS

Karl D. Norris, architect for the Lake County Tuberculosis Sanitarium, which is to be erected just north of Crown Point, went before the state board of accounts and state board of health at Indianapolis last week to secure approval of the revised plans and specifications for the structure.

Instead of following the original plans,

as proposed by the county commissioners at the outset of the project, it has been decided to eliminate the two main wings on each side of the administration building and in their place erect six frame wards. Later on, however, the two large wings to be occupied as wards will be constructed. Separate bids will be taken on the several sets of wards, power house and administration building about the latter part of December. On account of the delay caused by a revision of the plans, work will probably not get started before early spring.

With the completion of the new Masonic Temple, which is now well under way, Whiting will have three magnificent buildings in a group on one street—the Community Building, Methodist Church and Masonic Temple.

The Orthodox Jewish congregation has purchased the fine residence of the late W. B. Conkey on Hohman and Mason streets and will remodel it into an up-to-date synagogue. The garage is to be made over into a club room for the younger members. Architects A. C. Berry & Co. are preparing the plans, which will be ready for bids about January 1.

The contract for the \$12,000 summer home at Cedar Lake for William Ahlborn was awarded to Henderlong Bros., of Crown Point.

Architect Nat. L. Smith, Crown Point, has been commissioned to prepare plans for a Michigan township school in LaPort county. The structure is estimated to cost \$25,000.

The parsonage of the new Greek Catholic Church has been completed by general contractor Guy Young, who has the church building proper ready for roof.

Bad weather prospects have set the builders to earnest endeavor to get their projects under roof. Morris Bros., who have the contract for the Joseph Myers factory, have gotten the roof on that job and are "sitting pretty."

Local architects report a number of good sized projects on the boards that are not quite ready for public announcement.

EARTHQUAKE SHOCKS FAIL TO TOPPLE AMERICAN BUILT BUILDINGS**Reports From Japan Gratifying**

American steel concrete buildings in Tokio and Yokohama withstood the earthquake shock and are in good condition, according to a cable from Assistant Trade Commissioner G. C. Howard at Kobe. Officials of the U. S. Department of Commerce are said to have expressed gratification over the first practical demonstration of the effectiveness of the new so-called earthquake proof buildings which have been constructed within the last three years. There are about six of these buildings in Tokio.

PLANS FOR CONFERENCE FOR INDIANA BUILDERS COMPLETED.

Much Interest Centers on Lafayette Gathering Set For Nov. 15.

A conference of Indiana Architects, Contractors, Engineers and Craftsmen will be held at Purdue University, Lafayette, on Thursday, November 15th, 1923, marking a new epoch in Indiana building history since it will be the first time these four important elements of the state building industry have been called at one time into a general joint conference for builders.

The purpose of this meeting is to bring together architects, contractors, engineers and representatives of the building trades crafts for a one-day meeting at which time building problems common to these groups will be presented and discussed.

Special features of the conference will be a luncheon which will be held in the Home Economics Cafeteria at Purdue University, 12:00 noon, and inspection trip through the University buildings and laboratories, which will start from the Home Economics Building at 1:00 o'clock.

Plans have been made to establish headquarters at the Fowler Hotel for all visitors while all business sessions will be held at the Civil Engineering Building at Purdue.

All delegates who contemplate attending the conference should address inquiries, reservations for luncheon and dinner, to Professor W. A. Knapp, Assistant Director of Engineering Extension Service, Purdue University, Lafayette, Indiana.

The program for the day as completed is as follows:

Thursday, November 15, 1923

Morning—10:00 A. M.

Regional Meeting of the Indiana Society of Architects, Room 105, Civil Engineering Building.

Quarterly Conference of Associated Building Contractors, Room 101, Civil Engineering Building.

12:00 Noon

Luncheon—Home Economics Cafeteria, Purdue.

Afternoon—1:00 P. M.

Inspection trip through the Buildings and Laboratories of Purdue University, starting from Home Economics Building.

Joint Conference Meeting—2:30 P. M.

Presiding—W. A. Knapp, Assistant Director, Engineering Extension Service, Purdue University.

Address of Welcome—A. A. Potter, Dean of Engineering, Purdue University.

Response—F. S. Cannon, Chairman of Advisory Committee, Indiana State Building Council.

Progress Report of Advisory Committee, Indiana State Building Council—J. H. Owens, Secretary.

Standard Contracts—Herman Sherrer, President Architects Association of Indianapolis.

Extending the Building Season—A. E. Kemmer, of LaFayette, 1st Vice-President, Associated Building Contractors of Indiana.

Evening—6:00 P. M.

Informal Dinner—Hotel Fowler.

Presiding—Dr. Wm. F. King, Secretary, State Board of Health, and Chairman of Administrative Building Council of Indiana.

Talks By—
Dr. E. C. Elliott, President of Purdue University.

Mr. Newman T. Miller, State Fire Marshal, Member Administrative Building Council of Indiana.

Dr. W. K. Hatt, Head, School of Civil Engineering, Purdue University. Member Building Code Committee, Department of Commerce.

Mr. Charles E. Watkins, Director of Welfare and Ass't Treasurer, Muncie Products Company, Muncie, Indiana.

CALUMET CONTRACTORS CONSIDERING ORGANIZATION OF JOINT BUILDING COUNCIL.

Seek To Stabilize Working Conditions In That Section of Indiana.

As a result of a joint meeting of general building contractors of the Calumet

District held at Gary, November 2 and attended by building contracting operators from Hammond, Gary, East Chicago and Indiana Harbor there has developed a scheme to organize a Joint Council to handle building problems that arise in that section of the state, and thru such a body to institute a definite plan for unity of action in meeting such problems and seeking to better working conditions.

As a preliminary to such a move it has been suggested that the general contractors from each of the cities in the District having organizations elect three delegates from each city to membership in the Council and thus assure all an equitable representation.

The purpose of the Council would be to deal with various phases of building conditions as they affected the District as a whole, and to work on standard wage scales and working agreements to rule thruout the territory, thus having unity of action amongst contractors in an endeavor to prevent the builders in one city from taking advantage of those in neighboring cities, resulting in a state of turmoil and uncertainty to the disadvantage of the building industry.

In the organization of such a council the proposition was advanced that the officers should consist of a chairman, a vice-chairman and a secretary.

There were some thirty general contractors present at the Gary meeting, all of whom expressed favor toward the proposed council. They were instructed to report back to their individual organizations with the recommendation that the new move advocated be endorsed. Further action hinges upon the manner in which the city associations accept the proposition, but, if favorable another joint meeting of the cities involved will be called in the near future and steps taken immediately toward organization of the council.

Hartford City: Undertaking Establishment and Apartments: (rem. from commercial building) Private plans. Owner, Burk and Fennig (undertakers). Hartford City. Plans in progress.

Contracts Awarded

***Boonville:** Factory building, \$52,000. Archt., Clifford Shopbell & Co., Furniture Bldg., Evansville. Owner, Moses Rosenthal Co. (underwear Mfrs.), 913 West Van Buren St., Chicago, Ill. and Boonville, Ind. General contract awarded to Tri State Contracting Co., 22 Merchants Bank Bldg., Evansville. Start work at once, 3 sty.

Decatur: Garage (for company's cars), 1 sty., 52x82. Owner, The Cloverleaf Creamery Co. Starting work. Brick and hollow tile, concrete floor.

Franklin: Commercial Garage, 1 sty., 16x70, Madison St., private plans. Owner, Jarv Alexander, Franklin. General contract let to Haskell-Ferguson Co., Franklin. Start work shortly. Brick, additional radiation, roll roofing.

***Mooresville:** Community room and Sunday School (annex), \$10,000. 1 sty., 46x76. Archt., Allen and Garriott, Lombard Bldg., Indianapolis. Owner, Methodist Episcopal Church, Rev. E. L. Hutchins, Mooresville. General contractor, Jake Mann, Mooresville, Ind. Starting work. Brick.

***Sellersburg:** Township School, \$60,000, 2 sty. and bas., Sellersburg, Ind. Archt., Clifford Shopbell & Co., Furniture Bldg., Evansville. Owner, S. L. Scott, superintendent of schools, Jeffersonville, Ind., and Thomas J. La Master, trustee of Silver Creek Township, Sellersburg, Ind. General contract let to J. Fred Beggs, Scottsburg, Ind., including heating, plumbing and wiring. General contractor desires bids on all materials.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Sealed proposals will be received by the Trustee of Waltz School township, Wabash county, Ind., until eleven o'clock a. m., Friday the 14th day of December, 1923, in the school building in Somerset, Ind., for the erection and completion of a two story and basement brick school building, the estimated cost of which is \$80,000, to be located in Somerset, Waltz township, Wabash county, Ind., according to the plans and specifications prepared by the Elmer E. Dunlap Co., architects, copies of which are now on file in the office of the trustee and in the office of the architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewerage for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The trustee and his Advisory Board reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidders. The limit of time to be allowed the Trustee for proper investigation of bidders shall not be less than 7 days from the date of receiving bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand, Five Hundred Dollars (\$2,500.00) each bid for the heating and ventilating plans shall be accompanied by a certified check for the sum of One Thousand Dollars (\$1,000.00) and each bid for the plumbing and sewerage shall be accompanied by a certified check for the sum of Five Hundred Dollars (\$500.00). These checks must be made payable to the School Trustee of Waltz School Township, Wabash County, Indiana, and will be held by him as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Trustee for the performance thereof, if his bid or bids are accepted. The checks of those bidders who

fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Each bidder shall file with his bid the statutory affidavit required under Section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the trustee or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Signed: H. H. BRADLEY,
Trustee of Waltz School Twp.,
Wabash County, Indiana.

November 10th-17th-24th, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given by Edward J. Hecker, trustee of Warren school township, Marion county, Indiana, that until 1 o'clock p. m., on the 24th day of November, 1923, at his office at No. 5241 East Washington street, Indianapolis, Ind., said trustee and his advisory board will receive sealed proposals for the construction of a grade and high school building, to be located on the east side of the Post road, between East Michigan and East Tenth streets, in Warren township, Marion county, Indiana, in accordance with plans and specifications prepared by Harrison & Turnock, architects and engineers, 500 Board of Trade Building, Indianapolis, Ind., and now on file with said trustee and the state board of accounts, and in the office of the architects and engineers.

All bids must be made out on the standard form, No. 96 of the state board of accounts, and shall be accompanied by a certified check for two (2%) per cent of the amount of bid, guaranteeing that if the bidder is awarded the contract he will accept the same and give surety company bond for the faithful performance of said contract.

Bids will be received on the following parts of the work: General construction, heating, plumbing, electric wiring, electric fixtures.

Dated this 3d day of November, 1923.
EDWARD J. HECKER, Trustee.
Nov. 3, 10, 17, 1923.

CELOTEX

INSULATING LUMBER

Celotex Stops Heat-Cold-Noise Makes Stronger Buildings

Celotex is in use in thousands of homes throughout the entire United States as a sheathing, replacing wood sheathing, as a plaster base, eliminating lath, as a sound deadener, exterior finish or as base for stucco.

Celotex Lumber is used for sheathing throughout. Celotex is a replacement for wood sheathing, shows greater strength and is equal to cork insulation. It turns heat and cold alike, as no other building lumber can.

When you, as an Architect or Contractor, erect a house with Celotex you provide the owner with comfort the year 'round and a 25% to 35% saving in the annual fuel bills as long as the house stands.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture. It is the only manufactured board on earth that will stand the test in outside walls. Nails direct to the studs of the building, saws and handles the same as wood lumber. It is not readily harmed by weather nor rough handling.

Talk to your lumber dealer, he stocks it. Ask him about the merits of this remarkable lumber. He knows. He can make immediate delivery, too.

Stock sizes: Thickness 7/16 in., width 4 ft., lengths 8 ft., 8½ ft., 9 ft., 9½ ft., 10 ft. and 12 ft. Weight about 60 lbs. per 100 sq. ft.

HOW EFFORT IS BEING DIRECTED BY ASSOCIATION TO AID THE ARCHITECTURAL PRO- FESSION

Tile Men Advance Interesting Informa- tion to Architects

Impressions gained from war work experience in government service, in connection with construction operations especially along housing lines, showing the need for co-ordination of effort and co-operation between architects and building material industries and vice versa, and, that which one big association of manufacturers is seeking to accomplish in that direction through service, were set forth at a special meeting of the Indiana Chapter, A. I. A., at the Lincoln Hotel, Indianapolis, Wednesday evening, November 7, in a most instructive and entertaining manner, making for one of the most constructive programs ever presented to Indiana architects.

The speakers were Knickerbocker Boyd, Philadelphia, former vice-president, then secretary, of the A. I. A., now consulting architect for the Associated Tile Manufacturers, and F. W. Walker, Beaver Falls, Pa. secretary for the tile association.

Mr. Boyd referred to his connection with the United States Bureau of Housing and his contact with material supply manufacturers, in which position he came to know materials more intimately. Realizing that when an architect knows materials, their properties and function, he can build better, the speaker asserted that when his war work was completed he was inspired with the idea of securing better co-operation between the architects and industries that a method of proper presentation of data, vital information for the architect, might be established.

The average architect is too busy to give of his valuable time to all the arguments put forth by the many salesmen, and is also too much engaged to have to go into details to work out material solutions; also that it is impossible for him to acquire all the data necessary off-hand. Therefore, he advocates that to secure the much needed technical information the problems of the architectural profession be presented to the materials industry and the production details be presented by the industry to the profession.

In the tile industry he said he found being produced anything in that line the architect desired and then through a process of analyzation certain standards of colors and grading were settled upon.

Also the problem of the proper application and function of the material.

He then referred to the basic specification form advocated for tile by the manufacturers, preferring the word "basic" rather than "standard" in that a basic specification can be elastic to suit the practice in any location.

He recommended that other material interests do what the tile manufacturers are seeking to do to aid the architect and eliminate the drudgery for the profession.

Next Mr. Walker spoke, elaborating upon the fact that that which the tile men are doing with regard to specification forms, standardization, etc., is with but one view, to render service, not only to the architect, but to the public as well, and they feel that there is no better way to spend money than in this educational vein for in the end the architect will know how better to serve his client, who will be satisfied when the work is completed and such satisfaction will make more future business for the tile industry.

He then mentioned the effort being made by his association to encourage apprentices and create greater skilled mechanics. He said it costs money to teach new craftsmen and the Unions and contractors will not go to the trouble nor expense of teaching the boys. The tile association, realizing that good workmanship counts most in creating satisfaction, has a trade course under its tutelage that is actually turning out skilled men who have been pronounced more efficient than the average tile setter now on the job.

The remarks of the speakers were most enlightening and were enthusiastically received by the seventy or more architects and draftsmen present.

Preceding the meeting was a delightful 6 p. m. dinner in the Travertine Room at the hotel, the architects being the guests of the Associated Tile Manufacturers.

INDIANAPOLIS ARCHITECTS TO BE ADDRESSED BY HEATING EXPERT

Architects Association Following Policy of Instructive Initiative

A promising program for the regular monthly meeting of the Indianapolis Architects' Association is announced for next Tuesday night, November 13, at which time Charles F. Eveleth, chief engineer for the Warren Webster Co., will entertain with an illustrated address on "Group Heating of Buildings."

The meeting will be held at the Hoosier Athletic Club, starting with a 6:30 p. m. dinner.

BIG REPRESENTATION OF STATE ARCHITECTURAL PROFESSION DESIRED AT LAFAYETTE

Early Effort of I. S. of A. to a Great Extent Responsible for Next Week's Conference

The approaching builders conference at Lafayette Thursday, November 15, holds more than ordinary interest for the Indiana Society of Architects. There is a significance back of the meeting that carries back to several years ago, for at that time the idea for greater co-operative effort between the fundamental working elements of the building industry of the state was advocated. At the time the theory sounded good, but since little or no accomplishment had ever been achieved in that direction, the proposition seemed dreamy, a thing to be sought for, yet hardly considered practical.

However, the seed was sown when the idea was advanced; there was need for such and a mission. The thing took root and, through the years, has been growing. Certain barriers that were in an unwritten way supposed to exist between architects and contractors to prevent unity of action looking toward the advancement of building conditions and the industry were broken down when it was found they were more or less mythical.

Organization was the agent through which it was realized that the architects and contractors could work together for the advancement of the whole. The Indiana Society of Architects and the Associated Building Contractors of Indiana got together on general matters affecting building conditions and have not only worked in harmony but have brought about a betterment and are actually engaged in moves that will make for the advancement of the industry as a whole.

The South Bend conference of the State Architects and Contractors attracted favorable attention and Professor W. A. Knapp, assistant director, Engineering Extension Service, Purdue University, a member of the advisory committee of the Administrative Building Council of Indiana, proposed a general conference of Indiana builders to include architects, contractors, engineers and Labor representatives, the affair to be held at Purdue University. This proposition was endorsed by all concerned and Thursday's meeting is the result.

EVANSVILLE BUILDING OPERATIONS AHEAD OF ENTIRE 1922 VOLUME.

October Proved Good Building Month

Building progress as indicated by the figures compiled at the city building inspection department continues steady and active in Evansville, according to the October permit returns just made public by Inspector Edward Kerth.

More permits were issued in October than during any other single month since May and except for September, which ran \$7,000 ahead of October, the latter month's estimated valuations were the highest for the past five months.

There were 14 more permits granted in October, 1923, than in September, and 92 in excess of the number issued during October a year ago. As for the amount of money involved the past month's total ran 2.38% behind the September figures, but showed a gain of 61% over the October, 1922 estimated valuations.

To November the first this year the official figures of the building inspection department show that building construction operations in Evansville for 1923, are far ahead of those of the corresponding period a year ago. From January 1st to November 1, 1923, there have been 561 more permits granted than were issued over the same period in 1922 and the estimated valuation of this year's permits shows a gain of 108.3% over the total for the corresponding period last year.

Evansville's 1923 new building work is now 19.1% ahead of the entire volume put over in 1922.

The October figures are:

Months	Per.	Est. Val.
October, 1923	228	\$284,360
October, 1922	136	176,616
Gain, October 1923	92	\$107,744

LOCAL CONTRACTOR LANDS GOVERNMENT CONTRACT.

To Build Tenders' Residences at New Dam at Newburg.

C. Kanzler and Son, general building contractors, will erect the two dwellings

for lockmasters at the new Dam 47 near Newburg, Ind., according to notice of award of contract received from Washington, D. C. The Kanzler bid was \$22,000.

The building will consist of two brick and concrete dwellings of two stories each, to cost \$22,000. Each dwelling will comprise six rooms and bath. Work will be started at once.

CHIPS AND SHAVINGS.

Construction work is well under way at the new addition to the plant of the National Furniture company, Keller street near Fulton avenue. It will be a one-story brick structure 145 feet by 100 feet and will be used for upholstery and storage departments. The estimated cost is \$10,000.

BUILDING FALLS OFF IN FORT WAYNE DURING OCTOBER.

Shows Quite a Decline In Amount of Money Involved.

During October no extensive or large building operations were started in Ft. Wayne, a condition that caused quite a shrinkage in the usual customary monthly report of the city building inspector which since early last Spring has, with one or two exceptions, shown monthly returns of a million dollars and over. However, the number of permits issued in October, 270, indicates that there has been no let up in activity, instead, there were considerably more projects started last month than either in September, 1923, or in October, 1922, but they were of a smaller nature than those begun in the other two months mentioned.

The building work for which permits were granted during the month just past shows an estimated valuation of \$745,600 which is 58.5% less than the September valuation and 46.1% loss from that of October, 1922.

As for the permits issued, the item that shows the number of new projects started, there were 270 recorded in October, 1923, as against 175 issued in September, this year, and 189 in October, 1922.

Of the permits issued last month 118 were for new homes ranging in cost from \$14,000 down with a general average for all amounting to \$5,400. Taking into consideration the October permits there has been started in Ft. Wayne this season 1238 new homes.

The comparative building figures for October this year and the corresponding period last year are:

Months	Per.	Est. Val.
October, 1923	274	\$ 745,600
October, 1922	189	1,383,445

October 1923 - 85 - \$ 537,845

FORT WAYNE ELECTRIC SHOW PROVES TO BE A FINE AFFAIR

Big Crowds Attracted

A most interesting attraction was offered Fort Wayne people this week in the electrical show which opened Monday evening and continued through to Saturday night. One of the important features of the show was the fact that the entire exhibit was put on by Fort Wayne electrical manufacturers and dealers, no out-of-town interests being in any way connected with the undertaking.

The entire three floors of the Gates building were used for the show, which was put on by the Fort Wayne Electrical League. Members of the organization were enthusiastic regarding their exhibit and because of the interest they centered in their undertaking and the elaborate plans they made for the week's show went a long way to lend success to the effort.

The show opened Monday evening at 7 o'clock and was open every day at 1 o'clock and remained open until 11 o'clock at night. Many hundreds of visitors thronged the rooms during the week, and took a keen interest in the exhibit.

There were at least 35 exhibitors present during the entire week and all had elaborate displays. The entire third floor of the building was used for the exhibit of the National Lamp works, of Cleveland, one of the units of the General Electric Company, which has a branch in Ft. Wayne and this exhibit alone was well worth any one's time for inspection. The exhibit was made at Detroit last year and arrangements are now being made to make it a permanent affair in the schools of that city because of its great educational features. At the exhibit it was demonstrated just what a good or a poor light is and what a good light consists of, as well as what to do to improve a poor light.

The entire affair was a credit to the local electrical interests and was the most extensive and instructive electric show ever put on in Ft. Wayne.

SIGNS POINT TO GOOD CROWD OF INDIANAPOLIS CONTRACTORS FOR LAFAYETTE MEET**Delegation to Be Made Up Early Next Week**

Though no definite plans have as yet been mapped out for the trip to Lafayette next Thursday, the word going the rounds at the Building Contractors Association headquarters, 320 Peoples Bank Building, tends to the information that Indianapolis will be well represented at the big state gathering of Indiana building men.

Tentative agreements have been acknowledged by a number of local contractors to make the trip, contingent upon conditions prevailing at the time of the conference. Many of the contractors have expressed the desire to motor to Lafayette and it is probable that quite a caravan from Indianapolis will move by that method on to the Tippecanoe county metropolis, on the appointed day.

BRICK MASONS' ASSOCIATION AT INDIANAPOLIS TO HAVE OFFICIAL REPRESENTATION AT LAFAYETTE.**Name Two Delegates To Make The Trip.**

Official action relative to the Lafayette, Indiana, conference of state building men, scheduled for November 15, was taken

this week by the Brick Mason Contractors Association of Indianapolis, who at the regular meeting appointed as delegates to the affair, James Hodgson, Sr., and James Rybolt.

CITY BOOSTS BUILDING BATTING AVERAGE IN OCTOBER.**Late Fall Operations Take On New Impetus.**

Renewed activity in building operations sprung up in Indianapolis in October after a four months' slump and the showing made in the way of permits granted was very good for the middle fall season.

More permits were issued in October than during any one of the preceding months since May. The October permits in point of numbers were but 58 behind the May total which was the best recorded so far in 1923. The total estimated valuation of the new building construction work passed upon favorably by the city building inspection department amounted to over two and a half millions of dollars and is the fourth best monthly total posted this season, a fine record for this late in the year.

There were 255 more permits issued in October than in September, and 345 more than during the corresponding period in 1922. The estimated amount of money to be invested in the past month's new building volume is 51.6% greater than that for September, and also shows a gain of 3.8% over the October, 1922, valuations.

Official figures given out by City Building Inspector F. F. Hamilton are as follows:

Months	Per.	Est. Val.
October, 1923	1751	\$2,513,026
October, 1922	1406	2,431,513

DEEP CONVICTION AND REAL SINCERITY SOUNDED AT MASON CONTRACTORS MEETING**Indianapolis Mason Bosses in Inspiring Session**

In no place in Indiana, in fact, it is doubtful if any place in the country, can be found as greater exemplification of the close ties and the warm harmonious beneficial friendships that are welded through the channels of organization than is demonstrated at Indianapolis by the Mason Contractors Association. What the latter lacks in numbers, there are only twenty members, it makes up for in sincere spirit and fealty amongst the members. It took Tom O'Hara in a simple, homey way to adequately express that spirit, when in addressing non-members, he said, "We invite you to move into our neighborhood, to slide down our cellar door, to be a good fellow with the rest of us, to come to learn us better, to be privileged to slap us on the back and say, 'Hello, Tom, or Walter, or Ernie, or Jimmie, etc.' This friendship the association affords becomes an asset beyond value. There was a time when I fought these men about me, but, those days are over and,

to them, I am no longer 'that long-legged Irishman,' though my legs are just as long as ever."

The Indianapolis mason contractors association held a good fellowship meeting at the Lincoln Hotel, Thursday night embellished it with a chicken dinner, and swung things around into a sort of evangelistic or testimonial session that inspired a spirit of hallelujah, as it were.

Walter Wise presided and Attorney Harry Fenton showed the way to the "Saw Dust Trail" with a ringing, stirring speech. One by one the mason contractors voluntarily took their way to the mourner's bench and impressed deeply by the sincere note that sounded as they "testified."

It was an informal affair and proved most enjoyable, for there were men who stood back of their association fully convinced the association stood behind them at all times. Those men did not prate of dollars and cents benefits, rather, did they boast of the intangible assets that were theirs, the gift of the association, a treasure each and every one of them prized.

BUILDING PERMITS**Week of November 1 to November 8**

Factory: \$50,000 631 S. Alabama St. Owner, Samuel Bingham Sons Co., Kentucky Ave. General contractor, F. O. Johnson, at site. Brick and concrete.

Factory: \$27,200, 202 Miley Ave. Owner, Thos. L. Green and Co., 202 Miley Ave. Contract let to E. H. Pierson Construction Co. 1 sty., 90x120.

Residence: \$15,000, 3726 Fall Creek Blvd. Owner, G. A. Petersdorf, 1103 S. East St. General contract let to Michaelis Bros., 826 Parker Ave. Excavating.

Residence: \$10,000, 2352 Adams St. Owner, Royse-Borchert Co., 603 City Trust Bldg. Excavating.

Garage: \$10,000, 1 sty., 43x71, 4153 Broadway. Owner and builder, Conder and Culbertson, 623 N. Noble St. Brick. Excavating.

Residence: \$9,500, 269 Buckingham Drive. Owner, Woods-Richards Co., at site.

Store: \$8,000, 1 sty., 65x42, 2609 E. Washington. Owner, Joe Bledstein, 826 S. Capitol. Contract let to Abraham Kwitny, 1137 S. Illinois St. Brick.

Residence: \$6,000, 4710 Central Ave. Owner and builder, Cloud and Piper, at site.

Residence: \$6,400, 5248 Broadway. Owner, Charles Thomas. Contract let to H. R. Cox, 648 N. Temple.

Residence: \$5,500, 5460 Hibben. Owner, O. C. Boyd, 306 Lombard Bldg. Day work.

Residence: \$4,000, 262 N. Tremont. Owner, Frank Perkins, 254 N. Pershing. Day work.

Residence: \$5,000, 3252-54 W. Washington. Owner, S. H. Connarroe, at site. Day work. Excavating.

Hammond, Indiana**BIG GAINS SHOWN IN HAMMOND
BUILDING OPERATIONS
LAST MONTH****October One of the Best Months of the
Year**

Building operations in Hammond suffered nothing by the advent of October, in fact, the month just closed added considerably to the city's new construction volume that is being piled up with the advancement of the year.

The number of permits issued last month was more than the total for any other single month since June, and likewise, the total estimated valuation for the month was the best of the last four months and the fifth highest turned in so far during 1923 by Hammond.

The permits issued in October were 55 more than those of the October, 1922, total, and the estimated valuation for the October, 1923, permits showed a gain of 97% over the same item for the corresponding period the year previous.

The October figures this year and for the same time last year are:

Month	Per.	Est. Val.
October, 1923	122	\$383,200
October, 1922	67	193,475
Gain October, 1923---	55	\$189,725

**STEADY GROWTH SHOWN BY CITY
SURVEY****Much Home Building Done in 1923 to
Meet Increased Housing Needs**

A survey made recently by the Chamber of Commerce shows that the population of Hammond proper has increased 4,500 this year and that 960 new dwellings have been erected during that period. Also, that 200 new houses have been built in West Hammond.

If the proportionate rate of increase continues for the next two months Hammond by the first of the year should have at least 5,000 more people on January 1, 1924, than she had a year ago and 1,000 new homes added to her taxable valuation.

**CALUMET CONTRACTORS HOLD
REAL "GET-TOGETHER" SES-
SION AT GARY****Five Cities in the District Represented**

There was a fine, enthusiastic representative crowd of Calumet District building contracting men assembled at Gary, Friday evening November 2, in answer to a special call sent out for a district conference. Cities represented were Hammond, Gary, East Chicago, Indiana Harbor and Whiting and the delegates present were among the most prominent building operators of those localities.

The object of the meeting was to get the builders of the District together and seek to create a greater spirit of co-operative effort amongst the men as a whole, as it relates to a handling of conditions and problems pertaining to the building industry in the northwestern corner of Indiana. While the majority of contractors in the various cities have been working in unity to a more or less degree there are those who realize that there should be a closer tie between all the cities and the Gary meeting was a start in that direction.

There were a number of fine talks made, all of which were received kindly and with enthusiasm. Then, too, some time was given over to a general discussion of matters as they bore upon and affected the contracting business.

Among the guests present were J. H. Owens, Indianapolis, Field Representative of the Associated Building Contractors of Indiana, and O. C. Holtz, H. W. Meyers and Mr. Blanke of the Builders and Manufacturers Mutual Casualty Co. of Chicago, who motored over to Gary for the meeting.

Those sponsoring the meeting were highly pleased with the result and it is probable that more meetings of a similar nature will be held from time to time in the future.

A WELCOMED VISITOR**State A. B. C. Representative Brings
Good Tidings to Hammond**

On his way over to Gary, last week, Field Representative J. H. Owens of the

State A. B. C., dropped into local B. T. E. A. headquarters for a visit. He was greatly interested in local association affairs and conditions in Hammond and in turn imparted some instructive information regarding association work among contractors around the state.

His reference to that which the Administrative Building Council of Indiana is doing to whip things into shape was most encouraging and gratifying. It only goes to prove what can really be accomplished when architects, contractors, engineers and Labor, realizing the mutual interest all have at stake in the building industry, will get down to co-operative effort to advance that industry.

FLIVVER PACE FAST ENOUGH**Then, Too, Not So Far to Fall**

Some of us may like to fly high, but the speed the aviators are developing these days is somewhat beyond us. The latest press reports chronicling the flight of a navy aviator at 265.21 miles per hour is a little faster than we wish to go, thank you. As long as the old bus will travel along at from 25 to 30 miles per hour we will stick to the ground for ours, step on the starter, and try to keep from going around corners on two wheels.

CALUMET BUILDING PROGRESS

George Wolf has purchased the brick and stone in the old foundation from which the Central School Building was moved. He will wreck it and sell the materials. Perhaps now the old site will be cleaned up and not be an eye-sore any more.

General Contractors Ahlborn & Bates have desolved partnership, each continuing in business separately.

George Bates was awarded the general contract for the Bartlett Graver-Nash Auto Sales garage on Sibley St. at \$16,000.

Samuel Schlesinger has plans drawn by Archt. Newhouse of Chicago for a five-story apartment building on Hyslop Place. He will employ a superintendent and build by day work, starting excavation work November 5th. The estimated cost is \$110,000.

PROPHETS WHO MISSEP

Demand In Material Market Indicates
No Let Down In Construction
Work

Forecasters who predicted early this
year that the fall months would witness
a slowing up of the construction indus-
try are beginning to realize that their
guess was a poor one. Manufacturers
of building materials who are among

the first to feel the effects of a let-down
in the industry report that orders are
continuing to come in, in such volume
that it is difficult to build up a reserve
stock. During the month of August
thirteen million barrels of Portland ce-
ment were produced, and the manufac-
turers shipped over fifteen million bar-
rels. The Common Brick Manufacturers
Association reports a similar condition
existing in that branch of the industry,
with one hundred and seven members
reporting on September 1st that they
had 250,176,000 brick on hand and un-
filled orders for 330,712,000. Fabri-
cators of structural steel also report
that it is difficult to keep production up
to meet the demand and unfilled ton-
nage orders are on the increase.

THE GRASPING SHORT-SIGHTED CONTRACTOR

A Modern Fable

Once upon a time there was a near-
sighted contractor, who was asked by an
architect to figure a school house in a
nearby village.

And he took the plans and he went
over them carefully, and he gathered
around him all the sub-bidders he could.
And he examined all the figures of those
sub-bidders and partook largely of their
advice and counsel as to their particular
part of the work.

And when all was said and done, he
took those sub-bids which seemed best
and put them on his estimating sheet
and made his bid. And lo and behold,
the next day he had a contract!

Then those sub-bidders who knew
their figures were best, went to the near-
sighted contractor to secure their share
of his good fortune. But he refused,
saying, "There was a man from Squash-
ton here who promises me a better
price. Of course, I know he did not
figure the job before it was let, but I
took this work on a close margin and if
I can save a dollar any place, I must
do so."

And the sub-bidders went away with
wrath in their hearts, for they knew that
it was not only their price, but the in-
formation they had given, which had
enabled the near-sighted contractor to
land the job.

And, after many days, this same near-
sighted contractor was very desirous of
securing another job, and he besought
the sub-bidders for bids, but they would
have none of him, and he was sore dis-
tressed, and went away mournfully, for
in his heart he knew he had need of
their knowledge and figures if he was
to land the job.

And great was his sorrow when he

OCTOBER BUILDING IN INDIANA WHILE BEHIND THAT FOR SEPTEMBER RAN AHEAD OF THAT FOR OCTOBER, 1922.

Nearly a Six Million Dollars Building Total Recorded Last Month

Predictions advanced several months ago that building construction work in
Indiana would continue active into the fall and right on up to cold weather have
been fulfilled to date. September proved a good month and though the October
valuation figures reported by the city building inspectors of the ten principal cities
of the State were somewhat in arrears of those of the previous month, the permits
issued were 600 more than in September, showing that there has been no let up in
activity. Not many big projects are being launched at this time, but there is a great
deal new residence, addition and alteration work in progress which is keeping In-
diana building forces stepping along at a brisk gait.

Six of the ten cities showed better building business for October than in Sep-
tember, but Ft. Wayne and South Bend, the two places that have been booming
along all through 1923 showed quite a let up in new construction work last month
as compared with the figures of the preceding month.

The October, 1923 building total for Indiana's ten leading cities showed a gain
of 806 permits and 8.5% increase in estimated valuation over the October, 1922,
figures. Seven of the cities made gains over the corresponding period a year ago,
two showed losses, and Muncie, who turned in \$568,923 has no record of the October,
1922 figures, in building statistics having been kept at that time.

Of the above mentioned cities Terre Haute led them all in the percent of gain
over October, 1922, with 77 more permits for 143%. Then followed the others in
this order: Elkhart, 10 more permits, 112.76% gain; Hammond, 55 more permits,
74.28% gain; Evansville, 92 more permits, 61% gain; Richmond, 32 more permits,
36.8% gain; South Bend, 9 more permits, 8.49% gain; Indianapolis 345 more per-
mits, 3.8% gain. Gary issued 63 less permits this October than last for a 27.9%
loss, and though Ft. Wayne issued 85 more permits than a year ago, her total esti-
mated valuation showed a decrease of 41.6%.

The October permit record for the two years is:

Cities	Per.	—1923—		—1922—	
		Est. Val.		Per.	Est. Val.
Elkhart	24	\$ 70,850		14	\$ 33,300
Evansville	228	284,360		136	176,616
Ft. Wayne	274	745,600		189	1,383,445
Gary	98	278,475		161	372,825
Hammond	122	338,200		67	193,475
Indianapolis	1751	2,513,026		1406	2,431,513
Muncie	164	568,923		No Record	
Richmond	68	45,871		36	33,525
South Bend	506	613,042		497	565,045
Terre Haute	232	319,630		155	131,514
Total	3467	\$5,777,977		2661	\$5,321,258

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Trustee of Waltz School township, Wabash county, Ind., until eleven o'clock a. m., Friday the 14th

day of December, 1923, in the school building in Somerset, Ind., for the erection and completion of a two story and basement brick school building, the estimated cost of which is \$80,000, to be located in Somerset, Waltz township, Wabash county, Ind., according to the plans and specifications prepared by the Elmer E. Dunlap Co., architects, copies of which are now on file in the office of the trustee and in the office of the architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewerage for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The trustee and his Advisory Board reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidders. The limit of time to be allowed the Trustee for proper investigation of bidders shall not be less than 7 days from the date of receiving bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand, Five Hundred Dollars (\$2,500.00) each bid for the heating and ventilating plans shall be accompanied by a certified check for the sum of One Thousand Dollars (\$1,000.00) and each bid for the plumbing and sewerage shall be accompanied by a certified check for the sum of Five Hundred Dollars (\$500.00). These checks must be made payable to the School Trustee of Waltz School Township, Wabash County, Indiana, and will be held by him as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Trustee for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Each bidder shall file with his bid the statutory affidavit required under Section 8698 Burns Revised Statutes of the State of Indiana, 1914. Copies of the plans and specifications may be obtained from the office of the architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the trustee or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Signed: H. H. BRADLEY,
Trustee of Waltz School Twp.,
Wabash County, Indiana.
November 10th-17th-24th, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given by Edward J. Hecker, trustee of Warren school township, Marion county, Indiana, that until 1 o'clock p. m., on the 24th day of November, 1923, at his office at No. 5241 East Washington street, Indianapolis, Ind., said trustee and his advisory board will receive sealed proposals for the construction of a grade and high school building, to be located on the east side of the Post road, between East Michiean and East Tenth streets, in Warren township, Marion county, Indiana, in accordance with plans and specifications prepared by Harrison & Turnock, architects and engineers, 500 Board of Trade Building, Indianapolis, Ind., and now on file with said trustee and the state board of accounts, and in the office of the architects and engineers.

All bids must be made out on the standard form, No. 96 of the state board of accounts, and shall be accompanied by a certified check for two (2%) per cent of the amount of bid, guaranteeing that if the bidder is awarded the contract he will accept the same and give surety company bond for the faithful performance of said contract.

Bids will be received on the following parts of the work: General construction, heating, plumbing, electric wiring, electric fixtures.

Dated this 3d day of November, 1923.
EDWARD J. HECKER, Trustee.
Nov. 3, 10, 17, 1923.

ARCHITECTS AT INDIANAPOLIS HEAR INTERESTING TALK ON STEAM HEATING MATTERS.

Prominent Heating Engineer Guest of
Indianapolis Architects
Association.

Attractive programs are becoming the regular order of the monthly meetings of the Indianapolis Architects Association nor was the one offered for the November meeting, Tuesday, November 13, an exception. It featured Charles F. Everleth, chief engineer for the Warren-Webster Co., heating system specialists, who spoke on "Groupe Heating of Buildings," illustrating his remarks with lantern slides.

The meeting was held at the Hoosier Athletic Club getting underway through the medium of a 6:30 p. m., dinner at which was gathered a representative group of the architectural profession and several guests. It was a jolly party and most enjoyable.

When the dinner was concluded the crowd adjourned to a more commodious room which had been prepared for the meeting. President Herman Scherrer introduced the speaker of the evening, Mr. Everleth who, after exchanging felicitations and an expression of pleasure for the opportunity to appear before the Indianapolis architects, entered into the subject at hand.

He asked indulgence at the necessity for a more or less technical introduction dealing with the fundamental physical processes required in the development of steam for heating purposes. Such remarks led up gradually to the original steam heating systems which in their more or less crude way were brought into use.

His reference to the well remembered water hammer, leaky, spitting, sputtering valves, accompanied by illustrations, caused smiles. From then on he traced the improvement developments introduced from time to time into steam heating systems and dwelt particularly upon the vacuum principle.

Arriving at the groupe heating point he in a most interesting way illustrated, both by word and lantern slide, various methods employed in carrying out such systems, showing the overhead feed line, the tunnel, and conduit, and described their various advantages from a practical and economical angle and cited interesting incidents dealing with the three types.

It was a most instructive talk and was thoroughly enjoyed by all those present among whom, besides the architects, were

members of the National Association of Stationery Engineers, B. W. Bissel, State Boiler Inspector, Theodore Weinshank and Sidney E. Fenstermaker, the latter two being instrumental in bringing Mr. Everleth to Indianapolis.

Following the speaker's conclusion a general discussion was developed that brought up many interesting points, questions and answers, all of which lent greatly to the attractiveness of the evening.

The men attending these I. A. A. meetings are loud in their praise of the affairs, and it is to be regretted that all the architects in Indiana are not in a position to avail themselves of the opportunity these affairs afford.

STATE ARCHITECTS WELL REPRESENTED AT LAFAYETTE.

Builders Conference Attracts Members of the Profession.

Quite a delegation of Indianapolis architects journeyed to Lafayette, Thursday, November 15, to attend the State Conference for Builders, held in that city, under the auspices of the Engineering Extension Service of Purdue University. At Lafayette they were joined by many others of the profession from out over the State, all members of the Indiana Society of Architects, which organization together with the Associated Building Contractors of Indiana endorsed and sponsored the Conference.

During the morning the Society held a joint Directors' and Regional meeting following this program:

Reports of committees.

Report of treasurer.

Resolutions.

Report on amendment to constitution.

Appointment of delegate to attend

Standardization of Lumber Sizes and Grading Conference, Washington, D. C., December 12, under the auspices of the U. S. Department of Commerce.

Setting of date for semi-annual meeting of the Society.

ANNUAL ARCHITECTURAL EXHIBIT AROUSING ATTENTION.

Suggested That The Allied Arts Be Included.

Interest in the Annual Architectural Exhibit of Indiana Architects is growing as is evidenced by inquiries from various sources that are being received from

around the country by Secretary Harrison.

A communication has just been received from Mr. J. Arthur Mac Lean, Director of the John Herron Art Institute Indianapolis, where the exhibit is to be held, in which he shows much interest in the affair and advances the information that he is in a position to assure the Society of desirable space during the month of February. He suggests that the scope of the exhibit be broadened to include not only architectural features, but also the allied arts.

HE WHO LAUGHS LAST

His Turn Is Bound To Come.

Much fun, was aroused at Indianapolis recently when, the architects in meeting with officers of the Associated Tile Manufacturers, Knickerbocker Boyd, consulting architect for the tile men, and an ardent advocate on filing systems for architects offices, referred to Merritt Harrison's Dewey Decimal System. He in an amusing way told of Architect Harrison's hunt when Mr. Boyd called for a certain piece for reference. The Dewey Decimal plan having been heard of before drew a big laugh.

However, the system worked and evidently made a favorable impression as Mr. Harrison announces he has just received a letter from Mr. Boyd requesting the name and address of the publisher of the book setting forth the Dewey system.

Now Merritt is smiling.

LOOKS LIKE MORE FACTORY CONSTRUCTION WORK

Street Vacations Asked by Manufacturing Plant

Renewal of industrial building activities in Ft. Wayne were sensed by city officials this week following the presentation to the board of works of a petition asking the vacation of Seneca and Hanover streets, both of which are surrounded by property already acquired by a big pump and tank works. The petition was taken under advisement by the board because of possibilities which such a project might present for transportation to the city's dam property which adjoins the tank company's property. City officials will make an effort to revise the plans in such a way that ample roadway facilities will be provided.

ENCOURAGING INCREASES REGISTERED WITH THE PASSING YEARS

Evansville Building Grows In Yearly Volume

Since 1920, when building did show some tendency toward revival in Evansville—after the long lean years—during the war period, a big improvement in activity has been noted except in 1921, when it slowed up again.

Then came 1922 with its \$3,069,734 volume, a gain of 104.8% over 1920, figures that were hailed with delight.

That the impetus back of 1922 is still holding is evidenced by the volume of building for the first ten months of 1923, which is 19.1% ahead of 1922 and 143% in excess of the 1920 volume.

The local building figures since 1920 are:

1920.....	\$1,498,583
1921.....	1,303,367
1922.....	3,069,734
Ten months, 1923---	3,655,822

WHEREIN LIES THE SECRET OF EVANSVILLE'S BUILDING SUCCESS

Everyone Concerned Did His Part

The building volume put across in Evansville in 1923 is due first, to the big demand for structures that could not be snuffed out, and also to the fact that the city was not upset by any serious labor disturbances among the many building trades crafts. Nor must one overlook the condition that ruled as to building material, which in most cases was either obtainable in the local market or available with little delay in shipments.

There were times when it seemed the demand would outreach the ability to cope with it, and again labor trouble loomed as a threatening menace, to say nothing of the prospect of late shipments. However, the promise held out by a continuation of building seemed to actuate contractors, material men and labor to keep their shoulders to the wheel and it was through such concen-

trated effort, in which all played their part to a man, that construction work was kept moving ahead right along, without a break, to the advantage of the owner, contractor, mechanic, material man and the city as a whole.

ENDEAVOR IN EVANSVILLE BUILDING FIELD COVERS A WIDE RANGE

Little or No Let Up In Activity

A resume of activity in Evansville building circles shows that the work being taken care of covers many and a varied type of structures offering occupation to all classes of builders from those who handle large projects down to the smaller work, to say nothing of the welcomed employment offered the various crafts.

In the list of work recently gleaned from a survey of the local field one finds, factories, commercial buildings, schools, residences and a big assortment of remodeling and addition projects. This is a fine line of work for the fall season and has kept things moving at an unusually good pace.

The building movement in Evansville, while not flashy or of a boom tendency, has been steady, conducive to one of the best building business years the city has ever experienced.

COMBINED BUILDING FIGURES OF FT. WAYNE AND SOUTH BEND FOR 1923 AHEAD OF THOSE FOR INDIANAPOLIS

Two Northern Indiana Cities Pile Up Fine Building Total

Just as Ft. Wayne has run to record building figures again in 1923, so has South Bend, these two northern cities having rolled up a fine volume of construction business this year. For a time Ft. Wayne led her sister city in the matter of new work but fell behind in September and is still trailing both in the number of permits issued and in estimated valuations.

It is interesting to note the building progress made by these two hustling northern Indiana cities whose combined

population will not equal that of Indianapolis, and yet the new building construction work, in the way of the estimated amount of money involved, done by the two cities will total more than that of Indianapolis for the first ten months this season.

Ft. Wayne's total, \$10,882,147, added to South Bend's, \$12,671,665, equals \$23,553,812, which compared with Indianapolis' \$22,559,499, shows an advantage of \$994,313, or almost a million dollars, for the combined building volume of the two smaller cities.

Further, the combined estimated valuations of these three cities so far in 1923 equals 80% of the estimated valuations registered during the whole of 1922 by Indiana's ten leading cities.

WITH TWO MONTHS STILL TO GO IN 1923 FT. WAYNE HAS MADE NEW BUILDING RECORD

Valuations and Permits Now Ahead of 1922 High Level

When Ft. Wayne slipped into second place in the standing of Indiana cities in the matter of the volume of new construction work started in October she also added a nice boost to her amount of building for which permits have been issued so far this year, that is, up to November 1st.

There have been 2,467 building permits issued this season as against 2,128 for the entire year of 1922 an advance of 339 this season, with still two months to go. Also, the total estimated valuations for the first ten months of 1923, amounting to \$10,882,147, have outstripped the entire total for 1922, \$9,630,449, by \$1,251,698, a gain of 13%. All of which assures the city of a new yearly building record again this season, all former records having been broken last year.

NEW \$175,000 SCHOOL ADDITION TO BE STARTED SOON

Big School Program to Get Under Way

Plans for the James Smart school annex, a one-story building costing approximately \$175,000, located south of the present building, have been approved by the state board of health and returned to the local board. Advertising for bids will be started at once. The structure will be a 20-room grade building of brick and steel, fireproof construction. The heating plant, to be constructed to accommodate both buildings will be a separate item of expense and for this, a separate contract will be awarded.

OUT IN FRONT BY A SLIGHT MARGIN

Indianapolis Building Just Holding Its Own Against 1922 Work

Building construction operations in Indianapolis from January 1 to October 31, inclusive, this year, according to the figures of the city building inspection department, are shown to be \$618,409 in advance of those for the corresponding period a year ago, but November and December must deliver good quotas of building work if this season's volume is to equal or surpass the 1922 figures. As 1923 must still turn in \$3,551,108 worth of work to reach last year's record.

During the current year 13,643 permits have been granted as against 13,627 for the entire year of 1922. In other words, 16 more projects were approved in 10 months this year than in 12 months last season.

The monthly estimated valuations in 1923 to November 1st have each totaled better than a million and a half dollars, while in 1922 only eight of the ten to November 1st equaled such figures. At that only five totals of the ten months were better than the corresponding periods last year.

This season's local building figures to November 1st are:

Months	Per.	Est. Val.
January	619	\$2,021,138
February	54	1,601,282
March	1,438	3,028,839
April	1,764	3,215,976
May	1,806	2,805,011
June	1,396	1,905,000
July	1,413	2,055,748
August	1,415	1,756,530
September	1,496	1,656,949

October	1,751	2,513,026
Total	13,643	\$22,559,499
Same period 1922	13,627	\$21,878,090

BOWLING ACTIVITY OF BUILDERS SPURRED ON BY FRIENDLY COMPETITION.

Indianapolis Building Men Put In Busy Time on the Alleys Once a Week.

Born to competition, when entering the building field, the builders of Indianapolis given to the sport of bowling are right in their element when they get out on the alley decks for action in the Builders Bowling League games every Friday night. If any substantiation of the above is needed all doubters are referred to the Central Bowling Alleys each week-end.

There the spectator will find, architects, contractors, and material supplymen, teamed up against each other for a real two hour round of sport with plenty of friendly rivalry on tap.

The boys have been playing now for nine weeks with three of the teams tied for first place and the others strung along not so very far behind.

Up to and including the games of November 9, the team standing of the league is as follows:

Teams	Won	Lost	Pct.
Colvin's Triangles	18	9	.667
Wege-Stanford	18	9	.667
Thumb Tacks	18	9	.667
Hugh Baker	15	12	.556
Conder-Culbertson	12	15	.444
Indpls. Elec. Supply Co.	12	15	.444
Central Supply Co.	10	17	.370
Robert Berner	5	22	.185

FALL DAYS CONCLUDE NEW YORK BRICK LAYERS' HARVEST

Craftsmen Now Back to Wage Scale and No Bonuses

According to reports from New York, the shortage of bricklayers is rapidly becoming a thing of the past and many men are now seeking employment at the \$12 a day scale. It will be remembered that New York contractors were obliged to pay a bonus of \$2 a day following the settlement of the strike there during the past summer. Stability during the next year will depend largely on the wage negotiations which will be begun in the near future. Practically all of the agreements signed in New York this year end December 31st and many of them carry the stipulation that negotiations must be opened up this fall.

THINK IT OVER, BE PROUD

It Behooves Contractors to Contend for Right and Justice in the Building Industry

How many contractors ever stop to think of the magnitude of the building construction industry? How many appreciate its greatness? To be a part of it should be a source of pride. To protect it should be the aim of every man engaged therein, especially the contractor, the master builder.

These are the things all contractors should remember and, in remembering,

set themselves to contend for the best interests of the industry that its successful pursuit may be continued.

1st. The construction industry is the second largest in the country.

2nd. The construction industry employs twenty-two per cent of all skilled and unskilled labor.

3rd. In construction alone aside from the manufacturing and transportation of materials approximately thirty-five thousand additional skilled workers and twelve thousand unskilled workers are required each year to replace losses by death, old age and other causes.

4th. The annual bill for construction in the United States is about two hundred dollars for each family per year.

Hammond, Indiana**WAGE EARNERS SAVING****Postal Savings Report Would So Indicate**

Unmistakable signs of prosperity in the United States have been piling up at a rapid rate since mid-summer to the satisfaction of all and the contradiction of rumors of inflated business and suffering among wage earners. Not the least significant of these infallible signs is the reported increase in September postal savings in the larger cities. The bulk of such savings accounts is in the names of the wage earner and the members of their families.

There is no more auspicious nor gratifying announcement than that the wage earning class is in a position to save a portion of its earnings, no matter how small that portion may be. Savings are uncontradicted evidence of thrift, gratification of wishes and needs, and a living wage. With cost of living rising and a standard of living ever in the ascent, a savings account must indicate increased earnings.

Government, employers, and wage earners, all know that a living wage which permits of a surplus in the form of savings is the only insurance against labor strife, and produces contentment among the laboring people. Let us hope there will be an ever increasing number that will be wise enough to lay by a surplus, against the time when conditions may not be so good, and not blow it in hitting the high spots.

**CONTINUES TO CREEP AND WOULD
TIGHTEN ITS COILS.****To Kill a Snake Must Crush Its Head**

1,500,000 Bolsheviks in the United States!

According to an article in the Chicago Tribune there are in the United States as of October, 1923, one million and a half communists. In view of their unhindered propaganda, this number is rapidly increasing. The bolshevists headquarters, which is directed by Moscow, is in New York, according to information in the hands of the Tribune. New York headquarters alone has spent over \$3,000,000 during 1923 for propaganda purposes. This propaganda is carried on in the navy, army, national guard, in labor organizations, and even in public schools. The bolshevists spend considerable money to foment trouble between the colored and white people. It's time something was done to crush this serpent

FAR AHEAD OF LAST YEAR IS HAMMOND'S BUILDING TOTAL FOR 1923**Big Gains Shown By Comparison of Figures For The Two Years**

October proved to be the fifth best building month of the first ten months of this year for Hammond. The city has rolled up a good building construction record in 1923 up to November 1st, having issued 331 more permits than during the same period a year ago. The estimated valuations for the first ten months of 1923 as compared with those for the corresponding period last year show a 59.1% gain, and are 27.9% in excess of the entire total for 1922.

The official figures of the two years to November 1st, are:

Months	Per.	—1923—	Per.	—1922—
		Est. Val.		Est. Val.
January	32	\$ 159,150	21	\$ 49,600
February	23	431,375	19	35,050
March	119	606,225	72	187,725
April	133	408,075	106	253,575
May	144	363,820	81	248,100
June	140	390,690	111	521,925
July	113	296,840	87	400,875
August	112	265,385	63	130,000
September	94	155,450	74	154,200
October	122	383,200	67	193,475
	1032	\$3,460,210	701	\$2,174,525

WELL PUT.**Few Appreciate What Officers Strive to
Accomplish.**

The Chicago Construction Employers Bulletin well says, "There is no one set of men who need more sympathy and more encouragement than those who are officers of any organization.

It is no easy task these days to keep any association going to please the indifferent members and make them realize their duty to their colleagues. A pleasant call, an inquiring attitude, and optimistic feeling goes a long way in salvaging wounded feelings caused by the indifference and lack of interest of members."

NEEDED BADLY**Way To Pep Up An Interest In Association Endeavor.**

Since eminent surgeons have accomplished so much through their science, have made old men young, increased the intelligence of the feeble minded, and done many other wonderful things to advance mankind's interests, some one has suggested still further efforts. Why don't the surgeons discover some process of grafting or inoculation that will put more co-operation, pep and enthusiasm in the members of the contractors associations, and those who should be members? When that remedy is discovered the name of him who hits upon it will go down upon the records of building history for all time.

BE CAREFUL**They'll Git You If You Don't Watch Out.**

Says a Hammond citizen, "With the city spreading out as it is, with all the new sub-divisions platted, and the promoters and realty salesmen circulating

around, 'You're a pippin' if they get their mits on you and you escape without attaching your name to the dotted line."

CALUMET BUILDING PROGRESS

Plans for Indiana Harbor's new Post Office building, which is being erected by E. N. Bunnell, Lake County Ford man, to be located at 3451-53 Michigan avenue, will be completed by Architect Karl D. Norris of East Chicago this week. The structure will be two stories high and when completed will be occupied by the post office on the first floor and a bowling alley on the second. Construction of the foundation has already been completed.

Architect Karl D. Norris of East Chicago was given the commission to prepare plans for the construction of a comfort station at Forsyth and Chicago avenues, East Chicago, by the Board of Public Works. Plans call for the excavation beneath the sidewalks on the southeast corner. It will be modern in every respect. White and colored tile will be used for the floors, walls and ceilings, and the best sanitary equipment will be installed.

J. Wesley Reed, general contractor, has the new power house for the central school about completed. The heating plant is being installed and will be ready for operation in a few days.

Contractor Friedenfelt, Chicago, who has the contract for moving the Rim-bach building has it loaded and will soon be on the move.

Practically all the store rooms in the new hotel building have been leased and will soon be ready for business.

CONFERENCE FOR INDIANA BUILDERS AT PURDUE UNIVERSITY AROUSES STATE-WIDE INTEREST

Lafayette Was a Mecca for Professional and Practical Building Men Last Week

A new chapter was written into Indiana building construction history last week at Lafayette when approximately one hundred and fifty state architects, contractors, engineers and Labor's representatives met there, November 15, in joint conference, making for the most significant session ever attempted for or by these four great basic building interests in Indiana.

The scale upon which this memorable meeting was planned was so much larger than any other ever contemplated in Indiana building circles that it seemed folly to some. However, Indiana building men have grown, they have broadened their vision and a new constructive aggressiveness has seized upon them. Professor W. A. Knapp, Asst. Director of the Engineering Extension Service of Purdue University, sensed the true situation when he heard of the conference of Indiana architects and contractors held at South Bend last fall. The fact that the architects, engineers, contractors and Labor representatives had, in co-operation, succeeded in having legislation passed by which a State Administrative Building Council, looking to better, safer, more economical building, was established, inspired Professor Knapp with the idea of holding a conference for Indiana builders at Purdue to which the above four working elements, more or

less associated in the great industry, were to be invited.

When he made known his contemplated idea to the officers of the Associated Building Contractors of Indiana and those of the Indiana Society of Architects, they were gratified at the recognition accorded the industry by the big university, endorsed the move and agreed to co-operate with him to the fullest extent in an endeavor to assure success to the venture.

That the conference plan was acceptable, that the state building construction interests were receptive to the plan, and that the time was ripe for such a gathering was attested by the response resulting from the invitations sent out by Purdue's Engineering Extension Service. Contractors, architects and engineers began to arrive on the eve of the conference and kept on arriving right up to noon, November 15.

The members of the Society of Architects and those of the Associated Building Contractors of Indiana held their own individual quarterly conferences or regional meetings on the morning of November 15 at the Civil Engineering Building at Purdue. At noon all delegates were dined at the Home Economics Building, after which they were taken on a personally conducted trip of inspection through Purdue University.

Conference Begins.

Then at 3 p. m. the conference was called to order by Professor Knapp in the auditorium of the Civil Engineering Building. He briefly explained the idea of the conference, conceived with the view of opening an avenue for closer co-operation between the architectural, engineering, contractual and Labor interests, that in time all may be able to arrive at an understandable basis from which problems, pertinent to the general welfare of the state building construction industry, may be expediently worked out and causes for prevailing friction between interests eliminated.

Professor A. A. Potter, Dean of Engineering at Purdue, was introduced and extended a cordial welcome to the builders of Indiana. He referred to the land grant architectural and industrial schools, of which Purdue is one, which had their origin in a bill sponsored in Congress by a New England blacksmith and signed by President Lincoln in 1862. Through this bill the government was empowered to make land grants to each state as a site for the establishment of schools in which to teach mechanical,

civil, electrical and chemical engineering. Dean Potter explained that the teaching at Purdue is backed by experimental laboratory work, and that the work is being extended to all the state through the extension service of train men for leadership in the industries, that they may be of greater service to themselves, society and the state. He acknowledged the leadership of the men present in their respective fields, said the nature of the gathering was significant, Purdue was pleased to welcome them, and hoped that the effort thus started would be continued.

Architect Fermor S. Cannon, Indianapolis, chairman of the Advisory Committee of the Administrative Building Council of Indiana and Past President of the Indiana Society of Architects, in responding to Dean Potter's welcome, agreed with him that the conference was latent with significance, and yet the spirit displayed was only in the direction of that great present day tendency of men of allied industries to recognize mutual interests, work together and thus seek to reach better solutions to the problems that are more or less common to them all.

Professor Knapp next called attention to that which the co-operation between architects, contractors, engineers and Labor had accomplished, the establishment of the Administrative Building Council of Indiana, and called upon Secretary J. H. Owens of the Advisory Committee for a report. Mr. Owens gave a brief but concise history of the inception of the idea and its final consummation with the passage of the law and the organization of the council.

Standardization of Contract.

A conference that omitted reference to the contract, that most important document in building matters, would surely be lacking, but it was not the intention of those back of the meeting to commit such an error of omission, consequently they assigned that topic to a most able authority, Architect Herman Scherrer, Indianapolis, who spoke on "Standard Contracts." Mr. Scherrer dwelt only on the fixed sum contract between owner and contractor and defined it as the record of the details of an agreement between two parties for the exchange of things of material worth, the agreement fixing the responsibility of each. He said in part:

"The parties concerned in this case are the owner and the contractor. As to the things of material worth to be ex-

changed, we have: the contractor—labor, materials, skill, organization so welded together as to culminate in a preconceived structure; the owner—a pot of gold, sometimes a bunch of notes. As for the record of details of the agreement, there are the drawings, specifications and general conditions to show the contractor's obligations, and, on the other hand, parts of the general conditions set forth the owner's obligations.

"The agreement itself is the glue that holds the three before mentioned parts, the veneers, together, making a solid panel! It identifies the parties to the contract; it is the identification of the documents recording the contractor's obligations; fixes the main obligations on the part of the owner, incidentally naming the size of the pot of gold; sets other limitations and conditions between the two parties; fixes time of completion, liquidated damages, etc.; is an acknowledgment of agreement and binding of both parties by affixing of signatures.

"As for the standardization of the documents entering into the contract, the documents serve a triple purpose:

"First—Instructions to the estimator.

"Second—Instructions to the contractor.

"Third—Basis of contract—a legal document.

"Drawings can be standardized as to kind of information shown, systematized. The drawings should be a complete quantitative analysis. The specifications are complementary to the drawings and should be confined to information not given in drawings. These are, or in all cases should be, a qualitative analysis and are naturally subject to the requirements of the project for which intended.

"The general conditions indicate the function and duties of the owner, architect and contractor, the financial relations between owner and contractor and other further business relations.

"An attempt has been made by the American Institute of Architects to standardize building contracts, but we have laws that apply to public work and the standardized documents run afoul of these laws. In each state they vary greatly though all must be in conformity to the federal laws which apply to all citizens, exempting only a farmer on bankruptcy probation.

"The standardization of the general conditions in contracts for public work is a matter for each state to take up, as it is impossible to make a country-wide standard that will be in conformity with the laws of the forty-nine individual states. For instance, the status of the architect as defined in the A. I. A. standardized document is contrary to the laws of Indiana as applied to public work.

"Therefore, while plans, the quantitative analysis, as part of the contract can be systematized and standardized the other documents can only be standardized in accordance with the laws of a given locality and can not be made applicable to the whole country."

Advantages of Extension of the Building Season Set Forth.

Genial, smiling, goodnatured, serious, Kemmer, "Cap" they call him, of Lafayette was the next speaker who spoke

on "Extending the Building Season." He prefaced his talk with an endorsement of the welcome sounded by Dean Potter and expressed his own personal gratification at the splendid turnout at the conference and the loyal, deep-rooted enthusiasm displayed by the delegates in the future welfare of the building industry as manifested by the spirit that ruled the day.

In substance he said:

Some of us may be architects, or engineers, or contractors, or building craftsmen, all in their individual pews, yet we all belong to the same "church." There was a time not so long ago that the architect took unto himself a pinnacle and it seemed at times his sole duty was to see how far he could make a contractor jump or how loud he could make him yell. And the contractor—what of him? He was fond of telling Labor what it should do and then proceeded to make the craftsmen do it. But times have changed. Men have come to realize that there must be co-operative effort exerted in the building industry; men must co-operate rather than arbitrarily drive to gain an end.

The architect may dream and follow up with plans for given quantities and specifications setting forth the quality, but if he hasn't a contractor of ability and competent to visualize the contemplated result to co-operate with the architect, and execute properly there must be failure. The engineer occupies the same relative position as the architect. And, if the contractor hasn't the loyal co-operation of the craftsmen he fails and so does the architect or engineer. And in reverse ratio the craftsmen fail when work wanes. All four elements must co-ordinate effort and co-operate for success. All, every one of us in the building industry, are servants of the building public, and we must serve to the best of our ability.

Life is too short to confine our efforts to corralling dollars. That is a part of life, we all must exist, live, but there is a broader purpose, that of rendering service to our fellowmen.

Conditions in the building field are such now that they demand an extension of the building season and offer us further opportunity to serve by exerting our combined effort in that direction, by propaganda, encouragement, and a statement of facts.

We all know there is a shortage of labor; when the limited supply is demanded for a short, heavy building season the shortage naturally becomes more acute and wages soar regardless of wage scales. Further, a deluge of orders for material supplies over a limited period creates a demand that again affects costs sending them upward.

Hence, it devolves upon us to lengthen the building season, to take the industry out of the seasonable class and put it in a more permanent state. Necessity demands the devising of a ways and means to extend building activity over a period of greater duration than has been customary.

Every man interested in the healthy condition of our industry should impress upon prospective builder-owners the advantages of carrying their projects on through the winter when the demand for labor and material is not

heavy, when there is no rush. Even plans should be thought out and worked up and not be left to the shuffle of the spring rush. The architect in the winter is in a much better position to render real service than in spring or summer when everybody wants plans in a hurry.

Some people will always wait till what is termed, from force of habit, the opening of the building season, but there are others who can be shown the folly of delay, inactivity which means crowding a limited supply of both labor and material into a lesser period. Not being enough of either, demand reacts with rapidity to the detriment of the owner and the industry.

There are those who will argue that men can't work so well when it is cold; owners fear frost, wintry rains and snow. I, personally, have been an all-year-around builder and can say from experience, if the proper precautions are taken against the lowered temperatures, just as good a structure can be built in the winter as in the warmer months. Especial preparation and heating will mean added cost, yes, from 2% to 10%, to 12% or even 15%, but such excess of cost is offset in material prices which are inclined to lower under the slackened winter demand. A big advantage is that a contractor operating through the winter is able to select his mechanics when so many of them are idle, and these men work, too, for they know there are good unemployed workmen only waiting for a chance of employment.

Because we have a short building season wage scales are high, the craftsmen must live the year around and they must secure enough wage in the active season to tide them over the dull spell.

My advice is to extend the building season, it can be done; and many of our high cost and other problems will diminish perceptibly.

Labor Representatives Favor Longer Building Period.

Quite a lively discussion followed Mr. Kemmer's talk and was instrumental in drawing some interesting comment from Charles W. Kern, Pres. of the State Building Trades Council, who said Building Trades Labor appreciated the invitation to be represented at the Lafayette conference and would be pleased to ride along with the rest of the industry to improve conditions. He said Labor was inclined to go along and had not said much but Mr. Kemmer's remarks had smoked them out, as it were.

He backed up the Lafayette contractor's arguments heartily and asserted Labor was for a long rather than an abbreviated building season. Statistics showed, according to Mr. Kern, that the mechanics in his organization put in 120% time during the heavy season as against 4% in the off season, a condition all Labor men would like to remedy by a more even distribution over the entire year. He further stated that the contractor who works along steadily naturally gets the pick of the mechanics, rather than the one who works in spurts.

Dr. Wm. F. King, secretary of the State Board of Health, and chairman of the Administrative Building Council of Indiana, brought the conference to a close. He was called upon by Prof. Knapp and arising, said: "I am not an

architect, nor an engineer, neither am I a contractor or a building craftsman, rather I represent the owner with the pot of gold, or notes, to whom Mr. Scherrer referred. I believe in conferences such as you men are engaged in this day, and I am deeply impressed by the spirit exhibited here. Conferences are undoubtedly the ground upon which to meet to talk over and solve mutual questions. They make for better and more effective co-operation, and you can't belie the law of team work. I trust you building men will continue these conferences, in this affair today I see the opening of a door to a new era in Indiana.

There were represented at the Purdue meeting twenty-five cities distributed throughout the length and breadth of the state. While the contracting forces were in the majority, the architects were well represented, as were the engineers, and several of the various officers of the Building Crafts Unions were also present, even material supply men were to be seen here and there around the hall.

EVENING MEETING AT LAFAYETTE A DELIGHTFUL EVENT

Remarkable Coterie of Speakers Secured for Edification of Indiana Builders

One of the most enjoyable and edifying social gatherings ever indulged in by Indiana building men marked the wind-up of the day's program mapped out for the Lafayette conference last week. It was unique in its makeup, for those who sat at the banquet tables represented groups that go to make up the entire building industry of the state, a 100 per cent representation, a feature it is doubtful if ever before consummated in Indiana. There were architects, engineers, various and sundry contractors, labor representatives and material men. Then, too, in the assemblage were a university president, a state official, college and university professors, and a nationally known welfare worker, all builders, some of character and men, others of structures.

The affair was held at the College Inn at the Fowler Hotel, where a sumptuous dinner was served and a delightful program, consisting of instrumental and vocal numbers, also recitations, was rendered by the Kaiser Sisters, charming entertainers, of Lafayette.

Dr. W. F. King, secretary of the State Board of Health, as toastmaster, in his introductory remarks, said the building industry of Indiana was indeed fortunate in being inoculated with such a fine spirit of progressiveness as had been shown by the men in attendance at the conference and of such vision as their remarks and actions indicated. He again referred to the impress the day's transactions had made upon him and expressed the conviction that a new and brighter day had dawned for the building industry and Indiana. He then presented Dr. E. C. Elliott, president of Purdue University.

Men Must Work Today, Asserts President Elliott of Purdue University

Dr. Elliott, having taken note of the varied individual interests present—architects, contractors, engineers and labor—said he felt a good deal like the

lamb that was thrust into a cage of many animals of all kinds. The collection was advertised as "The Happy Family." People marveled at the seeming success with which the beasts got along in peace. How do you do it? was asked of the showman. "Oh, it's easy," was the reply. "Occasionally we have to renew the lamb." When the laughs had subsided, the speaker turned to a more serious vein to remind those present that ultimate success hinged upon the great law of life, respect for the rights of others.

"I shall never forget one of my boyhood instructors who defined a gentleman as 'one who thought more of another man's rights than he did of his own feelings and also who considered the other man's feelings above his own rights.' You men must give consideration to the rights of the men with whom you come in contact, and they in turn must consider your rights. Everyone has his legitimate rights that must not be overlooked. The greatest curse that has come upon American industry is the alleged right that contends it can limit production and stifle efficiency. Men must work today; they must give honest return for the wage received. Increased wages don't make skilled craftsmen; there must be intent to excel. As a great writer, known wherever the English language is spoken, said once: 'No amount of pay ever made a great teacher, a great artist or a great workman.' The same holds true today. Men must be taught to give of their best, they must be trained, must be encouraged to be efficient. That is the mission of Purdue and like institutions—to train men so that they will be worthy of their hire. And we want to help you men, help your industry and the state. That is what we are seeking to accomplish through our engineering extension service. We stand ready at all times to aid you men when you need us and we trust you will feel free to call upon Purdue when the occasion arises to require such necessity.

"It is a pleasure to see you men as the guests of Purdue, to know you are seeking to work out your difficulties through co-operation, for no man or no set of men can settle his or their problems by calling other men names."

Dr. King next introduced Dr. W. K. Hatt, who presides over the School of Engineering at Purdue, as a builder, not a practical builders as is generally known but as a constructive builder, and cited his work as a member of the Building Code Committee of the United States Department of Commerce.

Tells of Building Code Revision Effort of the Department of Commerce.

Briefly and concisely Professor Hatt referred to the endeavor in which he had been engaged. He paid a glowing tribute to Herbert Hoover and his capacity for sensing the needs developing in crises. He said: "Mr. Hoover is a builder, a great builder, not a mere feeder of starving millions and a rehabilitator of sorely pressed continents. It was Mr. Hoover who conceived the idea of eliminating the waste in the building industry in an endeavor to reduce mounting construction costs. Thus was the attempt started toward revising building

codes to throw out the superfluous and develop a standard master code, allowing for a flexibility that would make for adaptability to the location in which it was to be put into operation. The object of the revised code is not to tell how to build but to eliminate waste and still guarantee the factor of safety. The structure is but the tool of the building industry and no one has a right to overload it, dull as it were. There are two phases of a building code that must be remembered: it must care for the necessary requirements and at the same time assure safety to the public.

"The Building Code Committee of the Department of Commerce has completed its standard requirements for small house construction but still has a great work ahead in working out code provisions to care for larger types of construction. The committee is now engaged in working out floor loads and other important features of construction requirements.

"When completed the standard code, the finished product, will be a compilation of conclusions based on scientific and practical data that has been secured from all parts of the country."

Congratulates Indiana.

Other speakers were Dr. Rockwell, Dean of Rutgers College, who was visiting Purdue, and Charles Watkins, Director of Welfare, Muncie, Ind. Dean Rockwell was loud in his praise of Indiana's great engineering university, said its fame reached to every place where engineering was taught and the citizens of the state should be proud of this, their institution.

Influence of Contact Stressed Upon.

Mr. Watkins, a gifted orator and knowing intimately men, admonished his auditors in their business affairs not to forget the "Human Element." He said there was a phase of engineering in the construction business of which little was said, yet, it was there just the same; it he classed as human engineering and drew its origin from the point of contact, employer with employe, and man with his fellow men. He, too, stressed upon the right and rights of the other fellow. Men, he asserted, are not machines, they are human, and the contractor, architect, or what not, who treats them as human will find himself surrounded with loyalty. The point of contact, the inspiration that radiates from that point, is the big thing. He asked his audience if it was not true that certain men had inspired desires for greater effort when they were brought in touch with those men or with a given man. He related how he was inspired to own an orchard when making a visit to a well known horticulturist, how he bought land on a hillside in southern Indiana on his way home and visualized the future orchard only to let the inspiration lapse when back home and out from under the influence the horticulturist had created. He pleaded for employers to maintain the influence for good they, as human engineers, were capable of exerting. And in conclusion he urged the men in conference to continue their co-operative effort with each other that they may reach mutual conclusions that would be satisfactory to all.

Indiana Society of Architects

Office of the Secretary
500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

SOCIETY MEMBERS TURN OUT FOR DIRECTORS' MEETING AND BUILDING CONFERENCE AT LAFAYETTE

State Profession Well Represented

Whether it was the builders' conference at Lafayette, November 15, or loyalty to and interest in the Indiana Society of Architects, is really not the point at issue, the fact is there was a most gratifying response from board members to the call issued for the regular bi-monthly directors' meeting scheduled on that date for that city.

The meeting was in the nature of a joint regional affair in conjunction with the board session and was held in Lafayette that the members of the state architectural profession might not only attend the big state conference but also participate in the official session of the Indiana Society of Architects.

Purdue University through its Engineering Extension Service extended the courtesy of the big institution to the architects and prepared a meeting place for them in the Civil Engineering Building.

President Harry Griffin, Connorsville, presided and called the meeting to order at 10 a. m. The board members who responded to the roll call were: Harry E. Boyle, Evansville; Rodney Leonard, Frankfort; George Allen, Laporte, and these Indianapolis architects: Secretary Merritt Harrison, Wilson B. Parker, Herman Scherrer and L. A. Turnock. Among the guests were Architects L. L. Johnson, Attica; K. Vaughn, Hammond; Fernor S. Cannon, K. Coffin, Clarence Myers, Indianapolis; John Bruck, Kentland; F. S. Hoffman, Frank Riedel, Walter Scholer, Lafayette; Charles Scott, Terre Haute; Louis H. Osterhage and Byron Sutton, Vincennes.

The first matter taken up had to do with the proposed amendment to the constitution to change the length of the term of office of board members. Guy Mahurin, Ft. Wayne, chairman of the Constitutional Amendment Committee, who was unavoidably detained and unable to attend, wrote in that the consensus of opinion favored action that would put the directors on a progressive or sliding term basis, tenure of office to be left to a vote of the membership. Discussion relative to the matter developed the opinion that a maximum term of two years rather than four was preferable. As a final suggestion it was recommended that this proposition be submitted at the next semi-annual meeting to be held in February; one director to be elected for one year, the

other to be elected for two years and after the two years was up the directors to be elected and the one receiving the most votes be given a two-year term, these directors to serve with the officers as the executive board.

Chairman George Allen of the membership committee, reported four new applications for membership, all of which were accepted. The new members are: N. L. Smith, Crown Point; O. Bolting and Kenneth Vaughn, Hammond, and I. M. Cohen, Gary.

The subject of the standardization of contracts and specifications for public works in Indiana was taken up and thoroughly discussed, resulting in a recommendation that a committee from the Society work with the State Board of Accounts in an endeavor to secure

an approved standard form acceptable to the architects and in accordance with the law.

In concluding the meeting attention was called to the Annual Architectural Exhibit of the Society to be held this winter at the John Herron Art Institute, Indianapolis, space for which will be available there in February. It has been recommended that the scope of this affair be broadened to include the allied arts and co-operation with those interests was endorsed. Since the Chicago Architectural and Allied Arts Exhibit is to be held in January it was recommended that the Indiana exhibit follow immediately in the belief that many of the allied art displays can thus be secured for the Indiana affair.

STATE AND INDIANAPOLIS BUILDING MEN VIE WITH EACH OTHER IN BOWLING MATCH.

Two Teams Fight Hard With Little or No Advantage Apparent at the Finish.

An added feature to the Builders Conference at Lafayette last week, not listed on the program, added greatly to the enjoyment of the occasion to demonstrate that architects, contractors, engineers and material men are often all good fellows.

The conference had been completed, the banquet was over and the echoes of a series of high calibered talks were still reverberating about the hotel lobby. However, it had been a long serious day and the men were restive. Architect Frank Riedel of Lafayette sensed the situation and proposed recreation in the way of bowling. Like the fire-horse responding to the alarm, the men jumped at the proposal. What mattered it if the clock did record 10:30 p. m? Frank had a good following as he led the way to the fine Lafayette Bowling Alleys and fourteen men were soon in action.

Two teams were made up, one of mostly Indianapolis architects and the other of building men out over the State. The State crowd easily took the first contest and then subsided when Herman Scherrer came back in the second game with a nice string of strikes and slipped over a 174 with Parker and Harrison coming to also, thus enabling the big city chaps to even the game count. Harrison went even stronger in his third try and Scherrer was there again and Indianapolis was twelve pins to the good on the final count. But, when it came to tabulating total pins for the three games the State team was found to have outrolled their opponents by 82 pins. Thus while Indianapolis won two games, there was little to crow about as the State took one game and stood high on total pins, making a fifty-fifty break for the evening.

The summary:

State Team.				Indianapolis.			
Players			Tot. Pins	Players			Tot. Pins
Hoffman	134	126	280	Harrison	93	108	332
Blind			125	Parker	81	142	223
Scholer	143	142	139	Blind			125
Weaver	72	81	108	Griffin	106	94	200
Riedel	105	131	134	Blind			125
Burt	160	172	145	Carper	128	102	142
Sandberg	170	137	178	Bordorf	139	161	300
Fassnacht	135	145	133	Blind			125
				Scherrer	93	174	158
				Campbell	165	173	168
							506
	919	934	962		805	954	974
			2815				2733

High Single Games: Sandberg, 178; Scherrer, 174. High Three Games: Campbell, 506; Sandberg, 485; Burt, 477.

CELOTEX

INSULATING LUMBER

THERE IS A USE FOR CELOTEX IN EVERY BUILDING

Saves $\frac{1}{3}$ the Fuel Bill

Celotex is a rugged building lumber that has the insulating values of cork. Celotex sheathing and lining on walls and roof will cut fuel bills 25% to 35%.

Weather does not easily damage Celotex nor does ordinary rough usage.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture.

Besides sheathing and lining, Celotex is also

used for plaster base, roof insulation, sound deadening, exterior finish and stucco base. Stock sizes: Thickness, 7/16 in.; width, 4 ft.; lengths, 8ft., 8½ ft., 9 ft., 10 ft. and 12 ft. Weight about 60 pounds per 100 sq. ft. Manufactured by The Celotex Company, 111 W. Washington St., Chicago.

We want to put samples and full information in your hands. You may write the company in Chicago or one of the representatives above.

MASON CONTRACTORS THERE

Lafayette Meeting Draws Other Indianapolis Building Men, Too

The Mason Contractors' Association of Indianapolis, that strong advocate of organization effort, again backed up its preachments by having present at Lafayette last week three official delegates—James Hodgson, Sr., James Hodgson, Jr., and James Rybolt. All three were interested participants in the sessions of the day and expressed pleasure over the spirit displayed by those present. They were right in the front rank during the tour of inspection of the university and what they didn't see wasn't worth seeing.

James, Sr., even took out time to compare the brick work of the old and new buildings at the institution and says that while the latter may be larger and grander, still the modern bricklayer has nothing on the old-timer from the evidence he found.

Other Indianapolis men interested in contracting affairs present were: William Carper, President Cornell Engineering Co.; Attorney Harry Fenton, and J. H. Owens, Field Representative of the Associated Building Contractors of Indiana.

NEVERTHELESS, THERE IS A
SHORTAGE THAT NO ONE
CAN DENY

It Is Apparent Everywhere

S. W. Strauss & Co., building construction financiers, have made a survey of national building conditions and found, according to reports of building trade unions, that there were but 829,100 work-

ers engaged in construction work this year as against 888,500 in 1921. The inference that the labor supply for building is not being kept up is unsound; it is rather a decrease in trade union membership. The American Federation of Labor in the last three years has lost more than 25 per cent of its membership the 4,000,000 of 1920 having shrunk to less than 3,000,000 this year.

FEDERAL AID AVAILABLE FOR TRADE TRAINING

A Feature Contractors Generally Seem to
Overlook in Apprentice Question

Wage-earners, who wish to receive technical training which will help them in their occupations, may now secure such training from the public school, announces the Federal Board of Vocational Education.

Under the Federal and State Vocational Education Acts, funds are available to assist the public schools in each community to set up classes for wage earners. To revise such instructions, it is necessary that a group of workers, employed in a common industry, take the initiative by organizing into a class. Next, they should present themselves to the local school authorities and request an instructor. The local school board is empowered to provide an instructor and a class room, to the applicants. Thereupon, the class begins its sessions on a regular nightly schedule.

In some cases, no instructor, qualified to teach the desired subject, is available. In such cases, the local school authorities may call upon the State Supervisor of Trade and Industrial Education. The State Supervisor details an instructor to the community. If no technically qualified instructor is available in the State, the Supervisor takes steps to train an instructor especially for the needs of the class. In some cases, one of the members of the class is given this training to instruct the others. In no case is a group of workers denied assistance until all possible methods of aid have been exhausted.

The only restriction that the public schools lay upon such extension work is that all members of the class be workers, actually employed in the trades for which they desire training. Thus the mistake of training workers for trades in which they can not get employment is avoided.

Such training is also available to boys in the trades if some determined effort is only made to enlist the aid of local school authorities. The Federal law is there to provide certain funds for trade training education, so, if apprentices in the building field are so necessary the contractors should be able, by concerted

action in their respective communities, to get some apprentice classes actually started by invoking the aid of the government vocational act.

In the last analysis, if apprentices are to be inducted into building crafts training, it is up to the contractors to start the effort in that direction, nobody else will do it.

LABOR SAVING DEVICES NEEDED TO LOWER BUILDING CONSTRUCTION COSTS.

Would Aid Much In Easing Up Labor Shortage.

One of the contributing factors to the high cost of building is the lack of labor saving devices found in practically all of the other industries. In some of the older trades such as bricklaying and plastering, the methods no in use have been employed for many centuries. The use of machinery always tends to reduce production costs and until labor saving devices come into use in the building industry there is little likelihood that labor costs will be much lower.

BUILDING PERMITS

Week of November 15 to November 22

Commercial Garage: \$103,550, 1 sty., 195x202. Private plans. Owner and builder, Ostrom Realty Co., Peoples Bank Bldg. Excavating. Brick.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Sealed proposals will be received by the Trustee of Waltz School township, Wabash county, Ind., until eleven o'clock a. m., Friday the 14th day of December, 1923, in the school building in Somerset, Ind., for the erection and completion of a two story and basement brick school building, the estimated cost of which is \$80,000, to be located in Somerset, Waltz township,

Wabash county, Ind., according to the plans and specifications prepared by the Elmer E. Dunlap Co., architects, copies of which are now on file in the office of the trustee and in the office of the architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewerage for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The trustee and his Advisory Board reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidders. The limit of time to be allowed the Trustee for proper investigation of bidders shall not be less than 7 days from the date of receiving bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand, Five Hundred Dollars (\$2,500.00) each bid for the heating and ventilating plans shall be accompanied by a certified check for the sum of One Thousand Dollars (\$1,000.00) and each bid for the plumbing and sewerage shall be accompanied by a certified check for the sum of Five Hundred Dollars (\$500.00). These checks must be made payable to the School Trustee of Waltz School Township, Wabash County, Indiana, and will be held by him as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Trustee for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Each bidder shall file with his bid the statutory affidavit required under Section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the trustee or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Signed: H. H. BRADLEY,
Trustee of Waltz School Twp.,
Wabash County, Indiana.
November 10th-17th-24th, 1923.

NATIONAL CONFERENCE STUDIES PROBLEM OF APPRENTICE TRAINING IN BUILD- ING TRADES

Twenty-five National Building Organiza-
tions Consider Subject at Wash-
ington Meeting

The joint committee system of super-
vision, under which all the interested
elements in the industry have repre-
sentation, has proven to be the most
practical method of apprentice training,
in the opinion of the delegates who at-
tended the conference on apprentice
training in the building trades, held in
Washington, D. C., on November 15.

Reports were heard summarizing the
experience of the building trades in
Philadelphia, New York and Cleveland,
where the joint committee system has
been tried out successfully. The work
of the Apprenticeship Commission of
New York city was described. It was
the consensus of opinion of those attend-
ing the conference that the joint com-
mittee plan should be employed by the
industry wherever possible.

Another problem which engaged the
attention of the conference was how to
standardize methods of apprentice in-
struction. In this connection, an inter-
esting report of the experience of the
Associated Tile Manufacturers was
given. A committee of experts, ap-
pointed by the association, has recently
worked out an analysis of the nineteen
basic jobs which are included in the tile

setter's trade, with the most efficient
method of doing each job. To further
test the practicability of this data, a
class of seventeen picked boys was sent
to Dunwoody Institute, Minneapolis, at
the expense of the association, where
they received thirteen weeks of intensive
training, under the observation of ex-
perts. Their experience fully demon-
strated the instructional value of the
standards which had been worked out.

The tile manufacturers favor the plan
of giving three months of full-time in-
tensive training in class to apprentices,
before they go upon jobs, it was reported.
For this three months' course they re-
ceive six months of credit on their total
apprenticeship period. Contractors have
found the pre-employment plan of train-
ing much less costly than to place raw
apprentices directly on the job, where
they waste the time of the journeymen.
Another interesting report on standardi-
zation of training methods was offered
by the Master House Painters and Deco-
rators Association. In this trade; a
syllabus and textbook for use in training
apprentices have been prepared. It was
reported that during the past year over
7,500 copies of the textbook have been
distributed to contractors, and others in-
terested.

After full discussion of different as-
pects of the problem, ten general princi-
ples which should underlie apprentice-
ship training in the building trades were
agreed upon by the delegates. These
principles are:

- (1) That a local representative com-
mittee, composed of all interests in the
industry, is essential to determine the
needs, and to supervise training.
- (2) That part-time or evening schools
should be provided to supplement job
training.
- (3) That "all-around" training is
more desirable than specialized training.
- (4) That national associations should
set up fundamental training standards
for apprentice training, and make infor-
mation thereon available for instruc-
tional purposes.
- (5) That co-operation with the public

schools is essential in promoting appren-
tice education.

(6) That adequate incentives should
be set up to induce boys to enter appren-
ticeship.

(7) That pre-employment training
for employed apprentices or boys under
contract to be employed is recommended.

(8) That emphasis should be placed
upon dull season classes to follow up the
initial training given in the pre-employ-
ment period.

(9) That the local representative
committee should see to it that a well-
qualified instructor is provided.

(10) That the difference between the
problems involved in training appren-
tices for the building trades and those
involved in shop trades should be recog-
nized.

The activities of the American Con-
struction Council in the field of appren-
tice training were discussed and the fol-
lowing resolution adopted by the dele-
gates:

"Whereas, The necessity for the adop-
tion of a national policy will give direc-
tion to the education of craftsmen, modi-
fied to suit local conditions; therefore,
be it

meeting that the American Construction

"Resolved, That it be the sense of this
Council, comprising as it does the vari-
ous elements making up the construction
industry, in co-operation with the Fed-
eral Board for Vocational Education,
shall immediately employ such means as
are necessary and proper to put into
effective operation methods that will
train and enroll skilled workers into the
industry."

It was announced by Frank Cushman,
Chief of the Industrial Education Service
of the Federal Board for Vocational
Education, who presided over the confer-
ence, that regional conference of repre-
sentatives of the building trades employ-
ers, employes, and manufacturers' or-
ganizations are being projected for dif-
ferent sections of the United States un-
der the auspices of the Federal Board
for Vocational Education to discuss lo-
cal apprenticeship problems.

INDIANA ARCHITECTS URGED TO GIVE CONSIDERATION TO THE ANNUAL EXHIBIT

Event Scheduled for February

Now that it has been decided definitely that the Indiana Society of Architects will hold another annual architectural exhibit this winter, every effort is to be exerted to make the event a real attraction in keeping with the environment of the occasion and the dignity that naturally attaches to the profession.

In the first place, the exhibit is to be held again at the John Herron Art Institute, Director MacLain having assured the directors of the society desirable space for exhibition purposes during the month of February. Further, he volunteered to co-operate with the architects in any way possible in an endeavor to arrange an exhibit that will attract more than passing notice.

Since location has been assured it is up to the Indiana architects now to produce their end of the bargain—exhibits. In years gone by the excuse has been offered by many architects that they didn't have time in which to prepare suitable individual exhibits. This year, however, such an excuse will not go, since there are at least two months in which to give thought to this affair and prepare.

The suggestion has been made that each architect take two subject projects and work them out, then submit them for exhibit purposes. If the architects will only take the suggestion under seri-

Fermor very ably responded to Dean Potter's address of welcome.

ous advisement and act accordingly in conformity with the obligation their profession entails, an exhibit of merit is sure to result.

It has also been proposed that the extent of the annual architectural display be broadened to include the allied arts and the idea has met with favor. If the suggestion materializes an effort is to be made to secure the allied art display that is to be held in connection with the Chicago Architectural Exhibit which occurs the latter part of January.

Though definite details regarding the Indiana affair have not been worked out the probability is that the architectural exhibit will consist of water color renderings, drawings and photographs. These things are still to be worked out by the committee and as soon as this is done information and instructions will be sent out to all the Indiana architects.

In the meantime the members of the Indiana architectural profession are urged to give some thought to this event and conclude on some definite exhibits for exhibit purposes.

BEST SOUTHERN INDIANA REPRESENTATION EVER BROUGHT OUT AT ARCHITECTURAL MEETING

Directors Pleased by Interest Displayed

It was cheering to note the response made by the southern Indiana architectural profession to the Lafayette call. Evansville was represented by Harry Boyle; Terre Haute by Charles Scott; Vincennes by L. H. Osterhage and Byron Sutton. These men covered quite a few miles and met with considerable travel-

ing inconveniences but they got there just the same. Fine work!

STATE INTEREST IN I. S. A. ALWAYS APPARENT

Outstate Architects Respond Every Time

Attica, Frankfort, Hammond, Laporte and Kentland represented the lesser sized city representation of the architectural profession at Lafayette. Everett Brown of Bluffton wanted to attend but got mixed up in some Scottish Rite ceremonies and couldn't get away. The loyalty of the little city architects to the Society is not to be disputed, they always send in their quota to meetings.

LOCAL BUILDING AFFAIRS SHOWN TO HAVE CONFORMED TO GENERAL TREND THAT RULED IN INDIANA

Conference Revealed State Building In- dustry to Be in Promising State of Uniformity

Evansville was represented at the Conference for Indiana Builders at Purdue University, Lafayette, Ind., last week by General Contractor William Abeler and Architect Harry Boyle. Both, on their return home, reported an interesting meeting.

Each city reported an active building season for 1923 and a resume of the general scale of wages paid craftsmen showed that the Evansville scale was right in line with those that ruled in the other cities, in fact, there seemed to be a marked uniformity as to wages throughout Indiana.

Thus it is seen that Evansville has kept pace with the rest of the state in the essential details pertinent to self-protection and said local conditions compared favorably with those prevailing throughout the state as regards building.

As in Evansville, there seems to have been no serious labor trouble during the season in any of the sixteen cities represented by delegates at the quarterly conference of the State A. B. C., a gathering held on the morning of November 15, and separate from the big general conference that was held in the afternoon by architects, contractors, engineers and Labor representatives, and was able to come forward with a favorable report to show that the city had done its share to keep building affairs moving forward and on an even keel.

BUILDING INTERESTS BUSY

Late Season Activity Holding Up Well

There is no apparent let-up to the building movement that has been going on in Evansville this fall and indications promise a continuation of the fair volume of activity that has been ruling steadily for the past months. The chances are that new construction work locally will run right up into the dead

of winter with a fair break in weather conditions.

Home building continues in the van with some industrial work, not of a large type, bobbing up here and there. A new apartment building has just been started, while considerable remodeling work is being done on various kinds of structures. Progress on projects started some time back is moving along with dispatch to no delay, and much of this work is now entering upon the final stages of completion and will be ready for occupancy soon.

CHIPS AND SHAVINGS

Evansville's horn was tooted right lustily at LaFayette by "Bill" Abeler. Leave it to "Bill," he don't miss many big building meetings nor does he forget Evansville when he gets there.

Contractors J. Bippus & Son, have started a couple of bungalows for Geo. Durham at Madison Ave. and Campbell Street.

The M. J. Hoffman Construction Co. has all its work going under a full head of steam and hopes to have all projects in good shape to weather the winter blasts when they descend.

C. Kanzler and Son, who have the general contract for the erection of lock master's and caretaker's houses at the new Government dam near Newburg, on the Ohio River, put their force at work up there last week.

LEFT TO GEORGE TO TELL 'EM—HE DID

Ft. Wayne's Building Effort Set Forth By Exchange Secretary

Ft. Wayne had six delegates present at the LaFayette meeting November 15 at which were gathered representative building men from all over Indiana. George Schack, secretary of the local Builders' Exchange, did the official talking for Ft. Wayne when reports were called for and ably stated the city's building case to let the other Indiana builders present know what his city had done and was doing in the matter of

building. He very thoroughly set forth local conditions and impressed upon his auditors the great building strides Ft. Wayne had made this season. His reference to a shortage of building trades mechanics coincided with the shortages reported by other city delegates.

RENEWED ACTIVITY MAKES SELF FELT IN FT. WAYNE BUILD- ING FIELD

Residence Permits Totalling Nearly One Hundred Thousand Dollars Issued in One Day

A gratifying increase in building activity has developed in Fort Wayne in the past two weeks and if the renewed movement toward briskness continues over the last few days of the month there should be another monthly million dollars building total to inscribe on the record books.

The spurt in building that has cropped out recently in the local field is nearly of the proportions that ruled at the height of the season last summer and is most cheering following as it did the lull that came last month.

Only a few days ago seventeen permits were taken out in one day at the city building inspection office for the construction of new residences, the total estimated valuation of which was given at \$98,700.

WHAT MODERN BUILDING MEANS TO BUSINESS.

Some Idea of Materials Required And Extent of Influence Exerted.

Some conception of the immense amount of building material needed for the erection of the modern city office building may be gleaned from these figures offered by two of Fort Wayne's largest new structures erected this season. For instance, it took sixty carloads of cement and twelve carloads of plaster for the handsome new home office of the Lincoln Life Insurance Co., and many carloads of cement and fifteen carloads of plaster for the Keenan Hotel. Then in addition it required carload upon carload lots of brick, reinforcing steel, hollow tile and lumber, to say nothing of the other materials employed in these two projects alone.

Think what the building operations in Indiana over a year's period mean to the state, its people employed in the building industry and the business interests allied with and dependent upon new building construction. More people than just the architect and the contractor are interested in a continuation of building activity, the prosperity of the state is linked up with its perpetuation.

**QUARTERLY CONFERENCE OF
STATE A. B. C. WELL
ATTENDED**

All Sections of the State Represented

Sixteen cities with a contracting delegation of sixty-seven men, all representative of the industry in their respective localities, were represented at the State A. B. C. quarterly conference at Lafayette, November 15.

The check-up of cities and their delegations present showed these present:

Evansville, 1; East Chicago and Indiana Harbor, 5; Fort Wayne, 6; Gary, 4; Goshen, 1; Hammond, 1; Indianapolis, 8; Kokomo, 5; Logansport, 1; Lafayette, 16; Marion, 1; Michigan City, 6; Princeton, 1; Richmond, 1; South Bend, 7; Terre Haute, 3.

The turnout of the contracting force of the state in the way of delegations was the best ever recorded at an A. B. C. conference and the enthusiasm shown indicated a sincere interest in the effort the State Association is putting forth.

The contractors appreciate not only that which has been accomplished by the establishment of the Administrative Building Council of Indiana but are impressed by the significance that lies behind that establishment which proved it is possible for the organization of the architect, contractor, engineer and Labor to cooperate along constructive lines for the advancement of the building industry as a whole. Many of these men of different, yet more or less allied, interests are of the opinion that a new avenue

has been opened by means of which it will be less difficult in the future for these interests to get together to settle differences and also align with each other in the promotion of aggressive constructive measures looking to the greater spirit of unity being developed right along. Further, the contractors in the different cities are being kept in closer contact with each other and conditions by means of organization and are effecting a greater degree of uniformity in the treatment of their business and are able to protect their available Labor supply through a knowledge of conditions in the other cities. A summary of the general report made shows that welfare of the industry and the betterment of conditions.

Reports made by the delegations regarding building affairs in the various cities and the general discussion that followed revealed the fact that a certain promising element of cohesion has been brought about in the contracting industry throughout the state by means of organization and that the Labor shortage in Indiana is current as in other places, that there has been very little labor trouble and that there is a uniformity in the wage scales that are being paid in all localities.

**EFFORT TO INTEREST BOYS IN
TRADE TRAINING FAILS TO
REACH**

Indianapolis Attempt Fizzles

Another evidence of how hard it is to interest boys in the building trades has just cropped out at Indianapolis to convince that the apprentice problem is a real one. Boys apparently are not to be had to rehabilitate the building trades mechanic ranks just for the asking. Somehow the interest is not there, the appeal is lacking despite the wages paid.

At the Technical High School at Indianapolis, night classes for the studying of electrical work were started this year. There were to be three sessions a week and the boys responded at first only to lose interest as the weeks rolled on and finally the classes were cut down to one and experiment work dropped because of the general diminution of attendance.

From the excuses advanced it seems the boys are more interested in the movies and social affairs than in their future development.

An attempt was also made some time ago to train brick-layer apprentices by means of a course of instructions, both in theory and practice, but the boys who started in failed to stick, with the

exception of a few. Either they complained the work was too hard or too dirty. The Masons' Association was so earnest in the move that the members even went so far as to pay the boys \$9.00 per week while learning, but even that did not hold the boys.

The encouragement of apprentices is a real problem and mere resolutions and discussions will not solve it.

BUILDING PERMITS**Week of November 22 to November 29**

Residence: \$18,000, 4154 N. Meridian. Owner, Frank H. Sudbrock, 4009 Central Ave. Archt., D. A. Bohlen and Son. General contractor, J. W. Darnell, 2435 Broadway. Excavated.

Residence: \$10,000, 270 Blue Ridge Rd. Owner and builder, Woods-Richards Realty Co. Excavating, stucco.

Residence: \$9,000, 3122 Sutherland. Archt., Frank B. Hunter, State Life Bldg. Owner, Elmer Steffen, Washington and New Jersey Sts. Contractor, J. W. Darnell, 2435 Broadway. Excavated.

Residence: \$9,000, 5430 N. Delaware. Owner, James Hamlin, c-o Archt. and contractor, William F. Nelson, 42nd and College. Excavating.

Residences (2) doubles, \$8,500 each, 625-27 and 629-31 West 30th St. Owner, H. H. Reiner, 336 Massachusetts Ave. General contract let to J. L. Holmes, 5140 Park Ave.

Residence: \$6,500, 645 N. Oxford St. Owner, T. J. Owen, c-o general contractor. General contract let to American Estates Co., Occidental Bldg.

Residence (double), \$7,800, 643-45 Eastern Ave. Owner, Andrew McHugh, 627 N. Tacoma St. Contract let to Geo. M. Clegg, at site.

Garage (rem. and 1 sty. add., 67x40.) \$7,000, Capitol and Market. Owner, The Elm Garage, N. E. Corner of Capitol and Market St. General contract let to J. W. and W. C. Martin, 420 Board of Trade Bldg.

Residence (double), \$5,500, 3550-52 E. Michigan. Owner, Dan W. LeGore, 409 Peoples Bank Bldg. Owner builds.

Residences (3 doubles), \$4,700 each, 1206-08, 1222-24, 1226-28 Beecher St. Owner, Dan LeGore, 409 Peoples Bank Bldg. Contract let to William Rose.

Rug Factory: \$5,200, 1 sty., 36x100. Owner, Guthrie-Thompson Co. Contract let to B. A. Branson, 1502 West 26th St.

Residence (double): \$4,500, 2148-50 Paris Ave. Owner, C. W. Eaton, 2841 Highland Place. Owner builds.

Storage Shed: \$5,000, 30th and Monon. Owner, Indianapolis Lumber Co., 30th and Monon. Frame.

CALUMET DISTRICT

CONSISTING OF
HAMMOND INDIANA HARBOR
EAST CHICAGO WHITING
Building Trades Employers'
Association.
Member State A. B. C.'s

J. Wesley Reed President
E. E. Cole Secretary

108 Citizens National Bank Bldg.,
Hammond, Indiana

BUSY ORGANIZING CENTRAL BUILDING COUNCIL**Calumet Contractors Intent on Putting Proposition Over**

Committees from Gary, Indiana Harbor, East Chicago and Hammond representing the general contracting interests of the Calumet District held an enthusiastic meeting at Gary, November 12, and talked over preliminaries looking to the organization of a Building Contractors Council for the District. The council idea has been accepted favorably and a second committee meeting was held at Indiana Harbor, November 19. Officers elected are: Chairman, J. K. Doppler, Indiana Harbor; vice-chairman, John Anderson, Gary; secretary, Guy Young, Hammond.

PLUGGING ALONG**Building At Hammond Moving Right Along**

Building Inspector Henry Vis reported 20 building permits, for an estimated valuation of \$110,000, issued during the week ending November 17. At such a rate \$400,000 or more should be the Hammond volume for November, a figure that would fit in nicely this late in the season.

ARE THE MOVIES RESPONSIBLE FOR THIS, TOO**Target Practice Common in Chicago**

The wild and woolly West! There used to be a place like that in the old days, but it didn't have anything on the Chicago of today where a Union business agent shoots up another such official just to keep in practice.

WOULD TEND TO FURTHER CURTAIL LABOR SUPPLY**Another Immigration Barrier Proposed**

Every contractors association should get busy and adopt resolutions con-

demning the Johnson immigration bill, which will be introduced in Congress as soon as that body convenes. It will reduce immigration by one-half. Labor organizations throughout the country will urge the passage of the bill, and it is up to the contractor organizations to help defeat the bill or they will have a greater shortage of labor than ever.

MORE EFFORT, NOT LESS, WHAT IS NEEDED**Shortened Week Would Prove Big Handicap to Building**

In several localities the labor unions are advocating the five-day week. We can't see any good reason for such a move. It seems to be the idea to increase the shortage of building mechanics and on account of the shortage thus to be able to increase the wages. If they are working so hard that some of them are unable to stand the five and a half days labor let them lay off, and let those that are able work as long as they want to.

WORKERS, NOT PENSIONERS, WANTED BY OHIOANS**So Would the Vote Indicate**

The Ohio voters overwhelmingly defeated the old age pension referendum sponsored by the Labor interests of the state at the last election.

ANOTHER KNOCK FROM OPPORTUNITY THAT WENT UNANSWERED**Lack of Time Advanced as an Excuse**

We were all set to attend the builders conference at Purdue the 15th. Several of our contractors had planned on going, but, when the time arrived to go their business was such that they found it impossible to take the time, and the trip went "floey."

VOTE TO STAND PAT**Ohio Union Building Mechanics Would Keep Next Year's Wage Scales at This Season's Figures**

At a recent convention in Ohio practically all of the building trades affiliated with the Ohio State Federation of Labor voted to ask for a continuation of prevailing wage scale rates for next year.

HOLDS COMPETITIVE EFFORT WAS STIFLED**So Intimates U. S. Judge in Ruling Against Cement Manufacturers Association**

A decree dissolving the Cement Manufacturers Protective Association consisting of nineteen of the largest producers of this material has been issued. The action was taken recently in New York by Federal Judge Knox, and is pointed to as a result of the Lockwood committee inquiry.

In announcing the decree Judge Knox said, "Manufacturers do naturally follow their most intelligent competitors if they know what these competitors have been doing. I think real competitive effort tended to become more feeble. The manufacturers by reason of exchange of statistics were equipped to regulate their production, and by common consent and concerted action did so to the end that the cement supply would at all times be a lap or two behind the demand, and this created higher prices.

In enabling this to be done, the association, its officers and agents, together with its membership, materially limited the full and free operation of the contending forces of competition to which the public, under the Sherman Law, is entitled, and unreasonably affected interstate trade and commerce, therefore, the Government may have the decree asked for."

CALUMET BUILDING PROGRESS

Guy Young has been awarded the foundation contract for the Neidow Funeral Home on Rimbach Ave. The rest of the work will be awarded at once.

Rhoades and Graves are still putting up houses. They have started a \$6,500 bungalow on W. Carroll street. F. Graham is the owner.

A one-story brick store building to contain five rooms is being erected on East State St. by Posner & Throop.

Architects J. T. Hutton & Son, are preparing plans for an auditorium and gymnasium for the Washington School at Indiana Harbor. The building is estimated to cost \$400,000. It will be of brick and steel construction with stone trim, 2 sty., 90x196.

—E. E. COLE.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE TO CONTRACTORS SCHOOL HOUSE

Sealed proposals will be received by the Trustee of Waltz School township, Wabash county, Ind., until eleven o'clock a. m., Friday the 14th day of December, 1923, in the school building in Somerset, Ind., for the erection and completion of a two story and basement brick school building, the estimated cost of which is \$80,000, to be located in Somerset, Waltz township, Wabash county, Ind., according to the plans and specifications prepared by the Elmer E. Dunlap in the office of the trustee and in the office of the architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewerage for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The trustee and his Advisory Board reserves

the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidders. The limit of time to be allowed the Trustee for proper investigation of bidders shall not be less than 7 days from the date of receiving bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand, Five Hundred Dollars (\$2,500.00) each bid for the heating and ventilating plans shall be accompanied by a certified check for the sum of One Thousand Dollars (\$1,000.00) and each bid for the plumbing and sewerage shall be accompanied by a certified check for the sum of Five Hundred Dollars (\$500.00). These checks must be made payable to the School Trustee of Waltz School Township, Wabash County, Indiana, and will be held by him as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Trustee for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Each bidder shall file with his bid the statutory affidavit required under Section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the architects, National Sign Corp. Bldg., Kokomo, Indiana upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the trustee or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of Waltz School Township, Wabash County, Indiana.

Signed: H. H. BRADLEY,
Trustee of Waltz School Twp.,
Wabash County, Indiana.
November 10th-17th-24th, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given by William H. Penrod, trustee of Marion School Township, Owen County, Indiana, that up until 1 o'clock p. m. on the 20th day of December, 1923, at his office at Patricksburg, Ind., said trustee and his advisory board will receive sealed proposals for the construction of an eight-room school building to be erected at Patricksburg, Ind., in accordance with the plans and

specifications now on file at the office of said superintendent.

The estimated cost of the proposed building is \$21,000. All bids must be made out on standard form of bid blanks and accompanied by a certified check for 4% (four per centum) of the amount of the bid, guaranteeing that the bidder, if awarded the contract, will accept the same and give bond for the faithful performance of said contract. Such bond for the faithful performance of said contract. Such checks should be forfeited to the trustee in the event that the bidder to whom the contract is awarded, refuses or fails to enter into a proper contract with proper surety.

Duplicating copies of the plans and specifications are on file at the office of Johnson, Miller, Miller & Yeager, Architects, No. 30 North Fifth Street, Terre Haute, Indiana, and may be obtained by the bidders wishing to figure. The plans can also be obtained from the County Superintendent of Schools of Spencer, Indiana.

Trustee reserves the right to reject any or all bids.

Dated at Patricksburg, Ind., this 26th day of November, 1923.

WILLIAM H. PENROD,
Trustee.

Dec. 1, 1923.

COURT HOUSE NOTICE TO BIDDERS

Sealed proposals will be received up to 10 o'clock, December 22, 1923, at the office of Mortimer Lewis, Auditor, Vermillion County, Newport, Indiana, for a County Court House at Newport. Estimated cost, \$293,000. Exterior to be of Indiana Limestone.

Board of Commissioners of the County of Vermillion.

OPPORTUNITY CALLS ON BUILD- ING INDUSTRY

GERHARDT F. MEYNE
Prominent Chicago Contractor

The building and contracting business is probably the oldest known vocation. Before there were means of conveying thoughts and handing down such thoughts to posterity in script, creating habitations and security against the elements and enemies, and creating edifices of worship, this vocation had become one of man's handicrafts. Earliest history tells us of such temples and cities, and as our race of man became more gregarious and had the feeling of security, he set out to embellish his habitation, his places of worship, and his cities. Numerous examples of this work still exist. The history of architecture tells us about this. A little study in archaeology will prove this and be most interesting. However, the purpose of this article is not directed to architecture, but to building as a vocation. The early architect was as much dependent upon the artificer of his day as is the architect of today—and probably more so—for the early architect knew little of strength of material as we know it, knew little about stresses, and we often wonder, when studying his structures, how many slaves, artisans and public were killed by collapses before he learned to make his structures substantial enough.

Builder's Life Full of Romance

The builder's life, as is the life of everyone following the building vocation in any one of its numerous branches, be he journeyman, foreman, superintendent or employer, is full of romance. No two hours' work in a day are similar. New problems are constantly presenting themselves to be solved. New designs and new constructions must be continu-

ously developed. No two projects of buildings are alike. Inventive genius and ingenuity are called on continuously. Most of the work is outdoors, and therefore healthy, and altogether interesting. A big source of satisfaction is that each day the artisan may see the results of his labor, and, in the course of time, see the entire project completed—come back to it in later years, look it over again, take pride in his achievement and accomplishment, bring his children to boast about his skill and prowess. The builder's achievements speak for themselves. They are a monument to his enterprise and labor.

Every Craft Has its Important Function

There is nothing menial or servile in any portion of the building vocation. Every craft has its peculiar part which makes up the habitable whole. Every craft is as important as any other craft (although not necessarily as skillful or as hazardous), just as all parts of the human body are necessary to make up functioning man, and just like every part of the human body responds to the brain, so do all parts of a building grow under the co-ordination of that master-artisan and enterpriser, known to us as the Building Contractor.

Let us consider in perspective, a view of the artisans employed, and take, for example, the bricklayer. The poets and writers of the ages have praised the bricklayer's skill. The monuments of all new and old countries proclaim his art. The comfort and beauty of the schools, private and public buildings tell you of his craftsmanship. His art was practiced in Babylon and ancient Egypt. Some examples of it still exist and have been found to be the work of 4,000 B. C. The stone cutter has existing monuments over 3,000 years old. Let us look up about the art of old Greece, Rome, Alexandria, the Gothic tracery, figures and churches of Western Europe. His art was developed with the invention of the tempering of metal tools, made by old Tubal Cain himself. Much drudgery has been lifted from him these days by the invention of machinery so that the stone cutting mechanic has only the finer and better work to do. Surely the history of building, architecture, sculpture and art can not be written without credit for the stone cutter.

Carpentry has been practiced since the early ages, especially cabinet work. The great Nazarene helped his father, a carpenter. Moses mentions them in his instructions about building the tabernacle. In today's complex construction problems, the carpenter is the first craftsman to come on the project and leaves

with the painter. He turns over the keys. Surely there is a romance to go through it all and know you are a part of it. His artisan skill is equal to any craft, and his knowledge of construction is superior to any other craft. Could a modern or ancient human habitation be built without a carpenter? Must we not be grateful when we consider health, sanitation and comfort, that such an inventive genius as the plumber exists? His place in our complex city life is near the doctor, for by his vocation he helps to reduce the death rate of the population, minimize the spreading of disease and plague. He and the steamfitter have made a tenderfoot out of every city dweller.

The electricians and steamfitters are very new among the building vocations. They are doing their part to make the habitation more livable, so that mankind can produce more efficiently at all hours and in all seasons. Their art is still considered in its infancy.

The beauty of the interiors of our modern buildings would not be, were it not for the plasterer, nor could we be comfortable in our climate without him. His handiwork gives us the coffered and goined ceilings, the cornices and panels in public halls, churches and theaters. We sometimes forget the plasterer when we see all of his handiwork beautifully decorated by the painters in multi-colors and in gold. The painter's art dates back to the ancients. It seldom occurs to us to give much thoughts to the men who provide ways and means that properly conduct the rainwater so that we may keep our houses and merchandise dry in all seasons—who provide the daylight in the middle of buildings in the way of skylights, windows protected from fire, and fireproof exits. Surely the city dweller can not get along without the sheet metal worker. Craft after craft could be mentioned, and their importance lauded, but none is more necessary than the other, and all must perform their function.

Skillful Craftsmanship Not Lightly Acquired

The standing of one engaged in the building vocation is important and equal to the standing of those in the professions. It is not lightly acquired. It takes time and application to absorb its knowledge. Throughout the centuries the builder was considered as one outstanding in his community. The builder's vocation is remunerative. The building craftsman has always enjoyed superior wages, salary and prosperity. A determined young man who is en-

ELIMINATION OF WASTE IN ESTIMATING

Points Brought Out Before New York Building Congress Are Timely

Speaking before the New York Building Congress recently on the above subject, Mr. L. K. Comstock scored heavily in directing attention to certain practices commonly employed that are weighing heavily on the building industry. He said in part:

"Waste in industry is a phrase used in connection with the processes of production. If a machine can be so geared or a new one designed to produce ten units of production where but seven were formerly produced, a great saving in production cost has been accomplished, especially if the unit is sold by the hundred, the thousand or the ten thousand.

"We are confronted in the building industry by a monumental waste before the productive process even begins. The waste occurs not infrequently when the productive process is either temporarily laid aside or abandoned entirely. What is said here about waste in estimating is intended as a statement of fact without comment as to whose is the responsibility; whether that responsibility belongs to a class, a group or to individuals does not lessen the weight with which it bears down with crushing force on the industry taken as a whole. The enormous waste due to duplication of effort in estimating is an insidious growth in the bowels of the industry and is of such long standing that architects, engineers, owners, contractors and money lenders accept it as a part of the normal processes of the industry. Perhaps it ought to be likened to a tapeworm; the more it is fed, the more demanding it becomes. If we tried to find proof of how difficult it is for us to break the grip of tradition upon us, or how reluctant men are to throw off the yoke of inherited habits of mind, we need look no further than the building industry.

Indiscriminate Bidding Detrimental

"Indiscriminate bidding for work in the building industry has brought about a loading of the industry with a charge wholly disproportionate to the beneficial results obtained. It has fostered a ferocity of competition which has unquestionably lowered the quality of work and has been largely instrumental in destroying craftsmanship. Few persons in the building industry realize the extent to which this unbridled competition has undermined the business. Few persons realize that competition unchecked has

loaded the business with a crushing weight of overhead charge; has compelled the substitution of inferior for superior quality; has destroyed craftsmanship, and has converted a business into a speculation.

"If Mr. Untermeyer had directed his great talents as a ferret toward a disclosure of the underlying economic ills of the building industry, instead of toward the punishment of offenders, real and technical, against laws little understood even by lawyers, he would have found that a correction of the competitive system now in vogue in the industry would be far more potent in the reduction of building costs than the disclosures made—bad as they were.

Many Depressing Instances

"A few examples will serve to illustrate what is meant by loading the industry with an overhead charge which must be absorbed somehow.

"A certain project not long ago was being figured by a sub-contractor in one trade alone. The prescribed bid form was not complete until 204 separate prices were quoted, and the other trades were similarly treated, though generally not so badly.

"A 3,500-room hotel was recently planned. Seven general contractors offered bids. More than 325 firms participated in the making up of the seven general bids, at a cost to the industry of more than \$150,000. This figure is much too low rather than too high. This project was promptly abandoned after the figures had been received.

"There took place recently an architectural competition for a large building of a semi-public character, at least the owner wished to adorn his city and glorify himself. Three hundred and fifty architects competed. Each set of drawings submitted cost at least \$2,000—and a few cost as much as \$8,000. If the competitive drawings averaged \$3,000 each set, then this building imposed an overhead charge on the industry of \$1,050,000 before the architect was even selected.

"Not so long ago a competition was held for a building construction operation, relatively small when measured in dollars, but apparently attractive, since seventeen bidders competed. The work was let to one of the seventeen for \$200,000. After the announcement of the award, the seventeen bidders gathered about a table for mutual condolence and refreshment. Someone suggested that each one put down on a piece of paper his total cost of estimating and selling up to the moment. The suggestion was acted upon. The result showed that the

estimating and selling cost of the seventeen firms amounted to \$45,000. This was 22½ per cent of the selling price of the job.

"These examples are outstanding and illustrate in a dramatic way how these overhead charges accumulate. But they do not stand alone. Similar cases occur every day, not involving so much money, perhaps in single instances, but far greater sums in the aggregate."

INDIANAPOLIS ARCHITECTS' ASSOCIATION TO HOLD ANNUAL ELECTION

Big Time Planned

If contemplated plans carry through, the regular monthly meeting of the Indianapolis Architects' Association, slated for Wednesday evening, December 12, should prove not only important but unusually attractive.

The main feature of the meeting will be of a business nature at which the annual reports will be made to be followed by the election of officers.

As an added attraction, a seasonable touch will be lent to the affair by the institution of the holiday season spirit, the 6:30 p. m. dinner to be in the nature of a Christmas party somewhat similar to the one held several years ago when much merriment held sway.

The dinner and meeting will be held at the Hoosier Athletic Club at Pratt and Meridian streets and all members of the association are urged to make reservations promptly so that the proper accommodations can be made.

ARCHITECTS INSTITUTE NOON ROUND TABLE SESSIONS

Weekly Table Reservation Made for Members of the Profession at Indianapolis

Every Tuesday noon (12 o'clock) tables are reserved for architects and draughtsmen at the Board of Trade dining room. The following attended the luncheon last Tuesday: Edw. Pierre, William H. Harrison, E. G. James, Clarence Myers, Elliott B. Hadley, Clarence Hughes, Samuel E. Becker, Walter Stern. All architects and draughtsmen are invited to participate in this weekly gathering.

ORGANIZATION AND CURRENT NEWS

EVANSVILLE

Associated Building Contractors
Member State A. B. C.

Geo. L. Miller.....President..

Office, 411 Sycamore St.

LOCAL WAGE SCALES IN KEEPING
WITH THOSE AROUND THE
STATEFigures Did Much to Keep Conditions
Settled

Though Evansville felt the shortage of skilled mechanics in the various building crafts the local contractors managed to keep things moving in good shape and, while wages were the highest ever paid in the local building field, they were not out of line with those paid in the other Indiana cities. What is more the craftsmen worked faithfully in the performance of their tasks and aided to no little extent in the achievement of keeping affairs in such shape that the demand for building could be met fairly well.

The wages paid these five crafts in Evansville in 1923 were:

Bricklayers	\$1.50 per hr.
Carpenters	1.00 per hr.
Plasterers	1.50 per hr.
Plumbers	1.50 per hr.
Sheet Metal Workers.....	1.00 per hr.

A composite wage for the above crafts made up from the reports of eleven cities of Indiana submitted at the recent Builders' Conference at Lafayette, is:

Bricklayers	\$1.44
Carpenters	1.04
Plasterers	1.45
Plumbers	1.50
Sheet Metal Workers.....	1.00

WELL CLEANED UP

Most of This Year's Building Close to
Completion

Featuring Evansville building activities now is the clean-up effort that is being put forth by the contractors. During the past month or so every builder has been keeping his working organization going at top speed to get his work enclosed before the regular spell of late fall rainy and cold weather sets in.

Early season building projects have been fairly well cleaned up or carried on to the last stages of construction, while the work started later in the summer, in most all cases, has been enclosed or is just about so, thus making it possi-

ble for the contractors to finish up their work in a majority of this winter and obviates the necessity of carrying over the previous season's operations into the next new building year.

Fact of the matter, contracting affairs locally are in better shape now than they have been at this time during many previous years. The satisfactory position in which the builders find themselves they trace to the favorable conditions that have ruled all season, with few exceptions, in Evansville. Labor trouble was at a minimum, wages have held stable, prices have ruled steady though strong, the latter feature if anything proving an incentive to build, and everybody in the building game has worked diligently to keep construction work moving and strengthen the tone of the activity.

APPEARS AS IF THIS CONTRAC-
TORS' ORGANIZATION WAS ON
THE RIGHT TRACKLos Angeles Contractors Would Erect
Own Office Building

According to advices received from Los Angeles, the Builders Exchange of that city is about to begin construction of an office building to cost \$1,500,000 which will house the organization and provide office space for contractors, architects, supply dealers and others interested in the building industry.

BUILDING OPERATIONS SHOW
MARKED SLOWING DOWN
IN NOVEMBERContinued Slump Revealed by Latest
Local Figures

According to the latest information from the city building inspection department construction operations during November took on quite a slump in Ft. Wayne. The figures show that the volume of new work for which permits were issued was the third lowest monthly total posted so far this year. This slackening of activity is attributed by officials to the advent of colder weather and the uncertainty fall and winter conditions entail.

During November the estimated valuations on the total new work licensed

amounted to but \$590,716. This was \$154,884 or 20.7% behind the business of the preceding month, and \$9,584, or 1.5% in arrears of the figures for the corresponding month a year ago.

With practically no exceptions the amount of the estimated expenditure during the past month was entirely devoted to the erection of homes and garages, no large projects of any kind having been submitted for the issuance of permits.

BUILDING MATERIAL PRICE AD-
VANCE NOW FORECASTED

Supply Men Believe Increases Due Soon

Local material supply men are predicting an increase in the price of building materials, applying particularly to lumber, cement and clay products. It is intimated that such an upward trend in quotations may be expected within the next thirty or sixty days. Prices, it is said, have been more or less weak for some time, probably for the purpose of stimulating trade, and as the flow of orders is increasing, a rise is not unlooked for.

Lumber may be expected to advance within two or three weeks, and within 30 to 40 days it is probable that an increase of 30 per cent will be shown. Retail stocks are low, according to authorities on the subject, and the stocks at the various large mills are broken.

The reduced price is gradually bringing in orders, however, and while retailers have been somewhat reluctant to place orders, it appears that the gradual increase in buying will bring about the expected rise in price.

Another factor which may aid in increasing the price of lumber, and thus elevating the cost of building, is an increase in the buying of lumber by farmers. Stocks in country yards have been lowered considerably by this, supply men say.

The prices of clay products, brick, tile and pipe, have been weak for some time, and an increase of approximately 10 per cent may be expected.

Cement prices also are weak, probably to encourage dealers to increase their stocks, and an increase is due. The rise will not be above 10 per cent, according to reports, and will bring that material up to its price of several months ago.

The fact that money is more or less tight so far as building is concerned will have little effect on the price market of building materials, it is said. This "tightness" does not prevail generally, according to bankers, and as the price of building materials are based on a national demand, the effect will not be noticeable unless it were to restrict building locally to such an extent that it would be necessary for companies with large stocks to reduce prices considerably in order to make sales.

ESTIMATED VALUATION OF NEW CONSTRUCTION WORK IN INDIANAPOLIS IN NOVEMBER NOT UP TO FORMER FIGURES

Effect of Fall Felt

As is generally the rule at this period of the year, there comes a seasonable check to the briskness of building activity, and from the report of the city building inspector of Indianapolis operations in November were in line with the above tendency. All the way around the new building movement in Indianapolis showed quite a tendency toward a let up. Though there were 189 more permits issued in November, 1923, than in November, 1922, the extent of the operations was of a smaller scale as is evidenced by the estimated valuation which amounted to but \$1,838,565 as against \$2,503,014 posted for the corresponding period a year ago, a decrease of 26.5 per cent. Also, the past month's volume of building business was 26.8 per cent behind that of October this year, when the estimated valuation of new construction work ran to \$2,513,026.

A digest of the November, 1923, report shows the work for which permits were granted to be of the following nature:

Kind of Projects	Number	Est. Val.
Residences	169	\$696,950
Business buildings	3	505,476
Industrial buildings	12	90,550
Miscellaneous	226	222,215
Repairs, alterations and additions	717	323,374
Total	1,127	\$1,838,565

STATE PAINTERS TO HOLD ANNUAL CONVENTION AT INDIANAPOLIS NEXT WEEK

Delegates From All Sections of Indiana Assured

Extensive preparations have been made by Indianapolis painter contractors for the holding of the annual convention of the Indiana Association of Master Painters and Decorators at the Hotel Severin December 11, 12 and 13, next Tuesday, Wednesday and Thursday.

Notices sent out to the members have brought back responses indicating that there will be at least a hundred delegates present from all the larger and many of the smaller cities throughout the state.

An interesting program covering business sessions, trade talks and entertainment and social features has been arranged for the three-day convention period.

WHAT ONE IMPORTANT FACTOR IN INDIANAPOLIS BUILDING INDUSTRY THINKS OF 1924 PROSPECTS

Expect Favorable Season With Not Much Change in Prices

In casting about to get some idea as to the city's prospects for building next season and the effect price trend will have on it, an inquiry was made among Indianapolis architects resulting in a general come back intimating that the prospect is promising for another good local building season in 1924 though no definite attempt was made to prophesy the outcome.

As for costs, this question was put to them, "Do you anticipate in the next year or two any considerable change in building costs?"

Each of the men approached gave his own personal opinion, based on such study as he had given the subject. These six opinions can be fairly summed up as follows:

"We do not expect any considerable change in building costs in the next year or two. We think they have now about reached what may be called the 'new or post-war normal.'"

"There will be seasonal changes, as there always has been. It will probably cost somewhat more to build next spring than it does this fall.

"But, unless there is another war or some other entirely unforeseen and abnormal occurrence, we think building costs may be regarded as approximately settled."

One of the architects went somewhat further than his colleagues. He thought there was a decided possibility that building costs might grow higher, depending on factors at present somewhat uncertain.

This professional opinion is in line with the judgment of many Indiana builders.

BELIEVES BUILDING OPERATIONS WILL CONTINUE TO INCREASE IN VOLUME NEXT YEAR

Backs Assertion With Evidence

Commenting upon the building construction situation, S. W. Strauss, building financier, who operates over a wide expanse of the United States, recently said:

"Despite the fact that building operations of 1923 are 25 per cent ahead of those of 1922, a potential need still exists for \$8,000,000,000 worth of new building. Last year the nation's new volume of building was \$4,000,000,000; this year it will be \$5,000,000,000; so it will require a year and a half of the most intensive operation to make up the present shortage. An important development is the great increase in winter building. Permits, usually showing a decline in October, were 25 per cent ahead of September, and 30 per cent ahead of October, 1922. This reflects the universal confidence of business interests in a continuance of the present business expansion."

INDIANAPOLIS BUILDING PERMITS (Week of November 29 to December 6)

Residence (double), \$5,500, 2 sty., 28x32, 3550-52 East Michigan. Owner, Dan W. LeGore, 409 Peoples Bank Bldg. Excavating. Frame.

CELOTEX

INSULATING LUMBER

Celotex Stops Heat-Cold-Noise

Makes Stronger Buildings

Celotex is in use in thousands of homes throughout the entire United States as a sheathing, replacing wood sheathing, as a plaster base, eliminating lath, as a sound deadener, exterior finish or as base for stucco.

Celotex Lumber is used for sheathing throughout. Celotex is a replacement for wood sheathing, shows greater strength and is equal to cork insulation. It turns heat and cold alike, as no other building lumber can.

When you, as an Architect or Contractor, erect a house with Celotex you provide the owner with comfort the year 'round and a 25% to 35% saving in the annual fuel bills as long as the house stands.

Celotex is made from cane fibre, the longest, strongest fibre obtainable for board manufacture. It is the only manufactured board on earth that will stand the test in outside walls. Nails direct to the studs of the building, saws and handles the same as wood lumber. It is not readily harmed by weather nor rough handling.

Talk to your lumber dealer, he stocks it. Ask him about the merits of this remarkable lumber. He knows. He can make immediate delivery, too.

Stock sizes: Thickness 7/16 in., width 4 ft., lengths 8 ft., 8½ ft., 9 ft., 9½ ft., 10 ft. and 12 ft. Weight about 60 lbs. per 100 sq. ft.

YES, HOW AND WHERE?**That Is the Question**

The apprentice question has become a most pertinent one. How and where is the building industry to get men to replace those dropping out of the different crafts, and supply the demand for mechanics to take care of the ever increasing building activity? Attempts in several localities to establish schools to train boys for the building trades have not met with much success. Although it is a question that has become national and is being given serious consideration by our best thinkers it is going to be hard to solve. The new generation does not seem to take kindly to any trade that involves hard work, but is more concerned about something for amusement or getting into the movies or some other kindred occupation or endeavor. The boys seem to be looking for some place where the pay is large and the work small. However, from all reports, the building trades seem to have come about as near solving the big-pay-little-work problem as well as could be done.

MOST LIKELY**Information Should Be Forthcoming Soon to Ease the Suspense**

The rumor is circulating that the building trades are going to ask for \$1.50 per hour for the coming season. We haven't had any official notice to that effect yet. The Contractors' Committees meet soon with the committees representing the Carpenters and the Laborers, and will probably get an ear full then.

STILL GOING**Hammond Turns in Good Building Report for November**

City Building Inspector Henry Vis of Hammond, has stepped forth as is his monthly wont, to announce that local building is good. To substantiate his contention he backs it up with these figures:

In November, 1923, he granted 92 applications for building permits, the projects representing an estimated expenditure of \$326,950. Last year over the corresponding period of time he issued 64 permits with an estimated valuation of \$195,750. Thus November, 1923, scored 28 more permits and gained 67% on estimated valuations over November, 1922.

MANY WAKING UP

One good thing that has been brought about concerning the shortage of mechanics in some of the building trades has been the opening of the eyes of the contractor to the conditions that will soon prevail in other trades if the contractors do not take an active interest in making new mechanics. It has resulted also in getting the educational boards to realize that there are other important things that ought to be taught to the rising generation in our schools besides fitting them out to hold down some white collar job only.

ALL SHOULD READ THESE

Every contractor should get the October number of the Associated Builders of Chicago Bulletin and read the article on "What's Your Overhead?" by Mr. Gerhardt F. Meyne.

"MAN WANTS LITTLE HERE BELOW"—SOMETIMES, BUT NOT AT XMAS

After Thanksgiving comes the thought of Christmas. As far as we are concerned if Santa would just drop in our sock an order for one of those new Buick "Four" sedans it would fill the bill of wants completely.

JUST A SUGGESTION

Not what you pay—but what you get for what you pay—there is a thought for the prospective builder to consider seriously.

WELL-KNOWN CALUMET PLUMBER LOSES LIFE ON HUNTING TRIP**Duck Hunters Drowned When Launch Sinks**

J. P. Croak, one of the prominent plumbing contractors of Hammond, was drowned November 27th in the Illinois River at Bath, Ill., while on a duck hunting trip. The launch in which the hunting party was riding sank and three of the four hunters were drowned.

PROPOSE LARGE CLUB HOUSE FOR GIRLS.**Campaign To Finance Such a Structure Started.**

Believing there is a demand in Hammond for a club for working girls, accommodating a hundred girls, the directors of the Alice Club, recently launched a building fund campaign. The proposed new home of the Alice Club will have a large reception room, music room dining room and dormitory. The Alice Club was founded by Mr. and Mrs. Frank S. Betz, several years ago, and there has always been a long waiting list of girls who desired to enjoy its privileges, but could not be accommodated for lack of facilities.

CONTRACTORS FORM COUNCIL**General Contractors of Calumet District Organize Central Body.**

The general contractors of Gary, Indiana Harbor, East Chicago, and Hammond have completed the organization of a General Contractors Central Council of Lake County. They will meet the first Monday in each month unless especially called. This ought to prove a good move by the contractors and be conducive to a greater harmony among those of the building contracting fraternity in the Calumet District.

CATCHING UP WITH THE HOUSING SHORTAGE.**West Hammond Erects Many Homes**

West Hammond's home building boom has passed the million dollar mark. Two hundred and seventy-five homes have been built in West Hammond this year, or are under construction at the present time, according to records kept by the city clerk. The permits issued total \$1,070,000. Among the recent permits is one for a ten apartment house being constructed by Ahlborn & O'Conner on Ingraham avenue. Each apartment will consist of four rooms, bath and sun parlor.

CALUMET BUILDING PROGRESS

Calumet architects report new business rather slack, but that the home building underway is going on with a rush.

M. V. Grimm, North Manchester, was awarded the contract for remodeling the Hammond Dairy Ice Cream Plant and Barn. The Union Iron Works of Chicago was given the contract for the steel.

Danner & Co., general contractors, has completed the foundation for the Love-Rimbach Store and Apartment building on Sibley street.

The fixtures are being installed in several of the store rooms in the new Indiana Hotel Building.

OPPORTUNITY CALLS

(Continued from Page 5)

dowed with ability and is willing to practice self-denial, and thrift, can become in this great America one of the captains of this industry. It is hard work, of course, but is there anything that is worth while that does not require effort?

Big Part for High Schools to Play in the Building Industry

As the great monasteries of Western Europe from the Eighth to the Eleventh Centuries taught the arts and crafts and were the inspiration and beginning of the building apprentice system of the past centuries, so will the public high school of the present and future be the agency in giving fundamental knowledge of building as a vocation to that vast army of young men and boys who do not go to college, yet who do not wish to do menial or servile labor. Opportunity is open to all who will but look about. Nevertheless, this opportunity is being overlooked, i. e., one of the great high schools in Chicago, probably the largest in the number of students, had but two applicants who wanted to prepare themselves thoroughly for the builder's vocation.

WHAT'S YOUR OVERHEAD, MR. CONTRACTOR?

Illinois Contractors Seek to Solve the Answer

Overhead costs of contractors has been a feature of contracting that has been pretty thoroughly analyzed by the members of the Associated Building Contractors of Illinois and a development along that line in Indiana might not be amiss and would be sure to turn up some interesting points that could be used to advantage.

Touching upon the subject the monthly bulletin of the Associated Builders of Chicago says:

In each district conference of the A. B. C. of Illinois, it was assumed that the typical contractor was doing a business of \$50,000 a year. Slips were passed out to form a basis for discussion, asking for the estimate of expense by each contractor present for 'Administration Overhead,' and 'Field Overhead.'

Under these two broad divisions sub-heads were arranged as follows:

ADMINISTRATION OVER-HEAD

Executive's (contractor's) Salary\$
Estimator's Salary\$
Rents\$
Plant Depreciation\$
Furniture and Fixture Depreciation\$
Interest on Equipment (investment)\$
Cost-keeping\$
Bookkeeping\$
Yard Man\$
Tool Man\$

Miscellaneous

Stationery\$
Advertising\$
Interest on Borrowed Money\$
Office Supplies\$

Telephone\$
Telegrams\$
Postage\$
Business Travels\$
Automobile Upkeep\$
Taxi Fares\$
Charity\$
Business Insurance\$
Legal Expenses\$
Tool Maintenance\$
Equipment Maintenance\$
Team and Motor Truck Account\$
Depreciation\$
Total "Administration Overhead".....\$

FIELD OVER-HEAD

Superintendent's time\$
Time Keeper\$
Material Clerk\$
Use of Equipment\$
Rental of Equipment\$
Setting up of Equipment\$
Removing and Putting Equipment in
good order\$
Hauling of Equipment to Yard\$
Temporary Office\$
Tool Shed\$
Cement Shed\$
Temporary Power and Light\$
Temporary Enclosures and Fences\$
Sidewalk Protection\$
Water Connections\$
Tarpaulins\$
Machinery Protection\$
Equipment Hauling\$
Delays Due to Inclement Weather\$
Time Lost Through Break-downs\$
Time Lost Through Shifting of Plants\$
Time Lost for Other Projects to be
Made Ready\$
Time Lost Waiting for Materials\$
Time Lost Because of Shifting of Men to
Other Jobs\$
Efficiency Lost by Putting On New Men\$
Insufficient Number of Men\$
Contractor's Association Dues\$
Total Field Over-head.....\$

(Note):

Indicate approximate amount of yearly
work\$
Indicate "Trade Classification"\$

The very first item, "Executive's Salary," invariably provoked a wide range of discussion. Each district finally developed a majority opinion that the contractor was as much entitled to a salary on his own payroll as if employed by somebody else.

The estimator was dispensed with by the contractor on a \$50,000 a year basis. It was felt that the contractor should do this work himself.

Rent, it was decided, should be figured even though the contractor used his home as an office.

Plant depreciation proved a problem with many angles. There was a great variation in opinion as to what was required for a contractor's equipment, and its rate of depreciation. The state members, taking the masonry contractor as a standard, showed that it required an average investment of \$3,500 for equip-

ment of all types. The annual depreciation according to the prevailing opinion is about 12½%. Depreciation on furniture and fixtures was also considered, although this is frequently a negligible factor.

Interest on equipment was a new factor to many of the downstate builders. Some held it should be charged in figuring overhead, and others that it shouldn't. The argument that usually decided the question was that in the event the contractor was working for some one else, managing this business for him, it would require a certain amount of capital to buy this equipment. If the money so required was put out and invested, that would yield a certain return and interest; therefore, interest on equipment, which should be deemed invested capital, is very legitimate. It was found that the small contractor who pays himself a salary should do his own bookkeeping and keep his own costs.

Another item that caused considerable comment was the yard man and tool man. These two items were clubbed together and it was found a legitimate charge because in every contractor's yard things get more or less in disorder and it would require about one day a week for one laborer in such a small business to keep this yard in order.

Under "Miscellaneous" expenditures everybody assumed that stationery was a legitimate charge. When it came to the item of advertising the opinion was as varied as there were men in the room, some claiming that the advertising value that the contractor got out of newspaper advertising was absolutely nothing. Others claimed that constantly placing their name before the public would eventually do them good. The discussion, however, developed that advertising for those trades who render a personal service such as painting, electric wiring and plumbing, was very much worth while, while the larger operators could see no good in it.

The forums usually decided that the best advertising that the contractor could have was a sign in a conspicuous place on his operations and do such minor advertising as he could not get out of.

INDIANAPOLIS ARCHITECTS ELECT ASSOCIATION OFFICERS THEN PLAY

Turn Monthly Meeting Into a Christmas Party

Levity and merriment, inspired primarily by the spirit of good fellowship that holds sway among men at this season of the year, crept in in good measure Wednesday night at the regular monthly meeting of the Indianapolis Architects' Association and contributed to a most pleasant evening.

There was the customary 6:30 p. m. dinner partaken of from a large table at which all chairs were occupied and made a good starter for the evening's program.

Just before the dinner quite a few of the architects indulged in some indoor golf which afforded considerable amusement among those who went to make up an interested gallery. It all looked so easy after L. A. Turnock had completed his round that Otto Mueller took a whirl at the game but the balls just wouldn't behave and jump into the cup and Otto grew weary of counting his strokes. Merritt Harrison then climbed into the game and proved an adept, so much so that he had a Havana rope in his pocket at the end, having won a wager from the editor who fell down miserably in his attempt at putting. W. K. Eldridge took out enough time now and then from his reading of the evening paper to watch a few shots and then chuckle. Herman Scherrer, whose forte is bowling, refused to be inveigled into the game, preferring to let his Lafayette bowling record speak for his sport prowess. When dinner was announced it was found that nobody had equaled Turnock's score and he was allowed to walk away as champion.

The regular business session followed the repast at which only routine matters were discussed, after which nominations for officers to be elected for the ensuing year were called for. Then came the voting which resulted in the election of these men:

President, Herbert Foltz.
Vice-President, W. K. Eldridge.
Secretary and Treasurer, R. L. Batchelder (re-elected).

Directors, Fermor Cannon, Wilson B. Parker.

With all business disposed of, unbridled merriment broke loose to continue well along into the night. Toy balloons, which had been used for decorations, were unleashed from their moorings at the back of the chairs and sent bobbing, also popping about the room. In the meantime, each architect was given a string that led to a Christmas box at the foot of the table and from the box all pulled a gift secured from the bounty of one said Woolworth. Among the packages were horns, tambourines, fifes, accordions, watch fobs, a diamond (?) stick pin, games, a tool chest and many other things that were put to instant use. Followed a medley of music it would be hard to duplicate and even passers-by on the street are said to have stopped in wonderment to listen.

About that time "Tony" Scherrer rather thought the harmony was "sour" and Wilson B. Parker, to lead the musicians back, sat down at the piano where with the assistance of various chords and accompanied by Herbert Foltz on a harmonica and Otto Mueller on the fife, lent more tone to the concert. Clarence Myers and Fred Wallick in the meantime spent their time looking at cuts from some foreign films which one of the boys pulled from the Christmas box grab-bag. "Tod" Williams and Ed Pierre batted balloons around for a while and then sank back to take in the music.

It was quite a party, full of fun, some seriousness, and a ringing note of good cheer.

THREE MILLION DOLLARS' WORTH OF NEW SCHOOL BUILDINGS PASSED OUT

Indianapolis Architects Land Big Christmas Gift

This is the season of the year when architectural prospects are at a rather low ebb, most of the old work has been cleaned up, the boards are bare and it is a little too early for the succeeding prospective work to make its influence felt. That under ordinary conditions is the rule.

However, with the approach of Christmas this year the school board of Indianapolis put on a Santa Claus stunt in local architectural circles that has brought joy to five offices and put a new meaning to the words "Merry Christmas."

Came Tuesday night, December 11, and the school authorities met and when they adjourned they had caused action to be taken that distributed to some of the architects a Christmas gift in the way of plans for new buildings and several additions, improvements that when completed it is estimated will cost approximately \$3,000,000.

The buildings for which architectural commissions have just been awarded are: A north side high school, to cost \$1,500,000; a west side high school, to cost \$500,000; a colored high school, to cost \$300,000, and a couple of grade school additions.

This is the greatest Christmas gift local architectural circles have ever experienced.

JUST A REMINDER

Don't Forget Your Duty to the Indiana Society of Architects

How about your exhibits for the annual architectural and allied arts exhibition to be held in Indianapolis in February under the auspices of the Indiana Society of Architects?

This affair, it is true, is two months in the future, but now is the time to prepare. Why wait till the last moment and then plead "no time"?

The exhibition this year is attracting outside interest and every effort is to be made by the society to make the event one of public interest. Every member of the I. S. of A. is invited to submit exhibits; in fact, is urged to, that there may be a display of architectural handiwork that will bespeak the ability of the Indiana profession.

Give this matter your thought, then pitch in and contribute your share to make the exhibit the success that it merits.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

NEW BUILDING CODE ABOUT READY FOR OFFICIAL SANCTION

"Teeth" Put Into Proposed New Building Regulations

The final dozen chapters of the new city building code are being completed by Building Inspector Ed Kerth. The entire code will be completed in a few days, asserts Mr. Kerth, about two weeks sooner than was expected. The new code contains fifty-four chapters and will probably be presented to City Attorney John Brill immediately upon completion for his approval. If the city attorney places

his legal o. k. on the code it will go before the council at the next meeting. It is hoped that the code will be adopted and made effective shortly after the first of the year.

In framing the new code Kerth has "placed teeth" into it. One of the big items calls for the submitting of two sets of plans for each structure and the filing of an affidavit by the builder. One set of plans, after being endorsed by the building inspector, will be kept on file in the office and the other displayed where the work is being done.

CHIPS AND SHAVINGS

Bidding on new works continues active with local contractors busy compiling figures and checking same carefully.

In addition to the local projects upon which they are working, Evansville architects find their services much in demand in territory outside of the confines of the city. Prospects look good for a promising building season in 1924 in the city, southern Indiana and southern Illinois, sections in which the city's architects operate extensively.

OPENING OF BIG WHITE RIVER BRIDGE AT HAZLETON MEANS MUCH TO EVANSVILLE AND SOUTHERN INDIANA

Means a Dream Come True

The big feature in the Evansville environment the past week was the dedication of the new \$300,000 bridge over White river on the Dixie Bee highway at Hazleton, Ind., about thirty-eight miles north of Evansville. This important improvement, giving a direct unimpeded highway outlet to the north will undoubtedly lend a strong influence for good and advancement in the future development of Evansville.

For years the city was more or less shut off from the north, owing to the fact that much auto travel was diverted in other directions because of the poor conditions of the road through the river bottoms and the primitive ferry methods employed to cross the river. Business interests and the people of southwestern Indiana are rejoicing in the completion of this new bridge, which has been the dream of years.

SCHOOL LETTING ATTRACTS MANY CONTRACTORS

Bids on All Branches of Work Show Considerable Variance

Quite spirited was the bidding on the new annex for the Smart grade school, bids on which were opened the past week. Fourteen general contractors, quite a few of whom were from outside cities, submitted bids on the project. Seven contractors figured the heating and plumbing, and several of them, too, were outside men, while four local men estimated the electric work.

The bids on the general contract covered a wide range from \$148,000 to \$185,123. Heating and plumbing bids ran from \$39,100 to \$48,986. Electric figures varied from \$4,639 to \$5,141.

Owing to various alternates contained in the specifications, all bids were taken under advisement with the prospect that the contracts will be awarded shortly.

NEVER BEFORE HAS LOCAL BUILDING REACHED TO SUCH PROPORTIONS AS IT HAS THIS YEAR.

Early Season Activity Makes Great Record Possible Despite Late Fall Let-Up

Though the building volume in Ft. Wayne for the last four individual months has shown a steady decline from that of the corresponding months last year, the activity of the building construction industry assumed from March 1, to August 1, was of such proportions that the city's building figures for 1923 are far out in front of those for the same period in 1922.

To show the building trend upward and then backward during the above periods in both years, the 1923 figures from March 1 to August 1 amounted to \$7,719,164 as against \$3,476,235 for the corresponding period in 1922, a gain of \$4,242,929, or 122%.

Then on the other hand the latter part of this year has shown a slackening up as is evidenced by the statistics covering August to November, inclusive, when but \$3,809,449 was given as the estimated valuation of new work started. In 1922 over the same period the estimated valuations ran to \$4,326,284, showing a decrease of \$516,835, or 11.9%.

For the entire year to December 1, the building volume in Ft. Wayne for 1923 amounts to \$12,339,828, while for the same period in 1922 it was \$8,130,214, showing a gain of 51.5%.

The city's building figures for the two years to December 1, are:

Months	1923		1922	
	Per.	Est. Val.	Per.	Est. Val.
January	99	\$ 390,885	42	\$ 136,660
February	61	420,330	47	191,035
March	281	1,450,000	180	573,375
April	383	1,939,275	269	582,385
May	327	2,166,085	269	701,285

NOW STANDS AT ABOUT A FIFTY-FIFTY BREAK

Indianapolis Building About on a Par With That of 1922

Indianapolis is just managing to hold her own in building in 1923 as compared with her record performance in 1922, when all former building figures were topped.

Early in the season this year things started with a bang and for the first four months all figures were in advance of those of the preceding year. Then, in May, June, July, August and September the 1923 business trailed the 1922 volume for the same months. In October building operations showed a gain for a change, but November fell away again with the result that, while 1,798 more permits have been granted in 1923 than during the corresponding period in 1922, the total estimated valuation of the new work started so far this year is but \$16,967 ahead of the same item posted from January 1 to December 1 last year.

This year's figures are:

Month	Permits	Est. Val.
January	619	\$2,021,138
February	545	1,601,282
March	1,438	3,028,839
April	1,761	3,215,976
May	1,809	2,805,011
June	1,396	1,905,000
July	1,413	2,055,748
August	1,415	1,756,530
September	1,496	1,656,949
October	1,751	2,513,026
November	1,127	1,838,565
Total	14,770	\$24,398,064

STATE BUILDING COUNCIL MEETS

New Election of Secretary Necessitated by Withdrawal of S. R. Artman
From the Council

There was another important meeting of the Administrative Building Council of Indiana at the State House Friday, December 21. This was the regular meeting date for the Council, composed of the Administrative Committee and the Advisory Committee, to gather. However, since the last meeting Samuel R. Artman, chairman of the Industrial Board, who was also secretary of the Administrative Building Council, was appointed to and has taken his seat with the Public Service Commission, thus making the secretaryship of the Council vacant. Mr. Thomas Roberts was appointed to succeed Judge Artman on the Industrial Board and automatically becomes a member of the Building Council though not secretary of same, that position being elective.

The Administrative Committee, consisting of the Chairman of the State Board of Health, State Fire Marshal and Chairman of the State Industrial Board, met with the Advisory Committee, consisting of architects, contractors, engineers and Labor representatives, and discussed further plans for the formation of standard state building regulations and requirements.

MANY GATHER AT INDIANAPOLIS FOR STATE PAINTERS ANNUAL CONVENTION**Interesting Program Given**

Painting contractors and decorators from many of the larger cities of Indiana, members of the Indiana Association of Master Painters and Decorators, met in annual convention at Indianapolis the past week. The affair covered a three days' period from December 11 to 13, inclusive. The business sessions were held at the Severin Hotel and were attended by approximately one hundred delegates. Business problems, methods and practice were discussed with talks by several outside men. In addition a moving picture on interior decorating was given in connection with one of the talks.

Among the social features of the convention was a dinner given by the Indianapolis Paint, Oil and Varnish Club.

Elmer Stout, president of the Fletcher American National Bank was the principal speaker at the latter affair and spoke on Financial Conditions and the Business Outlook.

He pointed out that financial panics are virtually impossible in the United States because of the establishment of the Federal reserve bank system. Prices are controlled largely by the amount of Federal reserve currency outstanding in proportion to the total rediscounts held by the banks in the system, he said.

"When the Federal reserve bank begins to draw in its currency there will be a drop in prices," he said. "But I do not look for this to happen in the near future. Prices will zigzag up and down with a general tendency down."

William Lilly, president of the Paint Club, presided at the luncheon. Responses were made by the officers of the painters' and decorators' association.

DISCARDS "PITTSBURGH PLUS"

Move Will Probably Mean More Steel Mills for Indiana

President S. W. Leeds of the LaSalle Steel Co., one of the three largest manufacturers of drawn steel, announces in an advertisement in the Chicago Tribune the abolition of the Pittsburgh plus rate or 34 to 40 cents per hundred pounds on steel. The result of the situation will be that the manufacturers of the Chicago District must increase the capacity of their plants or the eastern concerns must erect plants in the west to get their share of the mid-western business. This will probably mean the building at once of the Jones-Laughlin plant on the land purchased by them in North Hammond, and also the locating of other steel mills in the District on account of shipping facilities both by rail and water.

CAN HAPPEN MOST ANY PLACE THESE DAYS

As Briggs Says, "Life's Darkest Moment"

A certain contractor was walking State street the other day with a sketch under one arm and a set of plans under the other and a preliminary estimate in his hand, when he was stopped by a well known architect. The architect said: "You were low this morning, you might as well sign this contract now," holding it up against the bank building. The contractor signed his name and the architect beat it.

A few minutes later a friend passed by, and seeing the contractor standing there, stroking his chin, said, "What in the world are you thinking about so deeply?" The answer came in a doubtful tone, "Oh I was just wondering what I forgot."

BUMP!

Feels as if Someone Was Setting the Brakes

Building has slacked up considerably the last few days since the rumor has gotten round of the contemplated raise to \$12.00 per day to the Building Trades

and a five-day week by the painters. Contractors are hesitating about figuring large jobs that will hang over until spring. Home-building is also slacking up to some extent.

LIBRARY ADDITION REFIGURED

Original Bids Ran Too High

The figures on the library extension being about \$10,000 higher than the estimate, the bids were thrown out and new figures received and opened December 13th.

NEW PLANT IN PROSPECT

Chicago Paint Company to Build in Hammond

Just as time rolls on so does Hammond's industrial life grow.

A few days ago a Chicago company purchased a five-acre industrial site which will mean another new factory in the eastern section of Hammond. Col. M. G. Labbee, representing the U. S. Eagle Paint Co., has come forward with the announcement that his company, which has a plant in Chicago, will erect a new plant in Hammond and as soon as the new buildings are completed and the mechanical equipment can be moved and placed the Chicago factory will be abandoned.

This will be a good move for Hammond as the company now employs six hundred men and expects to increase this number to one thousand when capacity production is reached in the new plant. The owners contemplate the erection of temporary steel buildings at once to take care of the first unit, these to be replaced later by permanent structures.

The Eagle company specializes in paints for structural steel, for which there is a big demand in the Calumet District, other lines of paint are also manufactured.

REALTY DEALS LEND HOPE

Activity in Real Estate Circles Encouraging

Real estate transactions in Hammond and East Chicago have been exceedingly active of late. That, however, is not all, in the wake of these deals has come information indicating the proposed erection of several large business blocks, all of which will total \$900,000 or more.

MAY ERECT LARGE HOTEL IN EAST CHICAGO

Such a Project Contemplated

East Chicago's commercial comeback, staged during the past few months, is accompanied by word now of a revival of building construction. Among the most prominent of the contemplated projects is a four-story hotel sponsored by Henry Leonard, one of the city's most

active business men. The new building, to contain 400 guest rooms, will be located at Chicago and Olcott avenues. The ground floor will contain a number of fine store rooms.

TAKE OVER MANY RESIDENTIAL LOTS WITH BUILDING PROGRAM IN VIEW

Bochnowski and Lesnak of East Chicago have purchased for \$30,000 cash 125 lots on White Oak avenue and Hoffman street in Hammond, just within the corporation line, on which an extensive building program is contemplated.

CALUMET BUILDING PROGRESS

It is announced that work on a \$150,000 store and apartment building at Chicago and White Oak avenues will be started soon after the first of the year.

S. A. Schessinger, who has purchased 1,000 ft. on each side of Chicago avenue just across the line in Hammond will erect a three-story store and flat building on part of this site.

INFLUENCE OF STEEL MOVE FELT

Prospect of New Mills Has Effect

Negotiations are under way for the purchase of 91 residential building lots in one section of Hammond. This deal is traceable to the announced intention of the LaSalle Steel Co. to abandon the Pittsburgh Plus rate on steel and the expectation of the erection of a new plant by the Jones-Laughlin Co., near the property in question.

HERE'S ONE FOR SANTA CLAUS

A Request From the Carpenter

The General Contractors of Hammond met a few nights ago with representatives of the Carpenter's District Council but no definite understandings regarding a new wage scale for 1924 were reached. The carpenters advanced the information that they didn't want much this time, only asking for a continuation of the present agreement and an advancement of the hourly scale to \$1.50. Some of the contractors haven't recovered from the shock and are still in a state of coma.

NOT SO SURE NOW

Big Project Hanging in the Balance

The owners of the former central school property who had in mind a ten story bank and office building for that site are slightly "up in the air" now since the building trades mechanics are coming out with threatened advanced demands for next year's wages.

Face brick, stone.

WHAT'S YOUR OVERHEAD?

(Continued from Page 5)

The item of interest on borrowed money always produced a lively discussion and it developed that not only was the builder entitled to interest on borrowed money, but he was also entitled to interest on his own capital. The amount of this capital was determined for the fifty thousand dollar yearly operations to be about seventy-five hundred dollars and the interest rate the going rate.

No one denied the costs of telephones, telegrams, postage and business travel as a part of a legitimate business expense, nor did they feel that taxi fares when in the pursuit of business were unreasonable, but automobile upkeep always developed an interesting discussion from the make or makes of the various automobiles to the actual cost per mileage per year. It developed that the contractor used his automobile for business purposes somewhere between five and ten thousand miles per year and at the going rate of automobile costs, including depreciation, tires, oils, gas, etc., ten cents per mile would be a reasonable charge.

Numerous times the contractor during the year, by reason of the fact that he is in business and has a shingle displayed prominently somewhere, is imposed on for various charitable purposes which are of no particular interest to him, and a small amount was set aside for that.

Business insurance, no one questioned. Legal expense, no one questioned. Tool and equipment maintenance such as could not be directly charged to the job upon which they had been used, broken or dulled, was determined at a fixed figure of approximately one hundred and fifty dollars. Discussion on team and motor truck account depreciation nearly always developed into merits or

demerits of certain makes of motor trucks and it showed only such charges should be made for depreciation as could not be covered by the direct cartage charge to a given job. The amount of approximately four hundred dollars for this size operation was considered reasonable.

The downstate contractors have been trying earnestly to find out what their overhead is, each trade by itself in each general association, and to report to the secretary of the State Association. He, together with a proper committee, will make a report at the next annual convention of these experiences and endeavor to form, if possible, a regular experienced rating for contractors doing various lines of work in the different localities. This is done for the purpose of not only showing the contractor that he actually has an overhead, but to determine such an overhead intelligently to show architect and engineer when he is called upon in cost plus work to prove his overhead. After all, the building public has to pay his overhead and he should be able to intelligently argue his point.

Too many contractors consider book-keeping and cost keeping red tape; they consider estimating as a necessary evil to their business. However, when they apply for a bond with a bonding company the contractor who has his materials properly listed after a careful survey of plans and specifications and is able to show the bonding company on paper how he does business and transacts business will have less difficulty in getting a bond of stretched credit limits than the sloth who comes in to the bonding company's office with a job figured on the back of an envelope or, worse yet, who makes the statement that 'so and so's bid is for so much money and that if he can do it, I can do it,' never realizing that somebody may have given him some fictitious figures in order to fool him.

FIGURES SHOW APPRENTICE TRAINING HAS MADE PROG- RESS GENERALLY

Would Aid Building If Properly and Efficiently Directed

An encyclopedia of information on the subject of apprenticeship in the United States is now available in the Bulletin on Apprentice Education, which has just been issued by the Federal Board for Vocational Education.

New methods of apprentice training have been made necessary by the introduction of large scale production in industry, the Bulletin shows. During the last fifteen years, we have witnessed the development of the class room method of apprentice education to supplement job experience. Such education has arisen, either in the form of vocational training in the public schools, or through corporation schools under the auspices of employers, or through classes controlled by the trade unions.

The most surprising progress has been made along the lines of part-time apprentice training classes organized by the public schools, according to the Bulletin. Such training dates from the passage of the Federal Vocational Education Act in 1917. At the close of the fiscal year 1921-22, a total of 265,494 pupils were enrolled in such continuation classes. The Bulletin believes that the public school is destined to fill a role of increasing importance in apprentice education, since it supplies a neutral train-

ing agency, acceptable to both capital and labor.

Sharp issue is taken with the belief of many educators that the part-time school is only a temporary make-shift to be displaced as soon as the age of compulsory full-time education can be raised to a desired point. The Bulletin questions the wisdom of full-time education for boys and girls over 14, whose minds are set on employment. For such youths, industrial experience will prove of greater educational value than unwilling attendance at high schools, it is declared. At the same time, the part-time school holds these young workers within the influence of the public school system.

Too many educators hold the "Camel" theory of education, says the Bulletin. They assume that the child is an intellectual camel, who can take his education in a prolonged meal—an educational

gorge—store it up in an intellectual hump all the way across the journey of life. They assume that the school is able, by itself, to furnish a balanced ration. They overlook entirely the educational value of work for youth, as well as for older people.

Part-time vocational education bridges the gap between the job and the school, and enables the child to gain the cultural benefits of both, during his formative years, declares the Bulletin. The increasing use of the public school for apprentice training by both employers and trade unions will be a mighty stimulus to the growth of part-time education, it asserts. At the same time, it will give a new practical value to the public school.

Copies of this Bulletin are obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C.

INDIANA BUILDING IN NOVEMBER IN SLOWING DOWN RAN CONTRARY TO FORM SHOWN BY THE COUNTRY AS A WHOLE.

Decrease In Volume Due To Check on Big Building Ventures In Indianapolis, Fort Wayne and South Bend.

While a summary of the building construction movement over the whole country shows that a greater volume of building permits was issued last month than in any other November previously, it can not be said that Indiana held to the pace for her showing was 22.5% behind the November, 1922, figures.

The tendency toward a slackening of building activity in Indiana in November was most pronounced, the estimated valuation of the work for which permits were issued being 36.1% in arrears of the October valuations. Also there were 1336 less permits issued in November than in October this year.

The larger cities, Indianapolis, Ft. Wayne and South Bend all started less new work this November than during the corresponding time last year. Terre Haute also ran behind while no record was submitted by Evansville. The cities to show gains were: Elkhart, 90.5%; Richmond, 82%; Hammond, 67%; Kokomo, 40%, Gary, 21.6%.

Building records for November from 10 Indiana cities issuing permits are:

Cities	Per.	Est. Val.	1922	
			Per.	Est. Val.
Elkhart	11	\$ 52,600	10	\$ 27,600
Ft. Wayne	193	590,716	175	600,300
Gary	105	346,010	42	284,335
Hammond	92	326,950	64	195,750
Indianapolis	1127	1,838,565	938	2,503,014
Kokomo	—	43,990	—	31,405
Muncie	65	42,730	No Record	
Richmond	30	36,605	26	20,090
South Bend	312	319,110	374	981,097
Terre Haute	193	90,670	134	120,414

SOCIETY LOSES ANOTHER MEMBER THROUGH DEATH

Architect L. H. Osterhage Answers Last Summons

Once more death has levied its toll upon the Indiana Society of Architects to take from the ranks one of the good and loyal members, Louis H. Osterhage, Vincennes, who, following an operation, passed away at Olney, Ill., December 12.

Mr. Osterhage was born in Vincennes and spent all of his life there. He had practiced his profession as an architect in that city for twenty-five years and was one of the best known and most prominent architects in southern Indiana and Illinois, in which territories many structures stand as a token to his ability in his chosen field of endeavor.

He first started in the business under the firm name of Osterhage & Campbell. Later he practiced alone as L. H. Osterhage, Architect, until he formed a partnership with Byron Sutton, the firm being known from that time to the present as Osterhage & Sutton.

The deceased held a license to practice in Illinois and was also licensed to practice in Indiana under the new engineer's registration law. Some years ago he was a member of the former Indiana Chapter, A. I. A., but when that body relinquished its charter he dropped out and did not reaffiliate with the new chapter started a year or so ago.

Though not presumably an active member of the I. S. of A., he was a loyal supporter of the society and was greatly interested in the constructive measures and policies the organization sought to carry out for the benefit of not only the state architectural profession, but the building industry as a whole.

When the recent conference for Indiana builders was announced for Lafayette, at Purdue University, November 15, Mr. Osterhage was greatly interested and he and Mr. Sutton attended same. While there he expressed himself as highly pleased with the affair and the opportunity it afforded to meet the members of the profession from around the state. At the time he appeared to be in the best of health. Upon his return home he began to feel badly

and reported to the Weber Sanitarium at Olney, Ill., for a physical examination, where it developed he was afflicted with cancer. An operation was deemed necessary three weeks ago, and another one followed Friday, December 7. He rallied from the latter for a time and then took a turn for the worse to pass away December 12th.

Prominent in the civic life of Vincennes, Mr. Osterhage was a member of the Rotary Club, a director of the Y. M. C. A., member of several of the Masonic bodies and actively identified with other organizations and community interests. He was also a member of St. John's Evangelical church.

Befitting the prominent position held by Mr. Osterhage in the life of his community and the esteem he commanded from his fellow citizens three services were held at the last rites Sunday, December 16, with interment at Fairview Cemetery, Vincennes. Private services were held at the home to be followed by those at St. John's Evangelical Church, while the Vincennes Lodge of Masons conducted the burial at the cemetery.

MUCH OF IT A NUISANCE

Effort of Manufacturer to Reach Architect Through Sales Literature Often Misdirected

"Why Architects Are Not Reading Your Sales Literature" was the subject upon which Louis Banks built up an interesting article in an issue of The T. Square, published by Charles Scribner's Sons.

That which architects wish in this line and what they can actually use was summed up in this manner:

"I want information in drawings and illustrations that will assist me in planning and specifying for my buildings and that may be laid on the drafting-table and be of help to the men in my office; I want data on specifications; also the cost of the material and its advantages, and how it is used and by what architects; I want the sales literature architectural and not general in nature; and I want it in an attractive but not luxurious style, in a size that will fit my file."

REAPPOINTED TO ENGINEER'S REGISTRATION BOARD

Harvey M. Anthony and H. M. Bell Are Named by Governor

Governor McCray has renamed Harvey Mitchell Anthony, of Muncie, and H. M. Bell, of Logansport, to serve three-year terms on the state board for the registration of professional engineers and land surveyors. Mr. Anthony has been chairman of the board.

The board has practically decided that it will not employ a regular executive secretary longer, but will continue Mrs. Ida Belzer, clerk of the board, in charge of the office, with the members dropping in more often than formerly.

Dewitt C. Moore was the first and executive secretary of the board, which was created by the 1921 legislature. He left the board last summer.

PENCIL SKETCHES

Picnic—What you have when you try to please a man and his wife, four sons and three daughters.

Pantograph—What many of us use more or less through life.

Oyster—An Englishman's elevator.

Perfection—A lost art.

Procrastination is the thief of time. Why take more time sending in your new I. S. A. application?—Send it today.

Omnibus—The thing so many of us are on and don't know it.

Nature is a master designer, yet she never laid out a perfect landscape.

Why be ashamed to own up to some of our mistakes, mistakes, if only made once, should make us wiser than yesterday.

Good morning! Have you signed your I. S. A. pledge card yet? Why not send in an application instead?

If a man is true to himself he is likely to be true to his clients.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

TO ENFORCE ENGINEER'S REGISTRATION LAW

Building Inspector at Evansville Issues Ultimatum.

What's the use of a law if it is not to be observed is the argument of city building inspector Edward Kerth of Evansville. Then following his line of contention he has announced to the architects, contractors and building fraternity of his city that no permit will be issued by his department for a project involving engineering features, the plans for which fail to bear the seal of a registered engineer as provided for in the law that requires state registration of practicing engineers and land surveyors.

This is the first official step taken by building officials in the state to require the stamping of plans by a registered engineer and will doubtless be followed by similar action throughout the state.

TWO MILLION DOLLARS ESTIMATED TO BE NEEDED TO SPAN RIVER AT EVANSVILLE WITH A BRIDGE

Chamber of Commerce Working for Construction of Such a Structure

The idea of a bridge across the Ohio River at Evansville will not down. For years this need has been felt as essential to the future development of the city and the Chamber of Commerce is again agitating the matter hoping to get such a project started.

At a recent meeting of the Bridge Committee of the Chamber of Commerce G. L. Mirick, engineer, Boston, Mass., went into the prospect thoroughly and estimated that the cost of a new bridge at Evansville would approximate \$2,000,000. He further suggested that such a structure should be 36 ft. to 40 ft. wide and was of the opinion that it would probably take from two to three years to build it.

According to plans being drawn by the bridge committee here the Evansville bridge is to be financed by Indiana

and Kentucky with the assistance of federal funds. The government is ready to defray half of the cost of the structure whenever Indiana and Kentucky make a definite proposal and a joint request.

WHAT SCHOOL BUILDING PROGRAM HAS DONE FOR EVANSVILLE

That the completion of the new half-million dollar Bosse high school will give Evansville a system of high schools far superior to the average city of its size was the assertion of Supt. L. P. Bennet, at a meeting of the school board, illustrating his talk with diagrams made by Principal R. C. Puckett of Bosse High. The standardized distance for the radius of the high school district is one and one-half miles, and there will be very little territory within the city limits that does not come within that distance.

The building program put on by the local board of education within the last few years has greatly advanced the city's educational facilities and put it in a position to meet the increased demand occasioned by the constant growth of southern Indiana's metropolis.

FT. WAYNE BANK CLEARINGS HIT HIGH MARK

Hope for \$3,000,000 Level Before Year's End

Bank activities in Fort Wayne, indicative of a healthy business tide, made another big gain last week, according to the weekly statement of the local clearing house. The total clearings for the week were \$400,000 more than they were last week, and more than four hundred thousand dollars over the clearings of the corresponding week a year ago. The total for last week was \$2,625,168.68, not a long way from the three million mark, which may be reached in one of the two weeks yet left in the year for active business.

INFLUENCE OF GREAT BUILDING EFFORT PROVES FAR-REACHING

Effect on Land Values Undeniably Felt

The great growth of building construction endeavor in Ft. Wayne and the ever increasing development of new outlying and suburban residential districts wherein to erect homes has had a tremendous effect on local realty values. Not only that, but the modern downtown commercial building effort put forth has added to land values in the business sections. Old neighborhoods have been awakened by the construction activities and taken on new life, while certain localities long unused fields have become scenes of activity through the invasion of the building movement. As a result much land, both downtown and in the suburbs which formerly was a drag upon the market, has become desirable building sites with consequent increases in value, spurred on by a new demand which construction operations have created.

Thus Ft. Wayne's great building years, 1922 and 1923, have done much more than to just dress up the city, meet the housing demand, and add to the business and industrial requirements, they have relatively increased her valuation not only in new structures but in her land assets.

Some one has wisely said that there is only one crop of land in the world, but there is an endless crop of babies. Every baby born increases the value of land. More homes can be built; more clothing can be manufactured; more automobiles can be made, but every birth increases the demand for land, and more land cannot be made. The increase in value follows as a natural result.

NEW BUILDING TRADES COUNCILS BEING ORGANIZED.

Moves Along That Line Started in Several Cities.

There is a general movement on foot in a number of the larger cities of the country to organize new building trade councils by the Building Trades Department of the American Federation of Labor. In a number of cities two councils are already in existence both of which are fighting for control of the local labor situation. The reason back of this movement is that many labor organizations are divided as a result of the carpenters refusing to abide by the decisions of the National Board for Jurisdictional Awards in the metal trim decision.

WAIVER OF LIEN

None filed with Recorder of Marion county this week.

DROPPED TO THE REAR

Indianapolis Fails To Keep Up With Building Stride of the Country.

The slowing down of building construction operations in Indianapolis in November set her back considerably in the list of cities which were active in that line. All year the city has managed to stack up well in comparison with the building endeavor exerted by cities of similar size, but last month she stumbled and dropped to the rear. Such places as St. Paul, Milwaukee, Newark, Nashville, Rochester, Minneapolis and Atlanta crowded Indianapolis back.

Below are the country's twenty-five cities showing the largest volume of permits issued for Novembers, this year and last:

1. New York	\$99,253,659
2. Chicago	27,130,550
3. Los Angeles	13,512,042
4. Detroit	8,390,556
5. Cleveland	6,905,900
6. Philadelphia	5,406,040
7. St. Paul	4,865,156
8. St. Louis	4,571,525
9. Washington, D. C.	4,414,861
10. San Francisco	3,850,808
11. Baltimore	3,429,540
12. Buffalo	3,281,000
13. Milwaukee	3,053,840
14. Newark	3,039,459
15. Nashville	2,895,572
16. Boston	2,448,612
17. Oakland	2,336,472
18. Pittsburgh	2,266,623
19. Rochester	2,166,302
20. Minneapolis	2,056,275
21. Long Beach	1,925,828
22. Atlanta	1,889,264
23. Indianapolis	1,838,565
24. Memphis	1,807,520
25. Portland, Oregon	1,672,145

\$214,408,114

BOWLING INTEREST GROWS**Indianapolis Building Men Have a Strong League.**

Not the least of the features of the Indianapolis building field, with some fifty or so men of building affairs, is that organization known as the A. C. E. S., (Architects, Contractors, Engineers, Supply-men) Bowling League. This recreational diversion has been in existence for several winter seasons and each year the interest has grown with the consequent increased proficiency of the men many of whom have graduated into faster bowling company though still performing regularly with the A. C. E. S.

It has been a pretty fight for supremacy all down through the weeks since the league games opened last fall and the half-way mark in the schedule finds the Wege-Stanford team out in front of the pack by a two point margin. Colvin's Triangles, sponsored by Leslie Colvin, contractor, are occupying the runner-up position, crowded from the lead for the first time this year. Other teams are fairly well bunched and the sport from now on in to the season's end should be of the hair-raising variety.

The league is a fine influence in that it brings men together from all corners of the local building world and furnishes a meeting ground for acquaintanceships and lasting friendships that make for a greater solidarity and understanding.

Some very creditable bowling has been done since the contests were started last fall and marks the league in a class above the average.

The standing of the teams to date is:

Teams	W.	L.	Per.
Wege-Stanford	25	11	.694
Colvin's Triangles	27	12	.692
Thumbtacks	27	15	.643
H. J. Baker	21	18	.538
Indpls. Elec. Supply	19	20	.487
Conder & Culbertson	17	22	.436
Central Supply	17	25	.405
Robert Berner	6	36	.143

Residences: (2) \$4,000 each, 6039 and 6043 Lowell. Owner, S. E. Hedrick, 5842 East Washington St. Frame.

Residence: (double), \$4,500, 2701-03 Olney. Owner, Federal Investment Co., Consolidated Bldg. Owner builds.

In this residence of T. W. Griffiths, Dallas, Texas, the architect, Anton F. Korn, Jr., Dallas, used 20,000 feet of Celotex as sheathing, plaster base and floor sound deadener.

Griffiths' residence under construction showing Celotex applied directly to the studs in place of wood sheathing.

Thousands of feet should go into every home

Architects, contractors, home builders the country over are specifying Celotex. The use of 20,000 feet of it in just this one residence shows the tremendous possibilities of this better building lumber.

Celotex stands alone. It adds comfort and value to buildings without increasing their first cost. *It replaces other materials.*

On walls, Celotex is insulation, sheathing and weatherproofing—all in one.

In partitions, Celotex insulates, deadens sounds, provides a perfect plaster base.

In floors, Celotex is sound deadener and insulation.

In roofs, Celotex is insulation and prevents condensation of moisture.

A house built of Celotex is quiet, is cool in summer, is easy to heat in winter. A Celotex house requires one-third less fuel.

Whether you plan, build or inhabit a house you need Celotex for the qualities it has.

Celotex is a rugged, strong, weatherproof, durable building lumber made from the long, tough fibers of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness $\frac{7}{16}$ in.; width 4 ft.; lengths, 8 ft.; $8\frac{1}{2}$ ft.; 9 ft.; $9\frac{1}{2}$ ft.; 10 ft. and 12 ft. Weight about 60 lbs. per 100 sq. ft.

CELOTEX

INSULATING LUMBER

THERE IS A USE FOR CELOTEX IN EVERY BUILDING

CALUMET DISTRICT

Consisting of

HAMMOND INDIANA HARBOR**EAST CHICAGO WHITING**Building Trades Employers'
Association.

Member State A. B. C.'s

J. Wesley Reed.....President
E. E. Cole.....Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**SEEM DETERMINED TO DEMAND
HIGHER WAGES REGARDLESS
OF CONSEQUENCES****Calumet District Facing Advanced
Wage Scales for Building**

Latest developments in the Calumet District tend to indicate that all the union building trades are preparing to demand at least \$1.50 per hour for next season. Some of the craftsmen are for even asking a scale several notches beyond the above figure.

The building laborers, though removed from the skilled classification, have informed the B. T. E. A. committee that they shall expect to receive the same ratio of advance as is made to the recognized skilled trades. As for the laborers, they want \$1.00 per hour for hod carriers and common labor, \$1.10 for mortar mixers, and \$1.25 for plaster tenders.

It looks as if all discretion has been flung to the winds and everybody has adopted the slogan of "Get while the getting is good."

The question arises will the getting be good under the tremendous pressure and heavy overhead that will burden building construction if the advances go through. On the face of conditions as they rule today one is inclined to believe that perhaps the building trades would profit more in the long run if a more conservative attitude was adopted and a "let well enough alone" policy was permitted to prevail. What will a high wage scale that snuffs out work mean to the mechanics if there is no avenue for employment?

Those directly connected with financial affairs have long contended that building costs are now too high, that operations are overfinanced to such an extent that they will not yield a profitable return on the investment. Rents have almost reached a prohibitive height; the middle man can not pay an advanced rent, nor can he afford to build. How a higher wage burden is to be hung on to building construction costs and yet operations are to be kept moving is an enigma for the industry itself to solve.

Many hold that if there is any material increase in costs the bottom will fall out and so will future prospects

with the result that there will be a general collapse of building activity.

While Calumet building men are not generally credited as being financiers and therefore hardly qualified to give expert opinion, however, humble experience prompts many of them to incline to the belief that advanced costs will without a doubt put the quietus on any prospect for an active building campaign in 1924.

Home builders and realtors announce that at present quotations for material and labor it is a problem to get a rental from projects that will reasonably justify expenditures involved in erecting new homes or other structures.

New homes have to be priced for sale at such a figure that it is hard to find buyers with sufficient capital to make even the first payment down. Still, the cry still sounds, "Build a Home," "Buy a Home," "Own Your Own Home." The question is how can the average man "Build, Buy, Own" with construction costs in the building field as they are with the prospect of even mounting?

However, it seems the trades are like a runaway horse with the bit in its teeth, determined to plunge on and on for a smash or to fall exhausted. As one man said the other day: "Let 'em go, Gallagher, the higher they soar the harder they'll fall."

DROPPED FOR TIME BEING**Library Board to Act Later On Building Scheme**

The library addition proposition for Hammond has been put under cover till the last of January. New bids were asked but when the board met only one bid was submitted. After considering all phases of the proposed building project it was decided to reject the lone bid, hold the project in abeyance till after the first of January and then readvertise for bids the latter part of that month.

**STEEL MILL EXTENSIONS UNDER
CONTEMPLATION CAUSE
FLURRY IN REALTY
CIRCLES****Several Large Deals Made**

The steel mills' building programs in prospect are strengthening activity in the Hammond realty market. Many titles to land have changed hands in the last few weeks, the latest deal having been transacted this week when Blackman & Co. took over ninety residential lots out near the site of the proposed Jones-Laughlin mill.

FIRST REAL STOPPAGE IN MONTHS**Rain, Cold, Snow and Ice Put Check on Building**

Winter rode in with a great bluster last week following the rain, to let Hammond know he was on the job. Snow fell and ice spread over things when

a night came. All of which put quite a crimp in local building progress. The weather man seems to have corralled the raging visitor and says he will endeavor to hold the captive in check for a while.

**URGES CLEARING OF DECKS FOR
GOOD START IN SPRING OF 1924****Expect Another Big Building Volume
Next Year.**

Franklin D. Roosevelt, President of the American Construction Council, is authority for the statement that from present indications the volume of construction work for 1924 will equal if not surpass that of this year. The Council is urging that there be no cessation of work during the winter months and is advocating that as much repair work as possible be done now, in order that the maximum number of new projects may be started in the Spring.

NEW BUSINESS ROOMS OPENED**Indiana Hotel Store Section Completed
for Xmas**

The store rooms in the new Indiana Hotel building were hurriedly dolled up for Xmas. Fixture men worked night and day to get things in shape for the holiday trade. Everything was placed in time and the new commercial center proved most alluring and attractive in its new brilliance.

ANOTHER CONTRACT SIGNED**Extensive Remodeling Project To Be
Started.**

M. A. Dickover has been awarded the general contract for the remodeling of the old Rimbach homestead. The building is to be converted into a funeral parlor with chapel on the ground floor, while above will be living apartments. Charles Niedow, the undertaker, is having the work done which, it is estimated, will cost about \$30,000.

**CHURCH PLANS READY THE FIRST
OF THE YEAR.****Hammond Architect So Announces**

It is announced by Architects A. C. Berry & Co. that the plans for the superstructure for the new Baptist Church at Crawfordsville, Ind., will be ready for contractors to figure, January 1st. The owners at Crawfordsville will receive the bids and award the contracts.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to 2:00 o'clock p. m. on Saturday, the 29th day of December, 1923, at the office of the Board of Trustees of the School Town of Argos, Marshall County, Indiana, the same being in the School Building in said town, for the construction of an addition to said School Building, full details, prints, plans and specifications for all such work are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the office of Allen & Garriott, architects, Masonic Temple, Logansport, Indiana.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than 5% of his bid, payable to the Board of Trustees of such School Town of Argos, conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of such Board, in no event to be later than July 15, 1924.

The estimated cost of such addition is \$35,000.00. The right is reserved to reject any and all bids.

Dated at Argos, Indiana, this 1st day of December, 1923.

SCHOOL BONDS NOTICE OF BOND SALE

Notice is hereby given that the undersigned will receive sealed bids up to 2:00 o'clock p. m. on Saturday, the 29th day of December, 1923, at the office of such Board, the same being in the High School Building, located in the Town of Argos, Indiana, for the issue of bonds of such School Town of Argos, Indiana, described as follows:

July 15th, 1925, \$500.00; January 15th, 1926, \$500.00; July 15th, 1926, \$1,000.00; January 15th, 1927, \$1,000.00; July 15th, 1927, \$1,000.00; January 15th, 1928, \$1,000.00; July 15th, 1928, \$1,500.00; January 15th, 1929, \$1,500.00; July 15th, 1929, \$1,500.00; January 15th, 1930, \$1,500.00; July 15th, 1930, \$2,000.00; January 15th, 1931, \$2,000.00; July 15th, 1931, \$2,000.00; January 15th, 1932, \$2,000.00; July 15th, 1932, \$2,500.00; January 15th, 1933, \$2,500.00.

Such issue shall be in the total principal sum of \$24,000.00, shall all be dated January 15th, 1924, shall be in denominations of \$500.00 each, and shall bear interest at the rate of 5% per annum, payable semi-annually, provided that no interest shall be due until July 15th, 1925.

That such bonds and the interest thereon shall be payable at the office of this Board, or at such bank in said Town of Argos as the Board may select.

That the purpose for which such bonds are issued is to provide funds to pay upon the cost of the proposed addition to the present School Building in said Town of Argos, and upon the proper or necessary items of expense connected with such addition and sale of bonds and these proceedings.

That the total estimated cost of the proposed new addition is \$35,000.00.

The right is reserved to reject any and all bids.

Dated at Argos, Indiana, this 1st day of December, 1923.

Hand Power Elevators

There are over 6,000 Kimball, Number Two, hand power elevators in operation throughout the United States.

Their popularity is due to the simplicity of construction and to the ease and speed with which they may be operated. Being of the ANTI-FRICTION type and equipped with roller bearings this machine operates easier, rises quicker, needs less care and lubrication than any machine on the market.

There are no gears to cause friction, no clumsy, rattling drums, and no cables to break.

BOARD OF ARBITRATION FINDS FOR CONTRACTOR.

Builder Resorts To Clause 45 of Standard A. I. A. General Contract Form For Settlement of Dispute.

A case that should be of unusual interest to the building fraternity of Indiana has just come to the surface at Terre Haute, and its final disposition will have a great bearing on the future of the building industry of the state. It centers around the arbitration provision provided for in the General Conditions, Clause 45, of the Standard Document Contract, between owner and general contractor, advocated and recommended for use by the American Institute of Architects.

Over a year ago the John A. Schumacher Co., a general contracting firm of Indianapolis, upon submitting the lowest bid for the general construction of St. Anthony's Hospital at Terre Haute, entered into a contract with the hospital to do the work and signed up the Standard A. I. A. general contract form as presented by the architect, J. G. Vrydagh, of Terre Haute. This contract contained all the forty-five clauses intact, even to the arbitration clause.

An Ugly Mess.

The work was hardly well under way when trouble arose between the architect and contractor and developed to a state where the work was closed down

and such charges were preferred against the contractor by the architect that the owner canceled the contract and is alleged to have kept him off the job by threats from armed men, though the work was continued under the guidance of Architect Vrydagh, who used the equipment of the Schumacher Co., his material, and re-employed the subcontractors the former contractor had had working on the building.

The Schumacher Co. appealed for arbitration as provided for in his contract. This appeal was ignored by the owner.

However, an arbitration board, composed of three disinterested parties, was named, in accordance with Clause 45, Fred W. Junglaus, general contractor, Indianapolis, being chosen by the Schumacher Co.; W. Robert Paige, engineer, Terre Haute, was selected by the president of the Terre Haute Bar Association, and those two selected Herbert Foltz, architect, Indianapolis, to serve as the third member of the board. These men then regularly organized by electing a chairman, vice-chairman and secretary, set a time for meeting and officially notified both parties to the contract, also the architect, as to their taking oaths to fully hear and determine as arbitrators all matters in difference and dispute arising under the performance of said contract by the parties thereto between the John A. Schumacher Co. and St. Anthony's Hospital as provided for in Clause 45 of said contract between the two parties.

No Attention Paid By Owner

Though twelve separate meetings of the arbitration board were held and evidence taken, St. Anthony's Hospital and the architect steadfastly ignored and refused to recognize the board's summonses.

The Decision of The Board

On the strength of the evidence presented, the board of arbitration has handed down its verdict as follows:

One. That the John A. Schumacher Company and St. Anthony's Hospital did enter into a contract in writing on the 17th day of November,

1921; that said contract is termed "contract documents" and consists of four component parts (A) agreement, (B) General Conditions, (C) Specifications, (D) Plans, and that by the terms and provisions of said contract documents said John A. Schumacher Company did promise and agree to furnish all the labor and material needed and required to erect and construct the South Wing of St. Anthony's Hospital for St. Anthony's Hospital according to the plans and specifications prepared therefor by Jupiter G. Vrydagh, architect, and said St. Anthony's Hospital promised and agreed to pay the sum of One Hundred Seventy-three Thousand, Five Hundred (\$173,500.00) Dollars to the John A. Schumacher Company for the labor and material and subject to deductions for ever to additions for extra and additional work, labor and material and subject to deductions for omissions from said contract and that a surety bond was filed by the John A. Schumacher Company with St. Anthony's Hospital for the full contract price, to-wit: One Hundred, Seventy-three Thousand, Five Hundred (\$173,500.00) Dollars to secure the faithful performance of said contract with Max A. Schumacher and William M. Schumacher as sureties thereon.

Two. That the John A. Schumacher Company entered upon the performance of its said contract with due diligence and dispatch and so continued said building operation up until the time that it was precluded, obstructed and interfered with in the performance of its said contract by and through the conduct of the owner, St. Anthony's Hospital, acting by and through its said architect, Jupiter G. Vrydagh, who did on May 15, 1923, issue to St. Anthony's Hospital a certificate and said St. Anthony's Hospital accepting said architect's certificate of May 15, 1923, adopting and confirming the same as its own, ratifying the acts of its agent and architect, Jupiter G. Vrydagh, therein did notify in writing the said John A. Schumacher Company on May 16, 1923 of its intention within seven days thereafter of cancelling and terminating the contract of the John A. Schumacher Company and that it, St. Anthony's Hospital, would take possession of all the materials, tools and equipment of the said John A. Schumacher Company and proceed to finish and complete said contract with said materials, tools and equipment in any manner that it deemed expedient, which said notice so served, embodying the certificate of said architect, Jupiter G. Vrydagh, is in the words and figures following, to-wit:

Notice Under Article of Contract 37 To Terminate The Employment of The Contractor.

To John A. Schumacher Company:

You are hereby notified that J. G. Vrydagh, architect and superintendent for the south wing, addition to Saint Anthony's Hospital, City of Terre Haute, Indiana, has duly certified in writing under date of May 15, 1923, to said hospital and to Sister Augustine, Superior, concerning your work and conduct under your contract with said addition as follows:

St. Anthony's Hospital,
Sister M. Augustine, Superior,
Terre Haute, Indiana.

This certifies that the Contract John A. Schumacher Company employed by you for and in the erection of the South Wing Addition to St. Anthony's Hospital Building, Terre Haute, Indiana, has repeatedly refused, neglected and failed to supply enough properly skilled workmen and proper materials, has failed to make prompt and proper payments to its subcontractors, has persistently disregarded the instruction of the Architect, has made and is making claims for additions to the contract without authority, has failed and refused to file a schedule of values made out in such form as required by the Architect, has refused to submit statements based upon said schedule in applying for payments, has refused to keep and present in such form as the Architect directed a correct account of the net cost of labor and materials together with the vouchers for the extra work allowed, has not promptly removed, replaced and re-executed his own work which was condemned, has failed and neglected to keep a foreman with authority at all times on the work and satisfactory to the Architect, has failed to give efficient supervision to the work, has failed to submit shop drawings with such promptness as to cause no delay in his own work or in that of any other contractor, has caused a loss to its subcontractors because of the aforesaid neglect, failure and refusal; that sufficient cause has existed and does now exist to justify your action in taking possession of the premises and of all materials, tools and appliances thereon and finish the work by whatever method you may deem expedient and to terminate the employment of the said contractor John A. Schumacher Company after you have given it seven days notice in accordance with the terms of the contract.

J. G. VRYDAGH,

Architect and Superintendent for the South Wing, Addition to St. Anthony's Hospital.

You are further notified that on account of your failure to faithfully keep and perform your part of said contract in the particulars indicated by said certificate and your failure to faithfully keep and perform your part of said contract in many other particulars concerning which said architect has frequently made complaint to you and your officers and agents, and concerning which said architect has, previous to said 15th day of May, made certificate to said hospital, said hospital, without prejudice to any other right or remedy, intends to and will and does at the expiration of seven days from the date of service of this notice terminate the employment of you, John A. Schumacher Company, under said contract as provided for in Article 37 of the General Conditions of said contract, and immediately at the expiration of seven days from the date of service of this notice intends to and will take possession of said building and the premises on which the same is located, and all materials, tools and appliances thereon and finish the work by whatever method said hospital may deem expedient; and upon the completion of said work, said hospital will furnish to you a complete statement of the cost of finishing said work and completing the construction of said addition, and give to you a full account of and concerning all of the tools, materials and appliances taken.

Dated this 16th day of May, 1923.

ST. ANTHONY'S HOSPITAL,

By Sister M. Augustine, Superior, and
(SEAL) President.

Sister M. Roasalia, Secretary.

That following said notice of May 16, 1923, from St. Anthony's Hospital the said John A. Schumacher Company did in writing deny the

truth of each and every one of the charges made in said architect's certificate to St. Anthony's Hospital and appealed to arbitration to settle said differences and dispute as in said contract documents, General Conditions Article 45, provided; that St. Anthony's Hospital did by and through armed men forcibly and against the wishes and over the objections of the John A. Schumacher Company enter upon the premises and did take possession of the materials, tools and equipment of the John A. Schumacher Company and did exclude its workmen therefrom; that the John A. Schumacher Company has willing and had the ability at all times to push the work on said hospital to completion during the arbitration proceedings, but was prevented from so performing said contract by armed men acting for and on behalf of said St. Anthony's Hospital; that said Board does find for the John A. Schumacher Company as against St. Anthony's Hospital upon its charges in said notice of May 16, 1923, which notice incorporates the architect's certificate under date of May 15, 1923, and does further find for the John A. Schumacher Company and against St. Anthony's Hospital upon the charges made by said architect as against the John A. Schumacher Company to St. Anthony's Hospital; that St. Anthony's Hospital without right, authority or legal justification undertook to cancel, rescind and terminate the contract between the John A. Schumacher Company and St. Anthony's Hospital, and that St. Anthony's Hospital did further fail, neglect and refuse to permit the John A. Schumacher Company to push the work to completion during the arbitration proceedings.

Three. The Board finds that there is due and owing to the John A. Schumacher Company from said St. Anthony's Hospital under and by virtue of the terms and provisions of the contract documents and by virtue and reason of the illegal and unwarranted attempt to cancel and rescind said contract as the adjusted balance due on contract and for damages for delay, destruction of property and expense incident to appeal the sum of Sixty-seven thousand, Sixty-six (\$67,066.00) Dollars which said amount is now due and wholly unpaid, an itemized statement of all of which is as follows:

Contract price	\$173,500.00
Damages for delays caused by architect and owner....	2,500.00
Temporary office and tool shed destroyed	25.00
Expenses incurred incident to appeal	7,300.00
	<hr/>
	\$183,325.00
Credits—	
Payments	\$108,029.00
Deducted for work omitted	4,230.00
Carpenter labor necessary to complete building.....	4,000.00
	<hr/>
	\$116,259.00
Balance	\$ 67,066.00

Four. The Board further finds that there is due and owing the said John A. Schumacher Company for and on account of certain extra labor and material furnished at the special instance and request of St. Anthony's Hospital and accepted by it of the reasonable value of Twelve Thousand Four Hundred Eighteen and 90/100 (\$12,418.90) Dollars, which said sum is now due the John A. Schumacher Company and is wholly unpaid.

Five. The Board further finds that the cost and expense of the arbitrators in conducting said arbitration is Two Thousand Twenty-nine and 50/100 (\$2029.50) itemized as follows, to-wit:

Herbert W. Foltz, Fred W. Jungclauss,
W. Robert Paige, arbitrators,
twelve days at \$150.00 per day.....\$1800.00

Arbitration Board's traveling expense and incidentals	127.00
Witness fees: Frank Seamans.....	1.25
Harold L. Davis	1.25
Helen H. Mahley, official stenographer and clerk	100.00

Total\$2029.50

and said Board assesses said costs and charges against St. Anthony's Hospital.

We therefore consider, find, order, adjudge and award that St. Anthony's Hospital shall pay to the said John A. Schumacher Company the sum of Seventy-nine Thousand, Four Hundred Eighty-four and 90/100 (\$79,484.90) Dollars together with the costs of this proceedings amounting to Two Thousand Twenty-nine and 50/100 (\$2029.50) Dollars being a total sum of Eighty-one Thousand Five Hundred Fourteen and 40/100 (\$81,514.40) Dollars.

In Witness Whereof we have hereunto set our hands this 20th day of December, 1923.

BOARD OF ARBITRATION,

Herbert Foltz, Chairman,

Arbitrator appointed by arbitrators.

Fred W. Jungclauss, Vice-chairman.

Arbitrator appointed by John A. Schumacher Company.

W. Robert Paige, Secretary,

Arbitrator appointed by Presiding officer of Terre Haute Bar Association.

Attest: Helen H. Mahley, Witness.

The owner holds to the contention that it had the right to cancel the contract through Clause 37, regardless of the arbitration clause, while the contractor maintains arbitration under Clause 45 was mandatory before the contract could be terminated. The award of the board has been delivered to St. Anthony's Hospital, but no statement has been forthcoming from that institution regarding the decision.

Particular importance attaches to this arbitration proceeding as it is the most extensive and exhaustive one ever indulged in in Indiana as pertains to such procedure as provided for in Clause 45, of the Standard Uniform A. I. A. General Contract Form. These forms have been advocated for quite some time as a means of minimizing building construction misunderstandings and disputes and now that this particular case has been conducted along the lines specified by the Standard Documents, which are being used extensively in Indiana, and a decision reached, any further developments upholding the award or disapproving it will be watched with interest as the final outcome will have a great bearing on the advisability of the use of these standard documents for building construction operations.

The Terre Haute case arbitration board conducted its hearings in regular court order swearing all witnesses and making an official report of all testimony. The attorneys in the case for the John A. Schumacher Co., were Fenton, Steers, Herbst & Klee, Indianapolis and Fitzpatrick & Fitzpatrick, also of Indianapolis.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

Indianapolis, Ind.

HOW ABOUT IT?

Each Party To Controversy Holds He Is Within His Rights.

An interesting point has been brought out at Terre Haute over the St. Anthony's Hospital, arbitration proceedings regarding the rights of the owner and the contractor when both enter into a contract embracing all the forty-five articles contained in the Standard A. I. A. General Contract Form.

In the St. Anthony's case the architect filed charges against the contractor who was dismissed without a hearing, the contract being canceled under Article 37, reading thus:

Art. 37. Owner's Right to Terminate Contract.—If the contractor should be adjudged a bankrupt, or if he should make a general assignment for the benefit of his creditors, or if a receiver should be appointed on account of his insolvency, or if he should, except in cases recited in Article 35, persistently or repeatedly refuse or fail to supply enough properly skilled workmen or proper materials, or if he should fail to make prompt payment to subcontractors or for material or labor, or persistently disregard laws, ordinances or the instructions of the architect, or otherwise be guilty of a substantial violation of any provision of the contract, then the owner, upon the certificate of the architect that sufficient cause exists to justify such action, may, without prejudice to any other right or remedy and after giving the contractor seven days' written notice, terminate the employment of the contractor and take possession of the premises and of all materials, tools and appliances thereon and finish the work by whatever method he may deem expedient. In such case the contractor shall not be entitled to receive any further payment until the work is finished. If the unpaid balance of the contract price shall exceed the expense of finishing the work, including compensation to the architect for his additional services, such excess shall be paid to the contractor. If such expense shall exceed such unpaid balance, the contractor shall pay the difference to the owner. The expense incurred by the owner as herein provided, and the damage incurred through the contractor's default, shall be certified by the architect.

On the other hand, the general contractor holds that before dismissal he had the right to resort to arbitration as provided for in Article 45, which says:

Art. 45. Arbitration.—Subject to the provisions of Article 10, all questions in dispute under this contract shall be submitted to arbitration at the choice of either party to the dispute. The contractor agrees to push the work vigorously during arbitration proceedings.

The demand for arbitration shall be filed in writing with the architect, in the case of an appeal from his decision within ten days of its receipt and in any other case within a reasonable time after cause thereof and in no case later than the time of final payment, except as to questions arising under Article 16. If the architect fails to make a decision within a reasonable time, an appeal to arbitration may be taken as if his decision had been rendered against the party appealing.

No one shall be nominated or act as an arbitrator who is in any way financially interested in this contract or in the business affairs of either the owner, contractor or architect.

The general procedure shall conform to the laws of the state in which the work is to be erected. Unless otherwise provided by such laws, the parties may agree upon one arbitrator; otherwise there shall be three, one named, in writing, by each party to this contract, to the other party and to the architect, and the third chosen by these two arbitrators, or if they fail to select a third within ten days, then he shall be chosen by the presiding officer of the bar association nearest to the location of the work. Should the party demanding arbitration fail to name an arbitrator within ten days of his demand, his right to arbitrate shall lapse. Should the other party fail to choose an arbitrator within said ten days, then such presiding officer shall appoint such arbitrator. Should either party refuse or neglect to supply the arbitrators with any papers or information demanded in writing, the arbitrators are empowered by both parties to proceed ex parte.

The arbitrators shall act with promptness. If there be one arbitrator his decision shall be binding; if three the decision of any two shall be binding. Such decision shall be a condition precedent to any right of legal action, and wherever permitted by law it may be filed in court to carry it into effect.

The arbitrators, if they deem that the case demands it, are authorized to award to the party whose contention is sustained such sums as they shall deem proper for the time, expense and trouble incident to the appeal and, if the ap-

peal was taken without reasonable cause, damages for delay. The arbitrators shall fix their own compensation, unless otherwise provided by agreement, and shall assess the costs and charges of the arbitration upon either or both parties.

The award of the arbitrators must be in writing and, if in writing, it shall not be open to objection on account of the form of the proceedings or the award, unless otherwise provided by the laws of the state in which the work is to be erected.

In the event of such laws providing on any matter covered by this article otherwise than as hereinbefore specified, the method of procedure throughout and the legal effect of the award shall be wholly in accordance with the said state laws, it being intended hereby to lay down a principle of action to be followed, leaving its local application to be adapted to the legal requirements of the place in which the work is to be erected.

TO CONTINUE BUSINESS ALONG HIGH PRINCIPLES OF SERVICE HELD TO BY FOUNDER.

Vincennes Architectural Firm To Perpetuate Spirit Instituted By The Late Mr. Osterhage.

It is with profound sorrow that Osterhage & Sutton, architects and engineers, Vincennes, Ind., announce the death of Mr. Louis H. Osterhage, senior member of the firm, who passed away December 12, 1923.

The death of Mr. Osterhage closes the last chapter in the career of a man who lived an upright, honorable life and gave unselfish service in his relations with his fellowmen and the practice of his profession of architecture. He spread cheerfulness and sunshine with his smile and we who had his friendship and confidence consider ourselves fortunate and better men by reason of our association with him.

The business of Osterhage & Sutton founded on the ideals and principles of Mr. Osterhage will be carried on by Mr. Byron Sutton, junior member of the firm, and Mr. Lester Routt, who has been associated with the business for some years, under the firm name of Sutton & Routt, Architects and Engineers. It will be their earnest aim and desire to give to the clients of the firm the same measure of service as in the past and to carry on the business with the same basic principles which Mr. Osterhage stood for and on which the business was built.

ORGANIZATION AND CURRENT NEWS

EVANSVILLE

Associated Building Contractors

Member State A. B. C.

Geo. L. Miller.....President..

Office, 411 Sycamore St.

WEATHER PLAYS BIG PART IN PUTTING EVANSVILLE BUILDING AFFAIRS IN GOOD SHAPE.

Season's Work Practically Cleaned Up.

The open fall and its continuation of propitious building weather even on up into December has aided the Evansville contractors greatly in carrying their 1923 construction projects well along toward completion. Even the work started late in the fall has progressed nicely to the stage where much of it can be enclosed and only severe cold weather can intervene to interrupt the work.

As a result of the weather conditions, building affairs are in good shape and the contractors are in a fair position to hold their working organizations intact for the early building break that is looked for in the spring. This will mean much to the local building industry which will not be greatly hampered by reorganization efforts next season.

HOUSING SHORTAGE BEING CUT DOWN STEADILY.

Continued Dwelling Building Making Itself Felt.

The residential building movement, steady all season and in good proportion, continues active in Evansville with the prospect for continued action in that direction next season.

Hundreds of new homes were put up in the city the past year and have been completed in time for the owners to enjoy them for the holiday season.

The housing shortage, so keen locally a few years back, has been greatly relieved by the building effort exerted along that line in the last several years and with any kind of favorable conditions holding as they have in the past

1924 should lend greatly to cutting down the shortage.

CHIPS AND SHAVINGS

Work has been started on the interior finish at the new home for Miss Emma Bernardin, Outer Lincoln avenue, by J. Bippus and Son, building contractors. The two cottages being erected for George Durham at Madison avenue and Campbell street are ready for plasterers.

The six new houses being built for the Lincoln Mortgage Company by the Scarborough-Davies Co., on Bellemeade, near Scholz avenue, are practically completed and will be ready for occupancy by January 1.

The M. J. Hoffman Construction Company has completed the general contract for the new addition to the power plant of the Krauss Laundry, 1307 Main street.

It is expected to have revised plans for the new Lodge Avenue school, Green River road and Lodge avenue, completed and ready for bids by January 1.

WILL AVERAGE A MILLION A MONTH.

Over 12 Million Dollars Put Into New Building At Ft. Wayne in 1923.

When the total new building construction work in Ft. Wayne for the year of 1922 mounted to \$9,630,049, a figure never nearly approached before locally, there was much acclaim and great rejoicing. The 1922 building effort was a real performance.

And yet, the end was not yet. The new year came and with it the impetus for another big twelve months period of extensive building endeavor.

Fort Wayne is assured a building record far in excess of \$12,000,000 for 1923.

Just a few days ago the school city took out a building permit for a \$210,000 addition to the James H. Smart School

which sent the December total close up to another "million dollar month" goal even should no more permits be issued before the first of the year.

As figures now stand Ft. Wayne is about 30 per cent ahead of the 1922 record and approximately 162 per cent in advance of the 1921 building total.

ACTIVITY HOLDS STRONG THRU MONTH OF DECEMBER.

Permits Issued For Many And Varied New Structures.

Though right at the threshold of winter and in the midst of that season of the year when building construction inclinations develop a tendency to slow down the trend of things at Ft. Wayne during December developed a contrary streak and building work, instead of falling away, has taken on new life.

All thru the month that marks the passing of the old year the city building inspection department has been called upon to issue more and more permits which when lumped at the end of December should run up a total that will make for one of the best monthly building records of the year and will do much to boost the yearly volume of building.

Many permits have been issued for new residences, several apartments, some commercial buildings, a few factory extensions and some school construction, making a fine wind up for Ft. Wayne's greatest building year.

SOUTH BEND DOES HERSELF PROUD IN 1923 BUILDING EFFORT

Slightly Out in Front of Fort Wayne So Far This Year

While Fort Wayne was rolling up an unheard of local building total for the first eleven months this year her northern Indiana sister city, South Bend, stepped right along, too, at a speedier gait than had heretofore been her wont as far as building endeavor went, with the result that she also has established a new record along the line of construction endeavor. Three two million dollar monthly totals went a long way to boost South Bend, these figures together with three one million dollar months more than equaling the whole twelve months' total in 1922.

South Bend in the eleven months this year issued 5,180 building permits for a total estimated valuation of \$12,990,075, while for the corresponding period a year ago the figures were 4,178 permits of an estimated valuation of \$9,196,696, a gain of 1,002 permits and \$3,794,079, or 41.2 per cent in valuation.

MEETINGS

Executive Committee meets second Tuesday each month.
Painter Contractors meet every Wednesday, 3:00 p. m.
Plasterer Contractors meet every Wednesday noon.
Mason Contractors Association meets every Thursday—1. P. M.
General Contractors meet second Friday each month.

PLANS ON FILE

None this week.

WAIVER OF LIEN

None filed with Recorder of Marion county this week.

SLIGHT EASING UP IN CONSTRUCTION COSTS MAY BE FELT IN 1924

Prices Lately Have Shown a Lower Tendency

There are those men directly connected with the building business in Indianapolis who freely predict that building prices locally may show a slightly lower shade in 1924.

Cement has been reduced ten cents a barrel, lumber will hardly show much change, though it is down now and may increase slightly when the demand grows as dealers begin to replenish their stocks, brick quotations will largely follow the prices of coal and freight rates, which tend downward, and some reductions have been made during the past year in prices of steel.

Speaking of lumber, one prominent local lumber man says: "Prices will be a little under what they were this year. All building construction is not on as strong a basis as it was at the end of 1922. The market with which we will start off building this spring will be somewhat less than it was last spring."

Prices in steel have been pretty well stabilized although there has been a slight reduction in pig iron. Orders being placed now are at generally lower than this year. There was a general reduction the first six months of this year. Price schedules for 1924 have not been announced.

There has been no change in the wholesale price of cement of more than a barrel in the last two years according to a cement dealer and distributor. The change was a drop of ten cents two months ago. He predicted that there would not be a change in the price of cement in the next year unless the prices of coal and labor, which are

large factors in the price of cement, are increased or decreased.

Coal is also a factor in the production of bricks, and the price of coal is reflected in the price of brick. Freight rates are also a factor, according to Indianapolis brick dealers, and the trend of brick prices will depend largely on the way the prices of these two factors go.

As for labor wage scales, this matter has not been gone into as yet, but it is hardly probable that these will reflect any material reductions, as the supply of skilled craftsmen is more or less limited and under an active demand men are hard to get. In some localities the unions have come out openly with advanced demands for next season. It is probable that the 1923 scales will hold over through 1924.

TO NEW LOCATION

Well-Known Indianapolis Roofers Make Change From Old Quarters

After twenty-five years of business at the same original location at 16th and Alabama Sts., Ralph R. Reeder and Sons, roofing and sheet metal contractors, announce their removal to their new office at 24th St. and Cornell Ave., where they have the largest display of tile, slate, asphalt shingles and built-up roofing in the state, a modern shop and warehouse.

WINTER BUILDING PROSPECT PROMISING

Urge Advanced to Take Advantage of Slack Seems to Have Taken Hold.

As the winter season approaches, reports from various sections of the country indicate that although the unparalleled building boom of last winter will likely not be repeated this year, there will be sufficient work under way to keep all of the trades busy. There are still a few property owners who hesitate to begin new work during cold weather, but the information that has been so widely disseminated, calling attention to the fact that under modern methods of construction, building operations can be carried on as effectively during the winter months as in the summer, is beginning to have an effect.

WAR MEMORIAL PLANS UNDERWAY.

Model of Big American Legion Project For Indianapolis to Be Made and Placed on Exhibition.

Problems of detail in connection with the construction of the working models of the Indiana world war memorial plaza development were discussed by the board of trustees of the memorial, at a meeting the past week. Frank R. Walker, Harry E. Weeks and C. C. Stedman, members of the firm of architects, of Cleveland, which is designing the development of the plaza, attended the meeting. Construction blueprints of the two office buildings that are to be built at the north end of the plaza, supplementing the central shrine, also were studied.

The architects said the plans of these buildings can be started at an early date, if the board definitely decides on such action. The board has indicated a desire to start the construction of these buildings as soon as possible.

Models to Be Seen

The architects are perfecting the construction of four models of the plaza and its buildings and landscaping, which will be exhibited in Indianapolis as soon as the details have been worked out to the satisfaction of the firm and the board of memorial trustees.

One model will be of the entire plaza development, built on a scale large enough to give an accurate conception of the project. Another model will present an interior view of the central shrine. A third model will show the inside development of the shrine. It will be built large enough for a person to stand inside and get an idea of lighting effects and details. The fourth model will be of the supplementary buildings. These models are being developed carefully and may not be finished for six months or so.

INDIANAPOLIS BUILDING PERMITS

(From December 20th to December 27th)

Residence: \$8,500, 5133 N. Capitol. Owner, Home Builders' Assn., Lemcke Bldg. Owner builds. Excavating. Frame.

SMASHES RIGHT AND LEFT**1923 Upsets Many Labor Theories.**

One of the outstanding features of the year 1923, now fast closing, for the vast majority of industrial workers is that while it has been a striking one it has almost been a strikeless year.

The period since January 1 has witnessed the paying of probably the highest real wages in history, a condition that has been accompanied by an industrial output that has broken all records in many lines. As a matter of fact, the results attained in 1923, when finally analyzed, digested and comprehended in their true perspective, may force a radical revision of ideas as now cherished by two opposing factions—that of organized labor, on the one hand, and the exponents of the open shop on the other.

It is just possible that the extremist for organized labor, who tells his followers and the rest of the world that all improvements in the conditions under which labor exists and which it enjoys have come solely from the effort put forth by organization, will find 1923 a rather embarrassing obstacle to refute his arguments, for, with wages way up and indications that the nation has enjoyed the largest industrial pay roll, measured by purchasing power, the past year has witnessed a depressed condition in the membership of the labor unions, thousands of members having dropped out.

And, at the same time, the extreme opponent of Labor will find 1923 failing to back him up. Usually such men preach that high wages restrict production and that the labor unions are to blame for the excessive wage rates. However, there are high wage rates, and a relative decline in the importance of the unions as measured by membership, even in the building trades where the opponent of organized labor will find the facts to his liking, there has been no great increase in membership, if any, and in some of the building trades unions there has been a sharp decline. Figures show a slump of 64,000 in all the union building trades membership, according to some experts. The railroad unions also provide some facts that are contrary to generally accepted ironclad theories; the rail workers are among the most thoroughly organized forces in the labor world, but there has not been an increase

in their wages as compared with those of other lines.

The American Federation of Labor, on the basis of its last report, has lost well over a quarter of the membership it had in 1920. The railroad unions, not affiliated with the federation, show signs of lagging in increase of membership. The garment makers' union has been deprived of much of its material for recruitment by the immigrant quota law.

One open shop writer calculates that less than a fifth of the workers in the trades, who it would be feasible to organize, are now enrolled in the unions.

Is it not possible that the immigration laws are largely responsible for the higher wages and the falling off of union membership? With the great influx of potential workers shut off now, men can command more wage and are not so seditious as to union help.

GOES OVER AT LAST**Lake County Tuberculosis Hospital Contracts Awarded.**

After nearly six years of continuous negotiations and preparations, during which more than a half a dozen sets of plans and specifications were revised and discarded, the people of Lake County are finally to have a tuberculosis sanitarium. The contracts were awarded by the county commissioners recently and the successful bidders were:

General contract, Henderlong	
Lumber Co., Crown Point...	\$211,705.28
Heating, ventilating and plumbing, C. H. Maloney & Co., Gary	72,743.94
Wiring, Standard Electric Co., Hammond	16,549.00
Electric fixtures, Tri City Electric Service Co., Hammond	1,957.84
Pipe Covering, Illinois Fireproof Cov. Co., Chicago....	15,089.09
	\$318,145.06

The sanitarium is to be erected on a beautiful site just two miles north of Crown Point, that overlooks the entire surrounding country. Karl D. Norris of East Chicago is the architect.

AIR IS STILL FREE THANK GOODNESS.**Water Rate Boost Dampens Christmas Cheer.**

The city of Hammond and the public utilities handed us a nice Christmas gift in a raise which doubles our water rates. Just wonder if they will charge us extra for the chlorine they put in the water?

ALWAYS SOMEONE TRYING THE SHORT GAME.**Usually Ends This Way.**

If the reports that are in circulation are true, and we have no reason to doubt them, two Chicago contracting firms that

came in here and underbid our local contractors on several large jobs will not have quite as much of the filthy lucre when they leave town as they had when they arrived. They started in to show our contractors that they could erect buildings cheaper than the local fellows could. Perhaps they can, but does it pay?

HAD TO FORSAKE FLORIDA'S BALMY BREEZES.**Building Sounds a Far Cry.**

Our genial colleague, Charles S. Rhoades, who went to Florida for the winter, returned Friday. Too much business compelled him to cut short his vacation and get back on deck. It's a hard life!

YOU TELL 'EM**We Haven't The Time.**

Where can a man buy a cap for his knee?
 Or a key to the lock of his hair?
 Can his eyes be called an academy,
 Because there are pupils there?
 What gems are found in the crown of his head?
 Who travels the bridge of his nose?
 Can he use, when shingling the roof of his house,
 The nails on the end of his toes?
 Can the crook of his elbow be sent to jail?
 If so, what did he do?
 How can he sharpen his shoulder blades,
 I'll be hanged if I know, do you?
 Can he sit in the shade of the palm of his hands?
 Or beat on the drum of his ear?
 Does the calf of his leg eat the corn off his toe?
 If so, why not grow corn on the ear?
 —Building Industry, Cleveland.

CALUMET BUILDING PROGRESS

Architect Mac Turner is preparing plans that will be ready January 1 for a two-story, seven-room, frame dwelling for Joe Thurma of East Hammond.

Charles N. Scott was the low bidder on the Love store and apartment building. Figures on the general contract, not including heating, plumbing, wiring and steel, amounted to \$48,500. The United Boiler, Heating and Foundry Co. of Hammond was awarded the steel contract.

Morris Bros. have the store and flat building on Columbia avenue plastered and will soon be ready to start the interior finish.

While a little late in getting to it, we hope the readers of the Recorder enjoyed a very Merry Christmas and that a Happy and Prosperous New Year is in store for them.

E. E. COLE.

News of the Week

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

**SCHOOL HOUSE
NOTICE TO CONTRACTORS**

Notice is hereby given that William Holland, trustee of Adams School Township, Decatur County, State of Indiana, whose post office address is St. Paul, Indiana, and the Advisory Board of said Township, will until one-thirty o'clock p. m. on Tuesday, January 15th, 1924, receive bids for alterations and additions to the school building at St. Paul in said Township; also for the installation and equipment of same with heating and ventilating system, plumbing and electrical work.

The estimated cost of the general construction is \$24,000.00; of the heating and ventilating system is \$8,000.00; of the plumbing system is \$5,000.00; and of the electrical work, \$1,000.00.

Contractors may bid on the general construction of said building and the equipment of same complete, or on any separate contract. All bids must be sealed. A Certified Check made payable to the order of the above named

trustee in the amount of \$750.00 shall accompany each bid on the whole of said work; in the sum of \$500.00 shall accompany each bid on the general construction, only; in the sum of \$200.00 shall accompany each bid on the heating and ventilating only; in the sum of \$100.00 shall accompany each bid on the plumbing contract; and in the sum of \$50.00 shall accompany each bid on the electrical work only. The proceeds of this check accompanying each bid of the successful bidder shall become the sole property of said Adams School Township in the event that the successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten (10) days after he has been notified that his bid has been accepted. Certified Checks of unsuccessful bidders will be returned to them within five (5) days.

Plans and specifications for all of the above work may be obtained by responsible contractors by applying to H. M. Griffin, Architect, 105 McFarlan Building, Connersville, Indiana. The deposit required for general construction plans and specifications will be \$15.00, and for other plans and specifications will be \$10.00. The above named trustee will have one complete set of plans and specifications on file at his office.

The Trustee and Advisory Board reserve the right to reject any or all bids.

(Signed) WILLIAM HOLLAND,
Trustee of Adams Township, Decatur County, Indiana.

Wickens & Hamilton, Lawyers,
Greensburg, Indiana.

Dec. 29-Jan. 5-12.

STATE HIGHWAY CONSTRUCTION

Sealed bids will be received by the Director of the State Highway Commission, at the office of the State Highway Commissioners in the State House, Indianapolis, Indiana, until 10 a. m. on the 2nd day of January, 1924, for the construction of highways as follows:

1. F. A. No. 21, Sec. B. Louisville Road, Sellersburg to Memphis, Clark county, 6.032 miles.

2. F. A. No. 65, Sec. B. Dixie Bee Line, Princeton to Cunningham's Ferry Road, Gibson county, 5.812 miles.

3. F. A. No. 67, Sec. A. Middlebury-LaGrange Road, LaGrange to Hood Lake, Lagrange county, 8.088 miles.

4. F. A. No. 67, Sec. B. Middlebury-LaGrange Road, Hood Lake to Middlebury, LaGrange and Elkhart counties, 8.779 miles.

5. F. A. No. 74, Sec. A. Lafayette Pike, Lebanon to Thorntown, Boone county, 7.736 miles.

6. F. A. No. 74, Sec. B. Lafayette Pike, Thorntown to Colfax, Boone and Clinton counties, 5.743 miles.

7. F. A. No. 74, Sec. C. Lafayette Pike, Colfax to Stockwell, Clinton and Tippecanoe counties, 8.639 miles.

8. F. A. No. 74, Sec. D. Lafayette Pike, Stockwell to Jackson Highway, Tippecanoe county, 8.095 miles.

Bids will be received for three types of pavement: Brick, bituminous concrete and concrete.

Cement for the above listed projects will be furnished the contractor by the Indiana State Highway Commission.

Letting of January 2, 1924:

9. F. A. No. 68, Sec. A. Lyford-Veedersburg Road, Lyford to Harmony Church, Parke county, 6.894 miles.

10. F. A. No. 68, Sec. B. Lyford-Veedersburg Road, Harmony Church to Bloomingdale, Parke county, 9.698 miles.

11. F. A. No. 68, Sec. C. Lyford-Veedersburg Road, Bloomingdale to Fountain county line, Parke county, 8.176 miles.

Bids will be received for grading and structures under twenty foot span on the above listed projects as shown on plans and described in standard specifications for same.

Contractor will furnish necessary cement for Projects Nos. 9 to 11 listed above.
